NEW QUESTION: 1

FortiWeb offers the same load balancing algorithms as FortiGate.

Which two Layer 7 switch methods does FortiWeb also offer? (Choose two.)

- A. Round robin
- B. HTTP session-based round robin
- C. HTTP user-based round robin
- D. HTTP content routes

Answer: A,D (LEAVE A REPLY)

NEW QUESTION: 2

What key factor must be considered when setting brute force rate limiting and blocking?

- A. Multiple clients from geographically diverse locations
- B. Multiple clients connecting to multiple resources
- C. Multiple clients sharing a single Internet connection
- D. A single client contacting multiple resources

Answer: B (LEAVE A REPLY)

NEW QUESTION: 3

In which scenario might you want to use the compression feature on FortiWeb?

- A. When you are serving many corporate road warriors using 4G tablets and phones
- B. When you are offering a music streaming service
- C. When you want to reduce buffering of video streams
- D. Never, since most traffic today is already highly compressed

Answer: (SHOW ANSWER)

FortiWeb might expend resources compressing responses that have already been compressed by the server.

NEW QUESTION: 4

Which would be a reason to implement HTTP rewriting?

- A. The original page has moved to a new URL
- B. To replace a vulnerable function in the requested URL
- C. To send the request to secure channel
- D. The original page has moved to a new IP address

Answer: ([SHOW ANSWER](#))

Create a new URL rewriting rule.

NEW QUESTION: 5

When is it possible to use a self-signed certificate, rather than one purchased from a commercial certificate authority?

- A. If you are a small business or home office
- B. If you are an enterprise whose employees use only mobile devices
- C. If you are an enterprise whose resources do not need security
- D. If you are an enterprise whose computers all trust your active directory or other CA server

Answer: C ([LEAVE A REPLY](#))

This can include SSL/TLS certificates, code signing certificates, and S/MIME certificates. The reason why they're considered different from traditional certificate-authority signed certificates is that they're created, issued, and signed by the company or developer who is responsible for the website or software being signed. This is why self-signed certificates are considered unsafe for public-facing websites and applications.

NEW QUESTION: 6

A client is trying to start a session from a page that would normally be accessible only after the client has logged in.

When a start page rule detects the invalid session access, what can FortiWeb do? (Choose three.)

- A. Allow the page access, but log the violation
- B. Display an access policy message, then allow the client to continue
- C. Prompt the client to authenticate
- D. Redirect the client to the login page
- E. Reply with a 403 Forbidden HTTP error

Answer: A,D,E ([LEAVE A REPLY](#))

NEW QUESTION: 7

Which algorithm is used to build mathematical models for bot detection?

- A. HCM

- B. SVN
- C. SVM
- D. HMM

Answer: (SHOW ANSWER)

FortiWeb uses SVM (Support Vector Machine) algorithm to build up the bot detection model

NEW QUESTION: 8

Which regex expression is the correct format for redirecting the URL http://www.example.com?

- A. www\.example\.com
- B. www.example.com
- C. www\example\com
- D. www/.example/.com

Answer: (SHOW ANSWER)

\1://www.company.com\2\3

NEW QUESTION: 9

Refer to the exhibits.

Name: server-pool1
 Protocol: HTTP
 Type: Reverse Proxy
 Single Server/Server Balance: Server Balance
 Server Health Check: availability-check1
 Load Balancing Algorithm: Round Robin
 Persistence: session-persistence-cookie1
 Comments: 0/199 (bytes)

+ Create New Edit Delete

ID	IP/Domain	Status	Port	HTTP/2	Inherit Health Check	Server Health Check	Backup Server	SSL
1	10.0.1.21	Enable	80	Disable	Yes		Disable	Disable
2	10.0.1.22	Enable	80	Disable	Yes		Disable	Disable

Edit Virtual Server	
Name	<input type="text" value="vserver1"/>
Use Interface IP	<input type="checkbox"/>
IPv4 Address	<input type="text" value="10.0.1.8/255.255.255.0"/>
IPv6 Address	<input "::="" 0"="" type="text" value=""/>
Interface	<input type="text" value="port1"/>

FortiWeb is configured in reverse proxy mode and it is deployed downstream to FortiGate. Based on the configuration shown in the exhibits, which of the following statements is true?

- A. You must disable the Preserve Client IP setting on FortiGate for this configuration to work.
- B. The configuration is incorrect. FortiWeb should always be located upstream to FortiGate.
- C. FortiGate should forward web traffic to virtual server IP address.
- D. FortiGate should forward web traffic to the server pool IP addresses.

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 10

When FortiWeb triggers a redirect action, which two HTTP codes does it send to the client to inform the browser of the new URL? (Choose two.)

- A. 404
- B. 302
- C. 403
- D. 301

Answer: B,D ([LEAVE A REPLY](#))
