NEW QUESTION: 1
by the security gateway device displa ipsec sa command displays the following order information, the information is understood by _____ .
Interface: Serial0/2/1
path MTU: 1500
========== ====

IPsec polic name: "1"
sequence number: 1
mode: isakmp
---
connection id: 5
encapsulation mode: transport
perfect forward secrec: None
tunnel:
local address: 10.2.1.1
remote address: 10.2.1.2
Flow:
sour addr: 10.1.1.0/255.255.255.0 port: 0 protocol: IP
dest addr: 10.3.1.0/255.255.255.0 port: 0 protocol: IP
[inbound ESP SAs]
spi: 909448761 (0x36351639)
proposal: ESP-ENCRPT-DES ESP-AUTH-MD5
sa remaining ke duration (btes/sec) : 1887435204/83
max received sequence-number: 19
udp encapsulation used for nat traversal: N
[outbound ESP SAs]

spi: 1583842120 (0x5e678348)
proposal: ESP-ENCRPT-DES ESP- AUTH-MD5
sa remaining ke duration (btes/sec) : 1887435204/83
max sent sequence-number: 20
udp encapsulation used for nat traversal: N
A. This security policy IKE dynamic state of a negotiated key , the SPI , security protocols and algorithm parameters
B. This security policy does not enable the NAT traversal function of IPSec/IKE
C. This security policy uses the ESP+AH encapsulation protocol
D. This security policy works in tunnel mode
Answer: (SHOW ANSWER)

NEW QUESTION: 2
Use the displa ike peer command to display the following information on the device, and you can know ____ through this information .
IKE Peer: 123
exchange mode: aggressive on phase 1
pre-shared-ke simple 123
peer id tpe: na me
peer ip address: 10.2.1.1
local ip address:
peer name: aaa
nat traversal: enable
dpd:
A. In IKE negotiation to negotiation mode in phase aggressive mode
B. IKE NAT traversal function is not enabled
C. The name of the peer security gateway during IKE negotiation is aaa
D. During the negotiation of the first phase of IKE , the initiator sends its own IP address to the peer to identify its identity
Answer: (SHOW ANSWER)

NEW QUESTION: 3
A VoIP network using the H.323 protocol is interconnected with the PSTN network.Which of the following components must be included in the VoIP network to ensure that users can make local calls from the VoIP network
A. Shou
B. terminating end
C. MCU
D. net off
Answer: (SHOW ANSWER)

NEW QUESTION: 4
To clear the secure tunnel established by ike , which of the following commands should be used ?
A. reset ipsec sa
B. reset ike sa
C. reset ike tunnel
D. reset ike
Answer: (SHOW ANSWER)

NEW QUESTION: 5
In VoIP networks, the bandwidth saved by VAD technology is related to which of the following factors ?
A. selected encoding type used
B. mesh network congestion degree
C. said language and characteristics of the speaker
D. selected by signaling type
Answer: (SHOW ANSWER)

NEW QUESTION: 6
How does the PPP protocol identify the upper layer packets it carries as MPLS packets ?
A. In the PPP head of the PPP Protocol field word segment to fill in 8847
B. In the PPP Association meeting NCP negotiation is completed the peer negotiation phase
C. In the PPP head of the PPP Protocol field word segment to fill in 0281
D. In the PPP Association meeting LCP negotiation is completed the peer negotiation phase
Answer: (SHOW ANSWER)

NEW QUESTION: 7
On a router perform row displa'interface tunnel explicit shown GRE tunnel interface as follows :
<Router>displa interface Tunnel 0
Tunnelo current statle: UP
Line protocol current state: UP
Description: Tunnel 0 Interface
T he Maximum transmit Unit is 1476
Internet Addess is 192.1.1.1/24 Primar.
Encapsulation isTUNNELT aggregation ID not- et
Tunnel source l0.1.11.1 destination 10.1.13.1
Tunnel keeepalive enable Period (10 s) , Retries (3)
Tunnel protocol/transport GRE/IP.
GRE key disable
Checksumming of GRE packets disabled
Last 300 seconds input:.0 btes/secl 0 packet/sec.
Last 300 seconds output:..0 bytes/sec , 0 packets/sec.

4 packets input 72bytes.
0 input error
1 packets output , 24 btes
0 0utput error
From the above information, we can know ____ .(Choose one or more)
A. The Keepalive function is enabled on the Tunnel interface .Once the router fails to receive the Keeplive packets from the other party within 30s , the tunnel is considered unavailable
B. The tunnel interface is in the UP state, and the MTU is 1467 bytes
C. tunnel channel source IP address of 10.1.11.1
D. tunnel track start validation, verification does not start
Answer: (SHOW ANSWER)

NEW QUESTION: 8
If the user configures the packet filtering strategy incorrectly and filters all TCP packets, what happens to the call in the H.323 network ?
A. that a call will be discontinued in RAS stage
B. Does not affect calls between terminals
C. that a call will be discontinued in Q .Stage 931
D. that a call will be discontinued in H.245 stage
Answer: (SHOW ANSWER)

NEW QUESTION: 9
The VPI/VCI parameters of ADSL connection are negotiated and determined in ____ .
A. PPPoE negotiation
B. Line Road activate
C. Jian Li low-level link VCC
D. DMT modulation
Answer: (SHOW ANSWER)

NEW QUESTION: 10
In the GRE encapsulation of IP over IP, IP uses the protocol number ____ to mark the GRE header.
A. 47
Answer: (SHOW ANSWER)

NEW QUESTION: 11
The following information about H.323 describes terminal of the error is ____ .
A. P through PSTN telephone is a standard H.323 terminal
B. P pass H.323 terminals may not support the video feature
C. & Poor pass H.323 terminal may not support fax functionality
D. even connected to the PSTN telephone network fax machine is a standard H.323 terminal equipment

Answer: (SHOW ANSWER)

NEW QUESTION: 12
Which of the following descriptions about H.323 terminals are correct?
A. even connected to the PSTN telephone network fax machine is a standard H.323 terminal equipment
B. P through PST telephone is a standard H.323 terminal
C. & Poor pass H.323 terminal may not support fax functionality
D. P pass H.323 terminals may not support the video feature
Answer: (SHOW ANSWER)

NEW QUESTION: 13
During the SIP UA calling the called party through the proxy server,
A. In addition to the external location request message, the main called UA other messages do not need to be forwarded through a proxy server
B. to the not right
C. behalf of the proxy server to help get the called UA after position, calling UA directly to the called UA initiates a call
D. Lord called UA all messages are forwarded through a proxy server
Answer: (SHOW ANSWER)

NEW QUESTION: 14
In the basic configuration of L2TP in independent LAC mode , the description of the name of the local end of the tunnel is correct.
A. In the L2TP group view, use the Tunnel name name command to configure the local tunnel name
B. In the system view, use the Tunnel-name name command to configure the local tunnel name
C. default case considered, the name of a tunnel for the name of the system
D. default case considered, the name of a tunnel is empty
Answer: (SHOW ANSWER)

NEW QUESTION: 15
Which of the following codes has the lowest bandwidth requirement?
A. G.711
B. G.726
C. G.723
D. G.729
Answer: C (LEAVE A REPLY)

NEW QUESTION: 16
What is correct about DOS attacks is ____ .

A. on to DOS attacks can be controlled by configure access lists on a network device to defense
B. on to DOS attacks in the TCP FLOOD attack, you can use TCP proxy mechanism to defense
C. DOS attacks are aimed at reducing the ability of the attacked system to provide services
D. for at DOS attack in the FTP FLOOD attack can be taken to limit the number of connections per second to defense
Answer: (SHOW ANSWER)

Valid GB0-391 Dumps shared by EduDump.com for Helping Passing GB0-391 Exam! NEW QUESTION: 17
When SIP-UA calls the called party through the proxy server, ____ .
A. Lord called UA All messages are forwarded through a proxy server
B. to the not right
C. In this environment, the called UA response message is sent instead of the main junction proxy called UA
D. In addition to the external location request message, the calling UA other messages need not be forwarded through a proxy server
Answer: (SHOW ANSWER)

NEW QUESTION: 18
In the H.323 call flow, if two terminals registered to the same gatekeeper use the direct call mode, then
A. H.245 capability negotiation is completed directly between two terminals
B. to the answers are right
C. Messages such as ARQ and ACF are directly exchanged between the two terminals
D. Messages such as Setup and Connect are directly exchanged between the two terminals
Answer: (SHOW ANSWER)

NEW QUESTION: 19
The four routers R1 , R2 , R3, and R4 are connected in sequence, and Loopback0 interfaces are created on R1 and R4 , and the interface addresses are 1.1.1.1 and 4.4.4.4 respectively.The four devices are configured with dynamic routing protocols to ensure Loopback0 of R1 and R4 .The address is reachable, and a GRE Tunnel is established between R1 and R4 .Check the tunnel interface information on R1 as follows:

[R1]displa interface Tunnel 0
Tunnelo current state: UP
Line protocol cu rrent state: UP
Description: Tunnelo Interface
The Maximum Transmit Unit is 1476
Internet Address is 10.0.0.1/30 Primar
Encapsulation is TUNNEL , aggregation ID not set
Tunnel source l.1.1.1 , destination 4.4.4.4
Tunnel keepalive disable
Tunnel protocol/transp ort GRE/IP
GRE ke disabled
Checksumming of GRE packets disabled
Last 300 seconds input: 2 btes/sec , 0 packets/sec
Last 300 seconds output: 2 btes/sec , 0 packets/sec
15 packets input , 840 btes
0 input error
27 packets output , 1248 btes
0 0utput error
At this time, if the link between R2 and R3 is interrupted , the following statement is correct.
A. The source IP of the Tunnel interface of R4 is 1.1.1.1 , and the destination IP is 4.4.4.4
B. The status of the Tunnel interface on R1 is Down
C. RI on Tunnel interface remains UP state
D. The IP address of the Tunnel interface of R4 should be 10.0.0.2.
Answer: (SHOW ANSWER)

NEW QUESTION: 20
In BGP MPLS VPN network, the user's private network packet can only carry a layer MPLS label, the private network packet which may be present in the following packet forwarding stage ?
freecram.net
A. newspaper article by the public penultimate hop P distributed to the public network equipment last a jump PE when the device
B. message packet from the source user side CE sent to the public network port PE device when
C. message packets from the public network egress PE sent to the user-side object of the CE device when
D. message packets from the public network entry PE sent to the P device when
Answer: (SHOW ANSWER)

NEW QUESTION: 21
In the L2TP networking, there are three ways for LNS to authenticate users: proxy authentication, mandatory CHAP authentication and LCP renegotiation.The highest priority is ____ .
A. All the same
B. LCP renegotiation

C. on behalf of the agent authentication
D. Strong system CHAP authentication
Answer: B (LEAVE A REPLY)

NEW QUESTION: 22
The configuration commands on the MSR router are as follows:
acl number 2001
rule 0 permit source 192.168.2.0 0.0.0.2
acl number 2002
rule 0 permit source 192.168.3.0 0.0.0.2
acl number 2003
rule 0 permit source 192.168.0.0 0.0.0.2
#
traffic classifier 2 operator or
if-match acl 2001
if-match acl 2002
if-match acl 2003
#
traffic behavior 2
filter den
#
qos polic 2
classifier 2 behavior 2
#
interface GigabitEthernet0/1
port link-mode route
ip address 192.168.1.1 255.255.255.0
qos appl polic 2 outbound
Then when the source address are 192.168.2.2 , 192.168.3.2.1 , 92.168.0.2 the packets from the port G0 / 1 forwarding outwardly, the following statement is correct _____
A. 1 Packets with a source address of 92.168.0.2 are forwarded normally
B. three message by the flow are blocked
C. Packets with the source address of 192.168.2.2 are forwarded normally
D. Forwarding of packets whose source address is 192.168.2.2 is blocked
Answer: (SHOW ANSWER)

NEW QUESTION: 23
Which of the following command to check MPLS LDP 's Session whether to establish complete ?
A. displa mpls ldp
B. displa mpls ldp session
C. displa mpls ldp lsp

Answer: (SHOW ANSWER)

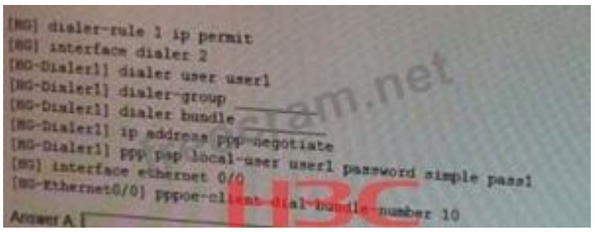

NEW QUESTION: 24
How do you view PE device learns to BGP private network routes _____ .
A. displa bgp vpnv4 all routing-table
B. displa bgp routing-table
C. displa bgp vpnv4 routing-table
D. displa mp-bgp r outing-table
Answer: (SHOW ANSWER)

NEW QUESTION: 25
The following commands are configured on an interface of the router:
qos car inbound an cir 1000 cbs 62500 ebs 0 green remark-dscp-pass ef red remark-dscp-continue af13
When the port receives packets, the following statement is correct _____
A. When the received message rate is less than 1000kbps , the message will be forwarded normally without any processing
B. When the received packet rate is less than 1000kbps , the packet DSCP value is marked as EF and then forwarded
C. When the received message is greater than the rate of 1000kbps , the burst can be 62500 bytes than 1000kbps packets DSCP value is marked as AF13 , straight forward next CAR policy processing
D. When the received message rate is less than 1000kbps , after the DSCP value of the message is marked as EF , it is forwarded to the next CAR policy for processing and forwarding
E. When the received message rate is less than 1000kbps , it can burst 62500 bytes, and the DSCP value of the message exceeding 1000kbps is marked as af13 and forwarded directly
Answer: (SHOW ANSWER)

NEW QUESTION: 26
M In BGP MPLS VPN on a network station of the public network equipment, displa mpls ldp lsp command command checks its label forwarding table, the following results described _____ .
[PE1] dis mpls ldp lsp
LDP LSP Information
---------- ---------- ----------
SN DestAddres s/Mask In/OutLabel Next-Hop In/Out-Interface
---------- ---------- ----------
1 1.1.1.1/32 3/NULL 127.0.0.1 Eth0/0/InLoop0
2 1.1.1.2/32 NULL/1024 100.0.0.2 ---------Eth0/0
3 1.1.1.3/32 NULL/3 100.0.0.2 ---------Eth0 /0
A. 1.1.1.3/32 is the interface address of the public network device directly connected to PE1 , so the output label is 3

B. 1.1.1.3/32 is the local interface address of PE1 , all outgoing labels are NULL and outgoing labels are 3.
C. 1.1.1.3/32 is the interface address of the public network device directly connected to PE1 , so the output label is 1024
D. 1.1.1.3/32 is the local interface address of PE1 , all outgoing labels are NULL , and incoming labels are 3.
Answer: (SHOW ANSWER)

NEW QUESTION: 27
Please add the correct parameters in the following PPPoE CIlent configuration:

Answer:
110

NEW QUESTION: 28
A PBX of a company in Beijing was originally connected to the operator's telephone network through an analog line.In order to expand the capacity, it was proposed to apply for a digital line from the operator . _____ is the most economical choice.
A. ATM
B. E&M
C. T1
D. E1
Answer: (SHOW ANSWER)

NEW QUESTION: 29
The information displayed on the MSR router is as follows:
Sstem Defined Behavior Information:
Behavior: ef
Expedited Forwarding:
Bandwidth 20 (%) Cbs-ratio 25
Behavior: af
Assured Forwarding:
Bandwidth 20 (%)
Discard Method: Tail
Behavior: be
-none-
Then the following statement is correct _____

A. significant information is shown the behavior of the system defined
B. which is defined in the EF queue and AF queues, bandwidth is reserved bandwidth occupied respectively 20%
C. use can change the percentage of the bandwidth occupied by the queue user behavior
D. explicit information indicating the behavior of a user-defined
Answer: (SHOW ANSWER)

NEW QUESTION: 30
The ZLB (Zero-Length Bod) message is a control message with only an L2TP header, and its function is to serve as an explicit response to ensure reliable delivery of the control message.
In the following four cases, LNS does not send ZLB message to LAC as a response: ____ .
Freecram.net
A. After the LNS receives the Hello control message sent by the LAC
B. After LNs receive the ICCN (Incoming-Call-Connectea , call connected) message sent by LAC
C. LNS receives StopCCN (scop-Control-Connection-Notiflcation) sent by LAC ; after the message
D. the LNS received LAC transmit the CDN (Call-Disconnect- Notif , call disconnection notification) after the message
Answer: (SHOW ANSWER)

NEW QUESTION: 31
The following information about the AH (the Authentication Header , Authentication Header) and the ESP (Encapsulating Securlt Paload , the Encapsulating Security Payload) described right there _____ .(Choose one or more)
A. two who can be used at the same time
B. two who can provide confidentiality protection
C. two who can provide data integrity protection
D. two who can provide data origin authentication and optional anti-replay service
Answer: (SHOW ANSWER)

NEW QUESTION: 32
RD is Route Distinguisher , and the correct description about it is _____ .

A. is not the same PE identical device on the VPN of RD must have the same, or they will not communicate
B. not with PE on different devices the VPN of RD may be configured the same, in principle there are no conflicts
C. with a PE different from the VPN the RD not have the same
Answer: (SHOW ANSWER)

NEW QUESTION: 33
When SIP UA calls the called party through the redirect server, ____ .
A. heavy directional server to help eligible post called UA rear position, the main port called UA directly to the called UA initiates a call
B. Lord called UA All messages are forwarded by redirecting server
C. to the not right
D. In addition to the external location request message, a calling LA other messages do not need to be forwarded by the redirection server
Answer: (SHOW ANSWER)

NEW QUESTION: 34
XZ company requires to build its network based on the modular enterprise network architecture. Z company in Shenzhen and Xi'an each 1 R & D base ; save Beijing and Shanghai have an office building ; save 23 provincial capital cities with more than 50 people in the office ; the 200 has no more than smaller cities 8 small office person ; At any given time, there are usually more than 200 marketing and technical personnel on business trips, and some of them are often located in areas lacking Internet access and can only dial in to the headquarters through the telephone network.Due to environmental and cost issues, some offices cannot access the headquarters through dedicated lines or packet-switched wide area network connections.According to these circumstances, the network module that Z company should have is _____ .
A. Dial Number Access
B. VPN access
C. An all-authentication
D. large type branch network
Answer: (SHOW ANSWER)

NEW QUESTION: 35
After the MPLS LDP protocol Session is successfully established, its state remains in the _____ state.
A. Operational
B. Opensent
C. Full
D. Establish
Answer: A (LEAVE A REPLY)

NEW QUESTION: 36
In the ONU registration process, comprising L the LID (the Logical Link ID , Logical Link Flags) control message comprises information ____ .(Choose one or more)
A. Report
B. P through GATE
C. Register_Req
D. Register
E. Register Ack
F. hair now GATE
Answer: (SHOW ANSWER)

NEW QUESTION: 37
Best-Effort model has the following features ?
A. pass through queues implemented
B. District Do not treat different types of business
C. the number of broadband data streams, delay, jitter and packet loss controllable
D. reality now simple.Save processing resources and fast processing speed
Answer: (SHOW ANSWER)

NEW QUESTION: 38
When the user uses the phone, after picking up the phone handle and inputting the called number, what kind of signaling does the ring back from the receiver belong to _____ .
A. to address signaling
B. monitoring tube signaling
C. Call call signaling
D. letter information signaling
Answer: (SHOW ANSWER)

NEW QUESTION: 39
Which statement about LR is correct?
A. Not valid for non- IP packets
B. bits at the link layer, all packets outgoing from the interface can take effect (critical packets except packets)
C. so that the flow rate is measured using the token bucket algorithm, would exceed the committed rate of packets into the queue buffer again, it reduces the overall packet loss rate, smooth traffic, introduces additional delay.
D. It is an active traffic adjustment measure that limits the total rate of packets sent downstream from an interface
Answer: (SHOW ANSWER)

NEW QUESTION: 40

The following commands are configured on the MSR router:
acl number 3000
rule o permit ip source 100.0.10
acl number 3002
rule o permit ip source 100.0.0.0.0.0.255
interface GigabitEthemeto/1
port link -mode-route
jp.address 200.0.0.1255.255.255.0
qos gts acl 3002 cir 200 cbs 12500 ebs o queue-length50
qos gts acl 3000cir 100 cbs 6250 ebs o queue-length50
Then when the port G0/1 forwards packets with the source IP address of 100.0.0.1 in the outbound direction , which of the following statements is correct (choose one or more)

Freecram.net

A. the flow amount is less than 100kbps forwarded when
B. flow is greater than 100bkps , less than 200kbps , the normal forwarding
C. flow greater than 100kbps , the less than 200kbps instant message shaping to 100kbps forwarded
D. portions partial misconfigured
E. stream is greater than 200kbps , the packet shaping to 200kbps forwarded
F. stream is greater than 200kbps , the packet shaping to 100kbps forwarded
Answer: A,B,E (LEAVE A REPLY)

NEW QUESTION: 41

In the BGP MPLS VPN network, which of the following functions need to be supported by the P device ?
A. Road multiple instances of the protocol
B. MP -BGP
C. MPLS
D. MPLS LDP
Answer: (SHOW ANSWER)

NEW QUESTION: 42

Which statement about RED (Random Early Detection) is correct?
A. In discarded after a congested port
B. flat average queue length is less than the minimum discard threshold, discarding packets not
C. flat average queue length is less than the minimum discard threshold, less than the maximum discard threshold, packets are dropped randomly
D. The higher the priority of the packet , the lower the drop probability.Which means less discarded
E. flat average queue length is greater than the maximum discard threshold, packets are dropped randomly
Answer: (SHOW ANSWER)

NEW QUESTION: 43
The following statement about RED (Random Early Detection) is incorrect.
A. flat average queue length is greater than the maximum discard threshold, packets are dropped randomly
B. flat average queue length is less than the minimum discard threshold, less than the maximum discard threshold, packets are dropped randomly
C. The higher the priority of the packet , the lower the drop probability.Which means less discarded
D. flat average queue length is less than the minimum discard threshold, discarding packets not
E. In discarded after a congested port
Answer: A,C,E (LEAVE A REPLY)

NEW QUESTION: 44
Configure the following commands in the MSR router:
dis qos wfq interface GigabitEthernet0/1
Get the following message:
interface GigabitEthernet0/1
Output queue (Urgabit queuing Size /discards): 0/100/0
Output queue (Urgabit queuing Size /discards): 0/100/0
Output queue (weighted fair queuing Size/length /discards): 1023/1024/52719
Hashed b DSCP
Hashed queues1/2/64(Active/max active/total)
Then what is incorrect in the following statement is _____
A. end port using the WFQ queues, the weight type is IP type
B. calendar history activated off the maximum number of queues is 2
C. team column the maximum length of 1024.The current data congestion and packet loss
D. When the number of queues is active before 2
E. end port using the WFQ queues, the weight type DSCP
Answer: (SHOW ANSWER)

NEW QUESTION: 45
According to different operating modes, VPN can be divided into the following types____ .
A. Internet VPN
B. Network-Based VPN
C. Intranet VPN
D. CPE-Based VPN
Answer: (SHOW ANSWER)

NEW QUESTION: 46
The changes of MP-BGP protocol relative to BGP protocol include
A. The new increase MP REACH NLRI attribute

B. new growth VPNv4 address family
C. The new increase Extended Communities attribute
D. The new increase MP UNREACH NLRI attribute
Answer: (SHOW ANSWER)

From the interface G0 / 0 into the only access port G0 / 1 forwarding traffic directed include the destination port, respectively 1000 , 1001 , 1002 and 1003 of the TCP packet flow rates of 3Mbps , other background traffic 4Mbps , other interfaces no flow, then the following claims The incorrect one is _____ (choose one or more)
A. Head of port 1000 of TCP packet forwarding rate of 3Mbps
B. Head of port 1001 of TCP packet forwarding rate of 3Mbps
C. Head of the port 1002 of TCP packet forwarding rate of 3Mbps
D. back background traffic packets into the Bottom queue, forward speed of about 0.5Mbps
E. Head of port 1003 of TCP packet forwarding rate of 1Mbps
Answer: C,D,E (LEAVE A REPLY)

NEW QUESTION: 48

use IKE is IPSec provides auto-negotiation key exchange and create SA during the service, in the IKE defines which of the first stage of consultation kinds of IKE exchange mode ?

A. Main Mode (the Main Mode)

B. channel information exchange mode (Informational the Exchange Mode)

C. Fast speed mode (New Group Mode)

D. Wild Man mode (Aggressive Mode)

Answer: (SHOW ANSWER)

NEW QUESTION: 49

Which statement about WFQ is correct?

A. feature set WFQ function can be arranged as required command in system view QoS wfq dscp queue-length 64 queue -number 64

B. can use WRED congestion avoidance control

C. phase only according to the same group of different DSCP priority assigned different queues

D. phase only according to the same group of different IP priorities are assigned different queues

E. with the same group only depending on the IP precedence or DSCP different priority queues assigned

Answer: (SHOW ANSWER)

NEW QUESTION: 50

The following are functions of the access layer. (Choose one or more)

A. owns a large number of interfaces, and for the final connected user computer

B. access into the security control

C. High -speed packet-switched

D. complex routing strategies complicated

Answer: (SHOW ANSWER)

NEW QUESTION: 51

The following statements about PKI workflow are correct.

A. solid body identity reviewed by RA completed

B. Certificate book by the CA issued

C. permit book application made by the entity

D. solid body needs to revoke the certificate RA application

Answer: A,B,C (LEAVE A REPLY)

NEW QUESTION: 52

Among the control messages defined by the MPCP protocol, the one sent by the ONU is

A. Reporter ALXK

B. Reporter

C. Reporter Req

D. Report

E. GATE
Answer: (SHOW ANSWER)

NEW QUESTION: 53
A company network through the corporate router RTA access port S0 / 0 is connected to the external network.In order to avoid congestion at the egress of the external network, the company hopes to limit the data traffic of various departments in the inbound direction of the RTA interface S0/0 .Which of the following technologies is appropriate ?
A. GTS
B. WRR
C. LR
D. CAR
Answer: (SHOW ANSWER)

NEW QUESTION: 54
About CBQ said correct method _____
A. It is a congestion management technology implemented by QoS strategy
B. package contains .1 th BQ , for supporting the AF service, broadband guaranteed queue and controllable delay
C. package contains .1 th the LLQ , to support EF traffic, is transmitted absolute priority, guaranteed latency
D. packet contains .1 th default queue for supporting the BE service, using the WFQ queue scheduling
Answer: (SHOW ANSWER)

NEW QUESTION: 55
For the label forwarding table of an LSR , the correct description is _____ .
A. with a label forwarding entry Incoming label and outgoing label can not be the same
B. with a label forwarding entry into the outgoing label and tag values are always the same
C. may be present in the same label value two label forwarding entry
D. can be present label value into two identical label forwarding entry
Answer: (SHOW ANSWER)

NEW QUESTION: 56
The advantages of the star-level network model include _____ (choose one or more)
A. by strong network scalability
B. drop low-end delay
C. will be to maintain the network of
D. provide high network throughput
Answer: (SHOW ANSWER)

NEW QUESTION: 57
In the SIP network, which of the following devices belong to UA?
A. language voice gateway
B. SIP server
C. connected to a common voice on the gateway PSTN phone
D. IP phone
Answer: (SHOW ANSWER)

NEW QUESTION: 58
Which of the following access methods does SSL VPN provide ?
A. UDP access method
B. TCP access method
C. IP access method
D. WEB access method
Answer: (SHOW ANSWER)

NEW QUESTION: 59
The following options belong to the co- side equipment is ____ .
A. access into the switch
B. machine top box
C. DSLAM
D. access the server
E. cable modem
Answer: A,C,D (LEAVE A REPLY)

NEW QUESTION: 60
What is incorrect about the description of L2TP VPN and SSL VPN?
A. have no need to install, maintain client
B. All support IP access mode
C. are based on TCP package
D. Both support Web access
Answer: (SHOW ANSWER)

NEW QUESTION: 61
Configure the following commands on the MSR router:
qos pql 1 protocol-ip-tcp1000 queue-top
qos pql 1 protocol-ip-tcp1001 queue-middle
qos pql 1 protocol-ip-tcp1002queue-normal
qos pql 1 protocol-ip-tcp1003 queue-bottom
#
interface GigabitEthernet0/1

port link-mode route
ip address 192.168.1.1 255.255.255.0
qos lr outbound cir 10000 cbs 625000 ebs 0
qos pq pql 1
qos rtpq start-port 16384 end-port 32767 bandwidth 1000 cbs 25000
Then when the destination port are 1000 , 1001 , 1002 and 1003 of the TCP packet and matching with RTPQ the flow rates of at 4Mbps speed feed into the MSR , and from the side port G0 / 1 forwarding, the following statements is correct is _____
A. Head of the port 1002 of TCP packet forwarding rate is 2.4Mbps
B. The forwarding rate of RTPQ traffic packets is about 2.4Mbps
C. Head of port 1001 of TCP packet forwarding rate is 4Mbps
D. Head of port 1000 of TCP packet forwarding rate is 4Mbps
E. Head of port 1003 of TCP packet forwarding rate is 0
Answer: (SHOW ANSWER)

NEW QUESTION: 62
AAA supports the accounting method of _____ .
A. RADIUS accounting
B. No billing
C. TACACS accounting
D. This ground billing
Answer: A,B,C,D (LEAVE A REPLY)

NEW QUESTION: 63
OLT issue register cancellation message 5 ONU issuing register_ACK message
3.The following statements about VLAN planning in the EPCNI network are correct: _____
(choose one or more)
A. PSPV manner the same user for all services use the same one VLAN to be labeled, its implementation can not be guaranteed quality of service.
B. PUPSPV mode can accurately identify users and services, and each user's business has a corresponding vlan id identification.
C. In PUPV mode, all users in the cell share the same business vlan id .

D. The deployment of PUPSPV mode requires equipment to support QinQ technology.
Answer: (SHOW ANSWER)

NEW QUESTION: 64
The following commands are configured on the S3610 switch:
qos map-table dotlp-ip
import 1 export4
import 2 export 5
interface Ethernet1/0/8
port link-mode bridge
port link-tpe trunk
port trunk permit vlan 1 4
qos trus t dotlp
interface Ethernet1/0/9
port link-mode bridge
port link-tpe trunk
port trunk permit vlan 1 4
qos gts an cir 65000 cbs 2000000
Then when the traffic is 40Mbps , the packets with the vlan id of 4 and the 802.1p priority are 1 , and the packets with the traffic of 40Mbps with the vlan id of 4 and the 802.1p priority of 2 enter at the same time from port E 1/0/8 , When forwarding from port E1/0/9 , which of the following statements is correct is ____ .(Choose one or more)
A. All packets with 802.1p priority 1 are stored out of port E1/0/9 and forwarded
B. Packets with 802.1p priority 2 have packet loss on outbound port E1/0/9
C. Packet traffic shaping is 65Mbps for forwarding
D. Packets with 802.1p priority 1 have packet loss on the outgoing port E1/0/9
E. 80Mbps packets are forwarded normally
F. All packets with 802.1p priority 2 are forwarded on the outgoing port E1/0/9
G. portions partial misconfigured
Answer: (SHOW ANSWER)

NEW QUESTION: 65
BGP MPLS VPN on a network station of the public network equipment, displa mpls ldp lsp command command checks its label forwarding table, the following results described _____ .
[PE1] dis mpls ldp lsp
LDP LSP Information

NEW QUESTION: 66
Which of the following descriptions of MPLS lsr-id is correct is _____ .
A. lsr-id is used to identify an LSR device in the MPLS network
B. The format of lsr-id is the same as the IP address
C. lsr-id must be configured to be the same as the Router ID of the LSR
D. lsr-id is unique in MPLS network
Answer: (SHOW ANSWER)

NEW QUESTION: 67
IPSec polic is configured between the two routers , after the policy is issued to the corresponding interface, the ping command is used to check the interoperability of the protected data flow, and it is found that the data passes 100% .Use displa ike sa and displa ipsec sa to order, it shows that IPSec SA is not established.
The reason for the failure of IPSec configuration is ____ .(Choose one or more)
A. the IKE the pre-shared-ke configuration mismatch
B. The transmission mode is used in the IPSec proposal , and the protected data flow is data from network segment to network segment
C. ACL configuration is incorrect
D. The remote-add ress address of IKE is not the interface address of the peer router
Answer: (SHOW ANSWER)

NEW QUESTION: 68
Which of the following statements about SSL VPN deployment is correct is _____ .
A. If the internal network needs to be fully protected, a single-arm deployment method is required
B. Double arm deployment is used in SSL VPN gateway with firewall integrated networking
C. If only part of the network traffic in the intranet needs to be protected, a dual-arm deployment method is required
D. In order to avoid a single point of failure of SSL VPN from affecting network connectivity, a single-arm deployment method is required
Answer: (SHOW ANSWER)

NEW QUESTION: 69
The following statements about the client, LAC and LNS in L2TP are correct _____ .
A. customer client at the same time as LNS

B. a th LAC simultaneously with the plurality of LNS to establish a connection
C. customer client can at the same time as the LAC
D. LAC can act as LNS at the same time
Answer: (SHOW ANSWER)

NEW QUESTION: 70
In the basic configuration of L2TP in independent LAC mode, the correct description of the local name of the tunnel is ____ .
Freecram.net
A. default case considered, the name of a tunnel for the name of the system
B. default case considered, the name of a tunnel is empty
C. In the system view, use the Tunnel name name command to configure the local tunnel name
D. In the L2TP group view, use the Tunnel name name command to configure the local tunnel name
Answer: (SHOW ANSWER)

NEW QUESTION: 71
Which of the following descriptions about GRE VPN configuration is correct is ____ .(Choose one or more)
A. After the keepalive function is enabled on the tunnel interface , by default, once the router fails to receive the keepalive message from the other party for three times , the tunnel is considered unavailable
B. with home GRE VPN when, regardless of static routing or dynamic routing, the Tunnel interfaces should start Keepalive function, to detect the actual work of the tunnel interface
C. Tunnel source address and a destination address uniquely identifies an interface of a tunnel, at the ends of the tunnel Tunnel source address and destination address from the interface must be the same
D. lack of provincial case, the Tunnel Interface packet encapsulation mode as GRE
Answer: A,D (LEAVE A REPLY)

NEW QUESTION: 72
EPON ranging and delay compensation technology is the key to upstream channel multiplexing, which is mainly realized through the _____ process defined by MPCP .(Choose one or more)
A. Report Processing
B. Gate Processing
C. Discovery Processing
D. Regis tration Processing
Answer: (SHOW ANSWER)

NEW QUESTION: 73

In ADSL of PPPoE applications, when the CPE side using MSR router + ADSL interface card for networking, CO.'S side DSLAM using ATM uplink time, deposit CPE needs to interface on the router which side (irrespective CPE side LAN Connection) ?

A. DSL interface

B. dial number Interface

C. Virtual-Ethernet

D. Virtual-Template

E. Yi Tai Ethernet port

Answer: (SHOW ANSWER)

NEW QUESTION: 74

MPLS labels a total of _____bit , which Label label value portion accounted _____bit .

A. 32 24

B. 32 20

C. 48 24

D. 48 20

Answer: (SHOW ANSWER)

NEW QUESTION: 75

In a not yo enable MPLS down the number of the second jump technology BGP MPLS VPN group network, the private network packet arrived last hop PE , the following statement is correct is _____ .

A. reported two packets of MPLS label value is definitely not the same

B. The two-layer MPLS label value of the packet may be the same

C. The message has two layers of MPLS label headers

D. The message has only one MPLS label header

Answer: (SHOW ANSWER)

NEW QUESTION: 76

G A good safety system should be _____ .

A. Reward people who have long followed the safety system

B. indeed ensure every job has its rules and regulations to follow

C. of personnel in violation of the security regime of penalties

D. ensure ensure safety system is capable of forming a virtuous cycle of continuous self-improvement

Answer: A,B,C,D (LEAVE A REPLY)

NEW QUESTION: 77
The quality of service of a data network usually has different requirements due to different services.Compared with data services, voice and video services are more focused on
A. Maximum number of concurrent connections
B. band width
C. When delay
D. When the delay jitter
Answer: (SHOW ANSWER)

NEW QUESTION: 78
In the VoIP network, which of the following factors has nothing to do with the bandwidth saved by VAD technology ?
A. selected by signaling type
B. said language and characteristics of the speaker
C. selected encoding type used
D. mesh network congestion degree
Answer: (SHOW ANSWER)

NEW QUESTION: 79
The following description of QoS jitter is correct.
A. branch support network of real-time business
B. do force to avoid network congestion
C. QoS can create broadband and make the use of broadband more reasonable
D. transfer control IP network traffic
Answer: (SHOW ANSWER)

NEW QUESTION: 80
For the two upstream and downstream LSRs , for the label forwarding table of the same forwarding equivalence class, the correct description is _____ .
Freecram.net
A. the swim LSR the label value of the label value is the same as the downstream equipment
B. the swim LSR same outgoing label and the label value of the downstream equipment
C. the tour LSR same tag value into a tag value to downstream devices
D. the tour LSR same label value into the label value to downstream devices
Answer: (SHOW ANSWER)

NEW QUESTION: 81

A secure network must meet the conditions of _____ .
A. determined users within the network access security and legal security
B. entire network has a sound management system
C. Have sufficient encryption and anti-counterfeiting means when transmitting data on the internet
D. There is an adequate security system when connecting to the internet
Answer: (SHOW ANSWER)

NEW QUESTION: 107
Which of the following descriptions about GRE are correct ? (Choose one or more)
A. adopted using IP over IP of GRE encapsulation, public network and the private network interface address may coincide
B. GRE uses the Ethernet protocol type Ox0800 to identify the payload packet as IP
C. bearing carrier IP header to UDP port number 47 identifies the GRE header
D. GRE VPN can transmit multicast data
Answer: (SHOW ANSWER)

NEW QUESTION: 108
IP OVER IP of GRE encapsulation, the IP protocol number used _____ marking GRE header
Answer:
47

NEW QUESTION: 109
QoS can determine which specific behavior set a packet belongs to by _____ .(Choose one or more)
A. match with IP Precedence
B. matched with IP addresses , the MAC address , the VLAN number, protocol type, port number of the transport layer
C. matching with 802.1x
D. match with COS
E. match with DSCP
F. Configure the trusted port priority or packet priority on the interface
Answer: (SHOW ANSWER)

Answer: A (LEAVE A REPLY)

NEW QUESTION: 111

Among the following ADSL standards, the one that does not need to use a splitter is ____ .

(Choose one or more)

A. ITU 992.3

B. ITU 992.1

C. ITU 992.2

D. ITU 992.4

Answer: (SHOW ANSWER)

NEW QUESTION: 112

The _____ in the data packet can be used to distinguish data streams for access control.

A. advantage with the source / destination of the IP addresses

B. Lee with URL information

C. Lee with source / object MAC address

D. Lee with the source / destination port numbers

Answer: (SHOW ANSWER)

NEW QUESTION: 113

Which of the following statements about SSL VPN deployment is correct is _____ .

A. Double arm deployment is used in SSL VPN gateway with firewall integrated networking

B. If the internal network needs to be fully protected, a dual-arm deployment method is required

C. If only part of the network traffic in the intranet needs to be protected, a dual-arm deployment method is required

D. In order to avoid a single point of failure of SSL VPN from affecting network connectivity, dual-arm deployment is required

Answer: (SHOW ANSWER)

NEW QUESTION: 114

xz company requires to build its network based on modular enterprise network architecture. Z company in Shenzhen and Xi'an with 1 R & D base, with an office in Beijing and Shanghai ; at 23 with more than capital cities 50 person office ; the 200 has no more than smaller cities 8 people in a small office j There are usually more than 200 market and technical personnel on business trips at any given time .Due to environmental and cost issues, some offices cannot access the headquarters through dedicated lines or packet-switched wide area network connections.According to these circumstances, the network module that Z company should have is ____ .

A. far away / distributed office network

B. dedicated line / packet switched access

C. Large type branch network

D. VPN access into

Answer: (SHOW ANSWER)

NEW QUESTION: 115

In a VoIP network, which of the following factors are related to the bandwidth saved by VAD technology ?

A. selected by signaling type

B. said language and characteristics of the speaker

C. mesh network congestion degree

D. selected encoding type used

Answer: (SHOW ANSWER)

NEW QUESTION: 116

Which of the following descriptions about the structure of SIP messages are correct ?

A. Since the start line, the message header, the message body is a SIP basic components message lacks any part of the SIP message is illegal cancellation message

B. There are some special SIP response messages without a start line

C. elimination main message body content of the message is a description of the session to be set up, some special SIP message without the message body

D. The some SIP message contains one or more message header, used to identify the type of message

Answer: (SHOW ANSWER)

NEW QUESTION: 117

IPSec security policies which include several ____ .(Choose one or more)

A. Hand worker configuration parameters of security policy

B. Lee with GRE auto-negotiation mode

C. Lee with IKE negotiation parameters of the security policy

D. Lee with L2TP auto-negotiation mode

Answer: A,C (LEAVE A REPLY)

NEW QUESTION: 118
According to Nquist 's theorem, the telephone system samples human voice _____ times per second in order to fully express the characteristics of the voice signal.(Fill in Arabic numerals)
Answer:
8000

NEW QUESTION: 119
The wrong description of the relationship between RT and RD is ____ .
A. same on a device different VPN of RD value and the RT attribute values can not be configured to be the same
B. with a VPN to RT value must RD same value
C. the RD value of their respective VPN of RT attributes Import Target property or Export Target a property list
Answer: A,B,C (LEAVE A REPLY)

NEW QUESTION: 120
The L2TP tunnel information can be displayed through the ____ command .
A. display l2tp session
B. display 12tp tunnel
C. display 12tp verbos
D. display l2tp status
Answer: (SHOW ANSWER)

NEW QUESTION: 121
Among multiple VRF technologies, one VRF will have _____ .
A. independent stand routing protocol process
B. independent stand physical or logical interface
C. independent stand routing table
D. independent stand router CPU
Answer: (SHOW ANSWER)

NEW QUESTION: 122

QoS can determine which specific behavior set a message belongs to through _____ .(Choose one or more)

A. matching with 802.1x

B. match with COS

C. match with DSCP

D. Configure the trusted port priority or packet priority on the interface

E. matched with IP addresses , the MAC address , the VLAN number, protocol type, port number of the transport layer

F. match with IP Precedence

Answer: (SHOW ANSWER)

NEW QUESTION: 123

In L2TP VPN in, the LAC (the L2TP Access Concentrator , the L2TP Access Concentrator) received from the remote system transmitted to the server side IP after the data packet, that the packet will be sent to the respective packages L the NS (the L2TP the Network Server , L2TP network server) , the encapsulation format of the data packet transmitted between LAC and LNS is

A. Private network data packet PPP header UDP header Public network IP header L2TP header

B. Private network data packet PPP header L2TP header UDP header Public network IP header

C. Private network data packet L2TP header PPP header UDP header Public network IP header

D. Private network data packet PPP header UDP header L2TP header Public network IP header

Answer: (SHOW ANSWER)

NEW QUESTION: 124

Which of the following information about the private network route learned from the remote end through the MP-BGP protocol will be recorded by the PE ?

A. RT Import Target attribute of the private network route

B. RD value of the private network route

C. The private network label of the private network route

Answer: (SHOW ANSWER)

NEW QUESTION: 125

How to view BGP private network routes learned by PE equipment

A. display mp-bgp routing-table

B. display bgp vpev4 all routing-table

C. display bgp vpev4 routing-table

D. display bgp routing-table

Answer: (SHOW ANSWER)

NEW QUESTION: 126

The calling UA sends a request message and receives a 200 OK response from the called UA .How can the calling UA cancel the request ?

A. No law have requested revocation
B. Li ie the called UA sent BE message
C. Li ie the called UA sent Back message
D. Li ie the called UA send Cancel message
Answer: (SHOW ANSWER)

NEW QUESTION: 127
In the BGP MPLS VPN network, which of the following items _____ exist on the P device ?
A. Private network routing table
B. Private network label forwarding
C. Public network routing table
D. Public network label forwarding
Answer: (SHOW ANSWER)

NEW QUESTION: 128
The user wants to design an H.323 network and requires unified and centralized control of all call rights.Which of the following components is not necessary ?
A. network gatekeeper
B. terminating end
C. MCU
D. net off
Answer: (SHOW ANSWER)

NEW QUESTION: 129
Which of the following H.225 messages called for the direction of the caller indicates that call processing progress state ?
A. Setup
B. Call-proceeding
C. Alerting
D. Progress
Answer: B,C,D (LEAVE A REPLY)

NEW QUESTION: 130
and IKE wild pretty model compared to, IKE main mode which has the following characteristics ?
A. IKE main mode can provide authentication
B. In the case where both parties can know the IP address of the initiator in advance and need to use the pre-shared key, only the main mode can be used
C. IKE main mode is more secure than aggressive mode
D. adopted by IKE main mode negotiation can improve speed
Answer: (SHOW ANSWER)

NEW QUESTION: 131
When the link type of the ONU port is Trunk , its processing method for downstream messages is _____ .
A. Only allow tagged messages to pass
B. Only allow the packets with the default VLAN tag to pass and remove the tag
C. only allowed without Tag packets to pass through, and the packets add the default VLAN of Tag
D. for without receipt of the Tag message, add the default VLAN Tag ; for received with Tag packets forwarded directly
Answer: (SHOW ANSWER)

NEW QUESTION: 132
The following options belong to CPE are
A. DSLAM
B. Wide Router
C. access into the switch
D. cable modem
E. access the server
F. machine top box
Answer: (SHOW ANSWER)

NEW QUESTION: 133
The interconnection between ordinary telephones , PBXs and other devices has a unified interface standard, including analog and digital interfaces.The following belong to the digital voice interface is _____ .
A. POS
B. E1
C. T1
D. FXS
Answer: (SHOW ANSWER)

NEW QUESTION: 134
A VoIP network is interconnected with a PSTN network and adopts the H.323 protocol.It is required that in addition to normal voice calls, it must also be able to conduct telephone conferences with more than three rooms.The VoIP network must include H.323 components including
A. net off
B. terminating end
C. network gatekeeper
D. MCU
Answer: (SHOW ANSWER)

NEW QUESTION: 135
Which of the following descriptions about GRE are correct ? (Choose one or more)
A. the GRE with the Ethernet protocol type 0 x0806 identified load package for IP
B. bearing carrier IP head is IP protocol number 47 identifies the GRE header
C. adopted using IP over IP of GRE encapsulation, the public network and private network interfaces may not coincide with the address
D. GRE VPN can transmit multicast data
Answer: (SHOW ANSWER)

NEW QUESTION: 136
The information displayed on the MSR router is as follows:
Sstem Defined Behavior Information:
Behavior: ef
Expedited Forwarding:
Bandwidth 20 (%) Cbs-ratio 25
Behavior: af
Assured Forwarding:
Bandwidth 20 (%)
Discard Method: Tail
Behavior: be
-none-
Then the following statement is incorrect is _____
A. significant information is shown the behavior of the system defined
B. which is defined in the EF queue and AF queues, bandwidth is reserved bandwidth occupied respectively 20%
C. use can change the percentage of the bandwidth occupied by the queue user behavior
D. explicit information indicating the behavior of a user-defined
Answer: (SHOW ANSWER)

Valid GB0-391 Dumps shared by EduDump.com for Helping Passing GB0-391 Exam! NEW QUESTION: 137
Execute the command on the MSR router and output the following information:
Interface: GigabitEthernet0/1

Output queue: (Urgent queuing: Size/Length/Discards) 0/100/0
Output queue: (Protocol queuing: Size/Length/Discards) 0/500/0
Output queue: (Priorit queuing: PQL 1 Size/Length/Discards)
Top: 3/20/42878 Middle: 10/40/0 Normal: 60/60/259195 Bottom: 80/80/344297
Then the following statement is incorrect :

A. PQ queue scheduling does not take effect , Top traffic has packet loss
B. PQ queue scheduling takes effect , Top traffic has packet loss
C. PQ queue scheduling does not take effect , Top traffic has no packet loss
D. PQ queue scheduling takes effect , no packet loss for Top traffic
E. PQ queue scheduling does not take effect , and Middle traffic has no packet loss
F. PQ queue scheduling takes effect , and Top traffic has no packet loss
Answer: (SHOW ANSWER)

NEW QUESTION: 138
Which of the following descriptions about H.323 terminals is correct is ____ .

A. & Poor pass H.323 terminal may not support fax functionality
B. even connected to the PSTN telephone network fax machine is a standard H.323 terminal equipment
C. P pass H.323 terminals may not support the video feature
D. P through PSTN telephone is a standard H.323 terminal
Answer: A,C (LEAVE A REPLY)

NEW QUESTION: 139
In BGP MPLS VPN network, the public network P on the device, the root packet according _____ packet forwarding.

A. inner layer object IP address
B. outer layer object IP address
C. an outer layer MPLS label
D. inner layer MPLS label
Answer: (SHOW ANSWER)

NEW QUESTION: 140
In the PPPoE application of ADSL , when the CPE side uses the MSR router + ADSL interface card for networking, and the CO side DSLAM uses ATM for uplink, which interfaces need to be PPPoE- related on the CO side centralized router (PPPoE Server) Configuration ?

Freecram.net

A. Yi Tai Ethernet port
B. dial number Interface
C. Virtual-Ethernet
D. ATM interface
E. Virtual-Template
Answer: C,D,E (LEAVE A REPLY)

NEW QUESTION: 141
An operator hopes to deploy ADSL (ADSL2) to kill the system in a community with relatively dense users and short transmission distance .Users do not require high bandwidth, and pay more attention to its economy and ease of installation and maintenance.
Based on the above requirements, when choosing ADSL (ADSL2) standard, the ideal is ____ .
(Choose one or more)
A. ITU 992.1
B. ITU 992.4
C. ITU 992.2
D. ITU 992.3
Answer: (SHOW ANSWER)

NEW QUESTION: 142
The configuration commands on the MSR router are as follows:
acl number 2003
rule 0 permit source 192.168.0.0 0.0.0.255
#
traffic classifier 1operator or
if-match acl 2003
#
traffic behavior 1
filter den
#
qos polic 1
classifier 1behavior 1
#
interface GigabitEthernet0/1
port link-mode route
ip address 192.168.1.1 255.255.255.0
qos appl polic 2 outbound
Then when the source address are 192.168.2.2 , 192.168.0.2 the packets from the port G0 / 1 forwarding outwardly, the following statement is correct _____
A. Forwarding of packets with the source address of 192.168.0.2 is blocked
B. Packets with the source address of 192.168.2.2 are forwarded normally
C. Packets with the source address of 192.168.0.2 are forwarded normally
D. Forwarding of packets with the source address of 192.168.0.2 is blocked
Answer: (SHOW ANSWER)

NEW QUESTION: 143
Configure the following commands on the MSR router:
qos pql 1 protocol-ip-tcp1000 queue-top

qos pql 1 protocol-ip-tcp1001 queue-middle
qos pql 1 protocol-ip-tcp1002queue-normal
qos pql 1 protocol-ip-tcp1003 queue-bottom
#
interface GigabitEthernet0/1
port link-mode route
ip address 192.168.1.1 255.255.255.0
qos lr outbound cir 10000 cbs 625000 ebs 0
qos pq pql 1
qos rtpq start-port 16384 end-port 32767 bandwidth 1000 cbs 25000
Then when the destination port are 1000 , 1001 , 1002 and 1003 of the TCP packet and matching with RTPQ the flow rates of at 4Mbps speed feed into the MSR , and from the side port G0 / 1 forwarding, the following statements is correct is _____
A. Head of port 1000 of TCP packet forwarding rate to 3Mbps
B. Head of port 1003 of TCP packet forwarding rate is 0
C. Head of port 1001 of TCP packet forwarding rate is 4Mbps
D. Head of the port 1002 of TCP packet forwarding rate is 2.4Mbps
E. The forwarding rate of RTPQ traffic packets is about 1Mbps
Answer: (SHOW ANSWER)

NEW QUESTION: 144
Which of the following descriptions of the traditional telephone system is correct is ____ .
A. electrically telephone subscriber loop connected by the PBX or central office switches, are connected to the telephone subscriber loop and the PBX a line between the pair, including tip and Ring , wherein Tip ground, Ring then PBX negative electrode.
B. electrically telephone ringing tone by the remote PBX providing a voltage or central office switches completed, the dial tone is provided by the telephone set voltage accomplished.
C. electrical telephones and facsimile machines belong to the FXS ordinary telephone devices can be connected to a central office switch via an ordinary telephone line FXO interface.
Answer: A (LEAVE A REPLY)

NEW QUESTION: 145
The incorrect description of L2TP VPN and GREVPN is ____ .(Choose one or more)
A. Both support dynamic address acquisition
B. are based on UDP encapsulation
C. all point to point VPN
D. Both support tunnel verification
Answer: (SHOW ANSWER)

NEW QUESTION: 146
In a VoIP network where calls are made through a gatekeeper , what will happen when the

gatekeeper cannot determine the location information of the called terminal within its jurisdiction ?
A. Direct access permission rejection reply to the caller (the ARJ) message
B. to the answers are right
C. directly connected to the calling party returns a location reject (LRJ) message
D. Send a location request (LRQ) message to its known gatekeeper
Answer: (SHOW ANSWER)

NEW QUESTION: 147
IP head ToS field provides a _____ a DSC code points.
A. 32
B. 64
C. 8
D. 16
Answer: (SHOW ANSWER)

NEW QUESTION: 148
PPP link transmission portion of the packet header information remains the same, in order to improve the throughput of the link, it may be considered by _____ mechanism.
A. IP packet header compression
B. PPP packets of STAC-LZS algorithm
C. link channel and slice interleave
D. VJ TCP header compression
Answer: A,D (LEAVE A REPLY)

NEW QUESTION: 149
Which of the following H.225 messages are used by the called party to indicate the call processing progress status to the calling party ?
A. Setup
B. Call-proceeding
C. Progress
D. Alerting
Answer: (SHOW ANSWER)

NEW QUESTION: 150
Which statements about the PKI workflow are correct?
A. Certificate book by the CA issued
B. permit book application made by the entity
C. solid body needs to revoke the certificate RA application
D. solid body identity reviewed by RA completed
Answer: (SHOW ANSWER)

NEW QUESTION: 151
When establishing a BGP MPLS VPN network, which of the following parameters need to be planned by the user and configured on the device ?
A. RT properties
B. VPN private network label value
C. VPN name
D. RD value
Answer: A,C,D (LEAVE A REPLY)

NEW QUESTION: 152
Which statement about VoIP voice transmission is correct?
A. needs to RTP provides a time stamp mechanism
B. need to RTP to provide re-ordering mechanism
C. need to UDP provides multiplexing mechanism
D. needed to TCP to provide reliability mechanisms
Answer: (SHOW ANSWER)

NEW QUESTION: 153
In a typical PPPoE networking, PPPoE Server and PPPoE Client are for the MSR router, if you want PPPoE session idle 3 minutes after the automatic disconnection, which requires the following configuration (choose the one or more) .
A. Configure on PPPoE Server : [RTA-Virtual--Template1] pppoe-client dial-bundle-number l idle -timeout 180
B. Configure on PPPoE Client : [HG-Dialerl] pppoe-client dial-bundle-number l idle-timeout 3
C. Configure on PPPoE-Server : [RTA-Virttual-Template1] pppoe-client dial-bundle-number l idle-timeout 3
D. Configure on PPPoE Server : [RTA-Ethernet0/0] pppoe-client dial-bundle-number l idle -timeout 180
E. Configure on PPPoE Client : [HG-Ethernet 0/0]pppoe-client dial-bundle-number l idle-timeout 180
F. Configure on PPPoE-Client : [HG-Dialerl] pppoe -client dial-bundle-number l idle-timeout 3
Answer: (SHOW ANSWER)
NEW QUESTION: 154

Which of the following statements about LR is incorrect is

A. It is an active traffic adjustment measure that limits the total rate of packets sent downstream from an interface

B. bits at the link layer, all packets outgoing from the interface can take effect (critical packets except packets)

C. Not valid for non- IP packets

D. so that the flow rate is measured using the token bucket algorithm, would exceed the committed rate of packets into the queue buffer again, it reduces the overall packet loss rate, smooth traffic, introduces additional delay.

Answer: B,C (LEAVE A REPLY)

NEW QUESTION: 155

In the GRE Tunnel interface view, configure the sending period of Keeplive packets to 10s , and determine the number of transmissions of Keeplive packets required for tunnel interruption to 3 , and the command is ____ .

A. keepalive 10 3

B. keepalive-interval 10

C. keepalive 3 10

D. keepalive-times 3

Answer: (SHOW ANSWER)

NEW QUESTION: 156

Common VPI/VCI values in ADSL applications include ____ .(Choose one or more)

A. 0/35

B. 0/16

C. 0/32

D. 0/30

Answer: (SHOW ANSWER)

NEW QUESTION: 157

The following statement about VoIP voice transmission is wrong

A. need to RTP to provide re-ordering mechanism

B. needed to TCP to provide reliability mechanisms

C. needs to UDP provides a time stamp mechanism

D. need to UDP provides multiplexing mechanism

Answer: (SHOW ANSWER)

NEW QUESTION: 158

About CBQ said law incorrect _____

A. It is a congestion management technology implemented by QoS strategy

B. packet contains .1 th default queue for supporting the BE service, using the WFQ queue

scheduling
C. package contains .1 th the LLQ , to support EF traffic, is transmitted absolute priority, guaranteed latency
D. package contains .1 th BQ , for supporting the AF service, broadband guaranteed queue and controllable delay
Answer: (SHOW ANSWER)

NEW QUESTION: 159
Execute the command on the MSR router and output the following information:
Execute the command on the MSR router and output the following information:
Interface: GigabitEthernet0/1
Output queue: (Urgent queuing: Size/Length/Discards) 0/100/0
Output queue: (Protocol queuing: Size/Length/Discards) 0/500/0
Output queue: (Priorit queuing: PQL 1 Size/Length/Discards)
Top: 3/20/42878 Middle: 10/40/0 Normal: 60/60/259195 Bottom: 80/80/344297
Then the correct statement is
A. PQ queue scheduling takes effect , and Top traffic has no packet loss
B. PQ queue scheduling takes effect , no packet loss for Top traffic
C. PQ queue scheduling does not take effect , Top traffic has packet loss
D. PQ queue scheduling takes effect , Top traffic has packet loss
E. PQ queue scheduling does not take effect , and Middle traffic has no packet loss
F. PQ queue scheduling does not take effect , Top traffic has no packet loss
Answer: D,E (LEAVE A REPLY)

NEW QUESTION: 160
To reinforce the company's network, you need to ___ user authentication and authorization.
A. Liu Users browse the company's external website
B. Gordon user land network equipment
C. access into the internal network users
D. access to the network of the network printer / video terminals
Answer: B,C (LEAVE A REPLY)

NEW QUESTION: 161
802.1p CoS divided the _____ Classes of Service.
A. 16
B. 32
C. 8
D. 64
Answer: (SHOW ANSWER)

NEW QUESTION: 162
The following part does not belong to the SSL/TSL specification
A. hello protocol

B. handshake agreement
C. record protocol
D. alert agreement
Answer: (SHOW ANSWER)

NEW QUESTION: 163
Use the displa ike peer command to display the following information on the device, and you can know from this information ____ .
KE Peer: 123
exchange mode: aggressive on phase 1
pre-shared-ke simple 123
peer id tpe: name
peer ip address: 10.2.1.1
local ip address:
peer name: aaa
nat traversal: enable
dpd:
A. is not configured for the local security gateway IP address, IKE local gateway negotiation IP address of the interface will use the security policy of the main IP address
B. The name of the local security gateway during IKE negotiation is aaa
C. In the IKE negotiation negotiation mode in phase master mode
D. During the first phase of IKE negotiation, the initiator sends its name to the peer to identify its identity
Answer: (SHOW ANSWER)
