NEW QUESTION: 1
A company uses Dynamics 365 finance and operations apps.
A customer wants to ensure future customizations or application upgrades do not interfere with or interrupt business process steps. The customer must document the business process steps a user performs in the user interface.
You need to select the options for exporting a task recording for testing.
Which three options could you select? Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.

A. Save to Lifecycle Services
B. Export as Word document
C. Generate Test Execution files only
D. Save as developer recording
E. Create derived test case
Answer: (SHOW ANSWER)

NEW QUESTION: 2
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
A company is automating manual processes in the Dynamics 365 finance and operations apps. The company has the following batch groups and priorities configured:

Batch Group Name	Priority
BATCHGROUP1	Normal
BATCHGROUP2	High
BATCHGROUP3	Critical
BATCHGROUP4	Reserved

freecram.net
Microsoft

The batch processes run during the following times of day:

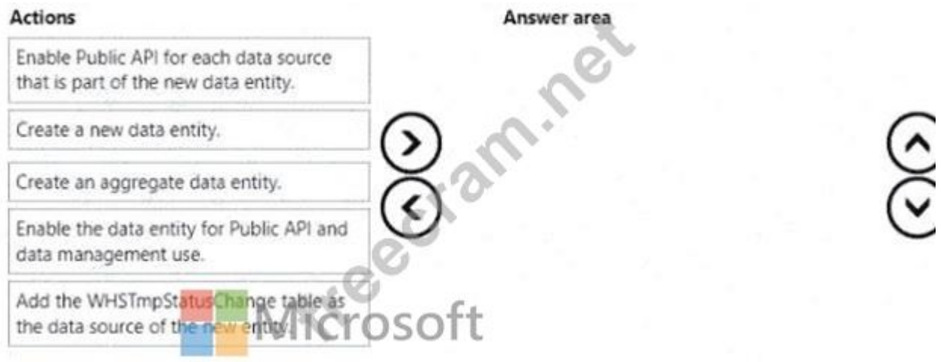

Batch Active Period	Active From (local time)	Active To (local time)
LUNCHBREAK	12:00 PM	1:00 PM
AFTERHOURS	5:00 PM	8:00 AM

The company requires a process that meets the following requirements:
* Runs every weekday.
* Runs outside of work hours.
* Runs with at least a high priority.
You need to automate the manual process.
Solution: Create a batch job to have an active period of AFTERHOURS and a recurrence of Daily. Select the Every Weekday setting, and set the batch job to run as part of BATCHGROUP2.
Does the solution meet the goal?
A. No
B. Yes
Answer: (SHOW ANSWER)

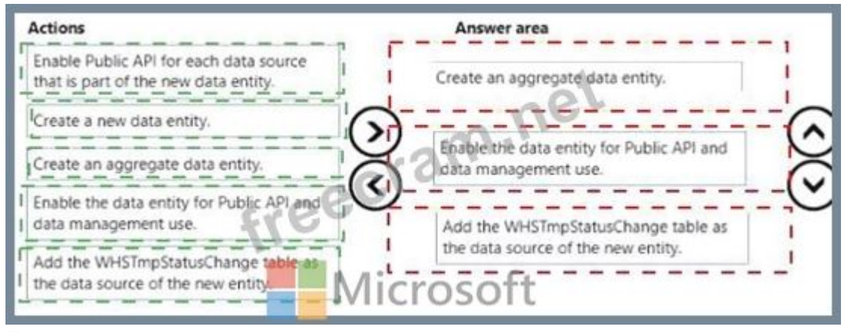

NEW QUESTION: 3
You need to configure models for the project.
What are two possible ways to achieve the goal? Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.
A. Overlay the existing FinanceExt model and populate the solution definition.
B. Modify the DefaultModelForNewProject setting in the DefaultConfig.xml file and name the model FinanceExt.
C. Create a new model that extends the existing FinanceExt model.
D. Extend the existing FinanceExt model and populate the project model definition.
Answer: (SHOW ANSWER)
https://www.google.com/amp/s/robscode.onl/d365-set-default-model-for-new-projects/amp/

NEW QUESTION: 4
You are a Dynamics 365 Finance developer. You create a key performance indicator (KPI) that will enable users to be able to see the total sales per region. You create a tile named SalesRegion and link the KPI to the tile.
You need to ensure that users can view this tile on a form in the user interface.
What should you do?
A. Create an extension of the form that will contain the new tile and KPI. Add the tile to the extended form.
B. Open the form that will contain the new tile. Add the tile to the form.
C. Create a new workspace. Add the KPI to the workspace from the user interface.
Answer: (SHOW ANSWER)
https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/user-interface/workspace-form-pattern

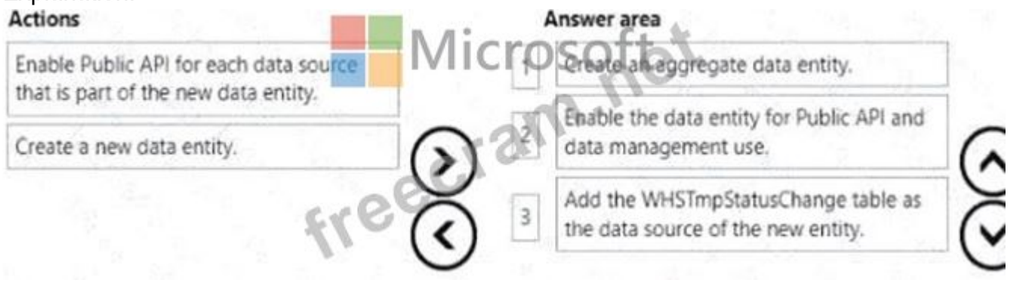

NEW QUESTION: 5
You are working on the data structures for the company's implementation.
You need to ensure that the data from the source system is mapped into the new staging table and can be used for synchronous and asynchronous integrations.
Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:

NEW QUESTION: 6

A company uses Dynamics 365 Finance. You have two tables as shown:

Table name	Comments
EmplTable	This table stores employee information.
EmplBankAccount	This custom table is used to store bank account information for employees. EmplBankAccount has a foreign key relation to EmplTable.

When an employee is deleted from EmplTable, the corresponding bank account information must automatically be deleted from EmplBankAccount.

You need to ensure that the requirement is met

Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

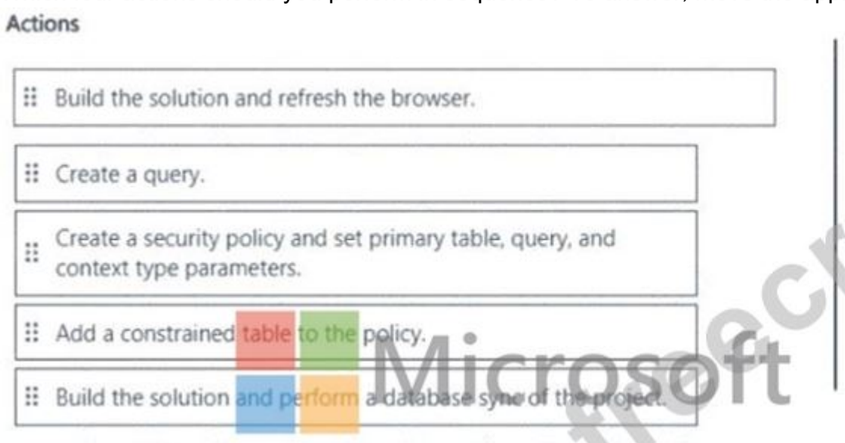

A. Set the value of the OnDelete property to Cascade.

B. Select the foreign key relation properties from EmplTable.

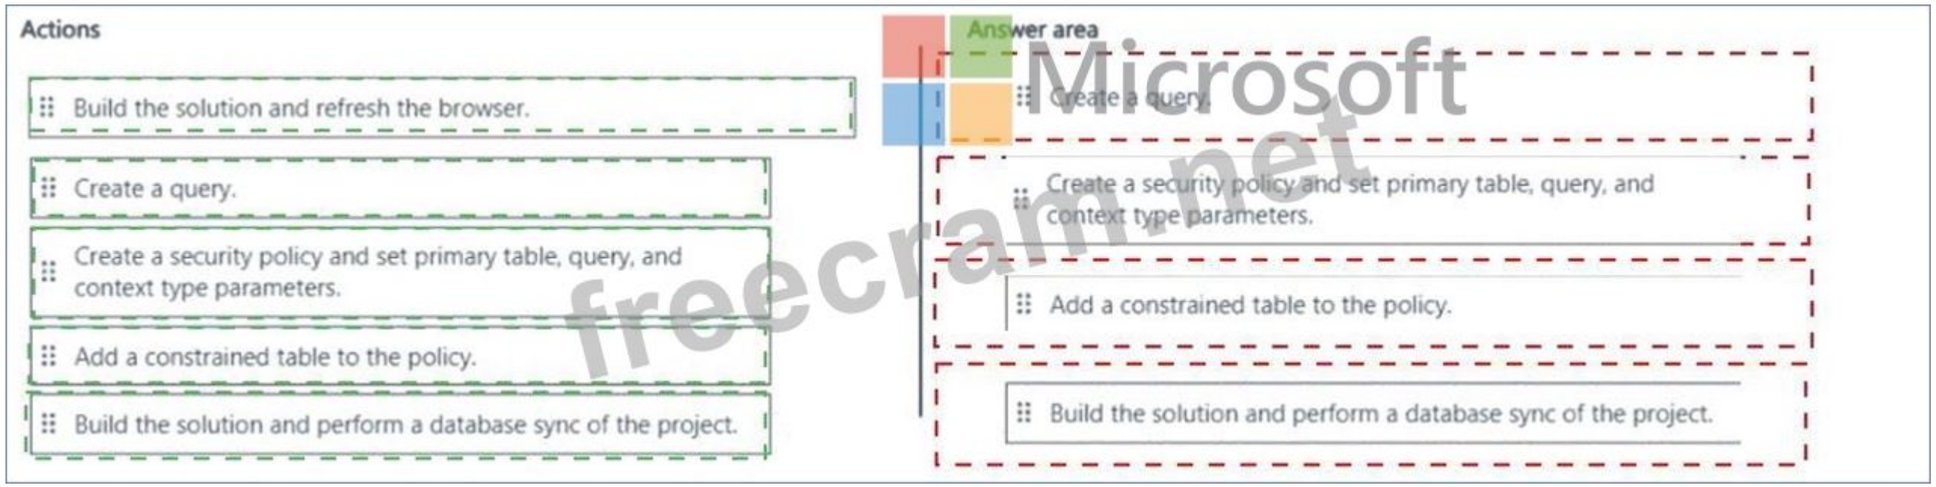

C. Set the value of the OnDelete property to Restricted.
D. Select the foreign key relation properties from EmplBankAccount.
Answer: (SHOW ANSWER)

NEW QUESTION: 7
A company uses Dynamics 365 Finance.
You need to migrate all custom report artifacts from a development environment to a cloud-hosted Tier-1 test environment that has Visual Studio installed.
Which two actions should you perform? Each correct answer presents part of the solution.
NOTE: Each correct selection is worth one point.
A. Apply a deployment package
B. Export the project as an axppfile
C. Create a deployment package
D. Import the project into a cloud-hosted environment from an axpp file and ensure that the Overwrite Elements option is selected
Answer: (SHOW ANSWER)

NEW QUESTION: 8
You are a Dynamics 365 Finance developer.
Users can view customers from all customer groups on the customer form.
You need to ensure that users can only see customers who belong to a specific customer group.
Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:

NEW QUESTION: 9

A company implements Dynamics 365 Finance and Dynamics 365 Supply Chain Management.

Customers place orders from the company website store or through sales representatives.

You create a Power Platform app to manage sales quotes for sales representatives who do not have direct access to the Finance and Supply Chain Management environment. The app must meet the following requirements:

* Sales representatives must be able to create new customers.
* Ensure that only approved products can be sold.
* Be available when the sales representatives do not have internet access.

Web sales are imported nightly.

You need to determine a strategy to integrate apps.

What should you use? To answer, drag the appropriate options to the correct app features. Each option may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

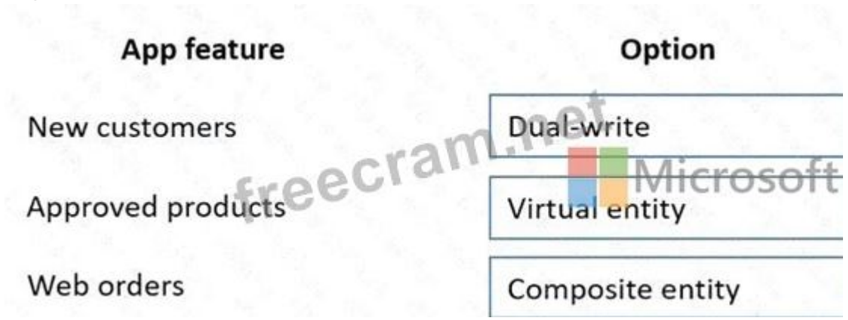

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

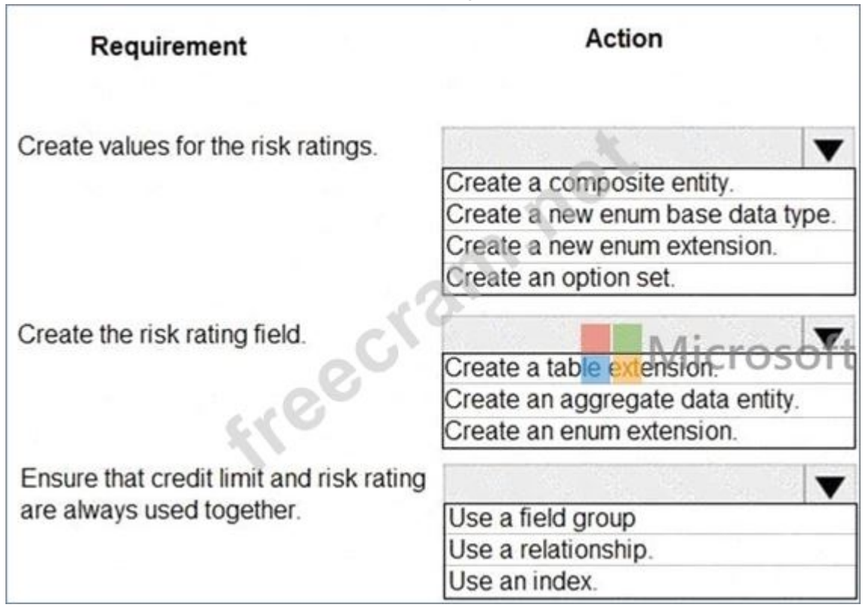

Reference:

https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/data-entities/dual-write/dual-write- overview

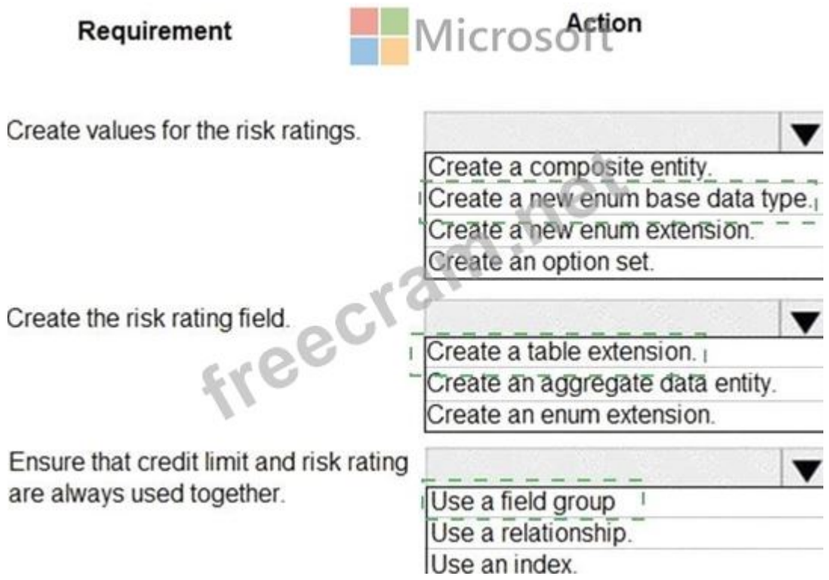

https://docs.microsoft.com/en-us/powerapps/developer/data-platform/virtual-entities/get-started-ve

https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/data-entities/develop-composite-data- entities

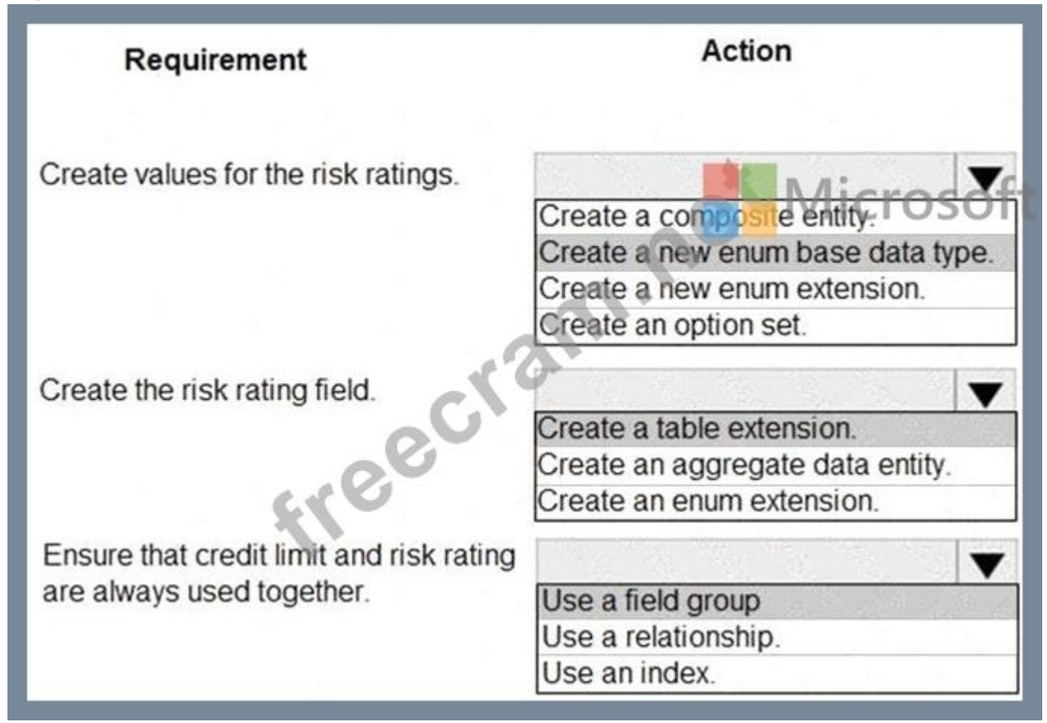

NEW QUESTION: 10
A company is implementing Dynamics 365 Finance. Vendors receive a risk rating that is determined by their on-time delivery performance as well as their credit rating.
You need to implement the following risk rating functionality:
* The risk rating must accompany the credit rating when the credit rating is used.
* The risk rating must be able to be used in other areas of the solution to determine processing outcomes.
* The risk rating must consist of the following values:
1 = Good
2 = Medium
3 = Risky
* The risk rating must be displayed in the Miscellaneous Details tab below the Credit Rating and Credit Limit fields in the Vendor form.
What should you do? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Box 1: Create a new enum base data type.

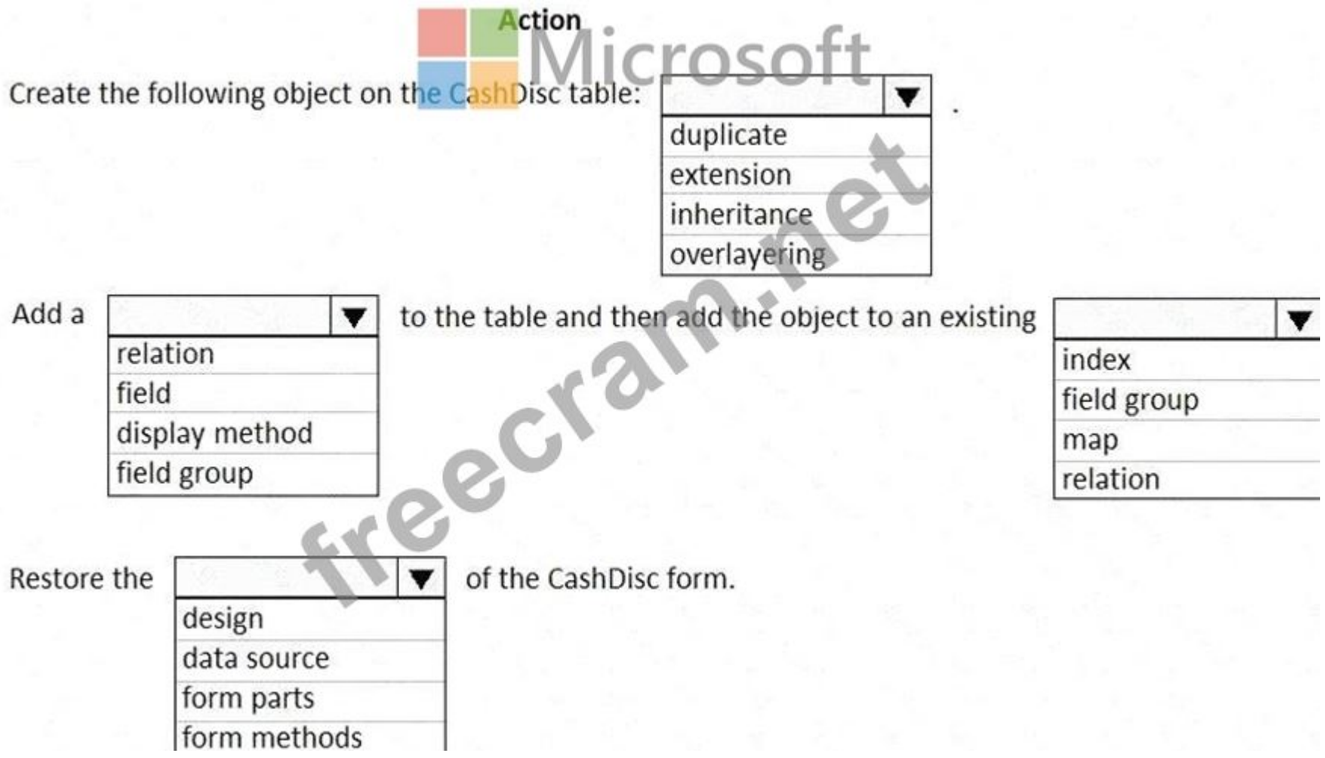

An enum is a list of literals.

Box 2: Create a table extension

After base enums and EDTs are created, they are usually added to a table to enable data capture.

Box 3: Use a field group
Field and Field Groups is the most common data entry subpattern and uses a dynamic number of columns to present multiple fields or groups of fields.
The group controls within this pattern can be used either to group fields under a label or to bind to a table field group.
Reference:
https://docs.microsoft.com/en-us/learn/modules/build-edt-enums-finance-operations/
https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/user-interface/fields-field-groups- subpattern

NEW QUESTION: 11
You need to modify the CashDisc form to meet the requirements.
Which objects should you use? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer:

Action

Create the following object on the CashDisc table: [▼] .

- duplicate
- extension
- inheritance
- overlayering

Add a [▼] to the table and then add the object to an existing [▼]

- relation
- field
- display method
- field group

- index
- field group
- map
- relation

Restore the [▼] of the CashDisc form.

- design
- data source
- form parts
- form methods

freecram.net

Microsoft

Explanation:

Action

Create the following object on the CashDisc table: [▼] .
- duplicate
- extension
- inheritance
- overlayering

Add a [▼] to the table and then add the object to an existing [▼]

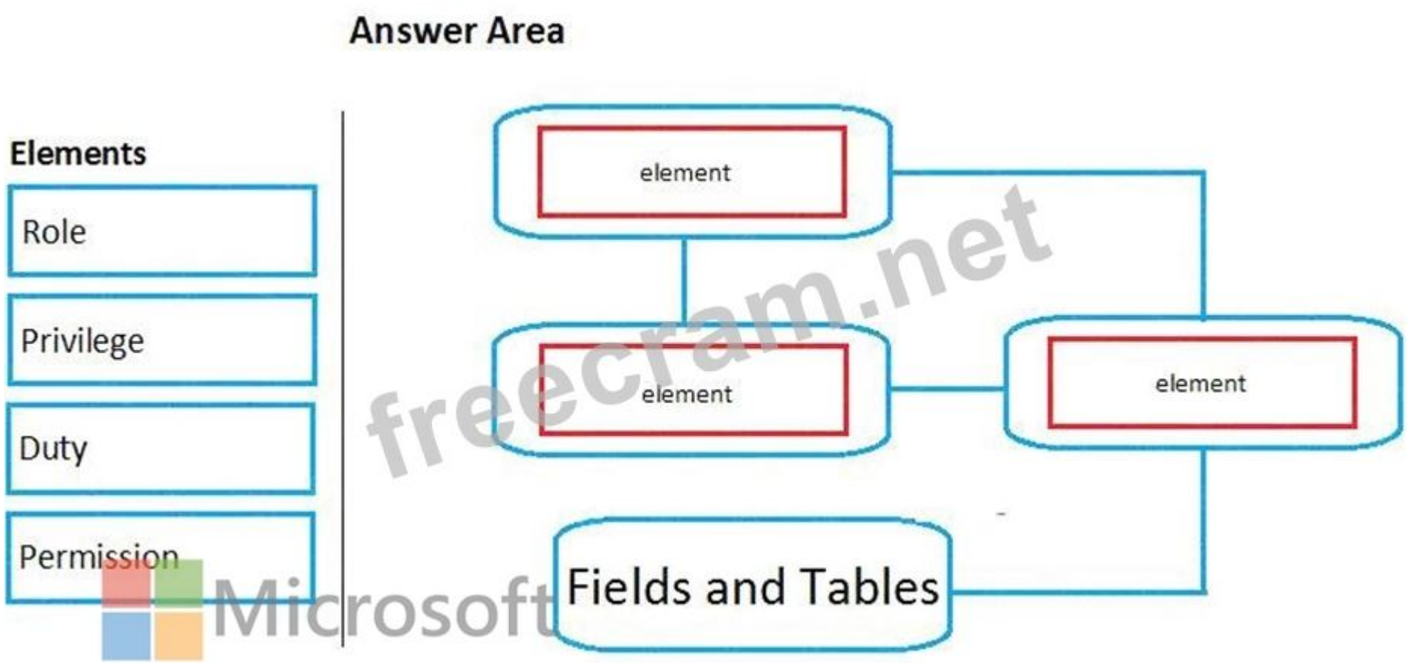

relation	index
field	field group
display method	map
field group	relation

Restore the [▼] of the CashDisc form.
- design
- data source
- form parts
- form methods

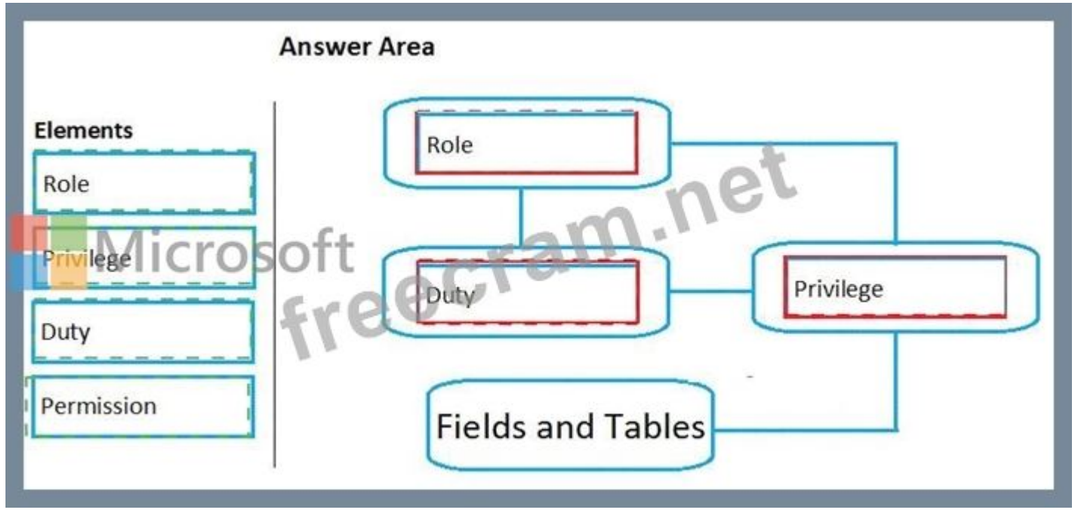

freecram.net Microsoft

Scenario: CashDisc form
You must extend the CashDisc form to add a new field named MinimumInvoiceAmount to the form. You must add a new Extended Data Type to the extension model for the new field. The new field must be added above the discount method field. The field must display 10 characters.
Box 1: extension
To add a new field to an existing table, you must first create a table extension.
Box 2: field
Box 3: field group
Box 4: data source
Often, the information that is stored in existing tables doesn't satisfy customer requirements. Therefore, additional tables must be created, and data from those tables must be shown on pages.
You can add new data sources to existing forms through extension. Follow these steps.
* In the extension model, create a form extension for the selected form.
* Right-click the form extension, and then select New Data Source.

https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/extensibility/add-datasource

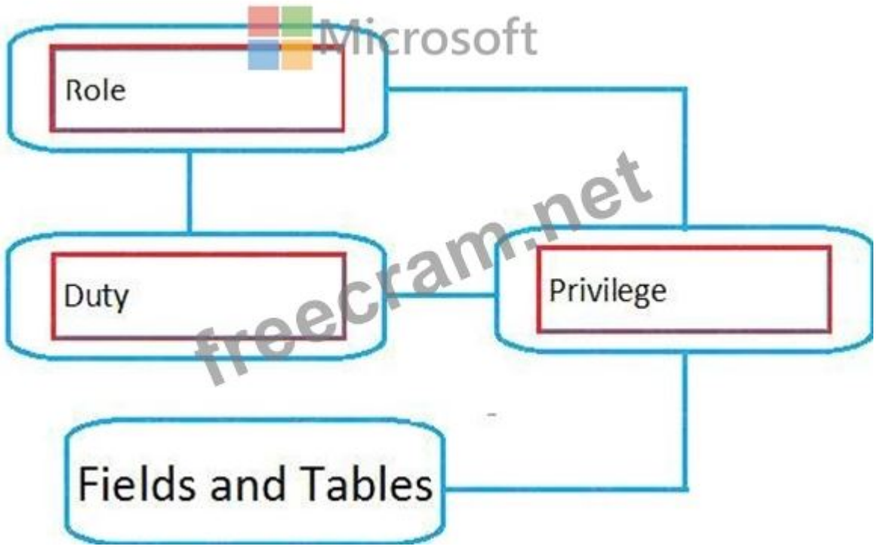

NEW QUESTION: 12
A company uses Dynamics 365 Unified Operations.
You need to implement role-based security for a set of fields in a table.
How should you arrange the security elements? To answer, drag the appropriate security elements to the correct locations. Each element may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

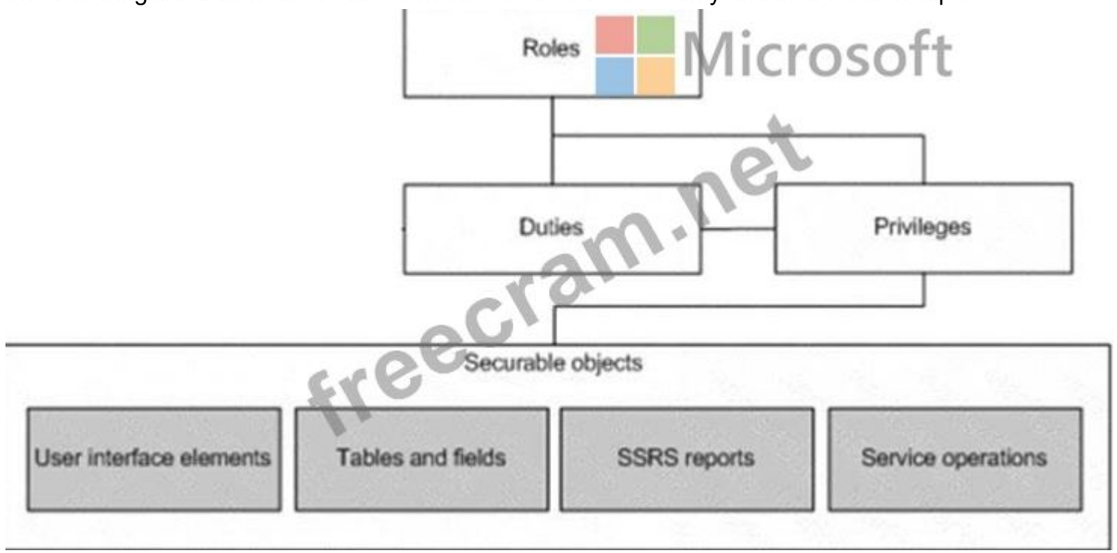

Answer:

Explanation:

The following illustration shows the elements of role-based security and their relationships.

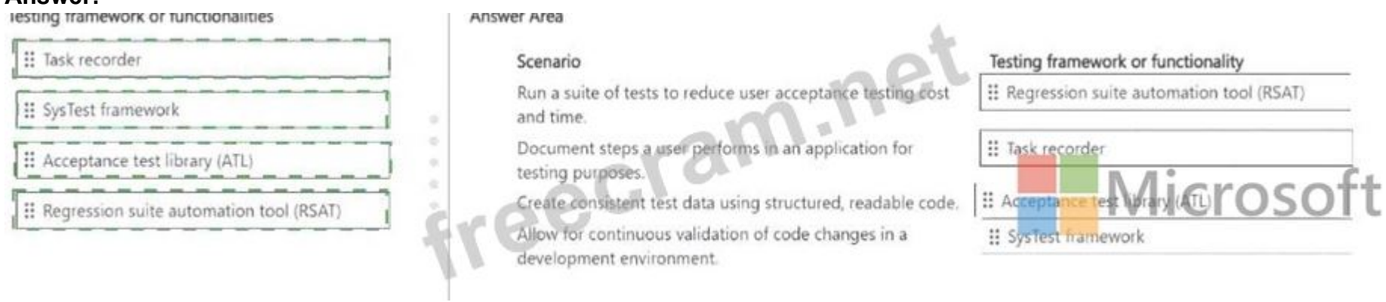

Reference:
https://docs.microsoft.c om/en-us/dynamics365/fin-ops-core/dev-itpro/sysadmin/role-based-security

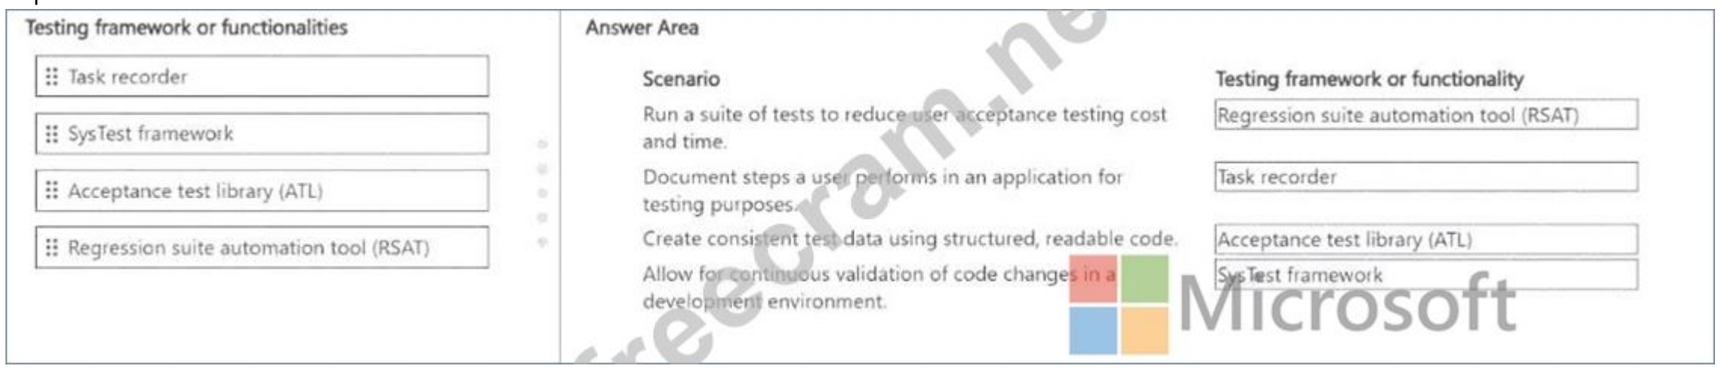

NEW QUESTION: 13
A company uses Dynamics 365 finance and operations apps.
The company must ensure employees use best practices when performing data validation and functional, regression, and user acceptance testing in the finance and operations apps.
You need to select the correct testing framework or functionality.
Which testing framework or functionality should you use in each scenario? To answer, drag the appropriate testing frameworks or functionalities to the correct scenarios. Each testing framework or functionality may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION: 14

You are a Dynamics 365 Finance developer. You have the following Extended Data Types (EDTs):

Name	Comments
AccountBase	Root EDT
AccountId	Derives from AccountBase

You plan to modify the EDT properties by using an extension.

You need to determine which operations can be performed.

Which operation is possible?

A. Create an extension for AccountBase and decrease the field size.

B. Create an extension for AccountId and increase the field size.

C. Create a derived EDT for AccountId and decrease the field size.

D. Create an extension for AccountBase and increase the field size.

Answer: (SHOW ANSWER)

You can only set the new String size to a value equal to or larger than the base EDT value.

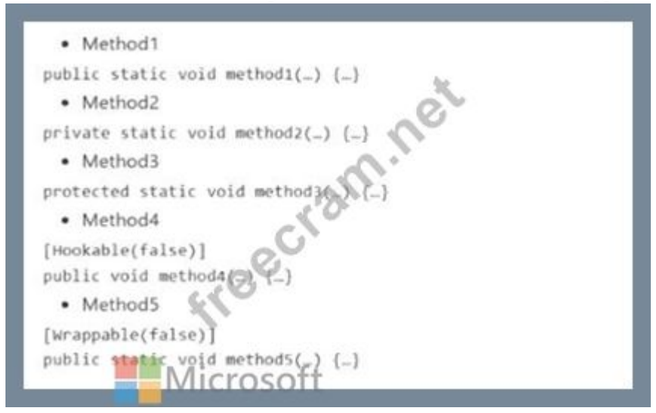

Reference:

https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/extensibility/modify-edt

NEW QUESTION: 15

A company is implementing Dynamics 365 Finance.

You must add custom logic before and after the following methods to extend the functionality by using Chain of Command.

You need to implement the development components that will allow the desired functionality. Which two methods can you extend? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

A.

```
protected static void method3(…) {…}
```

B.

```
private static void method2(…) {…}
```

C.

```
[Wrappable(false)]
public static void method5(…) {…}
```

D.

```
public static void method1(…) {…}
```

E.

```
Hookable(false)]
public void method4(…) {…}
```

Answer: (SHOW ANSWER)

NEW QUESTION: 16

A company is preparing to implement Dynamics 365 Supply Chain Management.

The company requires the following integrations to be built:

* Update master customer and vendor data from a third-party system by using a custom web service.

* Process files to import data from previous systems by using the recurring integrations scheduler.

* Display the current sales order on a B2B portal by using Dataverse virtual tables.
You need to differentiate the integration pattern for each requirement.
Which pattern does each integration use? To answer, move the appropriate integration patterns to the correct integration. You may use each integration pattern once, more than once, or not at all. You may need to move the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

NEW QUESTION: 17
A business needs a free-text field on the All customers form to enter notes about shipment requests. The field must allow users to enter a large number of characters.
You need to create a new extended data type (EDT) for the form.
Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.
NOTE: More than one order of answer choices is correct. You will receive credit for any of the correct orders you select.

Answer:

Explanation:

NEW QUESTION: 18

D18912E1457D5D1DDCBD40AB3BF70D5D

You are a Dynamics 365 Finance and Operations developer.

You need to deploy a new report in a development environment.

From which two locations can you deploy the report? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

A. Package deployment

B. Build project

C. Application Explorer

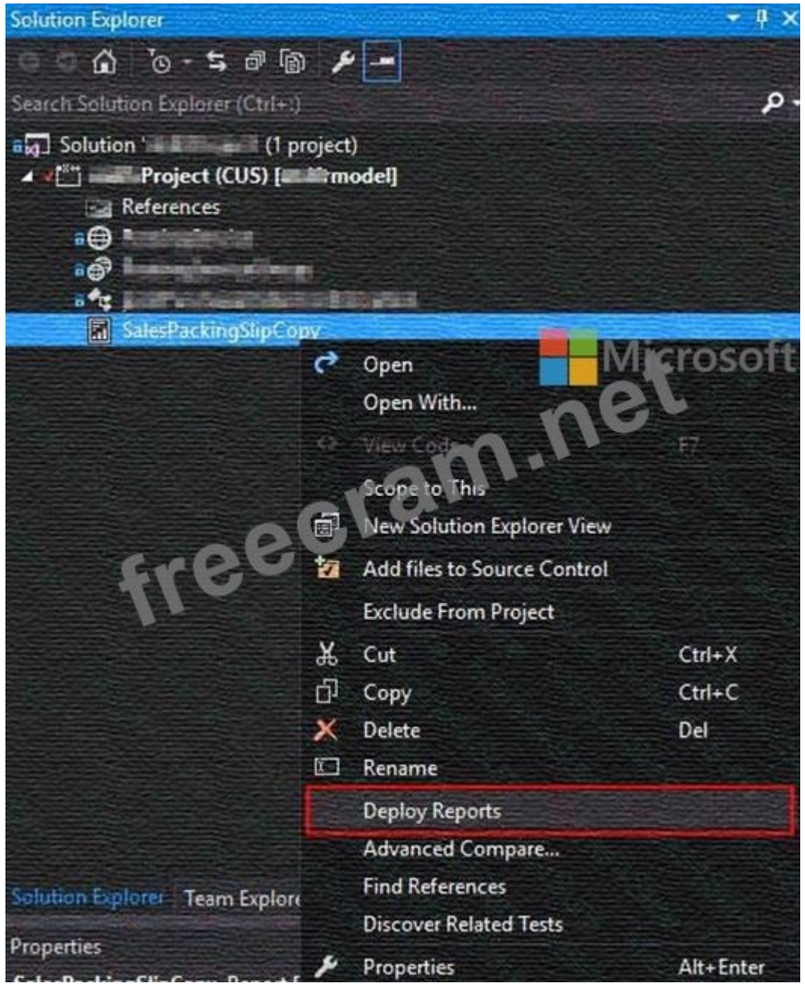

D. Solution Explorer

E. Build Models options

Answer: (SHOW ANSWER)

A: An AOT package is a deployment and compilation unit of one or more models that can be applied to an environment. It includes model metadata, binaries, reports and other associated resources.

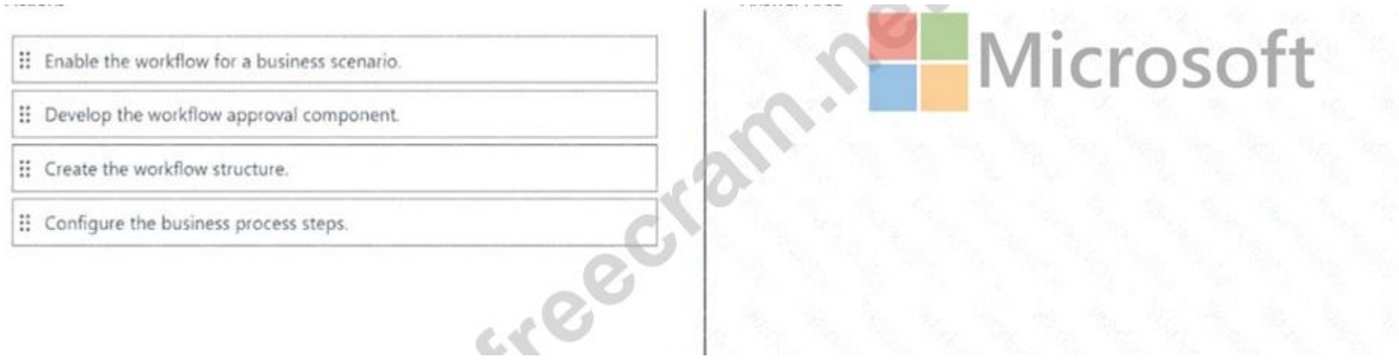

D:

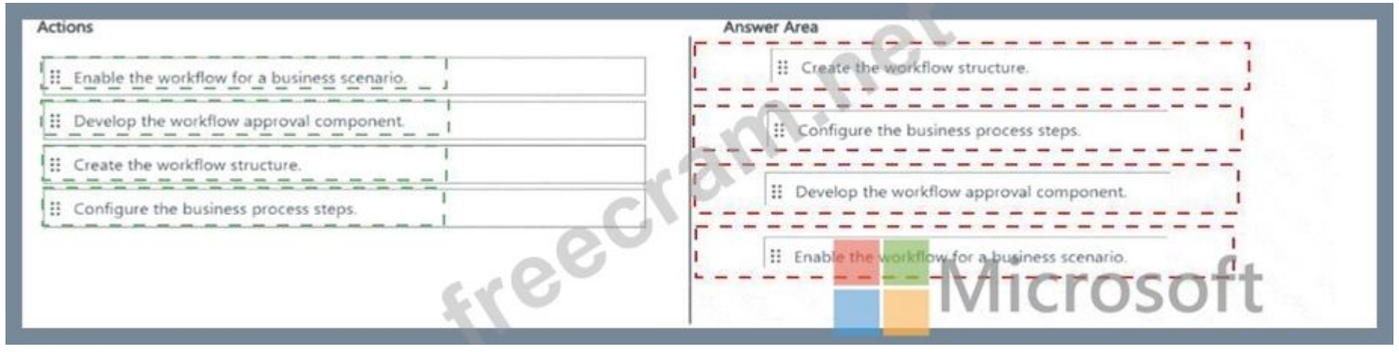

freecram.net

NEW QUESTION: 19
A company uses Dynamics 365 finance and operations apps.
An employee must track the status of a document. The employee creates a workflow by using a custom approval element.
You need to configure the workflow in the system.
In which Order should you perform the actions? To answer, move all actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:

NEW QUESTION: 20

An organization has 1,000 vendors that are part of a vendor group named Employee. You have a field named DIvTerm that is used to describe the delivery terms for a vendor.

You need to set the value of DIvTerm to Cash for all vendors in the vendor group. You must update all vendor records in the vendor group as a single bulk operation.

Which two code segments can you use? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

A.
```
ttsbegin;
update_recordset vendTable
setting DlvTerm = 'Cash'
where VendTable.VendGroup == 'Employee';
ttscommit;
```

B.
```
VendTable v;
var vo = new SysDaUpdateObject (v);
vo.settingClause()
.add(fieldStr(VendTable, DlvTerm), new SysDaValueExpression ("Cash"));
vo.whereClause(new SysDaEqualsExpression(
new SysDaFieldExpression(v, fieldStr(VendTable, VendGroup)),
new SysDaValueExpression("Employee")));
ttsbegin;
new SysDaUpdateStatement().execute(vo);
ttscommit;
```

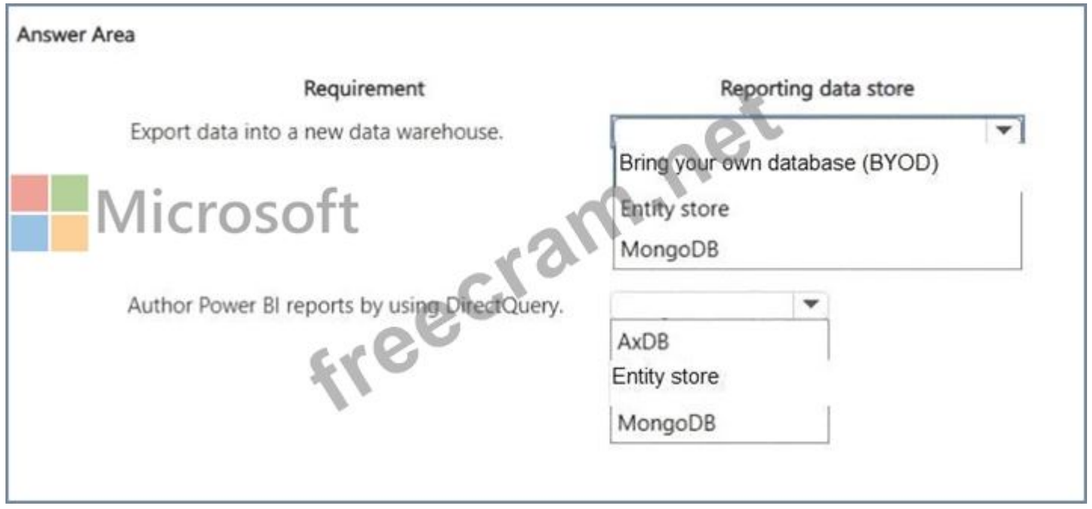

C.
```
VendTable v;
var vo = new SysDaUpdateObject(v);
vo.settingClause()
.add(fieldStr(VendTable, DlvTerm), new SysDaValueExpression("Cash"));
vo.whereClause(new SysDaEqualsExpression(
new SysDaFieldExpression (v, fieldStr(VendTable, VendGroup)),
new SysDaValueExpression("Employee")));
ttsbegin;
new SysDaUpdateStatement().update(vo);
ttscommit;
```

D.
```
ttsbegin; while select forupdate VendTable   where VendTable.VendGroup == 'Employee'   {     VendTable.DlvTerm = 'Cash';     VendTable.update();   }
ttscommit;
```

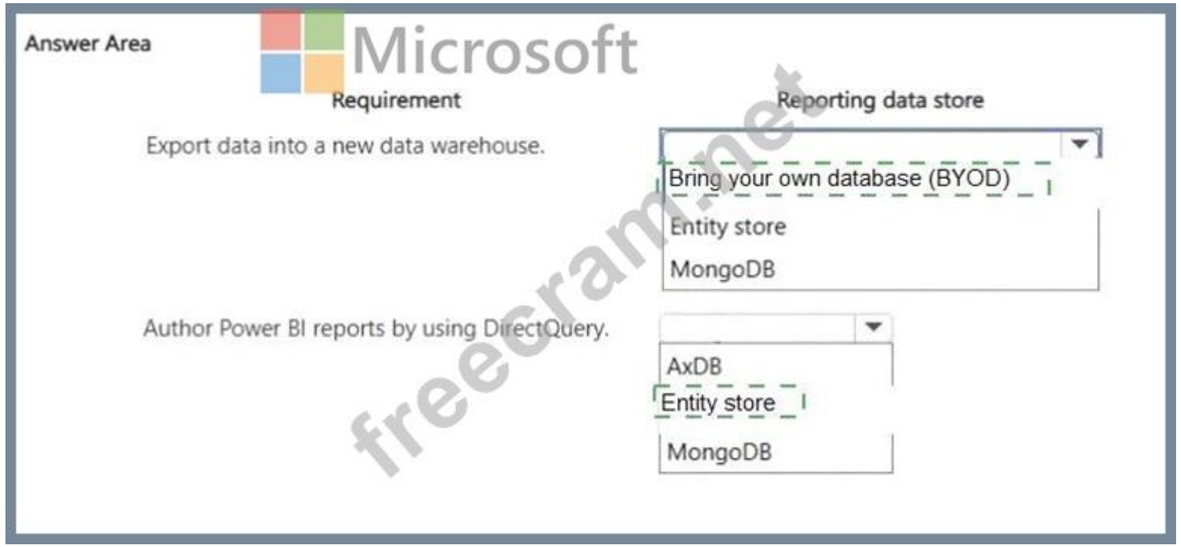

A. Option A
B. Option D
C. Option C
D. Option B
Answer: (SHOW ANSWER)

NEW QUESTION: 21
A company uses Dynamics 365 finance and operations apps.

The company wants to use reporting data stores for Dynamics 365 Finance.
You need to select the appropriate reporting data store for each requirement.
Which reporting data store should you use? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION: 22

A company uses Dynamics 365 Finance.

You create two methods in a class:

* MethodA is called only from the class. MethodA is not called from other locations in the code. Within MethodA, you must access class variables.
* MethodB is called from other places in the app. MethodB does not need to instantiate the class or access the class variables.

You need to implement the methods.

Which method types should you use? To answer, drag the appropriate method types to the correct methods.

Each method type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

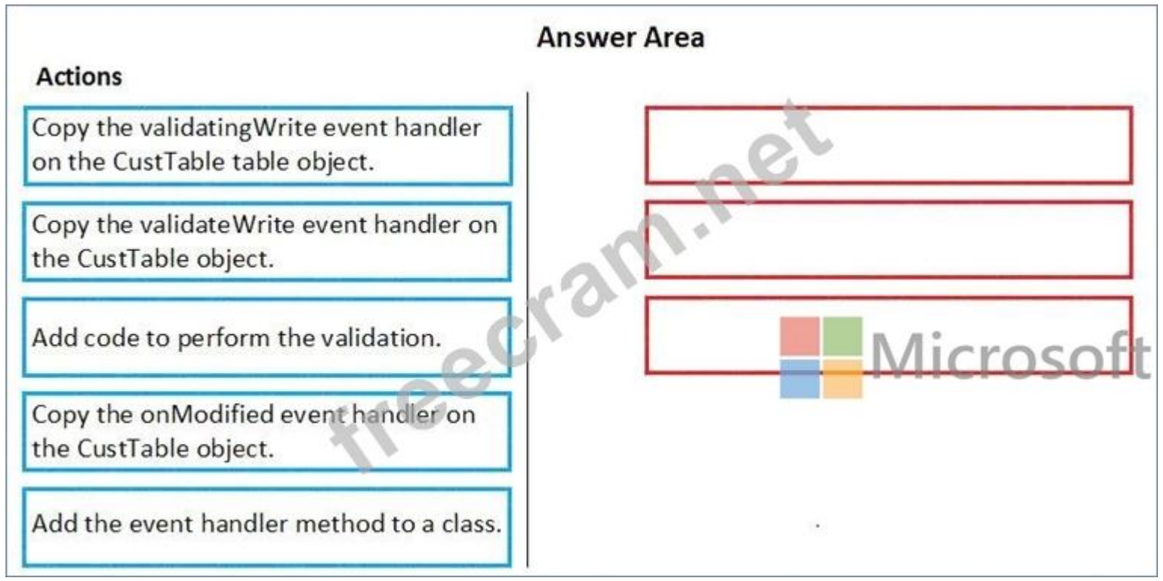

NEW QUESTION: 23

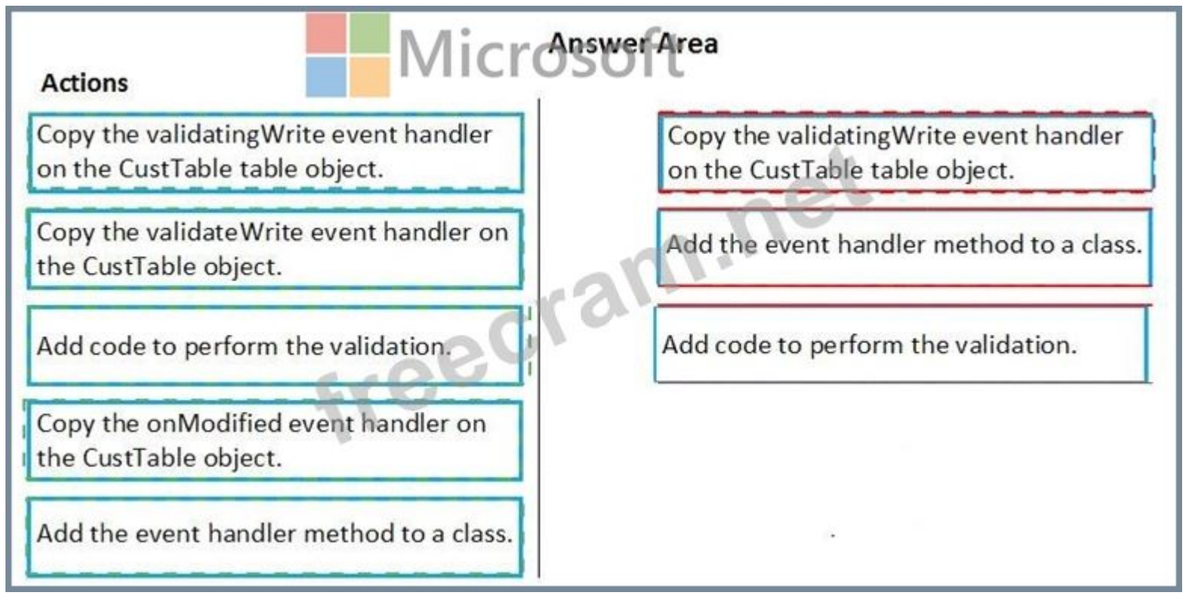

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You are adding a new field to the SalesTable form.
You must use an extension to add a status field onto the form.
You need to create the extension in the Application Object Tree (AOT) and add the extension to the demoExtensions model.
Solution: Navigate to the Visual Studio user interface forms extensions section for the SalesTable form and create an extension.
Does the solution meet the goal?
A. Yes
B. No
Answer: (SHOW ANSWER)

NEW QUESTION: 24
You are working with extended data types in Visual Studio.
You need to create an extension of a base Extended Data Types (EDT) that is part of another model. Which three properties can be modified? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.
A. Form help
B. IsExtensible
C. Label
D. Alignment
E. String size
Answer: (SHOW ANSWER)

NEW QUESTION: 25
You are a Dynamics 365 Finance developer for a company that sells pre-owned vehicles. When the company acquires a new vehicle, vehicle identification (VIN) numbers are added to the VIN field in the CustTable.
You need to create an event handler to validate that new VIN values are at least 10 characters long. Validation must occur when records are saved.
Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:

Step 1: Copy the validatingWrite event handler on the CustTable object (it is either validatingWrite or validatedWrite, there is no such option as validateWrite).

Step 2: Add the event handler method to a class.

Step 3: Add code to perform the validation.

NEW QUESTION: 26

You create an extension of ProjTable.

You need to configure the extension.

Which three table properties can you modify in the extension? Each correct answer presents a complete solution.
NOTE; Each correct selection is worth one point.
A. Preview Part Ref
B. TitleField!
C. Modified Date Time
D. Label
E. Form Ref
Answer: (SHOW ANSWER)

NEW QUESTION: 27
You are Dynamics 365 Finance developer.
You need to initialize an embedded Microsoft Power BI report.
Which code segment should you add to the form initialization method?
A. addReportControl(formGroupControl)
B. initializeReportControlInternal(powerBIConfiguration, reportparameters, reportControl, showError)
C. InitializeReportControl(workspaceName, Formgroup)
D. deployorUpdateReport(powerBIConfiguration, reportName, resourceName)
Answer: (SHOW ANSWER)
PBIReportHelper.initializeReportControl method is used to embed a Power BI report (.pbix resource) in a form group control.
Reference:
https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/analytics/add-analytics-tab-workspaces?toc=%2Ffin-and-ops%2Ftoc.json

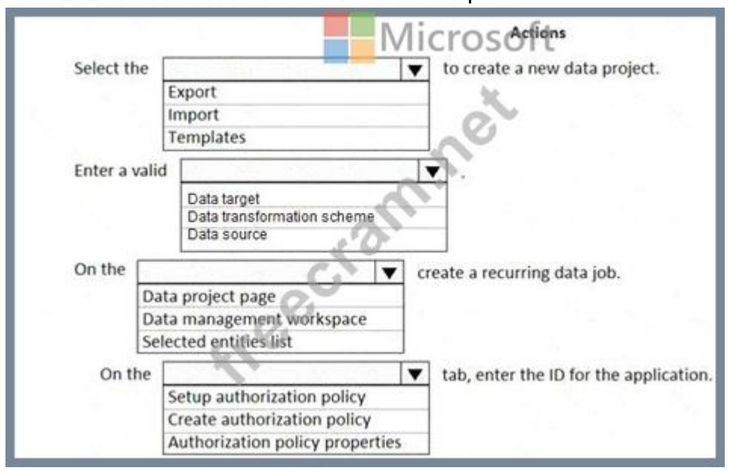

NEW QUESTION: 28
A company is using Dynamics 365 finance and operations apps.
A user reports that a custom report does not provide the expected results. After updating the report, you receive an alert that there are conflicting changes to the report when checking it in to source control.
You need to troubleshoot the cause of the conflict.
What are two causes of the conflict? Each correct answer presents a complete solution.
NOTE Each correct selection is worth one point.
A. You did not perform a Get Latest Version from source control prior to working on the report
B. A developer requested a code review of the prior report changeset which was approved by a reviewer.
C. A developer modified the report at the same time and created a shelveset of their changes
D. You created an annotation on a prior version of the report in source control.
E. A developer rolled back the changeset at the same time you were working on the report
Answer: (SHOW ANSWER)

NEW QUESTION: 29
You are a Dynamics 365 Finance developer. You have the following Extended Data Types (EDTs):

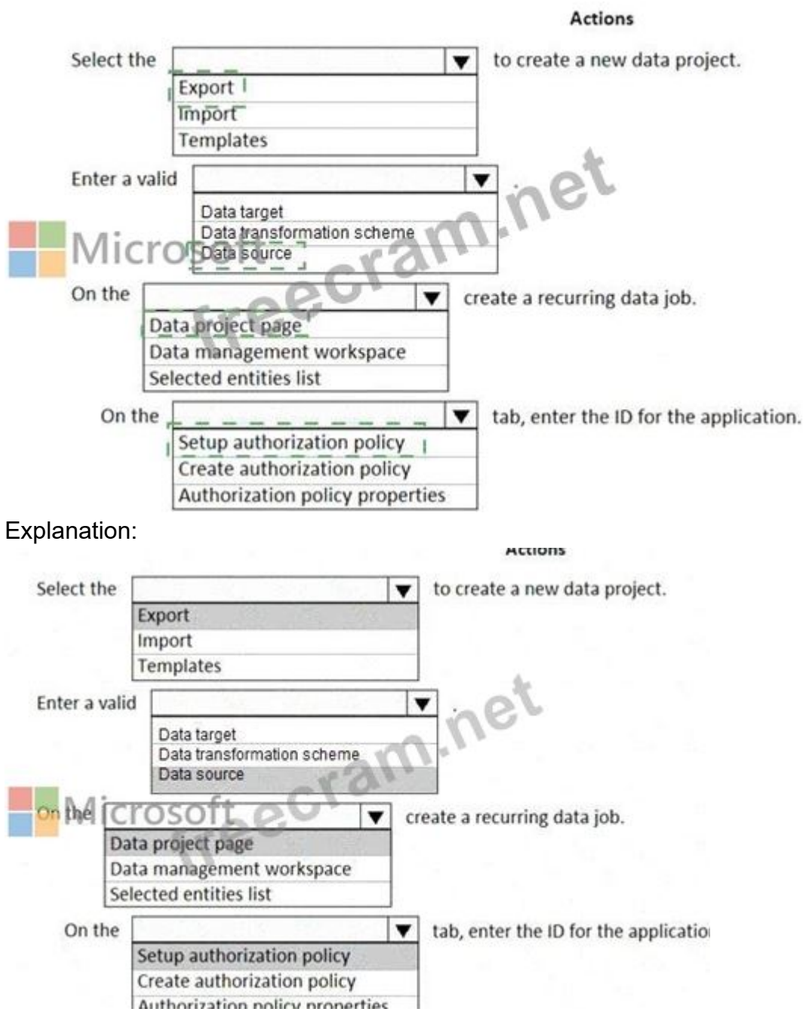

Name	Comments
AccountBase	Root EDT
AccountId	Derives from AccountBase

You plan to modify the EDT properties by using an extension.
You need to determine which operations can be performed.
Which operation is possible?
A. Create a derived EDT for AccountBase and increase the field size.
B. Create an extension for AccountId and increase the field size.
C. Create an extension for AccountBase and modify the Form Help property.
D. Create an extension for AccountBase and decrease the field size.
Answer: (SHOW ANSWER)

NEW QUESTION: 30
You are a Dynamics 365 Finance developer.
You need to export data from all products into a data package every day at 2 a.m. You open the Data Management workspace.
How should you complete the process? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Box 1: Export

Select the Import or Export (in this case) tile to create a new data project.

Box 2: Data source

Enter a valid job name, data source, and entity name.

Box 3: Data project page

O the Data project page, select Create recurring data job.

Box 4: Setup authorization policy

In the Set up authorization policy tab, enter the application ID that was generated for your application, and mark it as enabled.

NEW QUESTION: 32
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result these questions will not appear in the review screen.
You must extend the class SaleslineType and add a new method that returns the day of week for the system ' s current date as an integer value You need to create a class that extends SalesLineType and adds the new method.
Solution: You create the following code:

Does the solution meet the goal?
A. No
B. Yes
Answer: (SHOW ANSWER)

NEW QUESTION: 33
You create a Visual Studio project named ProductUpdates.
You must update data in a table named ProductTable. You must be able to run the code from Visual Studio.
You need to create an X++ class.
Which five actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer Area

Actions

- Add the ExtensionOf attribute to the class.
- Set the class as the startup object.
- Write database manipulation code in the class.
- Build and run the class.
- Create a runnable class and add it to the ProdcutUpdates project.
- Create a class extension of the ProductTable and add it to the ProductUpdates project.
- Open the new class and add a main method to the class.

freecram.net Microsoft

Answer:

Answer Area

Actions

- Add the ExtensionOf attribute to the class.
- Set the class as the startup object.
- Write database manipulation code in the class.
- Build and run the class.
- Create a runnable class and add it to the ProdcutUpdates project.
- Create a class extension of the ProductTable and add it to the ProductUpdates project.
- Open the new class and add a main method to the class.

- Create a runnable class and add it to the ProdcutUpdates project.
- Open the new class and add a main method to the class.
- Write database manipulation code in the class.
- Set the class as the startup object.
- Build and run the class.

Microsoft
freecram.net

Explanation:
1. Create a runnable class and add it to the ProductUpdates project
2. Open the new class and add a main method to the class
3. Write the database manipulation code in the class
4. Set the class as startup object
5. Build and run the class

NEW QUESTION: 34
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution. Determine whether the solution meets the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You must create a new attribute class in which to mark other classes in the ISV solution and their respective methods with the error levels Warning and Error. You have the following class: (Une numbers are included for reference only.)

```
01
02 public class Vehicle
03 {
04
05   public int bike()
06   {
07   }
08   public int automobile()
09   {
10   public int bicycle()
11   {
12   }
13 }
```

Microsoft freecram.net

You need 10 ensure that the compiler will report an error if code calls the bike method.

Solution:

Create the following attribute class:

```
public class ISVObsoleteAttribute extends SysAttribute
{
  ErrorWarning errorWarningEnum;
  str explanation;
  public void new(ErrorWarning _errorWarningEnum, str _explanation)
  {
    errorWarningEnum = _errorWarningEnum;
    explanation = _explanation;
  }
}
```

freecram.net Microsoft

Insert the following code at line 01:

```
[ISVObsoleteAttribute(ErrorWarning::Warning, "This class will be deprecated in future releases, please use the Transportation class instead.")]
```

Insert the following code at line 04:

```
[ISVObsoleteAttribute(ErrorWarning::Error, "Deprecated. Please use the bicycle instead.")]
```

Does the solution meet the goal?

A. No

B. Yes

Answer: (SHOW ANSWER)

NEW QUESTION: 35

Users report that a company's Dynamics 365 Finance website is slow. You suspect that a SQL query attached to the task GetFormInteractionTask is the cause. You need to determine how long it takes for the query to run and return results. What should you use?

A. Fiddler

B. Performance timer

C. Performance monitor

D. Microsoft Edge debugging tools

Answer: B (LEAVE A REPLY)

NEW QUESTION: 36

You have an enumeration named truckStatus that has the following statuses:

* Empty

* Loaded
* Completed

You have the following code:

```
switch (truckTable.TruckStatus)
{
    case TruckStatus::Empty:
      Info("1");
      break;
    case TruckStatus::Loaded:
      Info("2");
      break;
    case TruckStatus::Completed:
      Info("3");
      break;
}
```

You need to extend this (enumeration and add the following statuses to the enumeration: Quarantine, InTransit. You must then modify code that validates the switch statement.

Solution: Add a new case statement in the model of the existing code.

```
switch (truckTable.TruckStatus)
{
    case TruckStatus::Empty:
        Info("1");
        break;
    case TruckStatus::Loaded:
        Info("2");
        break;
    case TruckStatus::Completed:
        Info("3");
        break;
    case TruckStatus::Quarantine
    case TruckStatus::InTransit
        Info("Extended");
        break;
}
```

Does the solution meet the goal?

A. Yes

B. No

Answer: (SHOW ANSWER)

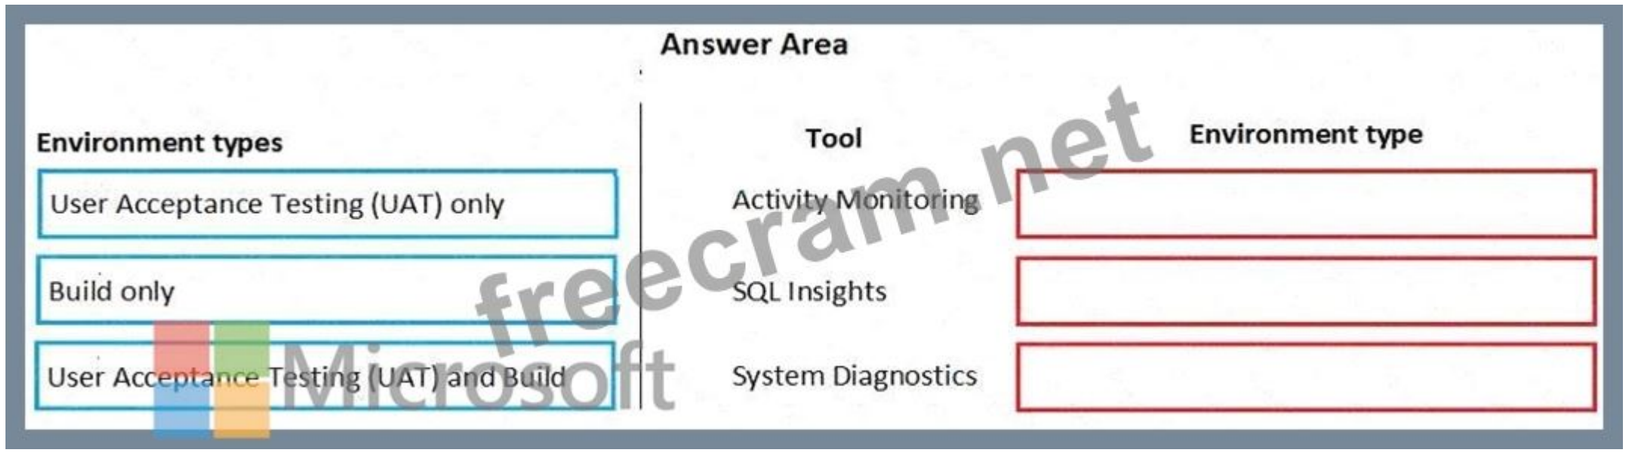

NEW QUESTION: 37

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are adding a new field to the SalesTable form.

You must use an extension to add a status field onto the form.

freecram.net
Microsoft

You need to create the extension in the Application Object Tree (AOT) and add the extension to the demoExtensions model.
Solution: Add a new form object to the project and name the form SalesTable.Extension .
Does the solution meet the goal?
A. Yes
B. No
Answer: (SHOW ANSWER)
Instead navigate to the user interface forms section for the SalesTable form and create an extension.
Note: In Dynamics 365 Finance and Operations, the new fields will need to be added via a table extension.
Create the extensions on the SalesTable.

Does the solution meet the goal?

A. Yes

B. No

Answer: (SHOW ANSWER)

NEW QUESTION: 39

You need to implement the payroll application data process.

Which two objects should you create? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

A. a data contract class that uses the DataContractAttribute attribute

B. a service class that has a public method which accepts a single parameter for a contract

C. a class that extends SysOperationServiceBase

D. an UIBuilder class that extends SysOperationAutomaticUIBuilder

Answer: (SHOW ANSWER)

Scenario: You must develop a process to import payroll journals into the system.

A: Data Contract: Data contract class is the model class defining attributes needed for batch operations. These attributes are provided by the user, in a dialog. DataContractAttribute attribute is needed for the class and the properties methods requires DataMemberAttribute attribute.

C: Service: Service class extends from the SysOperationServiceBase class and contains the business logic for the batch operation. Developers often tend to add the business logic in controller classes, which violates the Single responsibility principle.

NEW QUESTION: 40

A company uses Dynamics 365 Finance.

You create a form in the Accounts Payable module where a list of customers and their bank accounts is displayed. You also create a display menu item to add to the Accounts Payable menu.

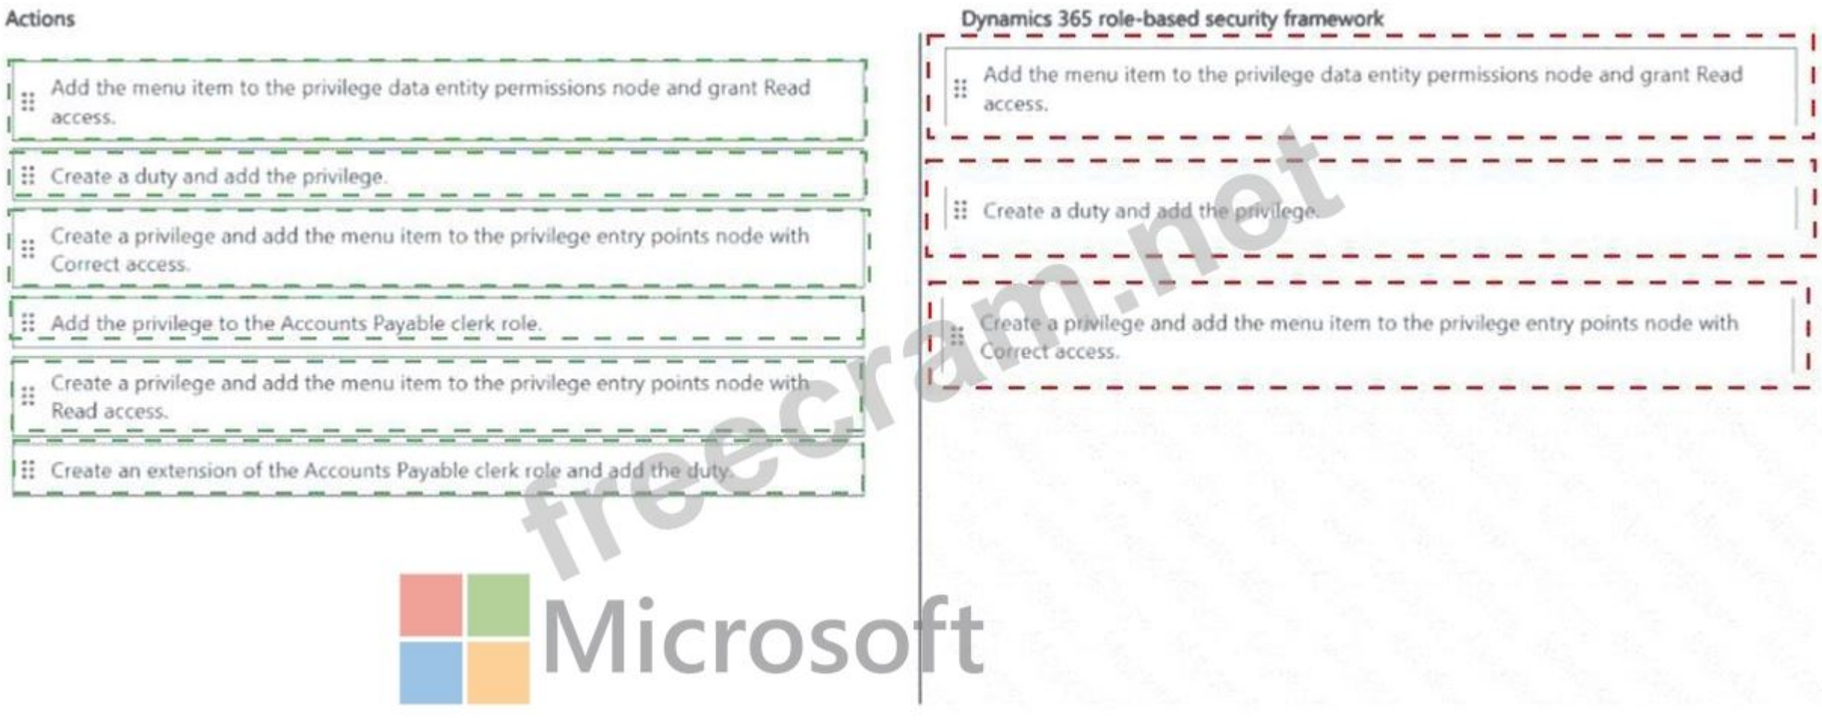

You must create a privilege to only view the records and a duty to allow the standard Accounts Payable clerk to access the form.

You need to configure the security items

Which three actions should you perform in sequence? lo answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

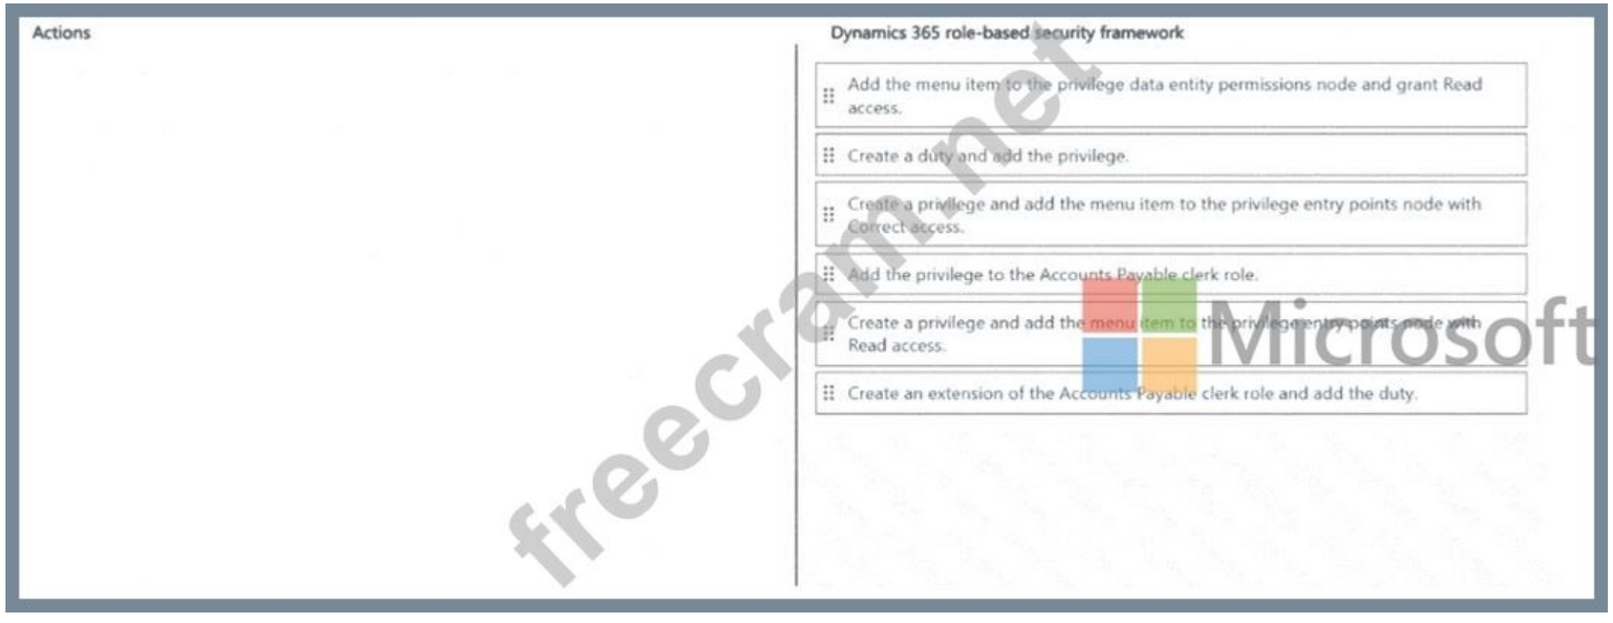

Answer:

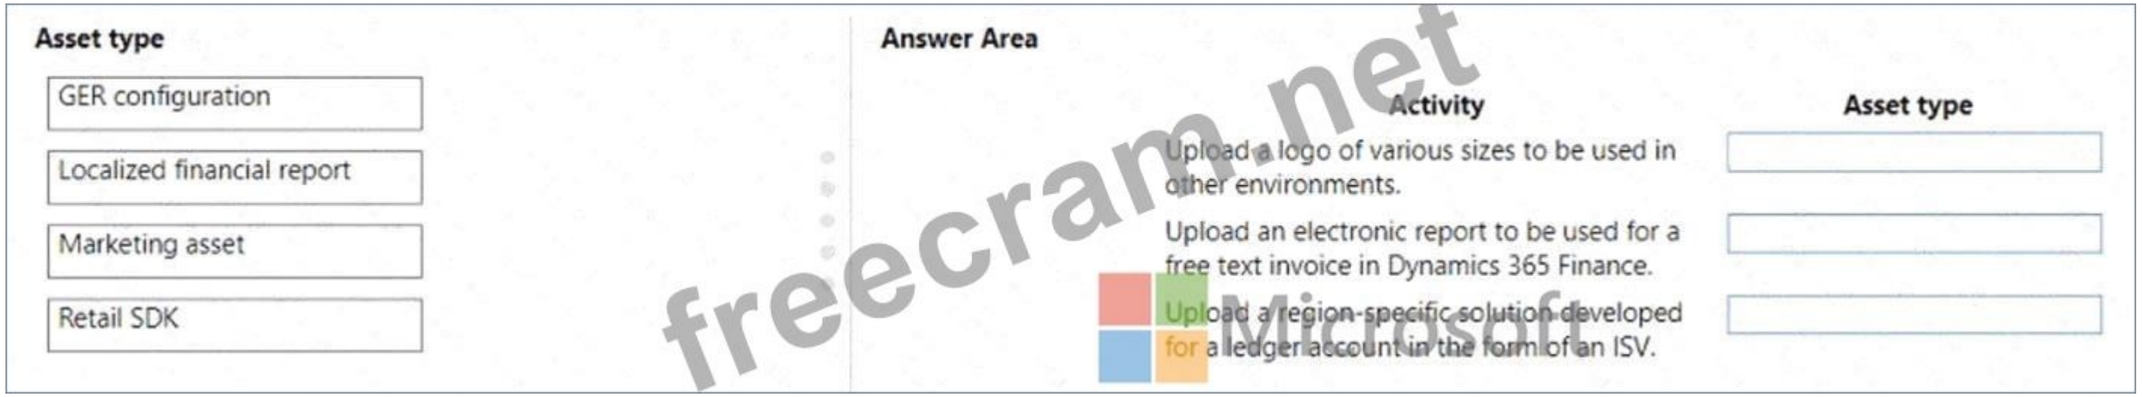

Explanation:

freecram.net

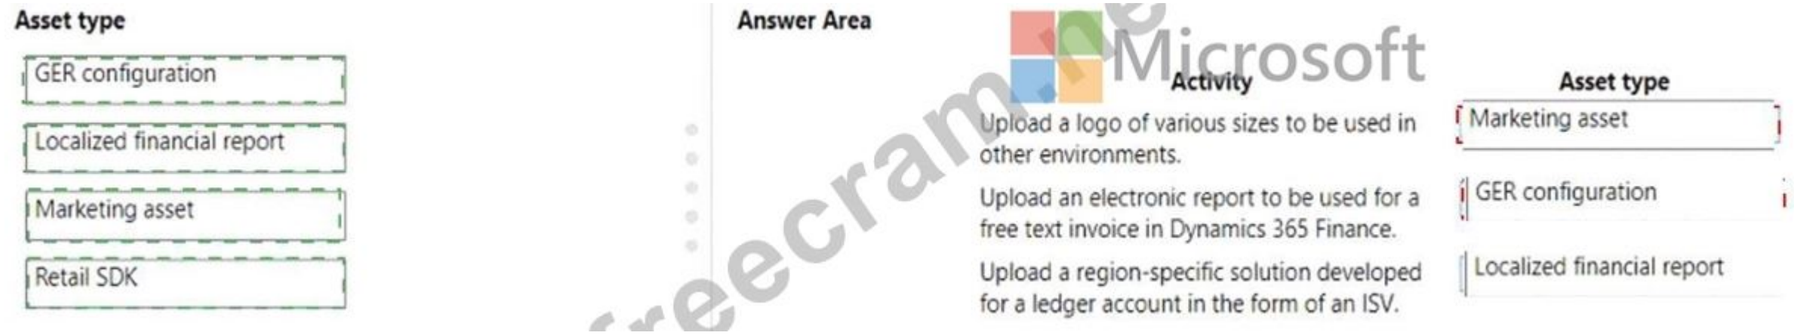

NEW QUESTION: 41
The warehouse manager at Contoso, Ltd. wants to display a tile in the user interface that will show total RAFs per hour.
You need to create a key performance indicator (KPI) that meets these requirements.
What two components should you create? Each correct answer presents part of the solution.
NOTE: Each correct selection is worth one point.
A. aggregate dimensions
B. data entity
C. aggregate measurements
D. TempDB table
Answer: (SHOW ANSWER)
https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/analytics/model-aggregate-data#model-a-kpi-to-show-revenue-per-rental

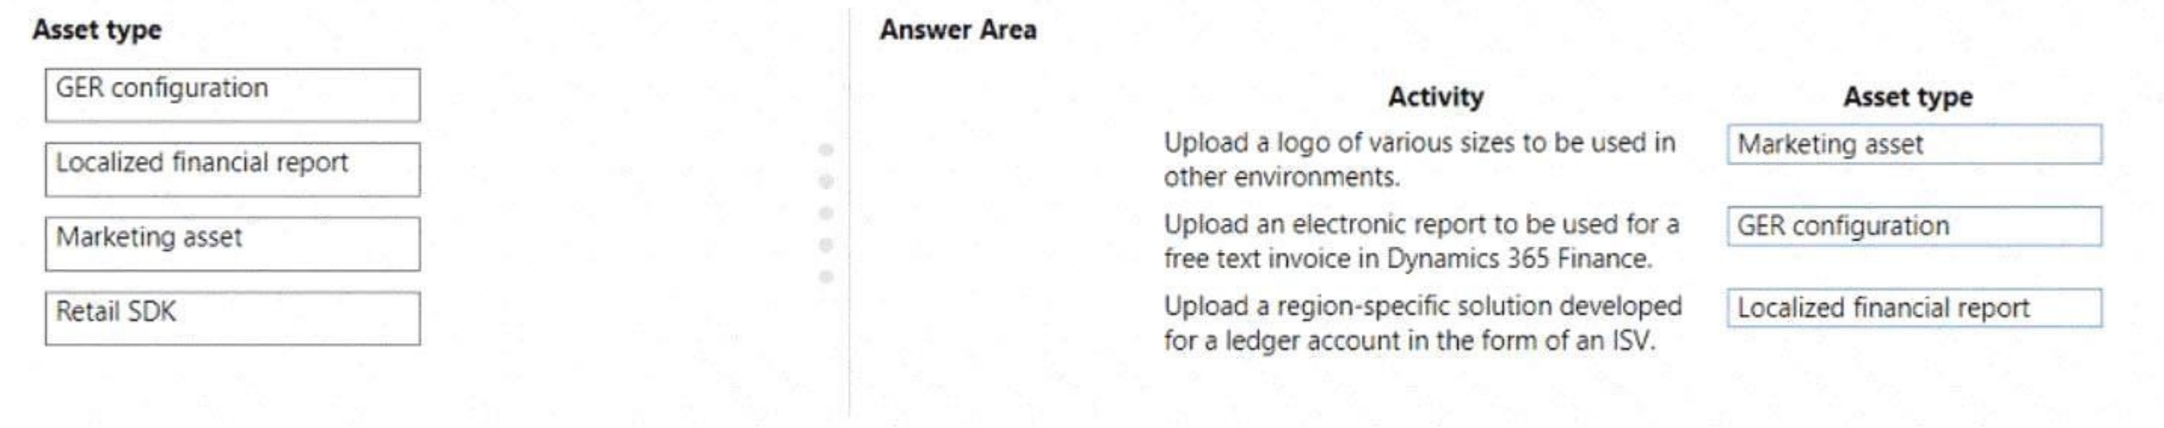

NEW QUESTION: 42
A company uses Dynamics 365 Finance. The company creates an asset library.
You need to upload assets for a solution to the asset library.
Which asset types should you use? To answer, drag the appropriate asset types to the correct activities. Each asset type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION: 43

A company is using a Dynamics 365 finance and operations app.

The accounting department requests two custom fields named CusStatus and CusDiscount for the header of the sales invoice SSRS report The custom fields are in the SatesTable table.

You create a duplicate of the report design and add the two new fields to a temporary table by using the following extension:

```
01 [ExtensionOf(classStr(SalesInvoiceDP))]
02 final class MySalesInvoiceDP_Extension
03 {
04     protected void populateSalesInvoiceHeaderFooterTmp(CustInvoiceJour _custInvoiceJour, CompanyInfo
_companyInfo)
05     {
06
07         next populateSalesInvoiceHeaderFooterTmp(_custInvoiceJour, _companyInfo);
08
09     }
10 }
```

freecram.net

You need to populate the new fields by using Chain of Command (CoQ

Solution: Declare the SalesTable table on line 06 and insert a new line after line 06 to declare the SalesInvoiceHeaderFooterTmp table ^Populate the new fields by using the custInvoiceJour parameter with a reference to SalesTable Does the solution meet the goal?

A. Yes

B. No

Answer: (SHOW ANSWER)

NEW QUESTION: 44

A company uses Dynamics 365 Supply Chain Management.

You need to list all classes in the Application Suite model that contain a cross-company query.

Which query string should you use?

A. type:class, table code:"crosscompany" model:"Application Suite"

B. type:class, method name-run code:"crossconpany" model:"Application Suite"

C. type:class code:"crosscompany" model:"Application Suite"

D. type:class, method name=insert code:"crosscompany" model:"Application Suite"

Answer: (SHOW ANSWER)

NEW QUESTION: 45

You have an enumeration named truckStatus that has the following statuses:

* Empty

* Loaded

* Completed

You have the following code:

```
switch (trunkTable.TruckStatus)
{
  case TruckStatus::Empty:
    Info("1");
    break;
  case TruckStatus::Loaded:
    Info("2");
    break;
  case TruckStatus::Completed:
    Info("3");
    break;
}
```

You need to add the following statuses to the enumeration: Quarantine, InTransit What should you do?

A. Add a post handler to the method that checks the enumeration and logic for your new enumeration values using a range comparison for your new values.

B. Add a new case statement in the model of the existing code,

C. Add a post handler to the method that checks the enumeration and logic for your new enumeration values using the enumeration value.

D. Add a post handler to the method that checks the enumeration and logic for your new enumeration values using the integer value of the enumeration.

Answer: C (LEAVE A REPLY)

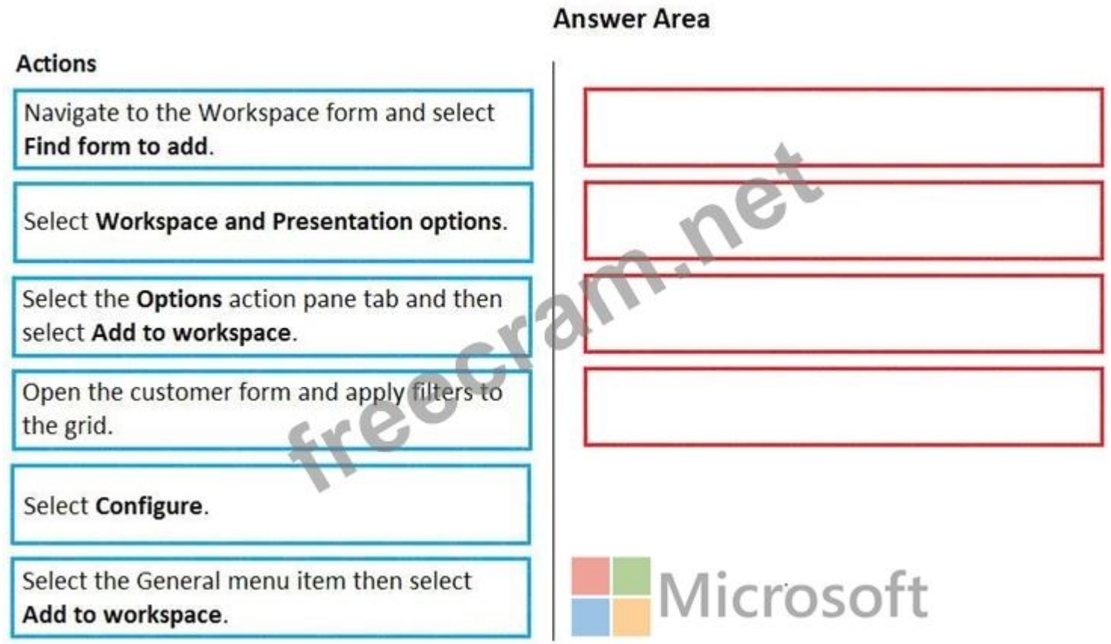

NEW QUESTION: 46

You are a Dynamics 365 Finance developer.

Users must be able to view a filtered customer list from within a workspace.

You need to add the customer form to a workspace.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them on the correct order.

freecram.net
Microsoft

Answer:

Answer Area

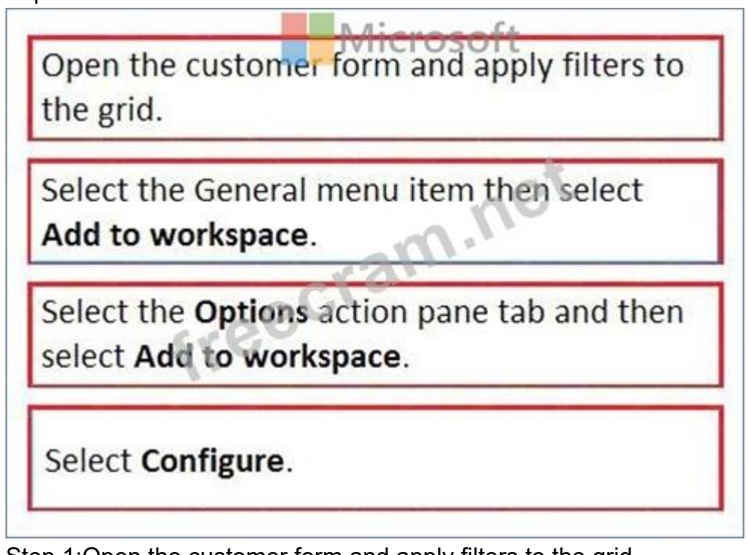

Actions

- Navigate to the Workspace form and select **Find form to add**.
- Select **Workspace and Presentation options**.
- Select the **Options** action pane tab and then select **Add to workspace**.
- Open the customer form and apply filters to the grid.
- Select **Configure**.
- Select the General menu item then select **Add to workspace**.

- Open the customer form and apply filters to the grid.
- Select the General menu item then select **Add to workspace**.
- Select the **Options** action pane tab and then select **Add to workspace**.
- Select **Configure**.

freecram.net

Explanation:

Step 1:Open the customer form and apply filters to the grid.

To add a list to a workspace, first sort or filter the list on the page so that it shows the information as you want it to appear in the workspace.

Step 2: Select the General menu item then select Add to workspace
This workspace will be selected in step 3.
Step 3: Select the Options actions pane tab and then select Add to workspace.
For some pages that include lists, the Add to workspace personalization feature is available in the Personalize group on the Options tab of the Action Pane. This feature lets you push relevant information from the current list to a specific workspace.

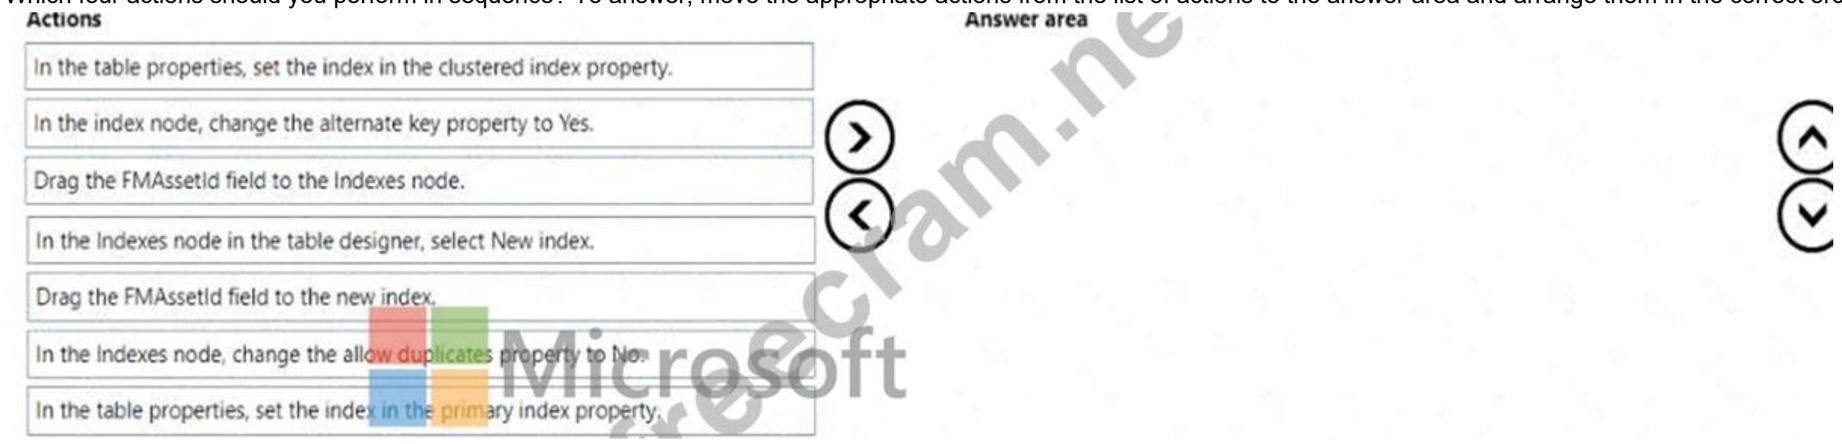

Step 4: Select Configure
After you select Configure, a dialog box appears, where you can select the columns that should appear in the list in the workspace.

NEW QUESTION: 48
You create a table in Dynamics 365 Finance.
You must create a unique index from an existing field named FMAssetId
You need to set the index as the primary key of the table after you create the index.
Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:

NEW QUESTION: 49

You are the Dynamics 365 Finance Developer.

You have the following class definition:

```
class WebShopOrderValidations
{
  public static void checkQtyValue(int Qty = 0)
  {
    ...
  }
}
```

You need to create an extension class and wrap the method by using Chain of Command (CoC), if the value of the Qty variable is less than 5, the code must cause an exception.

How should you complete the code segment? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

```
[ExtensionOf(classStr(WebShopOrderValidations))]
```

final class WebShopOrdVal_Extension
final class WebShopOrderValidations_MyExtension
static class WebShopOrderValidationsMy_Extension
class WebShopOrderValidations_Extension

```
{
```

public static void checkQtyValue(int Qty)
public void checkQtyValue(int Qty)
public static int checkQtyValue(int Qty)
public static void checkQtyValue(int Qty = 0)

```
  {
    next checkQtyValue(Qty);
    if (Qty < 5)
    {
      throw error("Quantity cannot be smaller than 5");
    }
```

freeexam.net

Microsoft

Answer:

```
[ExtensionOf(classStr(WebShopOrderValidations))]
```

final class WebShopOrdVal_Extension
final class WebShopOrderValidations_MyExtension
static class WebShopOrderValidationsMy_Extension
class WebShopOrderValidations_Extension

```
{
```

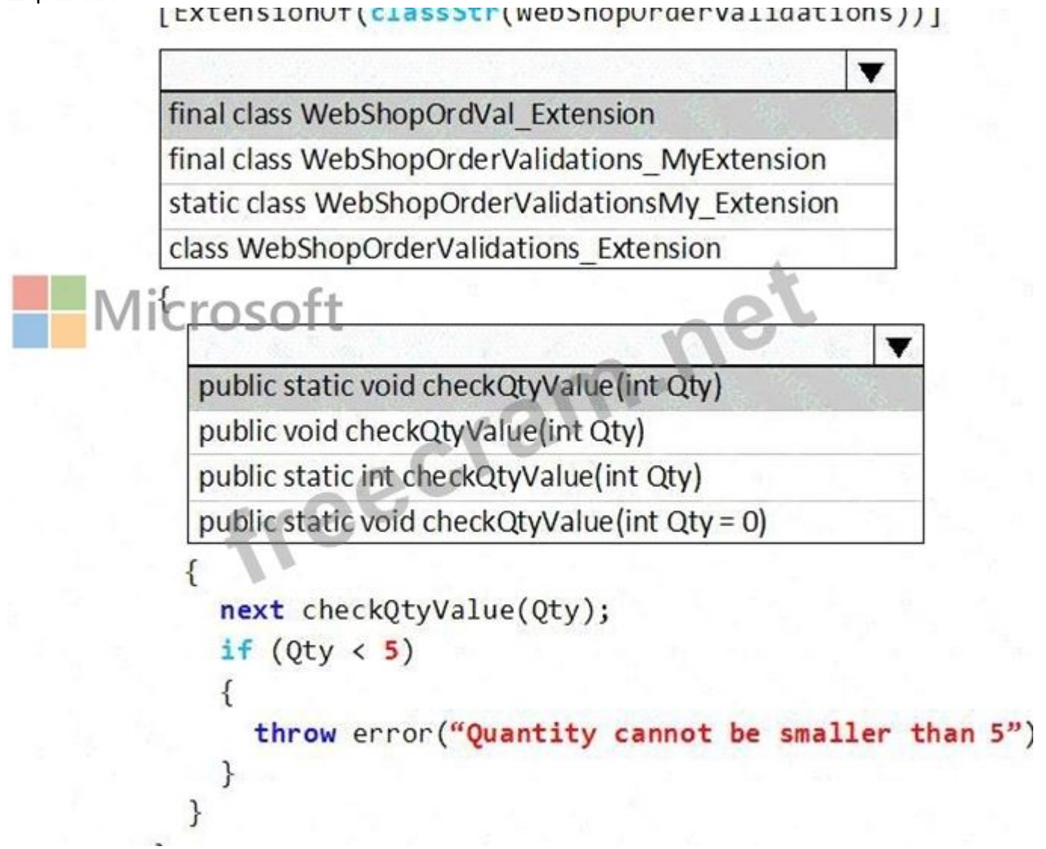

public static void checkQtyValue(int Qty)
public void checkQtyValue(int Qty)
public static int checkQtyValue(int Qty)
public static void checkQtyValue(int Qty = 0)

```
  {

You need to resolve the issue for UserB.

Which framework should you use?

A. RunBaseBatch

B. SysOperationSandBox

C. SysExtension

D. SysOperation

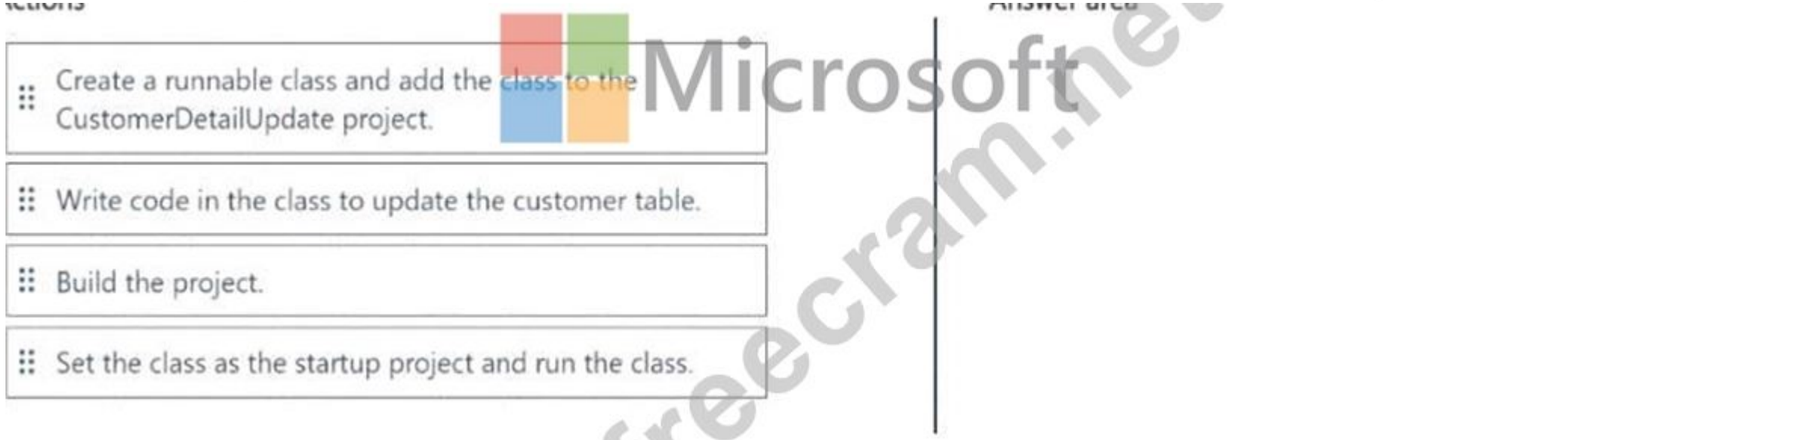

Answer: (SHOW ANSWER)

NEW QUESTION: 70

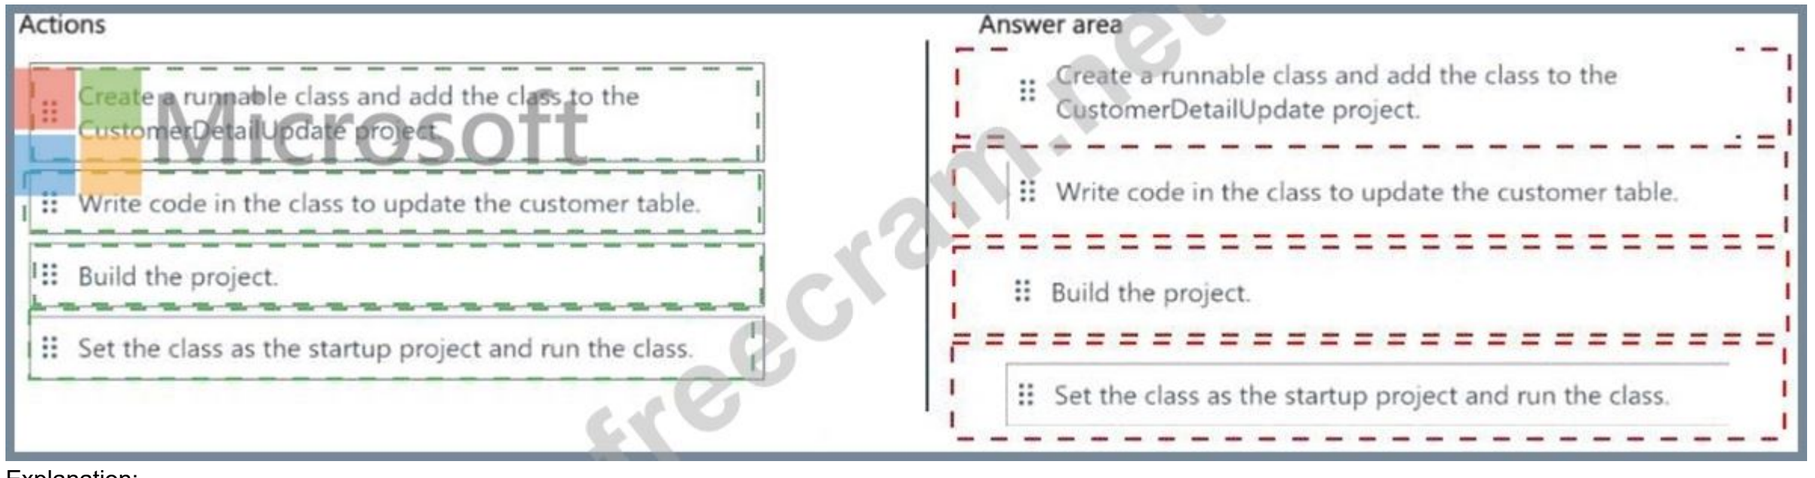

You create a Visual Studio project named CustomerDetailUpdate.

You must update data in a table named CustTable. You must be able to run the code from Visual Studio.

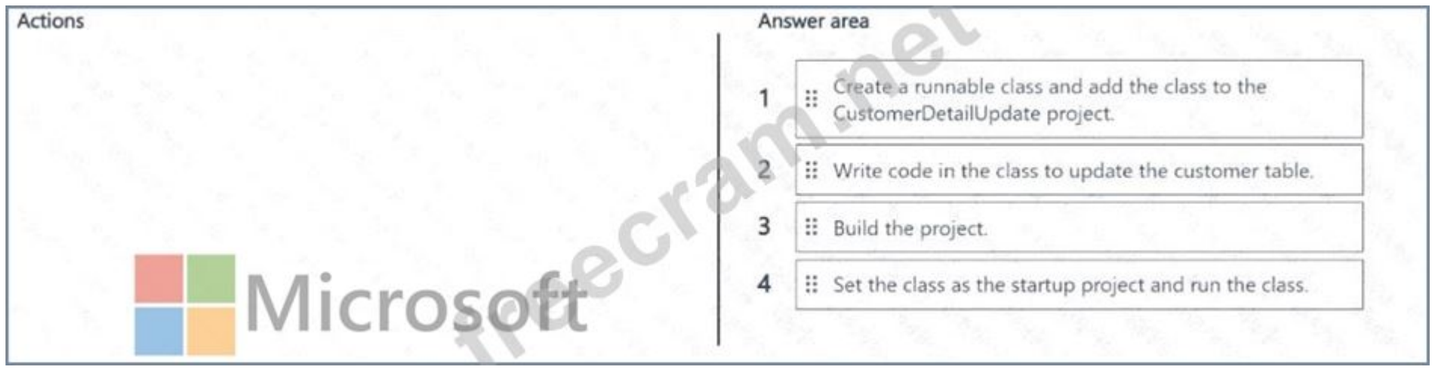

In which order should you perform the actions? To answer, move all actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:

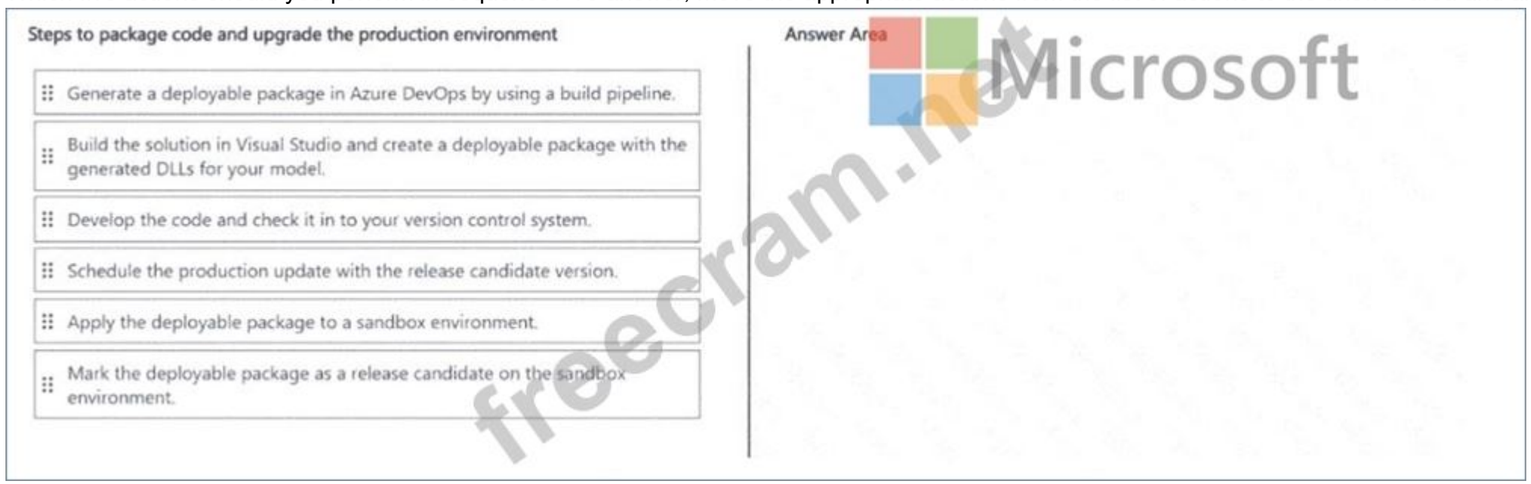

NEW QUESTION: 71

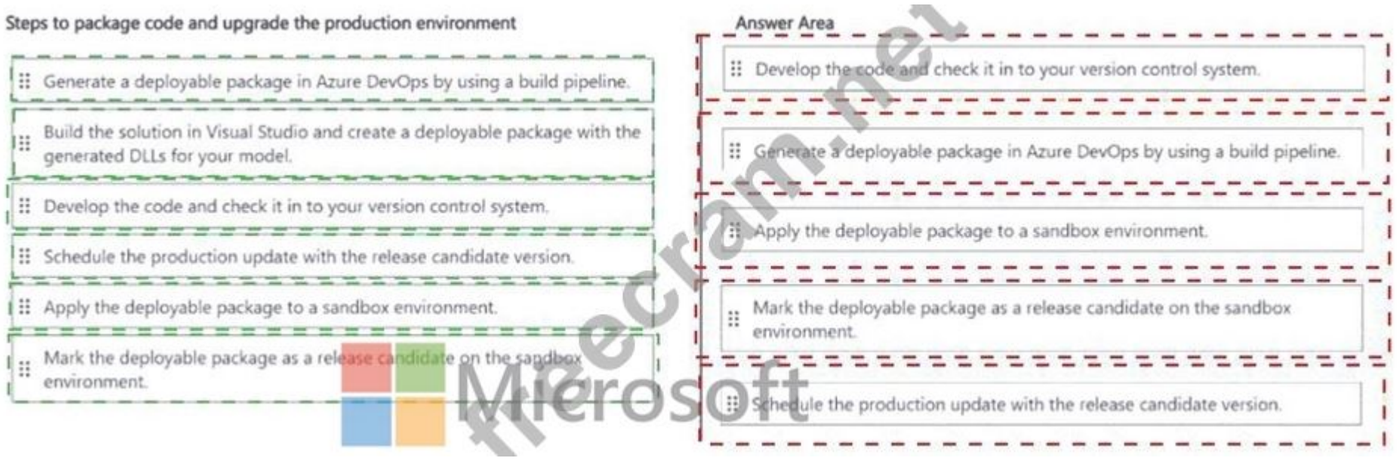

Developers at a company discover a bug in the production environment You update the existing code in a development environment to resolve the bug.

You need to get the updated code to the production environment by using Azure DevOps.

Which five actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

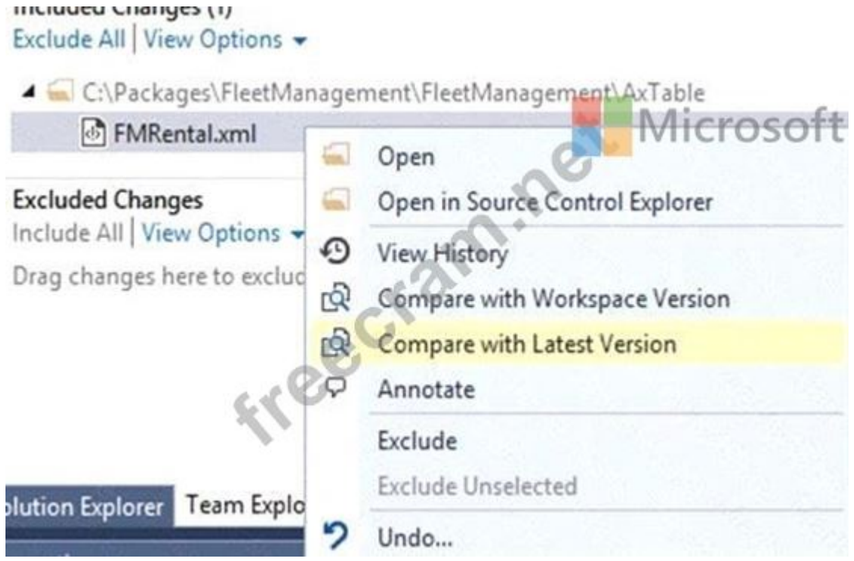

Answer:

Explanation:
Develop the code and check it in to your version control system.
Generate a deployable package in Azure DevOps by using a build pipeline.
Apply the deployable package to a sandbox environment.
Mark the deployable package as a release candidate on the sandbox environment.
Schedule the production update with the release candidate version.

NEW QUESTION: 72
You are a Dynamics 365 Finance developer.
You make changes to an existing class.
You need to compare the code that is in source control with the updated class. In Visual Studio, you display Team Explorer.
What are three possible ways to achieve the goal? Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.
A. In Team Explorer, select Compare with Latest Version.
B. In Team Explorer, select Compare with Workspace Version.
C. In Team Explorer, select Compare Files.
D. Run the tf diff command.
E. Run the vsdiffmerge command.
Answer: (SHOW ANSWER)
Example:
In Team Explorer, right-click FMRental.xml, and select Compare with Latest Version.

freecram.net Microsoft

* Choose Compare with Latest Version to see how the changes you have made compare to the latest version of the file on your Team Foundation Server.
* Choose Compare with Workspace Version to see what changes you have made to the version you checked out.

D: The diff tool of Visual Studio is very good to compare two files.

It compares, and if it is possible, displays differences between two files, files in two folders, or a shelveset and a local or a server file.

Syntax:

tf diff[erence] itemspec [/version:versionspec] [/type:filetype]
[/format:format [/ignorespace] [/ignoreeol] [/ignorecase] [/recursive]
[/options][/noprompt][/login:username,[password]]

NEW QUESTION: 73

You need to select an integration strategy to meet the new freight processing requirement. Which two integration strategies can you use? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

A. batch data API EC.
B. asynchronous integration
C. custom web service
D. OData
Answer: A,B (LEAVE A REPLY)

NEW QUESTION: 74

You create a new class.

Class compilation must fail if a specific method in the source code is called.

You need to mark the class with the appropriate attribute.

Which attribute should you use?

A. SysAppSecurityAttribute

B. SysTestCategory
C. SysObsoleteAttribute
D. SysAttribute
Answer: (SHOW ANSWER)

NEW QUESTION: 77
A company uses Dynamics 365 Finance.
You create a batch class for the company by using the SysOpefationFramework. The data contract class contains a Boolean and a date field that are displayed in the dialog as a checkbox and date picker field, respectively.
If the checkbox is selected, the date picker field must default to today's date unless users manually select a date.
You need to implement the checkbox functionality.
In which class should you implement the functionality?
A. Controller
B. Service
C. Contract
D. UIBuilder
Answer: (SHOW ANSWER)

NEW QUESTION: 78
A company uses Dynamics 365 Finance. The company stores its software repository in a Git-based version control system.
The company requires you to add a new feature to the existing code.

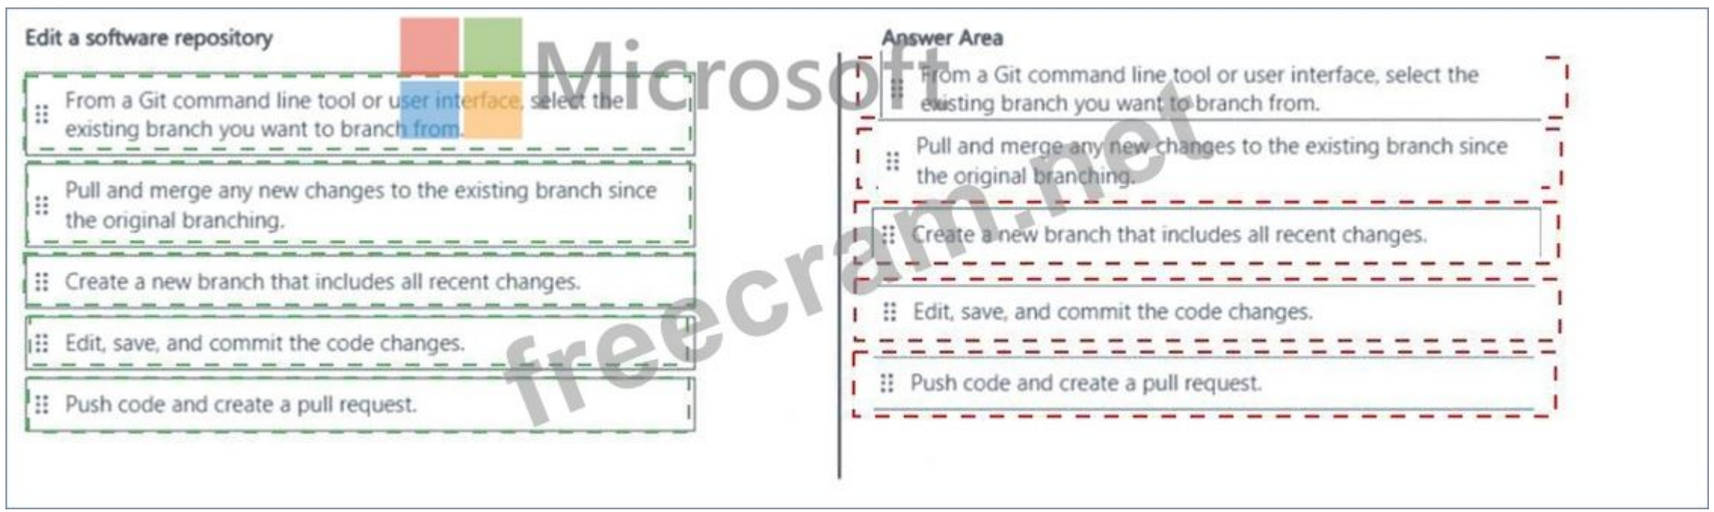

You need to add your changes to the software repository.

In which order should you perform the actions? To answer, move all actions from the list of actions to the answer area and arrange them in the correct order.

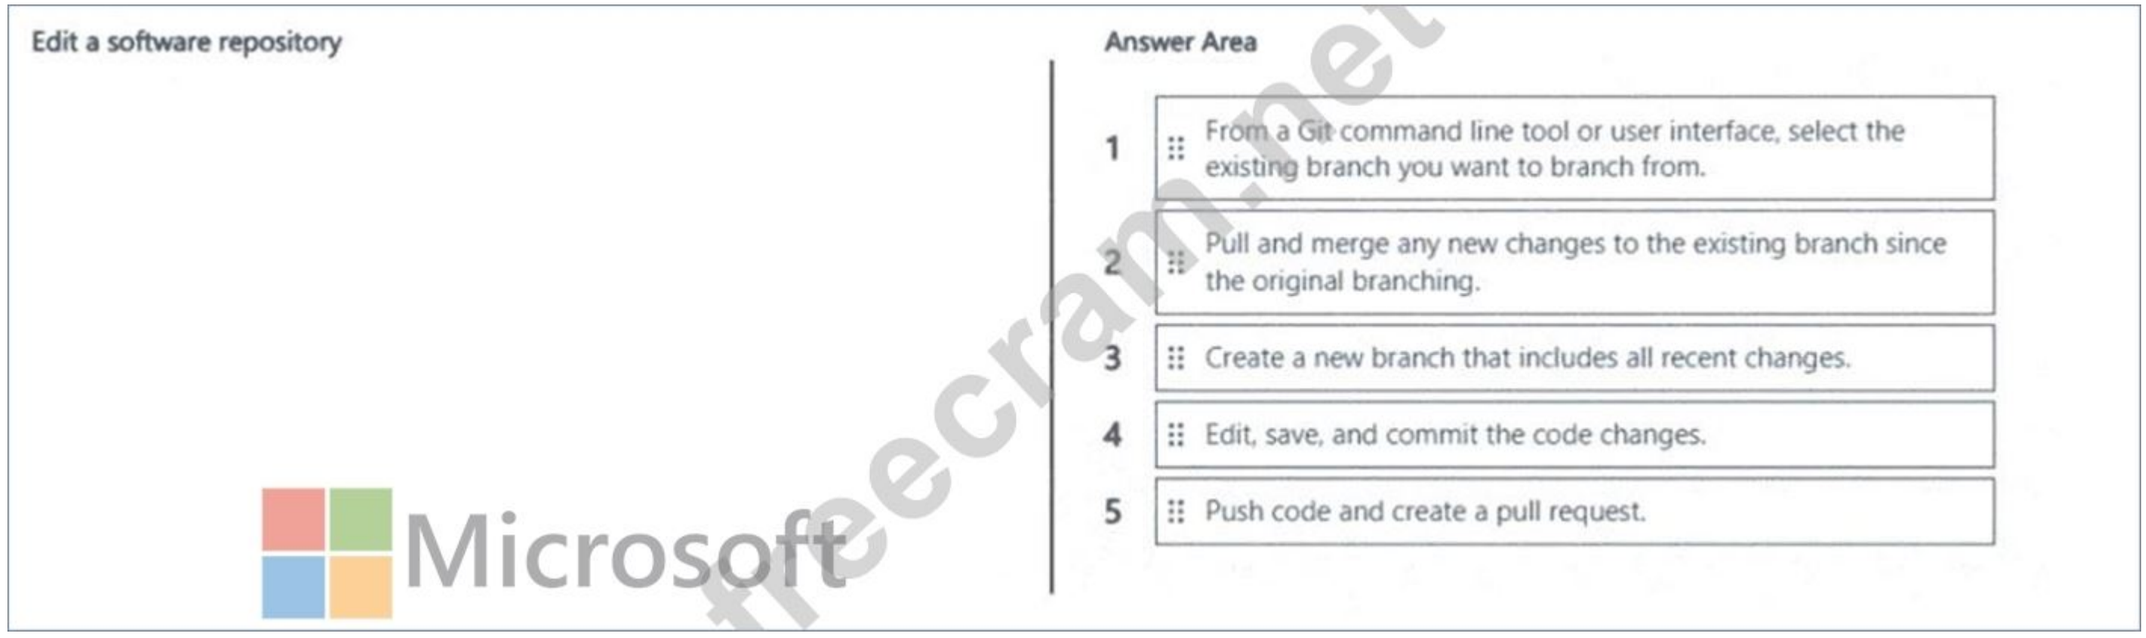

Microsoft
freecram.net

Answer:

Microsoft
freecram.net

Explanation:

NEW QUESTION: 79

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have an enumeration named truckStatus that has the following statuses:

* Empty
* Loaded
* Completed

You have the following code:

```
switch (truckTable.TruckStatus
{
  case TruckStatus::Empty:
    Info("1");
    break;
  case TruckStatus::Loaded:
    Info("2");
    break;
  case TruckStatus::Completed:
    Info("3");
    break;
```

You need to extend this enumeration and add the following statuses to the enumeration: Quarantine, InTransit. You must then modify code that validates the switch statement.

Solution: Add a post handler to the method that checks the enumeration and logic for your new enumeration values using the integer value of the enumeration.

```
if ( truckTable.TruckStatus == 4 || truckTable.TruckStatus == 5)
{
   Info("Extended");
}
```

Does the solution meet the goal?

A. No

B. Yes.

Answer: (SHOW ANSWER)

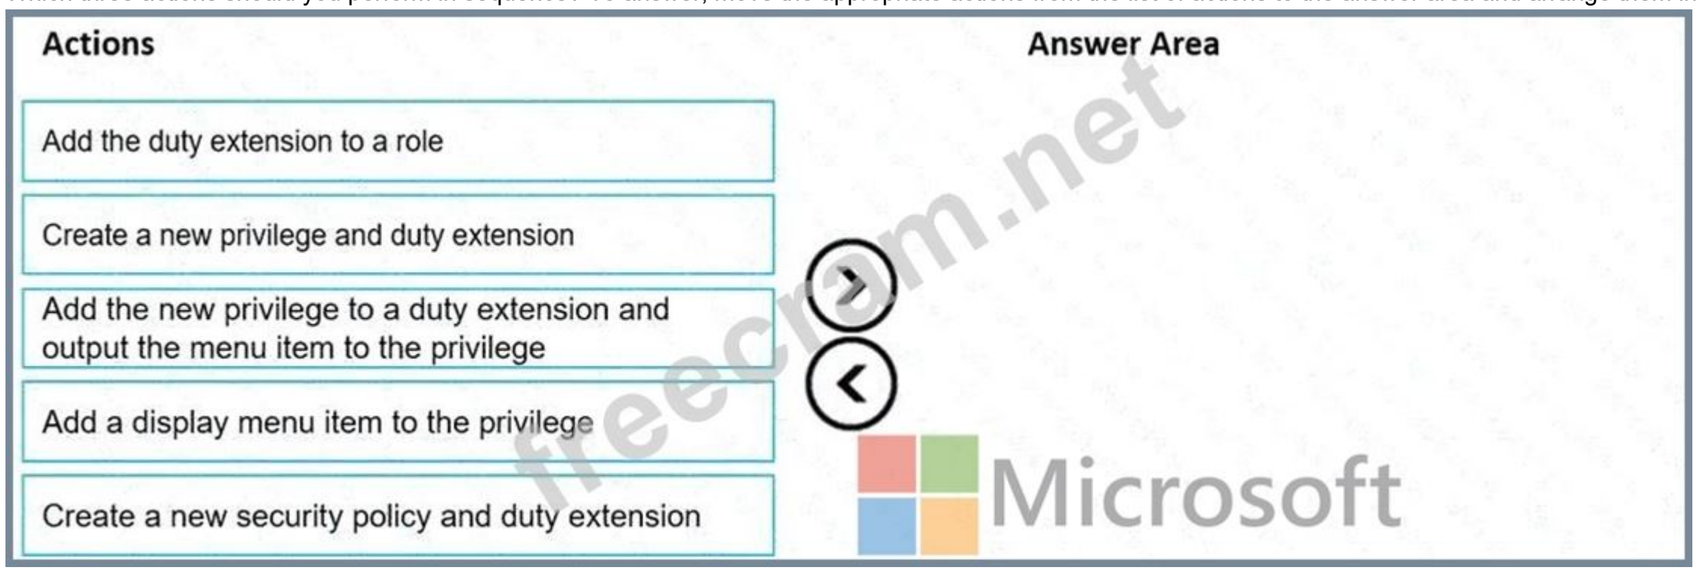

NEW QUESTION: 80

A company uses Dynamics 365 Finance.

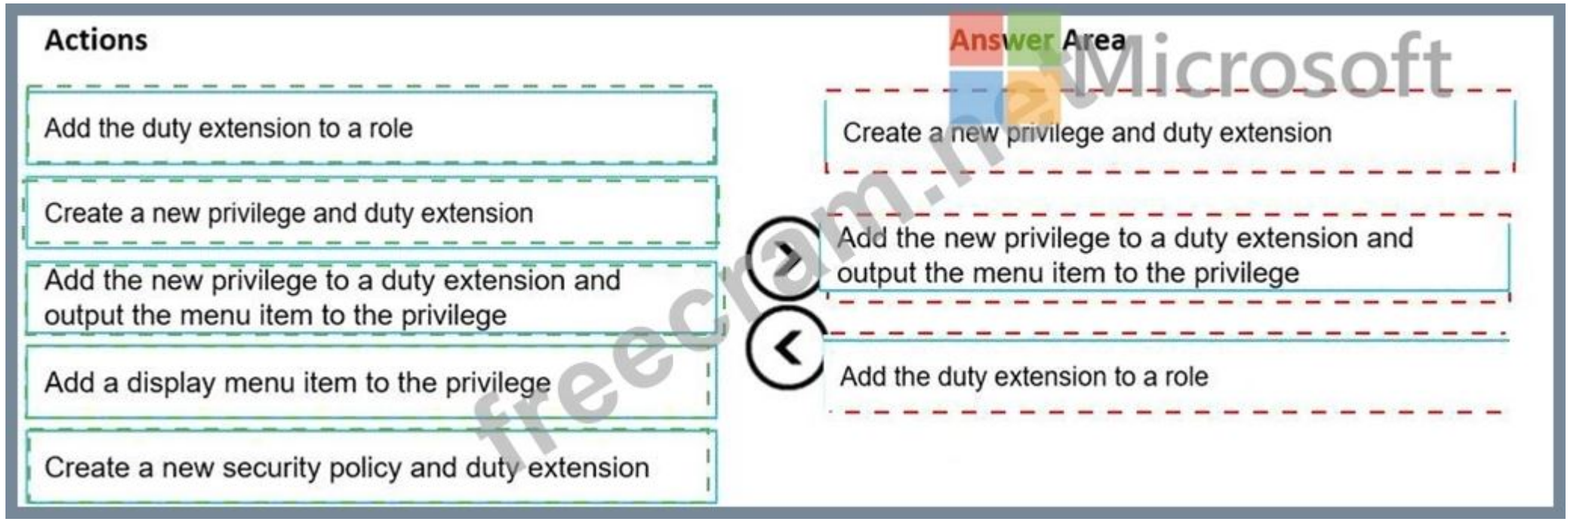

A user is unable to access the new Customer Credit Limit report.

You need to configure security for the report.

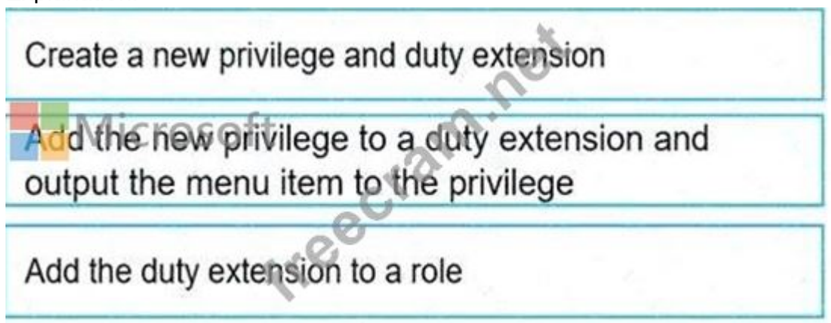

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:

NEW QUESTION: 81

You ate Dynamics 365 Finance developer.

You need lo initialize an embedded Microsoft Power BI report.

Which code segment should you add to the form initialization method?

A.
```
initializeCustomReportControl(resourceName, formGroupControl, reportCustomParams)
```

B.
```
importAndStoreReport(powerBICongifuration, resourceName, isUpdate)
```

C.
```
deployOrUpdateReport(powerBIConfiguration, reportName, resourceName)
```

D.
```
initializeReportControlInternal(powerBIConfiguration, reportParameters, reportControl, showError)
```

Answer: (SHOW ANSWER)

NEW QUESTION: 82

You are a Dynamics 365 Finance developer. You make changes to an existing custom class.

The code comparison tool shows version conflicts between your version and the latest checked-in version of the custom class.

In Visual Studio, you open the Source Control Explorer. You locate the latest changeset for the class and you open the changeset in Team Explorer.

You need to compare the latest code that is in source control with the code that you created.

Which option should you use?
A. Compare with Workspace Version
B. Compare with Previous Version
C. View History
D. Compare with Latest Version
Answer: (SHOW ANSWER)
Reference:
https://docs.microsoft.com/en-us/azure/devops/repos/tfvc/compare-files?view=azure-devops

NEW QUESTION: 83
You need to modify the environment to meet User1's requirements.
What should you do?
A. Create an extension of CashDisc in a new project and add the field to the extended table,
B. Create a new table named CashDiscExtension in the project.
C. Use Open Designer to add the field to the table.
D. Create an overlayer of CashDisc in a new project and add the field.
Answer: (SHOW ANSWER)
Scenario: A sales manager suspects a data-related issue in the vendor exclusion list. User1 must identify the user who created the referenced exclusion records.

NEW QUESTION: 84
A company uses Dynamics 365 Finance.
You must add fields to a standard Dynamics 365 Finance form by using Visual Studio.
You need to create an extension for the form.
What should you do?
A. Add the form directly to the project and add the new fields.
B. Create a new class that extends the form.
C. Create an extension of the standard form in the AOT and add it to the project.
D. Drag the form from Application Explorer to the project.
Answer: (SHOW ANSWER)

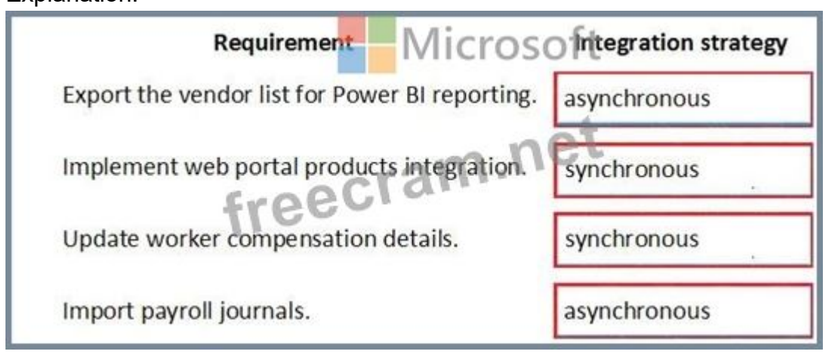

NEW QUESTION: 85
You need to implement the company's integration requirements.
Which integration strategies should you use? To answer, drag the appropriate integration strategies to the correct requirements. Each integration strategy may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Box 1: asynchronous

An asynchronous pattern is a non-blocking pattern, where the caller submits the request and then continues without waiting for a response.
Box 2: Synchronous
A synchronous pattern is a blocking request and response pattern, where the caller is blocked until the callee has finished running and gives a response.
Box 3: Synchronous
Box 4: asynchronous
Batch data is asynchronous.
Reference:
https://docs.microsoft.com/en-us/dynamics365/f in-ops-core/dev-itpro/data-entities/integra tion-overview#synchronous-vs-asynchronous-in tegration-patterns

NEW QUESTION: 86
You are training a new Dynamics 365 Finance developer.
You need to explain the relationships between models, packages, and projects to the new hire.
Which three design concepts should you explain? Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.
A. A project can contain elements from multiple models.
B. A model is a group or collection of elements that constitute a distributable software solution.
C. A Visual Studio project can belong to more than one model.
D. A model is a design time concept.
E. A package is a deployment unit that may contain one or more models.
Answer: (SHOW ANSWER)
B: A model is a group of elements, such as metadata and source files, that typically constitute a distributable software solution and includes customizations of an existing solution.
D: A model is a design-time concept, for example a warehouse management model or a project accounting model.
E: A package is a deployment and compilation unit of one or more models.
Reference:
https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/dev-tools/models

NEW QUESTION: 87
You are training a new Dynamics 365 Finance and Operations developer.
You need to recommend where asynchronous integrations should be used instead of synchronous integrations.
For which scenario should you recommend asynchronous integration?
A. A retailer requires all new customer data captured at point of sale (POS) terminals through the day sent back to the system.
B. A service company needs workers to be able to access just-in-time inventory data from the field by using a third-party Software as a Service (SaaS) application to ensure they have parts to complete a service.
C. A retailer wants to ensure gift card balances are communicated back to the system from point of sale (POS) terminals in near real-time.
D. A company uses workflow for purchasing approvals, which then sends just-in-time approval information to a third-party application for approvers to review.
Answer: (SHOW ANSWER)
Classic data integration: Asynchronous,
Classic data integration provides asynchronous and uni-directional data synchronization experience between model-driven applications in Dynamics 365 and Dynamics 365 Finance and Operations applications. It's an IT-administrator led experience and you must schedule the data sync jobs to run on a specific cadence. Classic data integration is suitable for business scenarios that involves bulk ingress/egress of data across Dynamics 365 applications.
Note: Dual-write: Synchronous, Bi-directional.

Dual-write provides synchronous, bi-directional, near-real time experience between model-driven applications in Dynamics 365 and Finance and Operations applications. Data synchronization happens with little or no intervention and is triggered by create, update and delete actions on an entity. Dual-write is suitable for interactive business scenarios that span across Dynamics 365 applications.

NEW QUESTION: 88
A company uses Dynamics 365 finance and operations apps. The company plans to integrate third-party products with Dynamics 365 Finance.
You need to select the appropriate data integration option for each scenario.
Which data integration option should you select? To answer, drag the appropriate data integration options to the correct scenarios. Each data integration option may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE; Each correct selection is worth one point.

Answer:

Explanation:

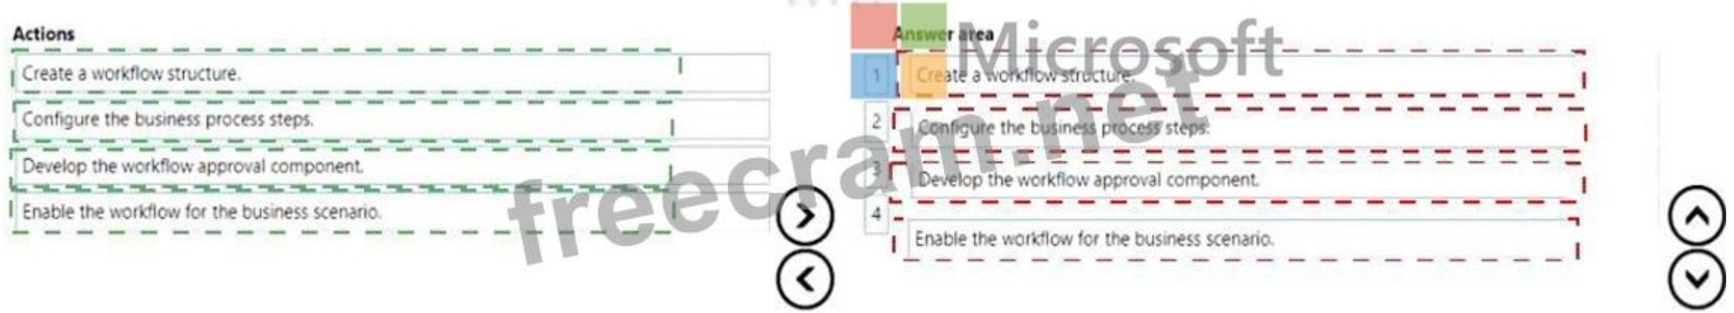

NEW QUESTION: 89
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
A company is implementing Dynamics 365 finance and operations apps.
The company must test the functionality of its native Dynamics 365 finance and operations apps by using the Acceptance test library (ATL).

You need to implement ATL classes on test data within a development environment.
Solution: Record business process steps and save as developer documentation by using Task recorder.
Does the solution meet the goal?
A. Yes
B. No
Answer: (SHOW ANSWER)

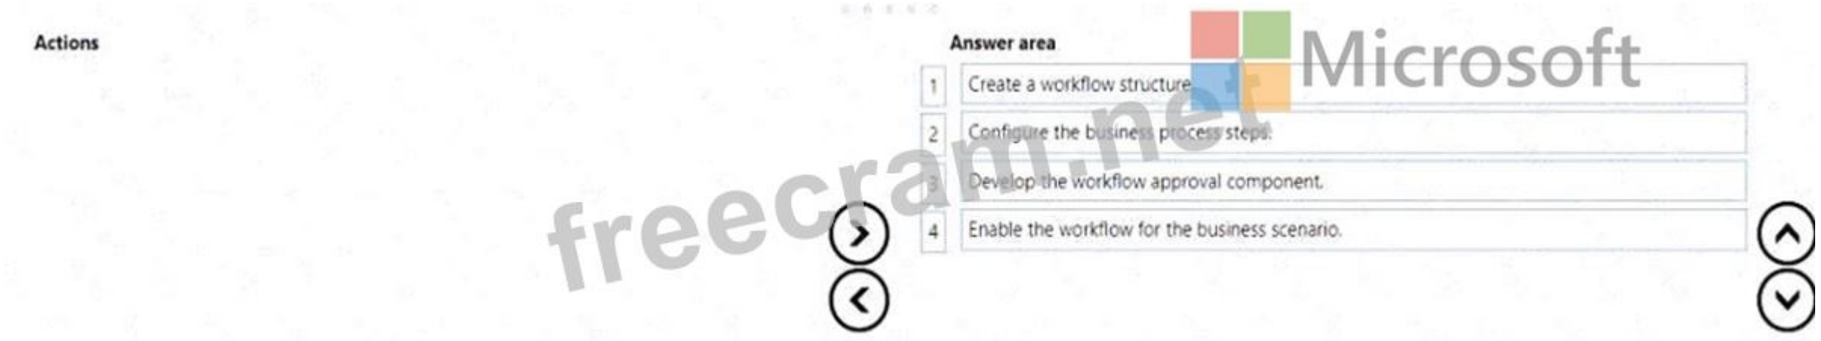

NEW QUESTION: 90
An error occurs when an employee creates a new workflow using a custom approval element to track the status of a document.
You need to ensure that the workflow is created correctly.
in which order should you perform the actions? To answer, move all actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:

freecram.net
Microsoft

NEW QUESTION: 91
You create a custom payroll form.
You must ensure that only the finance manager can view the form.
You need to set up security for the form.
Which three actions should you perform? Each correct answer presents pan of the solution.
NOTE; Each correct selection is worth one point.
A. Add the privilege to a new security policy.
B. Add the duty to the security role of system users.
C. Add the duty to the security role for finance managers.
D. Add the privilege to a new duty.
E. Add the menu item of the form to the entry point of a new privilege.
Answer: (SHOW ANSWER)

NEW QUESTION: 92
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
A company is implementing Dynamics 365 finance and operations apps.
The company must test the functionality of its native Dynamics 365 finance and operations apps by using the Acceptance test library (ATL).
You need to implement ATL classes on test data within a development environment.
Solution: Create command classes to run business practices. Call the classes by using the SysTest framework.
Does the solution meet the goal?
A. No
B. Yes

Answer: (SHOW ANSWER)

NEW QUESTION: 93
You need to test and map the freight processing integration.
Which data management concept is used for the XML file to import the freight processing data?
A. data entity
B. data project
C. data job
D. data package
Answer: (SHOW ANSWER)

NEW QUESTION: 94
A company is implementing Dynamics 365 finance and operations apps.
The company must test its native Dynamics 365 finance and operations apps by using multiple values.
You need to create a test case within a development environment.
Which attribute should the test case use?
A. SysTestCategory
B. SysTestRowInactive
C. SysTestRow
Answer: (SHOW ANSWER)

NEW QUESTION: 95
A company uses Dynamics 365 Finance.
You create a new form that must have the ability to open from the menu.
You need to set up the form for the menu.
What should you add to the menu?
A. action menu item
B. display menu item
C. menu reference
D. output menu item
Answer: (SHOW ANSWER)

NEW QUESTION: 96
You need to integrate Dynamics 365 Finance win the following applications.

Application	Scenario	Real-time data required
Dynamics 365 Customer Service app	Sales representatives must be able to change the credit limit for customers by using the app.	Yes
e-commerce website	Customers use the website to request information about product availability.	Yes
on-premises mainframe system	The system generates sales orders. The sales orders must be imported daily into Dynamics 365 Finance.	No

Which integration patterns should you use? To answer, drag the appropriate patterns to the correct applications. Each pattern may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content. NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION: 97

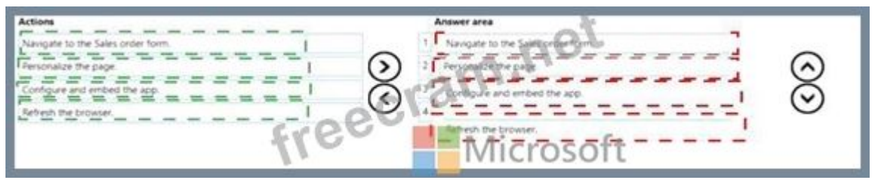

You create a Power Apps app to display customer feedback.

You need to submit and display customer feedback for each sales order.

In which order should you perform the actions? To answer, move all actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:

Actions

Answer area

1. Navigate to the Sales order form.
2. Personalize the page.
3. Configure and embed the app.
4. Refresh the browser.

NEW QUESTION: 98

A company uses Dynamics 365 Finance.

The company deploys a custom table named LoyaltyCustomerTable. The table has a 1:1 relationship with a table named CustTable. Both tables contain a unique field named AccountNum and share the same data.

Using event handlers, all edits to CustTable are reflected within LoyaltyCustomerTable.

The LoyaltyCustomerTable data is maintained by using the LoyaltyCustomerTable form. This form selects all data from both LoyaltyCustomerTable and CustTable and displays the records sorted by LoyaltyCustomerTableAccountNum.

LoyaltyCustomerTable was mistakenly created with no indexes. A significant delay occurs when users open the LoyaltyCustomerTable form.

You need to improve performance by creating an index.

Which method should you use?

A. Create a foreign key relation on CustTable with Related Table set to LoyaltyCustomerTable and Index set to RecId.

B. Create a foreign key relation on CustTable with Related Table set to LoyaltyCustomerTable and Index set to AccountIdx.

C. Create an index on CustTable for Redd.

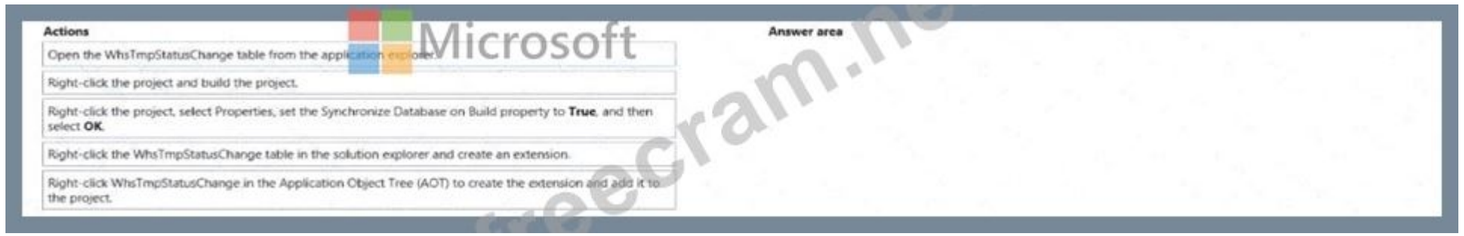

D. Create an index on LoyaltyCustomerTable for AccountNum.

Answer: (SHOW ANSWER)

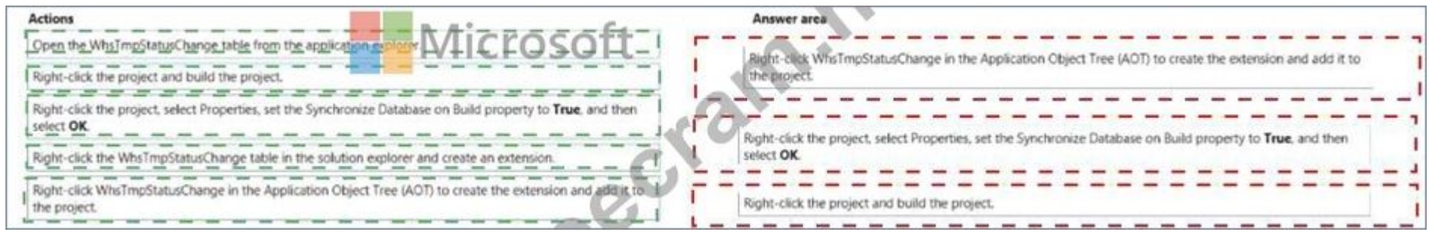

NEW QUESTION: 99

You need to create an extension of the table and perform a build and synchronize the newly extended table.

Which three actions should you perform in sequence? to answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

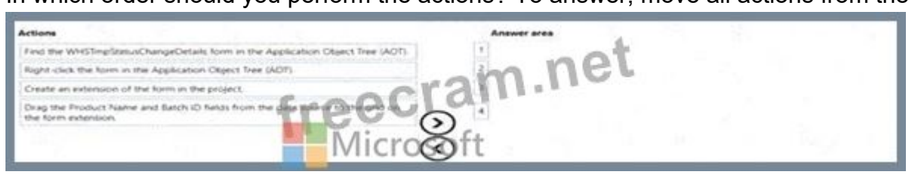

Explanation:

NEW QUESTION: 100

You need to add new fields to the standard form and organize the grid to meet the requirements.

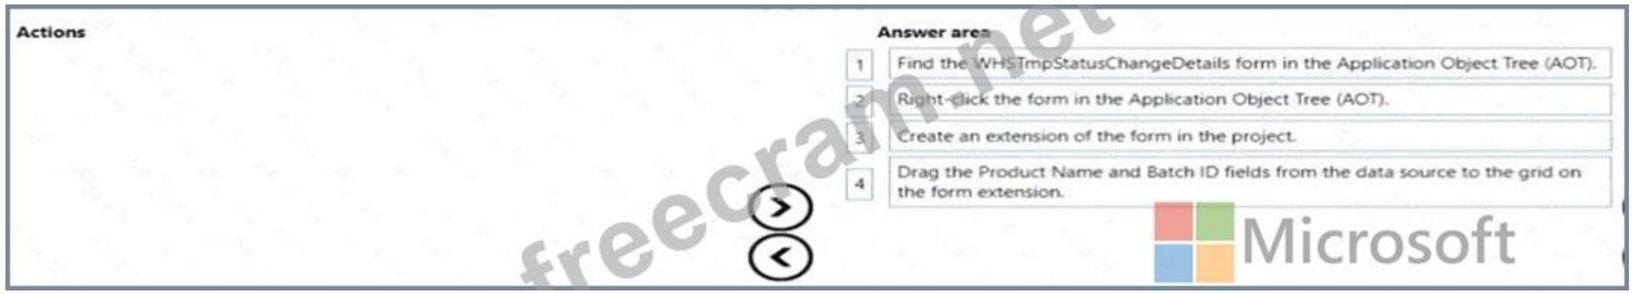

In which order should you perform the actions? To answer, move all actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:

NEW QUESTION: 101

A company uses Dynamics 365 Finance and Dynamics 365 Supply Chain Management.

The company plans to integrate Dynamics 365 Sales customer data with Finance and Supply Chain Management.

You need to integrate the data.

Which data integration option should you select for each scenario? To answer, drag the appropriate data integration options to the correct scenarios. Each data integration option may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Microsoft

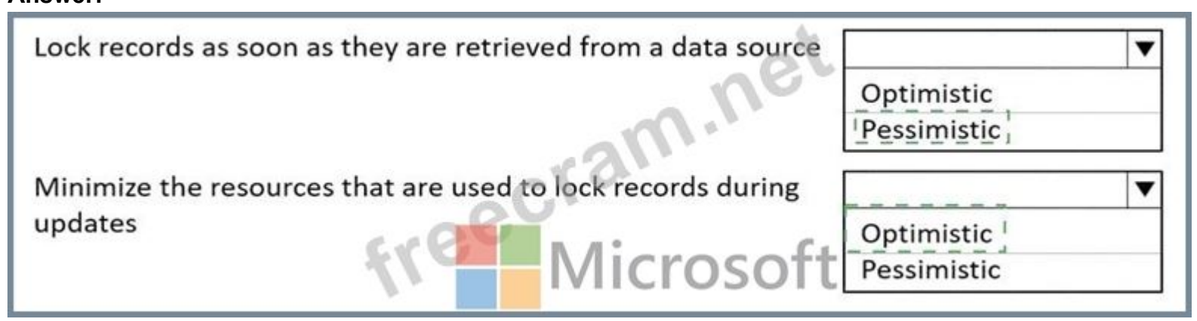

NEW QUESTION: 102
You need to design a form to display the check data.
Which two form patterns can you use? Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.
A. Details master
B. Simple List
C. List page
D. Simple List and Details
Answer: (SHOW ANSWER)

NEW QUESTION: 103
A company plans to integrate Dynamics 365 finance and operations apps with an external application. The apps must send each vendor ' s name and address in a single field to the external application. You need to add a computed field to meet the requirement. What should you do?
A. Create an extension for VendVendorV2Entity, select the Fields node, select New, and then select Mapped Field.
B. Create an extension for VeridTable and then add the new display method.
C. Create an extension of VendVendorV2Entity, select New, and then select String Unmapped Field.
Answer: C (LEAVE A REPLY)

NEW QUESTION: 104
You develop a customization for Dynamics 365 Supply Chain Management.
You need to optimize performance for this customization.
Which concurrency control options should you implement? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:
Pessimestic and Optimistic
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

NEW QUESTION: 105

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You create a new form in a project.
You need to display tabs in a vertical alignment.
Solution: Apply the Details Master pattern.
Does the solution meet the goal?
A. Yes
B. No
Answer: (SHOW ANSWER)
https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/user-interface/section-tabbed-list-subpattern

NEW QUESTION: 106

You are a Dynamics 365 Finance developer.
You must extend the validate method of the SalesLine table by using Chain of Command. The value of a variable named SalesPrice must be greater than or equal to zero when adding new lines.
You need to create an extension class.
Which two code segments can you use? Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.

A.
```
[ExtensionOf(tableStr(SalesLine))]
final class SalesLine_Extension
{
    boolean validateWrite(boolean _skipCreditLimitCheck)
    {
        boolean ret;
        ret = next validateWrite(_skipCreditLimitCheck);
        if (ret && this.SalesPrice < 0)
        {
            ret = false;
        return ret;
    }
}
```

B.
```
[ExtensionOf(tableStr(SalesLine))]
final class SalesLine_Extension
{
    boolean validateWrite(boolean _skipCreditLimitCheck = false)
    {
        boolean ret;
        ret = next validateWrite(_skipCreditLimitCheck);
        if (ret && this.SalesPrice < 0)
        {
            ret = false;
        return ret;
    }
}
```

Microsoft

Answer:

Explanation:

NEW QUESTION: 113
You have a cloud-based Dynamics 365 Finance production environment.
You need to access the data to create Microsoft Power BI reports for the business.
What should you use?
A. aggregate measurements
B. DirectQuery
C. Analysis Cubes
D. Entity store
Answer: (SHOW ANSWER)
When you have completed modeling the aggregate measurement, you can deploy the aggregate measurement and continue with building KPIs and visualizations. You have 2 deployment choices:
Stage in Entity Store. This option leverages Entity store, the operational data store that enables near real-time PowerBI reporting.
In-memory real-time
Reference:
https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/analytics/model-aggregate-data

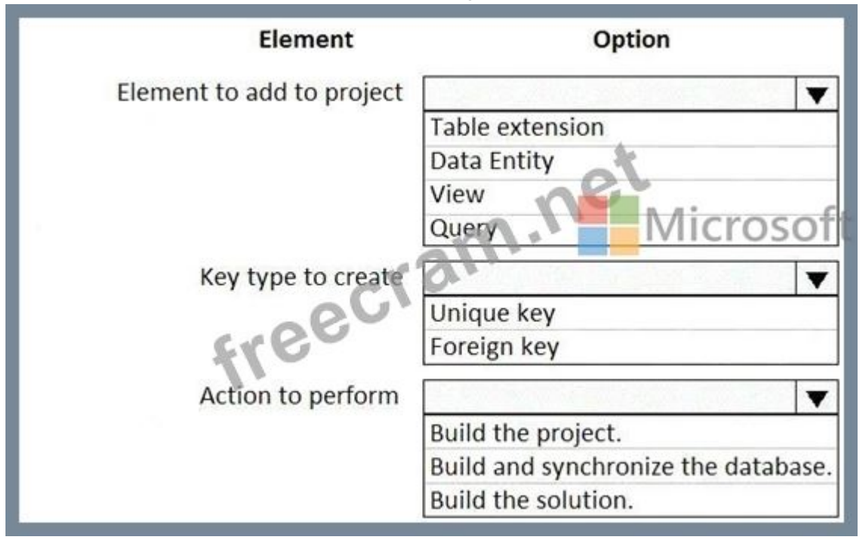

NEW QUESTION: 114
You are a Dynamics 365 Finance developer.
Users report that a sales table details form takes a long time to load and display data. You need to optimize the performance by implementing caching.
Which two actions should you perform? Each correct answer presents a complete solution.

freecram.net

NOTE: Each correct selection is worth one point.
A. Associate all display and edit methods with the form data source instead of the table.
B. Call the FormDataSource.cacheAddMethod method.
C. Create display and edit methods on the table instead of the form data source.
D. Call the FormDataSource.research method.
Answer: (SHOW ANSWER)

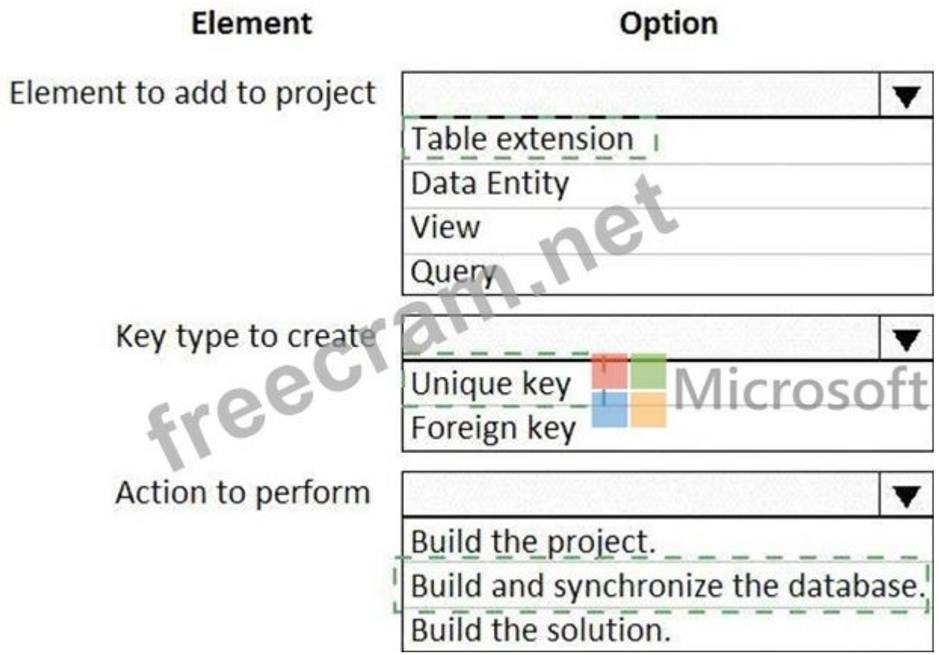

NEW QUESTION: 115
A company uses Dynamics 365 Finance.
The company requires you to create a custom service.
You need to create request and response classes for the custom service.
Which class attribute should you use?
A. DataContract
B. DalaEventHandler
C. DataCollection
Answer: (SHOW ANSWER)

NEW QUESTION: 116
You need to implement the integration for the Vendor Exclusion List form.
What should you do? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

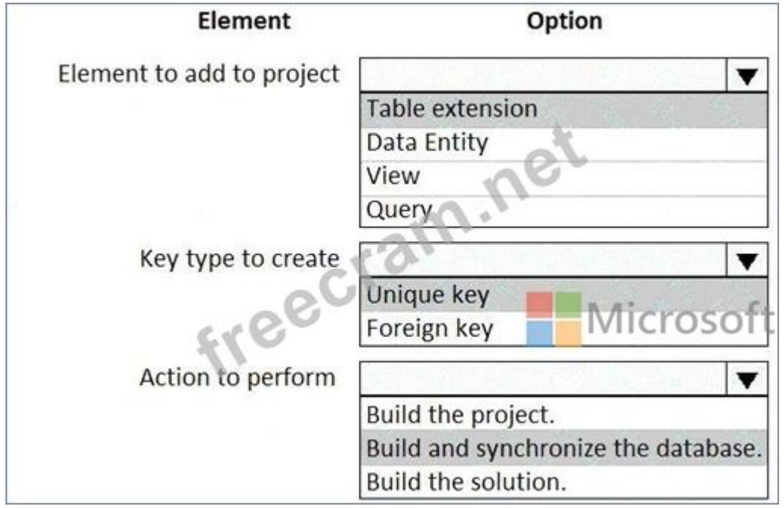

freecram.net
Microsoft

Answer:

Explanation:

Box 1: Table extension

Isolate all new vendor exclusion codes as a new assembly by creating a table named VendExclusions.

Implement the Excel integration for the Vendor Exclusion List form.

The table extension object allows you to add additional fields or to change some properties on a table provided by the Dynamics 365 Business Central service. In this way, you can add data to the same table and treat it as a single table.

Box 2: Unique key

Create an index for the table named PrimaryIdx that uses the following fields: CustAccount, ItemId, VendAccount.

Box 3: Build and synchronize the database.

A project property lets you specify that the synchronize operation for the database should be performed every time that you build the project. This can be useful when you're making changes to the table structure for an application. Each time that you build, you will know that the database is synchronized with the tables as they are defined in the project.
Reference:
https://docs.microsoft.com /en-us/dynami cs365/business-central/dev-itpro/developer/devenv-table-ext-object
https://docs.microsoft.com/en-us/dy namics365/fin-ops-core/dev-itpro/dev-tools/build-operations#synchroniz ing-the-database-at-each-build

NEW QUESTION: 117
A company uses Dynamics 365 Finance. The company has a customized version of a purchase requisition report.
You are designing the Report Data Provider (RDP) class for the new report.
You plan to use business logic to display the data in the report.
You need to ensure that the RDP class is decorated with the correct attribute.
Which attribute should you use?
A. SrsReportNameAttribute
B. SRSReportParaneterAttribute
C. DataContractAttribute
D. SRSReportOataSetAttribute
Answer: (SHOW ANSWER)

NEW QUESTION: 118
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You have an enumeration named truckStatus that has the following statuses:
* Empty
* Loaded
* Completed
You have the following code:

```
switch (truckTable.TruckStatus
{
  case TruckStatus::Empty:
    Info("1");
    break;
  case TruckStatus::Loaded:
    Info("2");
    break;
  case TruckStatus::Completed:
    Info("3");
    break;
}
```

You need to extend this enumeration and add the following statuses to the enumeration: Quarantine, InTransit. You must then modify code that validates the switch statement.
Solution: Add a post handler to the method that checks the enumeration and logic for your new enumeration values using a range comparison for your new values.

```
if ( truckTable.TruckStatus > TruckStatus::Completed)
{
   Info("Extended");
}
```

Does the solution meet the goal?

A. No

B. Yes

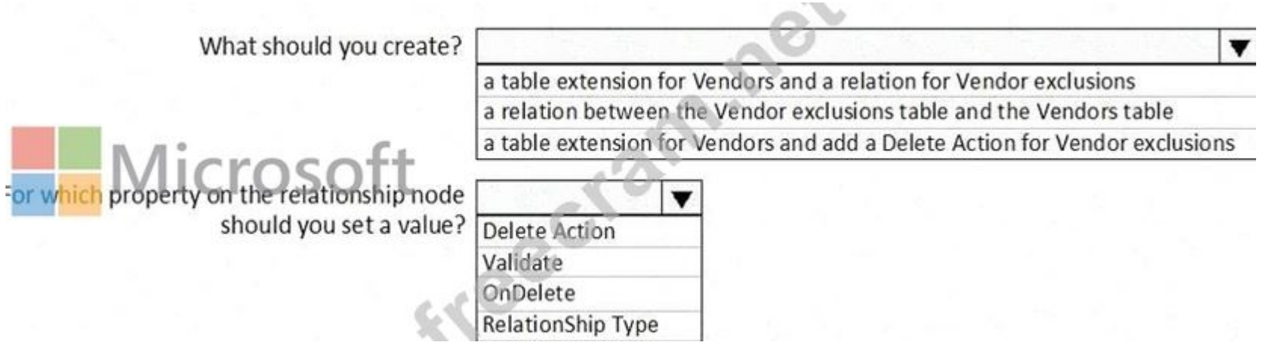

Answer: (SHOW ANSWER)

NEW QUESTION: 119

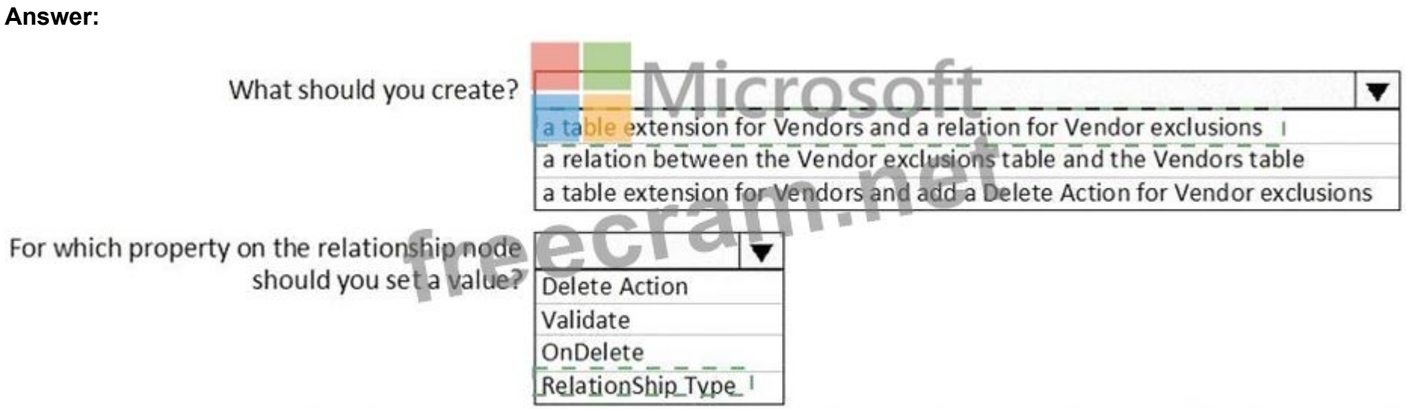

You need to create the new table for the vendor exclusion list.

What should you do? To answer, select the appropriate options in the answer area.

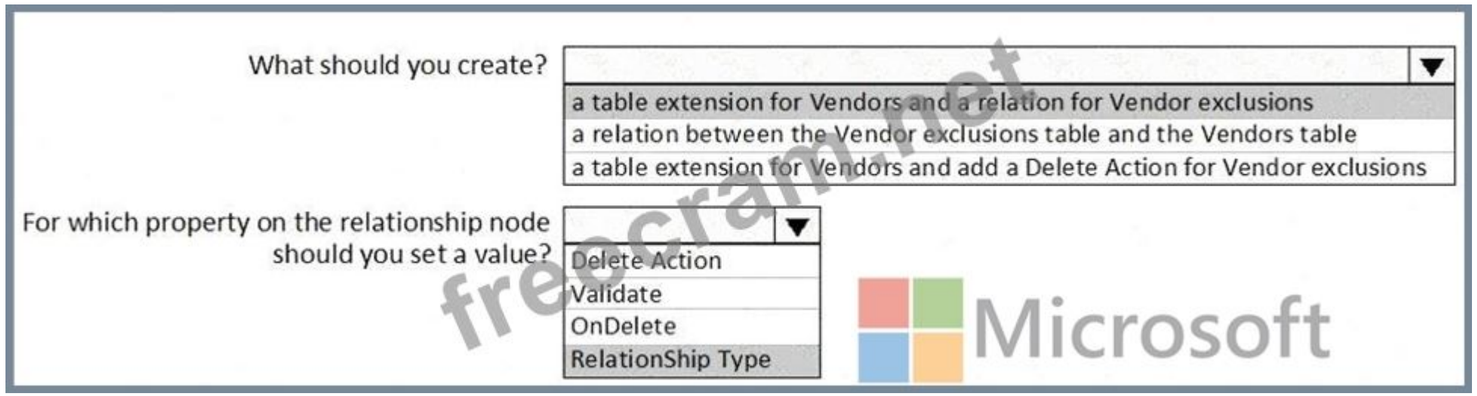

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Scenario: You must develop a new solution to maintain a Vendor exclusion list for each customer and item combination. The solution must meet the following requirements:

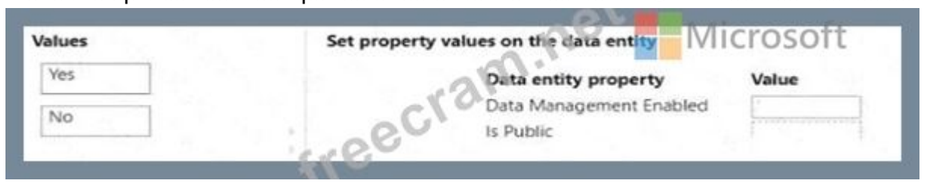

* Isolate all new vendor exclusion codes as a new assembly by creating a table named VendExclusions.
* Create an index for the table named PrimaryIdx that uses the following fields: CustAccount, ItemId, VendAccount.
* Ensure that users can open the Vendor Exclusion list report from the customer master form. The list must display the customer account, Item ID, and Vendor account fields.
* Maintain referential integrity with other tables.

Box 1: a table extension for Vendors and relation for the Vendor exclusions Box 2: RelationShip Type Reference:
https://docs.microsoft.com/en- u s/dynamics365/fin-ops-core/dev-itpro/data-entities/develop-composite-data-entities

NEW QUESTION: 120

You need to design the new data entity for the purchase order inquiries records.

Which values should you set on the data entity properties? To answer, move the appropriate values to the correct data entity properties. You may use each value once, more than once, or not at all- You may need to move the split bar between panes or scroll to view content NOTE: Each correct selection is worth one point.

Answer:

Explanation:

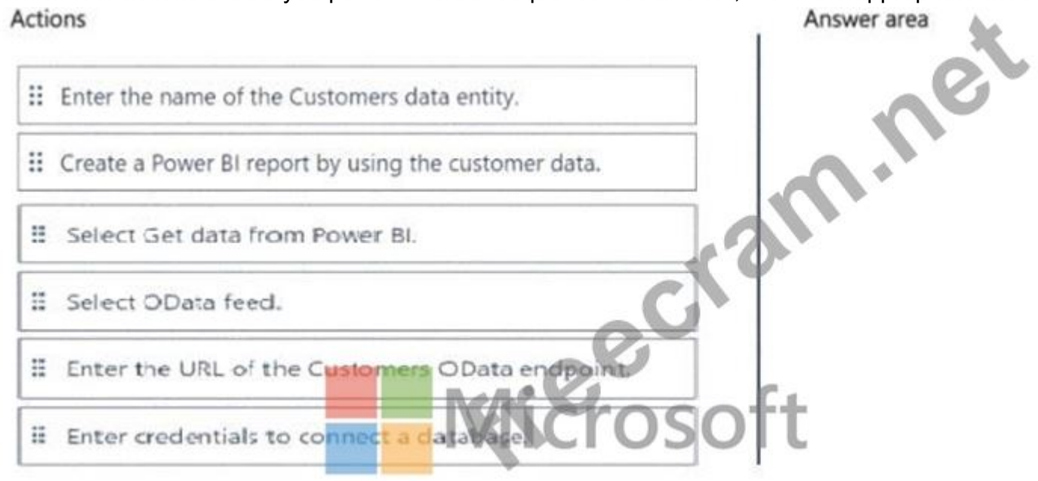

NEW QUESTION: 121

You need to prepare to deploy a software deployable package to a test environment. What are two possible ways to achieve the goal?

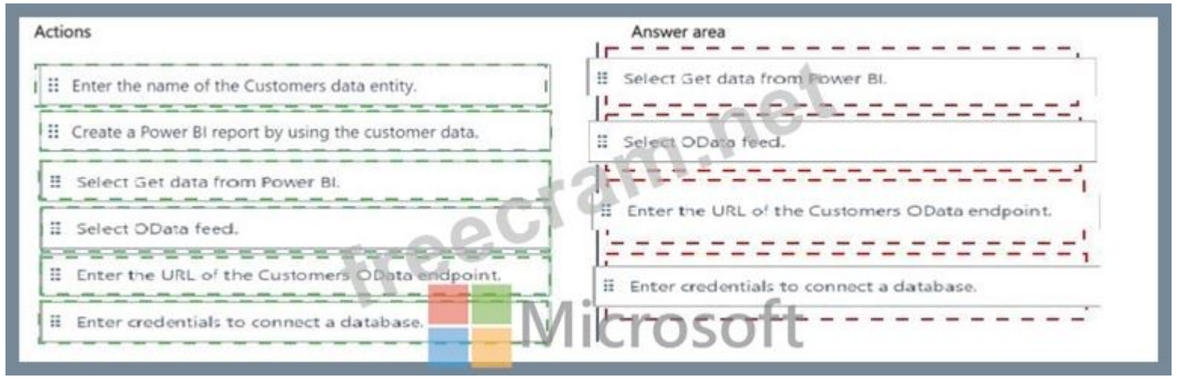

Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.
A. In Visual Studio, create a Dynamics 365 deployment package and upload the package to the as
B. In Azure DevOps, queue a build from the corresponding branch and upload the model to the asset library.
C. In Azure DevOps, queue a build from the corresponding branch and upload the package to the asset library.
D. In Visual Studio, export the project and upload the project to the asset library.

NEW QUESTION: 122
A company uses Dynamics 365 finance and operations apps. The company uses Power 61 Desktop to fetch a list of customers.
You need to create a Power BI report to view the list. You authenticate a Power BI Desktop instance by using a Dynamics 365 finance and operations app.
Which four actions should you perform next in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:

NEW QUESTION: 123

A company uses Dynamics 365 Finance.

There are performance issues with the sales order list page and Invoicing process.

You need to diagnose the issues by using the Performance timer.

Which two processes can the Performance timer monitor? Each correct answer presents a complete solution NOTE: Each correct selection is worth one point.

A. the X ++ process call stack

B. the time consumed by a client and a server

C. the longest-running SQL statement

D. the metadata of a web session

Answer: (SHOW ANSWER)

NEW QUESTION: 124

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are developing a form for Dynamics 365 Finance.

You need to add a button that allows users to run a report.

Solution: Create an output menu item. Add the output menu item to the form button and then link the report to the output menu item.

Does the solution meet the goal?

A. Yes

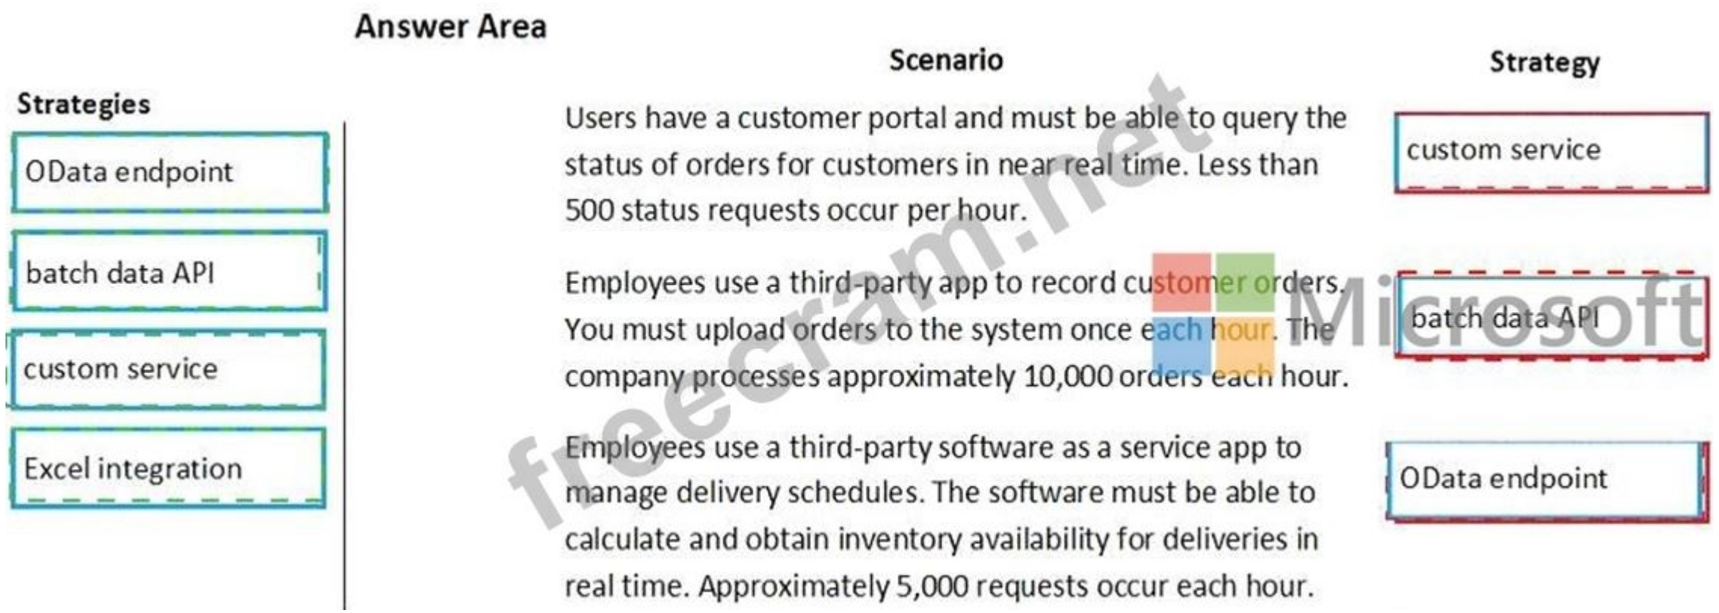

B. No

Answer: A (LEAVE A REPLY)

NEW QUESTION: 125
A company uses Dynamics 365 Unified Operations.
You need to integrate the system with third-party applications.
Which data integration strategies should you use? To answer, drag the appropriate data integration strategies to the correct scenarios. Each strategy may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Box 1: custom service

Custom service peak data volume is 1,000 records per hour.

Box 2: batch data API

This scenario is best implemented by using batch data APIs, which has a peak data volume of 300,000 records per hour.

Box 3: OData endpoint

Peak data volume for reading Odata status of orders is 5,000 records per hour.

This scenario is best implemented by using the OData service endpoints to read order status information.

NEW QUESTION: 126

A company plans to implement Dynamics 365 Finance.

The company is unsure whether to use a cloud implementation or an on-premises implementation.

You need to determine the features that you can use for each implementation.

Which feature can you use? To answer, drag the appropriate features to the correct implementation types.

Each feature may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

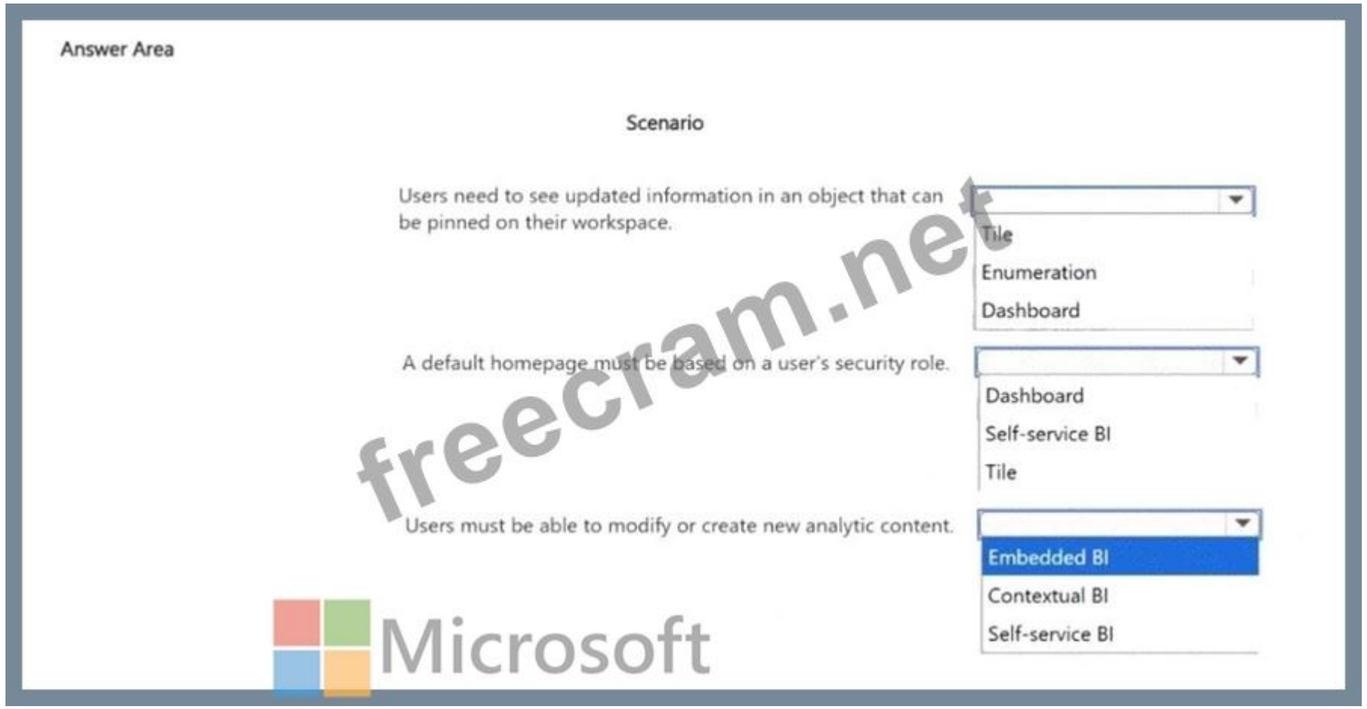

NEW QUESTION: 127

You are building analytical components for users in Dynamics 365.

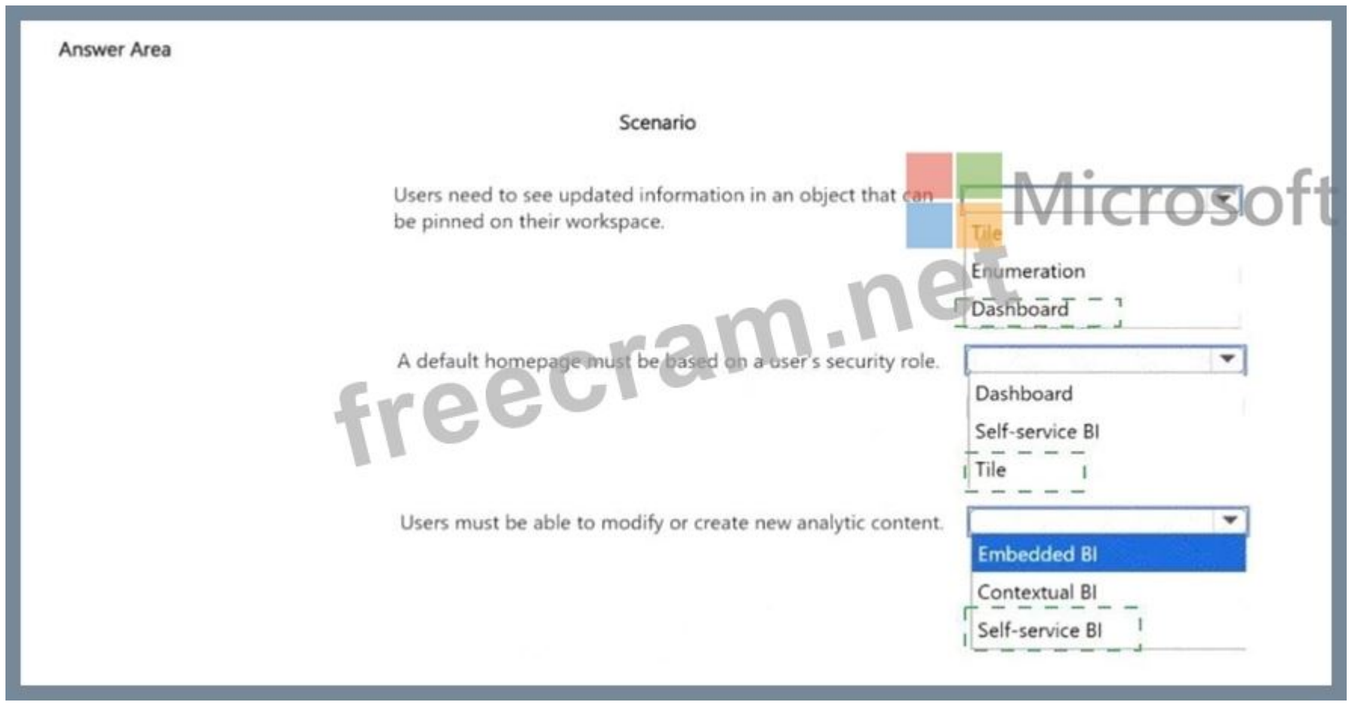

You need to determine the appropriate component to use for several scenarios.

Which component should you use for each scenario? To answer, select the appropriate options in the answer area.

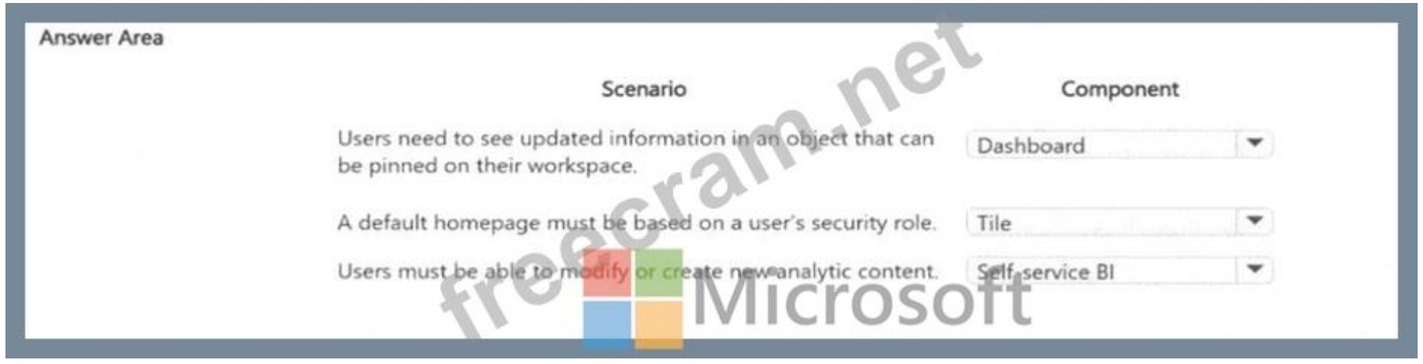

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION: 128

You extend the insert method of the CustTable by using Chain of Command.

You need to print a message after creating a record if the Sales tax group is complete.

Which code segment should you use?

A.

```
[ExtensionOf(tableStr(CustTable))]
final class CustTable_Extension
{
    void insert(DirPartyType _partyType, Name _name, boolean _updateCRM)
    {
        next insert(_partyType, _name, _updateCRM);

        if (!this.TaxGroup)
        {
            info('The customer has a sales tax group.');
        }

    }
```

B.

```
[ExtensionOf(tableStr(CustTable))]
final class CustTable_Extension
{
    void insert(DirPartyType _partyType, Name _name, boolean _updateCRM)
    {
        next insert(_partyType, _name, _updateCRM);

        if (this.TaxGroup)
        {
            info('The customer has a sales tax group.');
        }
    }
}
```

C.

```
[ExtensionOf(tableStr(CustTable))]
final class CustTable_Extension
{
    void insert(DirPartyType _partyType, Name _name, boolean _updateCRM)
    {
        if (this.TaxGroup)
        {
            info('The customer has a sales tax group.');
        }

        next insert(_partyType, _name, _updateCRM);
    }
}
```

NEW QUESTION: 130

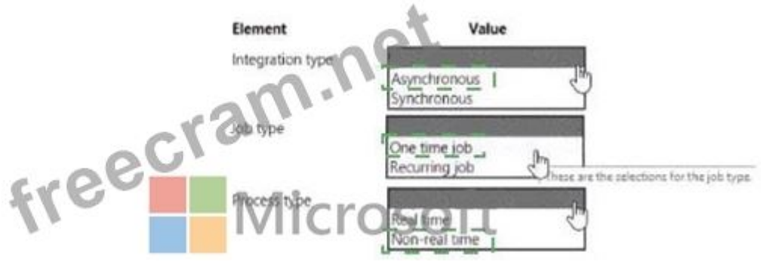

You need to design integrations for the freight processing source system Which integration strategies should you implement? To answer, select the appropriate options In the answer area.

NOTE: Each correct selection is with one point.

Answer:

Answer Area

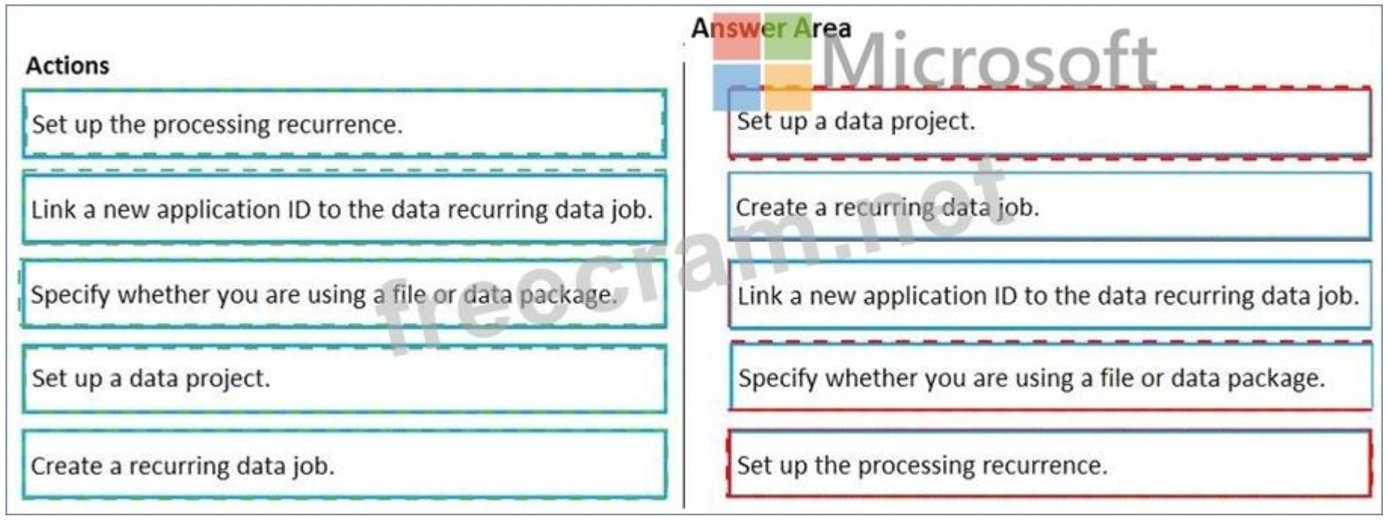

NEW QUESTION: 131

You need to set up a recurring integration to enable file exchanges between Dynamics 365 Finance and a third-party system.

In which order should you perform the actions? To answer, move all actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:

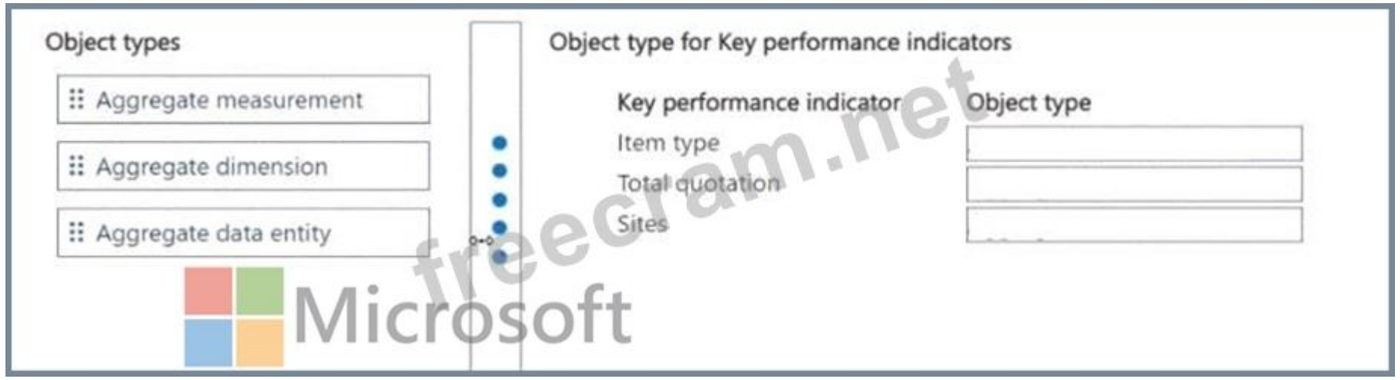

1. Set up a data project -
2. Create recurring data job -
3. Link a new application ID to the data recurring job -
4. Specify whether you are using a file or a data package -
5. Set up the processing recurrence

https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/data-entities/recurring- integrations#create-a-recurring-data-job

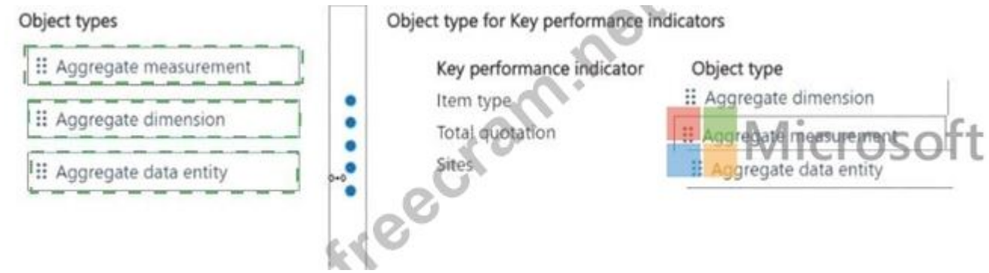

NEW QUESTION: 132

You need to design the workspace for the sales manager.

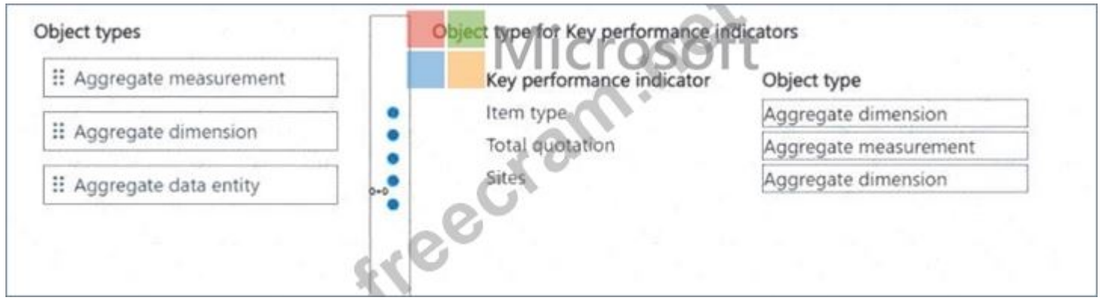

Which object types should you use? To answer, move the appropriate object types to the correct key performance indicators. You may use each object type once, more than once, or not at all. You may need to move the split bar between panes or scroll to view content.
NOTE: Each correct select is worth one point.

Answer:

Explanation:

NEW QUESTION: 133
A company uses Dynamics 365 Finance.
You create an analytical report for the company by using Microsoft Power BI and add it as a resource in a project.
The company requires the report to be embedded in the Reservation management workspace within the application.
You need to embed the report.
Which two actions should you perform? Each correct answer presents part of the solution. Choose two.
NOTE: Each correct selection is worth one point.
A. Initialize the report by using the code segment initializeReportControl(ResourceName, FormTabPageControl).
B. Extend the Reservation management workspace to add a form html viewer control.

C. Extend the Reservation management workspace to add a tab page and Form group control.
D. Initialize the report by using the code segment initializeReportControl(ResourceName, FormGroupControl).
Answer: (SHOW ANSWER)

NEW QUESTION: 134
You have the following class definition:

```
class UnitConv
{
   public static real PoundsToKilograms(real _pounds)
   {
      return _pounds * 0.45359237;
   }
   public static real FahrenheitCelsius(real _fahrenheit)
   {
      return (_fahrenheit - 32) = 5/9;
```

Microsoft
freecram.net

You need to create an extension class and create a new static method in it that converts miles to kilometers and then call the method from another class.
How should you complete the code and call the method? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Extension class definition:

```
[ExtensionOf(classStr(UnitConv))]
```

final class CustUnitConv_Extension
final class UnitConv_MyExtension
static class UnitConvMy_Extension
class UnitClass_Extension

```
{
  public static CaseMileage MiToKm(CaseMileage _miles)
  {
     return _miles * 1.609344;
  }
}
```

Call the method:

var km = UnitConv::MiToKm(62.1371);
CaseMileage km = UnitConv_MyExtension::MiToKm(62.1371);
UnitConvMy_Extension cUC = new UnitConv(); int km = cUC.MiToKm(62.1371);
UnitConv_Extension uCE = new UnitConv(); real km = uCE.MiToKm(62.1371);

Answer:

freecram.net

Extension class definition:

```
[ExtensionOf(classStr(UnitConv))]
```

▼
- final class CustUnitConv_Extension
- final class UnitConv_MyExtension
- static class UnitConvMy_Extension
- class UnitClass_Extension

```
{
  public static CaseMileage MiToKm(CaseMileage _miles)
  {
    return _miles * 1.609344;
  }
}
```

Call the method:

▼
- var km = UnitConv::MiToKm(62.1371);
- CaseMileage km = UnitConv_MyExtension::MiToKm(62.1371);
- UnitConvMy_Extension cUC = new UnitConv(); int km = cUC.MiToKm(62.1371);
- UnitConv_Extension uCE = new UnitConv(); real km = uCE.MiToKm(62.1371);

Explanation:
Box 1: final class CustUnitConv_Extension
Box 2: var km = UnitConv::miToKm(62.1371);

NEW QUESTION: 135
You are a Dynamics 365 Finance developer.
You have the following code: (Line numbers are included for reference only.)

```
18      b = 3;
19      retry;
20    }
21  }
22  finally
23  {
24    info("Four");
25  }
26 info("Five");
27 }
```

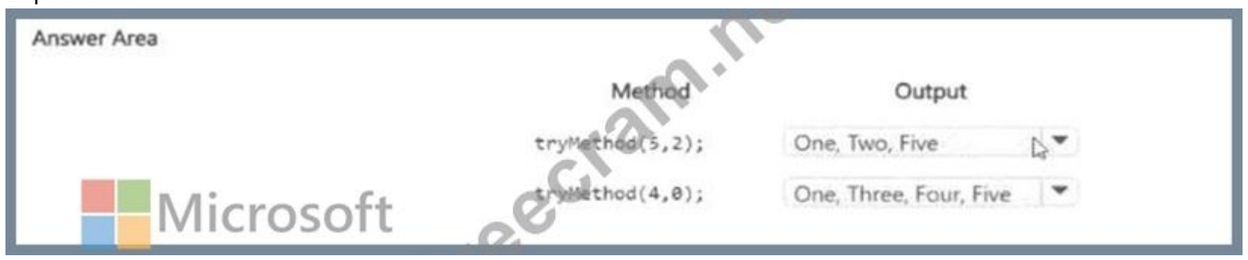

You need to evaluate the code
What is the correct output for the method? To answer, select the appropriate option in the answer area.

Answer:

Explanation:

NEW QUESTION: 136

You are a Dynamics 365 Finance developer. You have two tables as shown in the following exhibit:

You need to configure Table1 to ensure that records cannot be deleted from Table1 if Table2 contains related records.

Which value should you use for the OnDelete property?

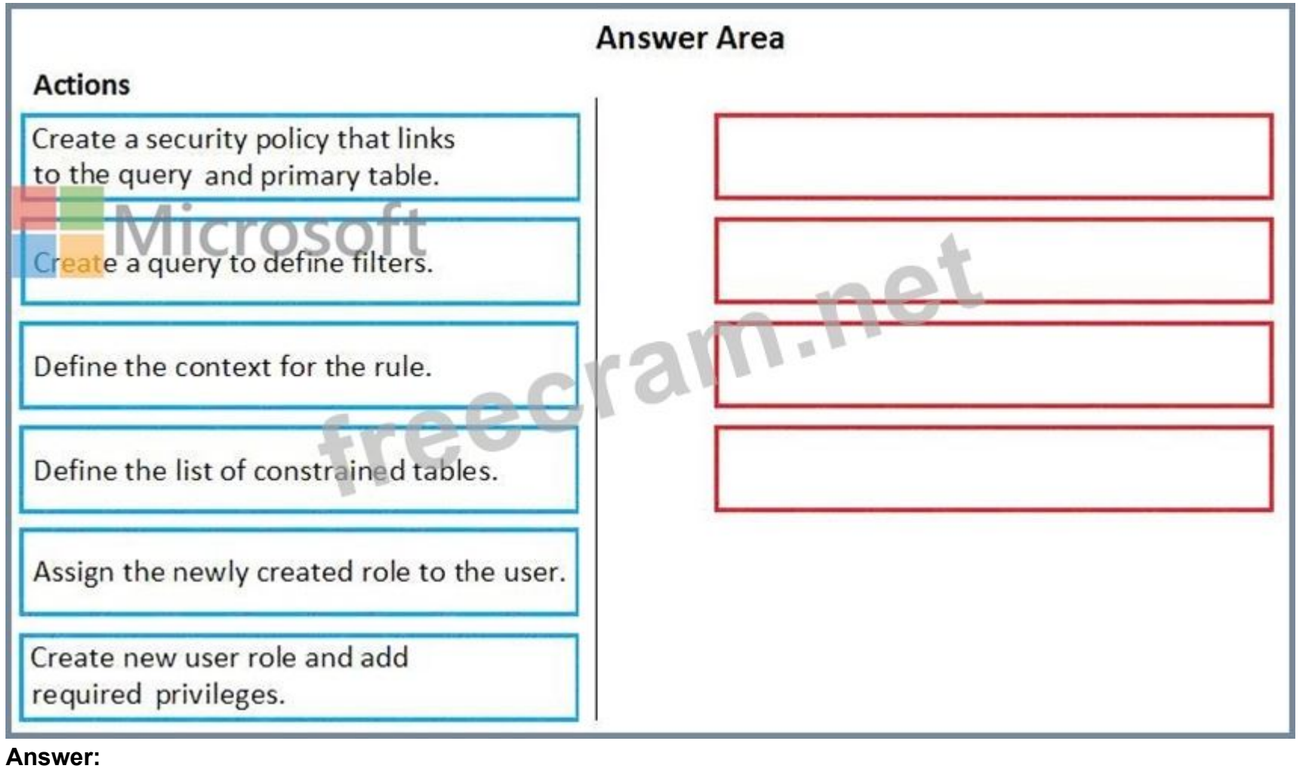

A. None

B. Cascade

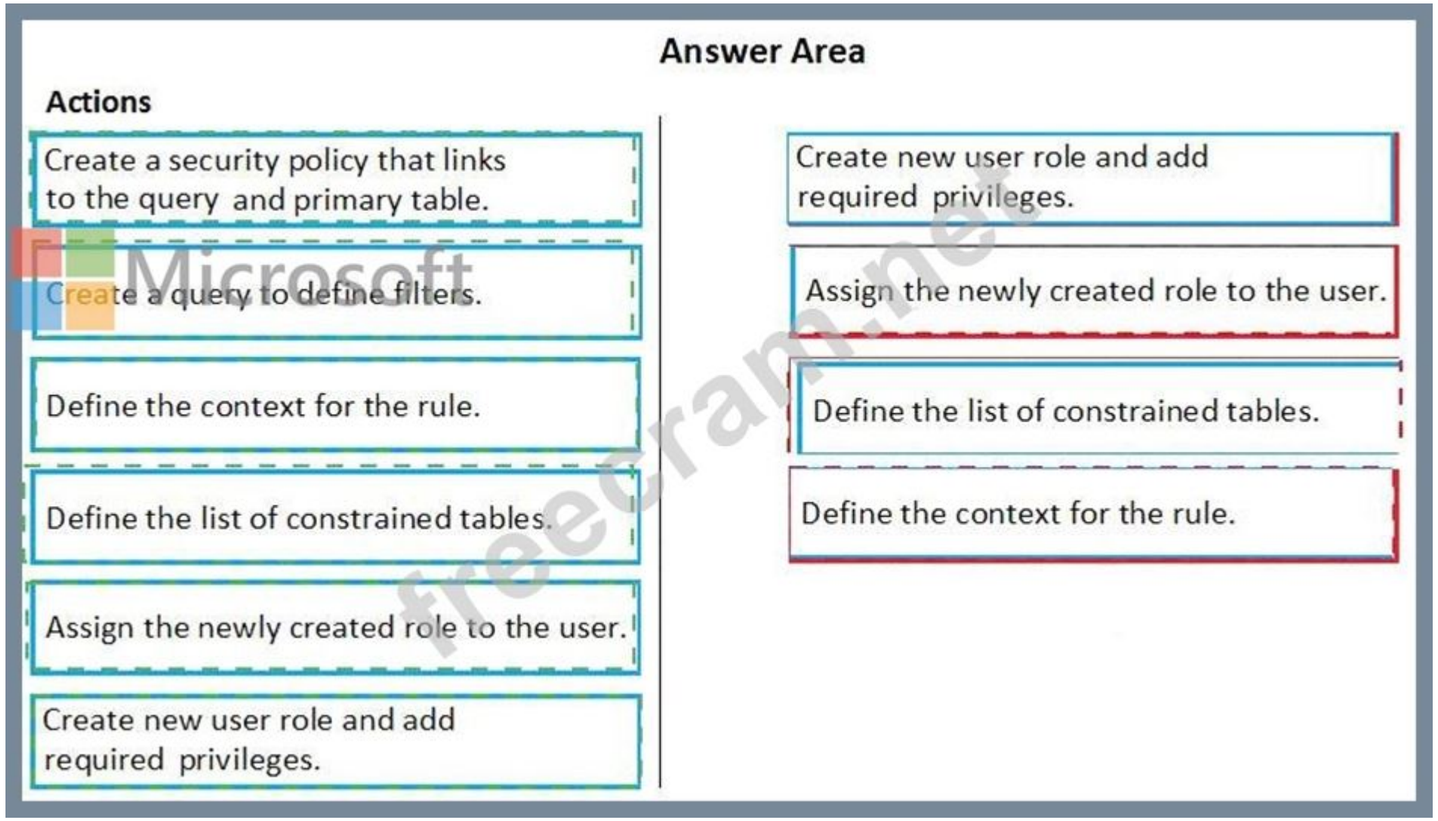

C. Cascade + Restricted
D. Restricted
Answer: (SHOW ANSWER)
Example of Restricted
Suppose we have two tables (Customer & Order) and the relation is of One-To-Many i.e Customer can have many orders.
So on a parent table i.e.(Customer) if I set a delete action property to "RESTRICTED" for Order table. Then If I go and delete the record from a Customer table. It will first check the record in the child table and if exist that warning prompt saying that first we need to delete a record from child table.
Reference:

NEW QUESTION: 137
You are a Dynamics 365 Finance and Operations developer.
You need to use the Extensible Data Security (SDS) framework to restrict to the data in the Sales table form based on the customer group and the role of the user.
Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:

Step 1: Create a new user role and add required privileges.

Individual security permissions are combined into privileges, and privileges are combined into duties. The administrator grants security roles access to the program by assigning duties and privileges to those roles.

Step 2: Assign the newly created role to the user.

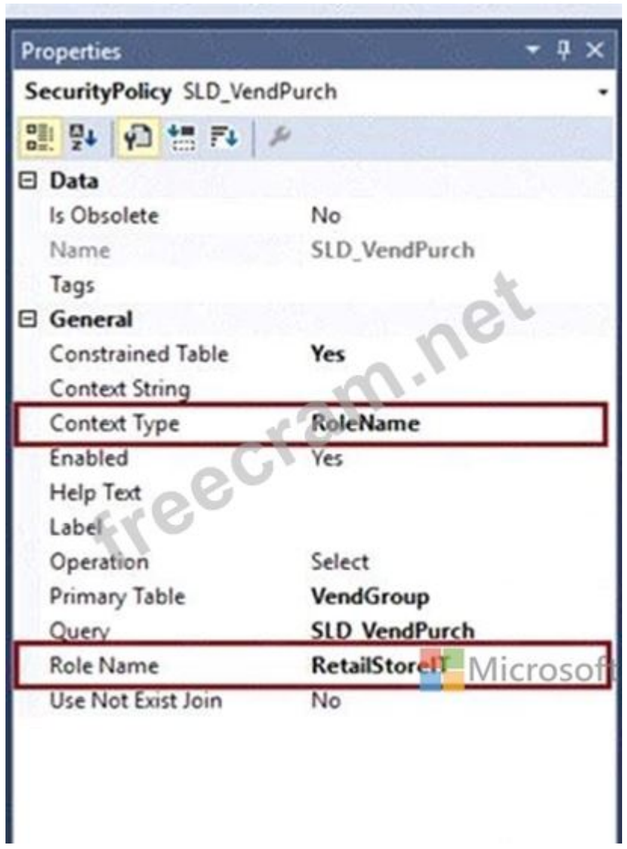

Step 3: Define the list of constrained tables.

Add the constrained tables and views.

Step 4: Define the context of the rule.

Set the context.

Set the ContextType property to one of the following:
* ContextString - Set the property to this value if a global context is to be used to determine whether the policy should be applied. When required, this context string needs to be set by the application using the XDS::SetContext API.
* RoleName - Set the property to this value if the policy should be applied only if a user in a specific role accesses the constrained tables.
* RoleProperty - Set the property to this value if the policy is to be applied only if the user is a member of any one of a set of roles that have the ContextString property set to the same value.

NEW QUESTION: 140
A company uses Dynamics 365 for its supply chain operations.
A client wants to ensure current processes do not break when the client receives Microsoft updates for Dynamics 365 finance and operations apps.
The company has no development capabilities.
You need to build the scenarios to automate the process by using the Regression suite automation tool (RSAT).
Which file type should you include to run the scenarios?
A. SysTest frame work
B. Business events schema
C. Test automation/parameter
D. Security customization
Answer: (SHOW ANSWER)

NEW QUESTION: 141
Users are experiencing slower load times for a data table on the All customers form.
You need to update caching for the table in Dynamics 36S to improve data retrieval times.
How should you configure Cachelookup properties? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer Area

freecram.net
Microsoft

Answer:

freecram.net
Microsoft

Explanation:

Answer Area

Property	Value
Set-based caching	Entire table
Single-record caching	Found

Microsoft freecram.net

NEW QUESTION: 142

A company uses Dynamics 365 Finance.

The company needs to track deletions of purchase order header records only.

You need to enable the change tracking.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

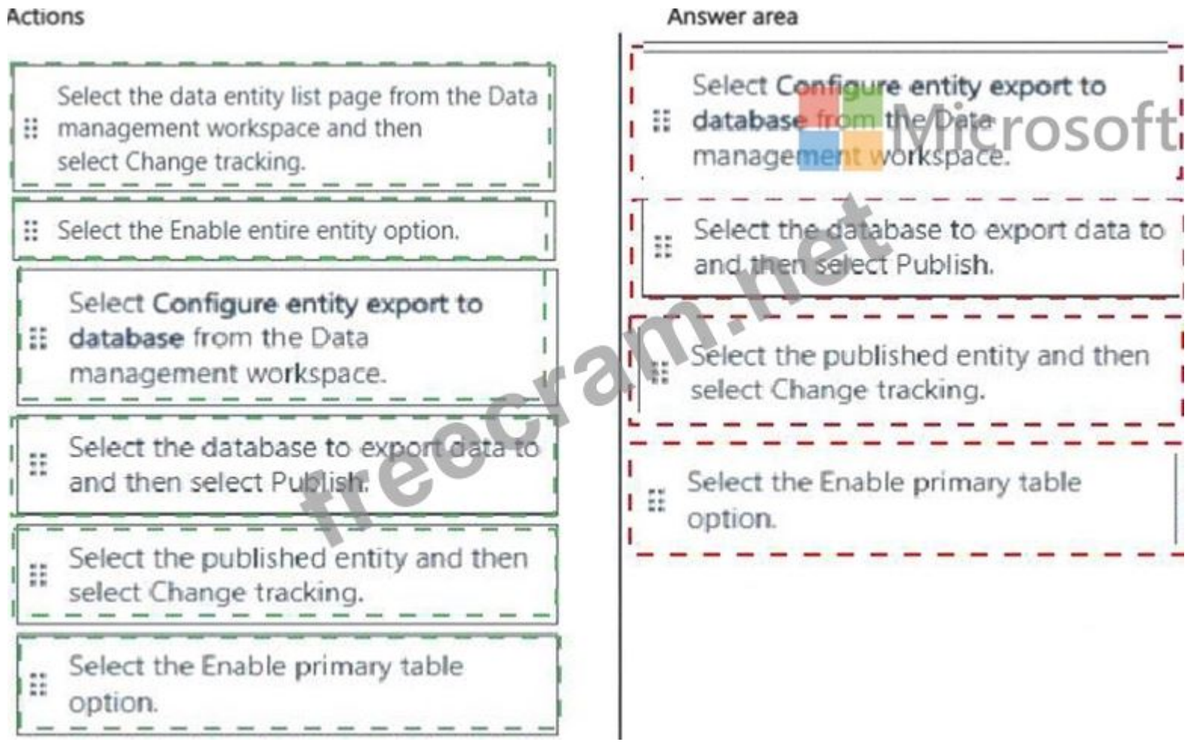

Actions

- Select the data entity list page from the Data management workspace and then select Change tracking.
- Select the Enable entire entity option.
- Select **Configure entity export to database** from the Data management workspace.
- Select the database to export data to and then select Publish.
- Select the published entity and then select Change tracking.
- Select the Enable primary table option.

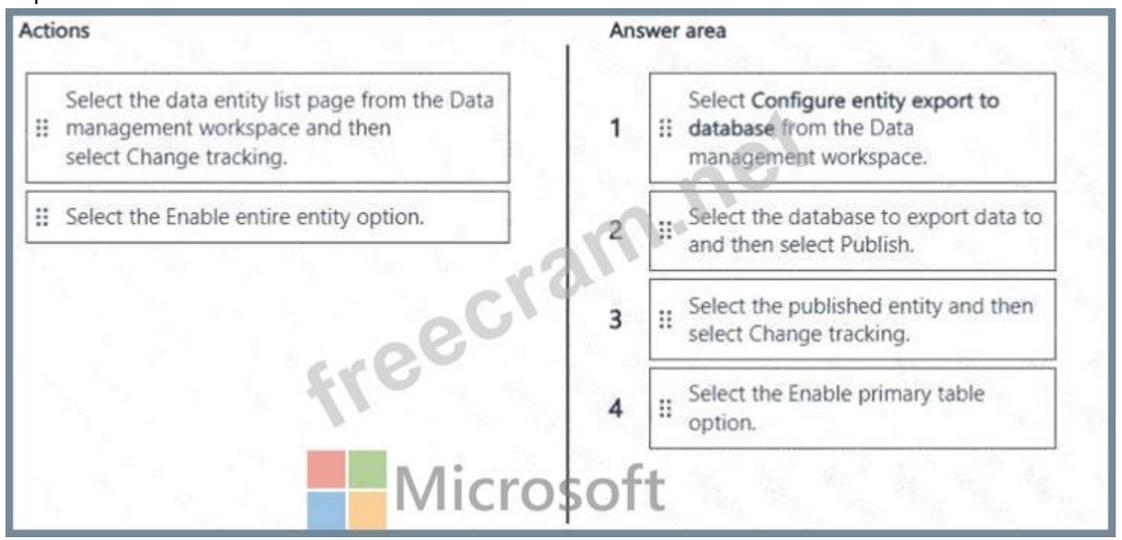

Answer area

Microsoft freecram.net

Answer:

Explanation:

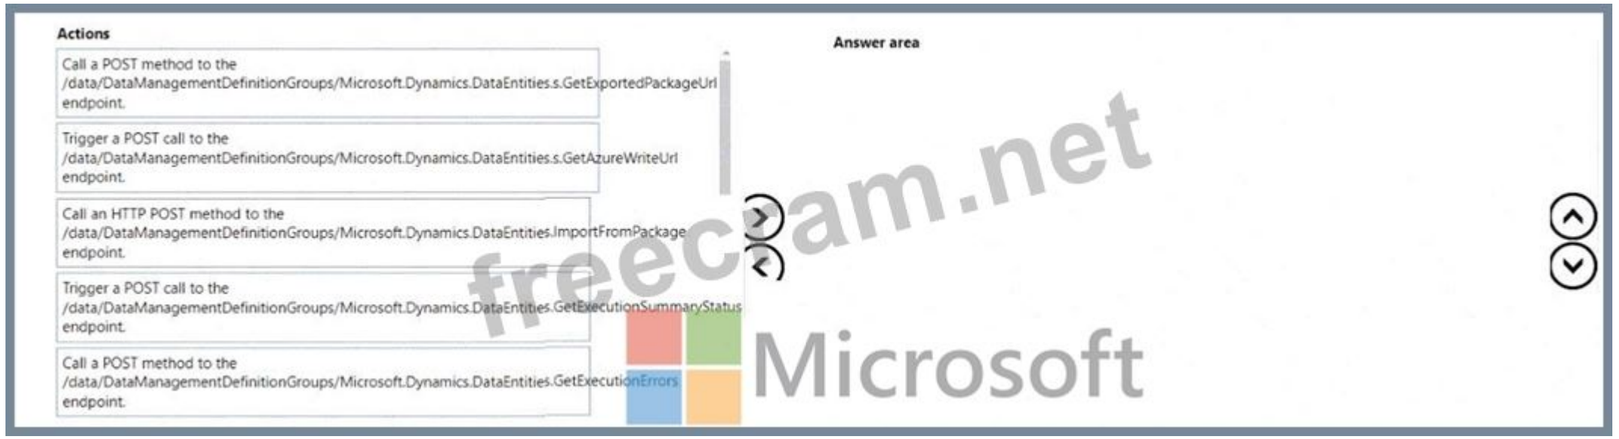

NEW QUESTION: 143

You are importing data packages into Dynamics 365 Finance from external systems.

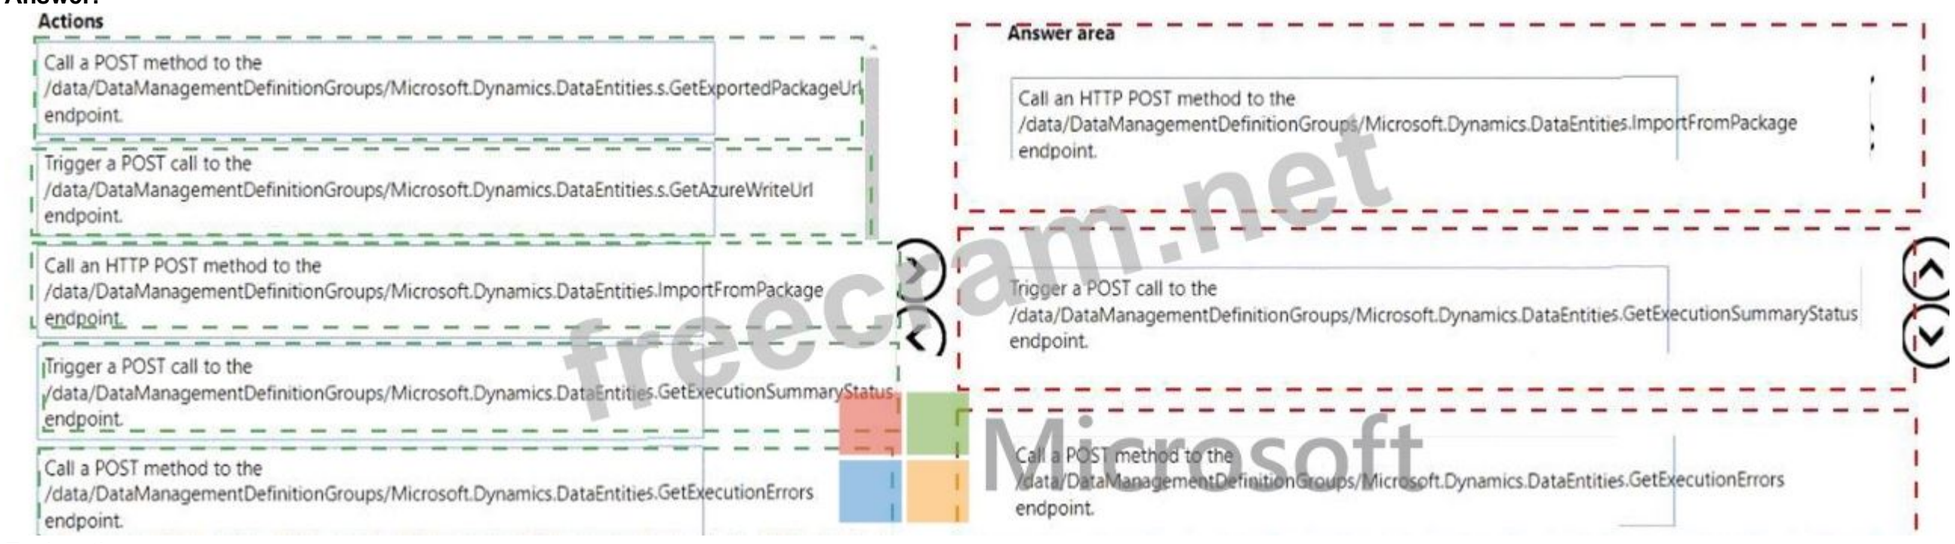

You must import the data packages by using the Data management package REST API. You must check the status alter the import is triggered.

You need to call the HTTP operations.

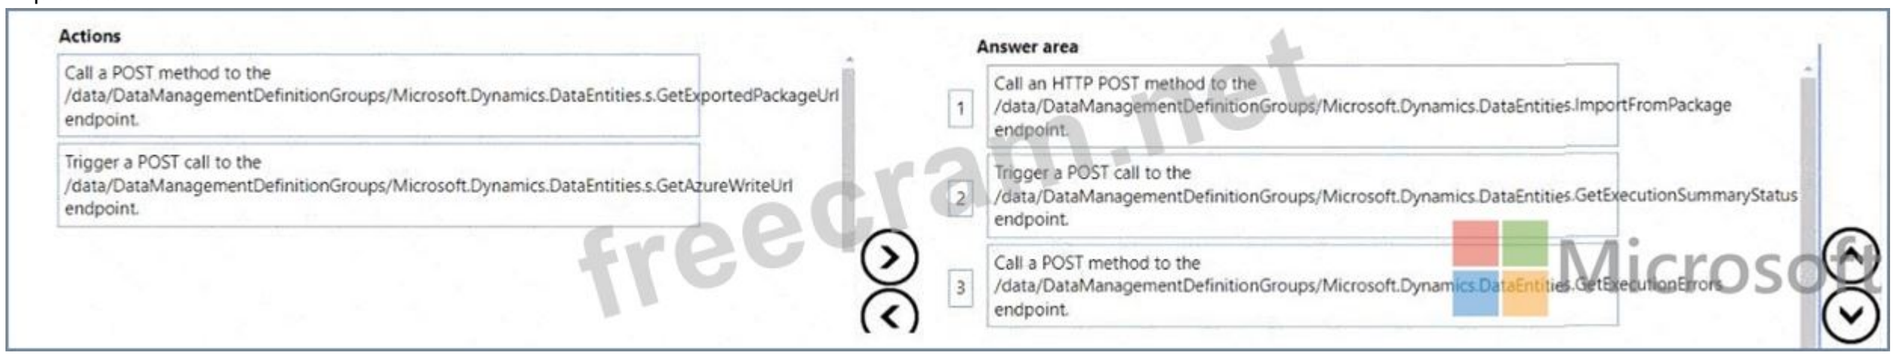

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:

NEW QUESTION: 144

A company uses Dynamics 365 Finance.
Developers receive an error in an existing solution. The solution must be debugged to identify the root cause of the error.
You need to enable debugging in Visual Studio to hit an existing breakpoint with the solution open.
Which three methods can you use? Each correct answer presents a complete solution. Choose three.
NOTE: Each correct selection is worth one point.
A. Using Visual Studio to debug, attach the debugger to the devenv.exe process.
B. Using Visual Studio to debug, attach the debugger to the IIS process.
C. Using Visual Studio to debug, start debugging with your start-up object.
D. Press F5.
E. Using Visual Studio to debug, attach the debugger to the X++ compiler process.
Answer: (SHOW ANSWER)

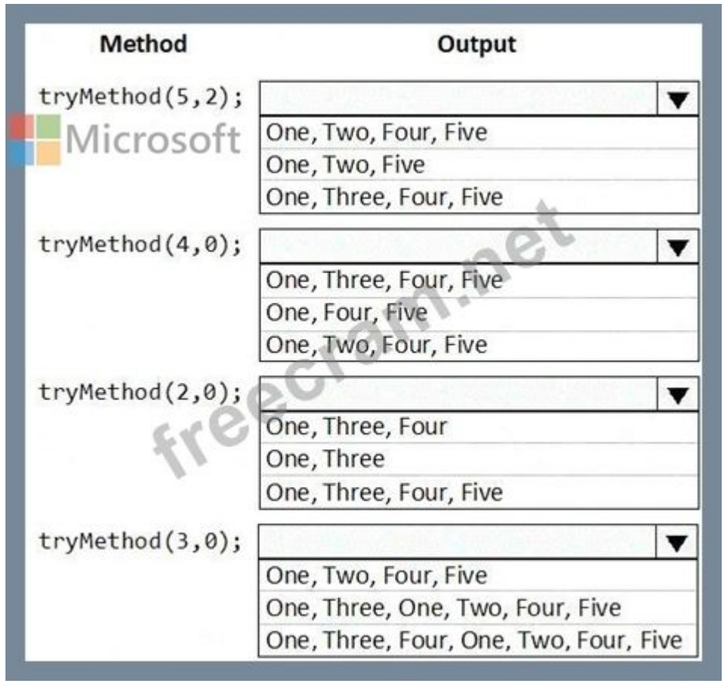

NEW QUESTION: 145
You are a Dynamics 365 Finance and Operations developer.
You have the following code: (Line numbers are included for reference only.)

```
01  public void tryMethod(int a, int b)
02  {
03    try
04    {
05      info("One");
06      int c = a/b;
07      info("Two");
08    }
09    catch
10    {
11      info("Three");
12      if (a == 2);
13      {
14        return;
15      }
16      else if (a == 3)
17      {
18        b = 3;
19        retry;
20      }
21    }
22    finally
23    {
24      info("Four");
25    }
26   info("Five");
27  }
```

Microsoft
freecram.net

You need to evaluate the code.

What is the correct output for the method? To answer, select the appropriate option in the answer area.
NOTE: Each correct selection is worth one point.

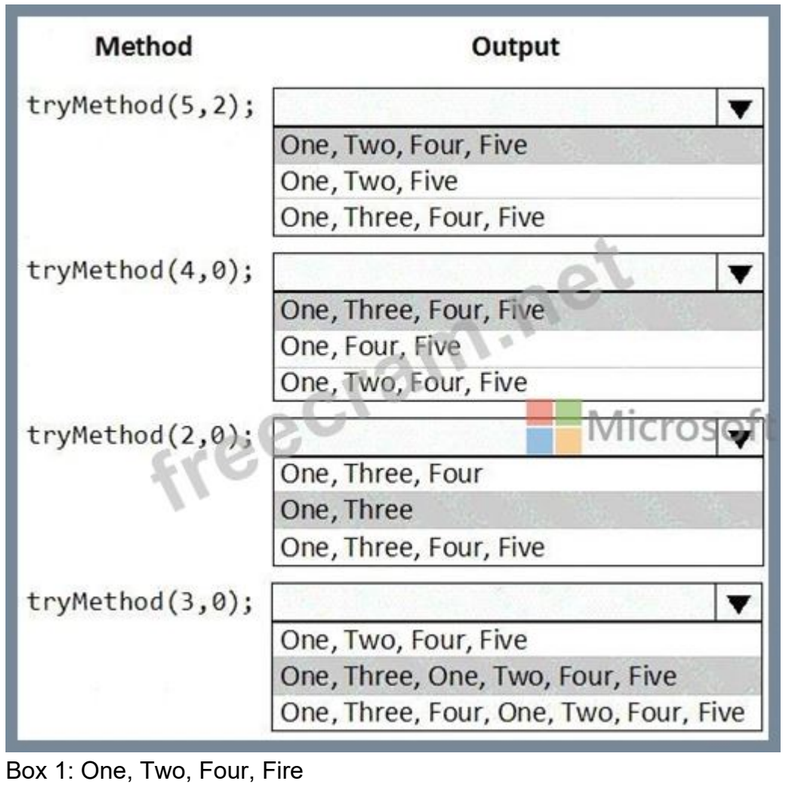

Microsoft
freecram.net

Answer:

Method	Output
`tryMethod(5,2);`	One, Two, Four, Five One, Two, Five One, Three, Four, Five
`tryMethod(4,0);`	One, Three, Four, Five One, Four, Five One, Two, Four, Five
`tryMethod(2,0);`	One, Three, Four One, Three One, Three, Four, Five
`tryMethod(3,0);`	One, Two, Four, Five One, Three, One, Two, Four, Five One, Three, Four, One, Two, Four, Five

freecram.net

Explanation:

Box 1: One, Two, Four, Fire

The statements in the finally clause are executed when control leaves the try block, either normally or through an exception.

Box 2: One, Three, Four, Five

Box 3: One, Three

Return ends the call.

Box 4: One, Three, One, Two, Four, Five

Retry restarts the try statement.

NEW QUESTION: 146

A company is implementing Dynamics 365 finance and operations apps.

The company must test the custom enhancements for its native Dynamics 365 finance and operations apps.

You need to create a test case within a development environment.

Which base class should the test class extend?

A. SysTestExecute

B. SysTest

C. SysTestSuite

D. SysTestCase

Answer: (SHOW ANSWER)

NEW QUESTION: 147

An organization has two million customers that are part of the International customer group.

Validation must occur when customer records are updated. For all customers where the value of the customer group field is international, you must the delivery mode to Air.

You need to update the customer records.

Which two segments can you use? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

A.
```
ttsbegin;
while select forupdate CustTable
  where CustTable.CustGroup == 'International'
{
  CustTable.DlvMode = 'Air';
  CustTable.update();
}
ttscommit;
```

B.
```
ttsbegin;
update CustTable
set DlvMode = 'Air';
where CustTable.CustGroup == 'International'
ttscommit;
```

C.
```
ttsbegin;
update_recordset CustTable
  where CustTable.CustGroup == 'International'
  setting DlvMode = 'Air';
ttscommit;
```

D.
```
ttsbegin;
while select forupdate CustTable
  where CustTable.CustGroup == 'International'
{
    CustTable.DlvMode = 'Air';
    CustTable.doUpdate();
}
ttscommit;
```

E.
```
ttsbegin;
update_recordset CustTable
  setting DlvMode = 'Air';
  where CustTable.CustGroup == 'International'
ttscommit;
```

NEW QUESTION: 148
You are a Dynamics 365 Finance developer.
You have a table named FMVehicle that contains a field named VehicleId. The table has a clustered index named VehicleIdIdx on the VehicleId field. You declare a table buffer named vehicle to refer to the table.
You need to select all records from the FMVehicle table in ascending order based on VehicleId field in the vehicle variable.
Which embedded-SQL statement should you use?

A. `select vehicle index VehicleIdIdx;`
B. `select vehicle order by VehicleId desc;`
C. `select VehicleId from vehicle order by VehicleId asc;`
D. `select vehicle order by VehicleIdIdx desc;`

Microsoft freecram.net

A. Option A
B. Option B
C. Option C
D. Option D

NEW QUESTION: 149
A company uses Dynamics 365 Commerce for sales and distribution operations.
The following reporting changes are required based on feedback from user acceptance testing:
* Add a field to a business document template.
* Adjust the location of the customer address on an SSRS report.
You need to implement the changes.
Which development tools should you use? To answer, drag the appropriate development tools to the correct requirements. Each development tool may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION: 150

You are a Dynamics 365 Finance developer.
You have a form that displays customer records by using a listpage control. You must add related sales total information for the selected customer to the form.
You need to display the required related sales total information.
What should you add to the form?

A. a quick filter
B. a factbox
C. an external feed
D. a tile
E. a custom lookup

Answer: (SHOW ANSWER)

A list page presents a set of data on a user interface that is optimized so that you can browse records, find the right record, and then take an action upon that record. The list page lets the user search, filter, and sort the data. FactBoxes on the right side of the grid show related data for the active record.

NEW QUESTION: 151

A company uses Dynamics 365 Finance.

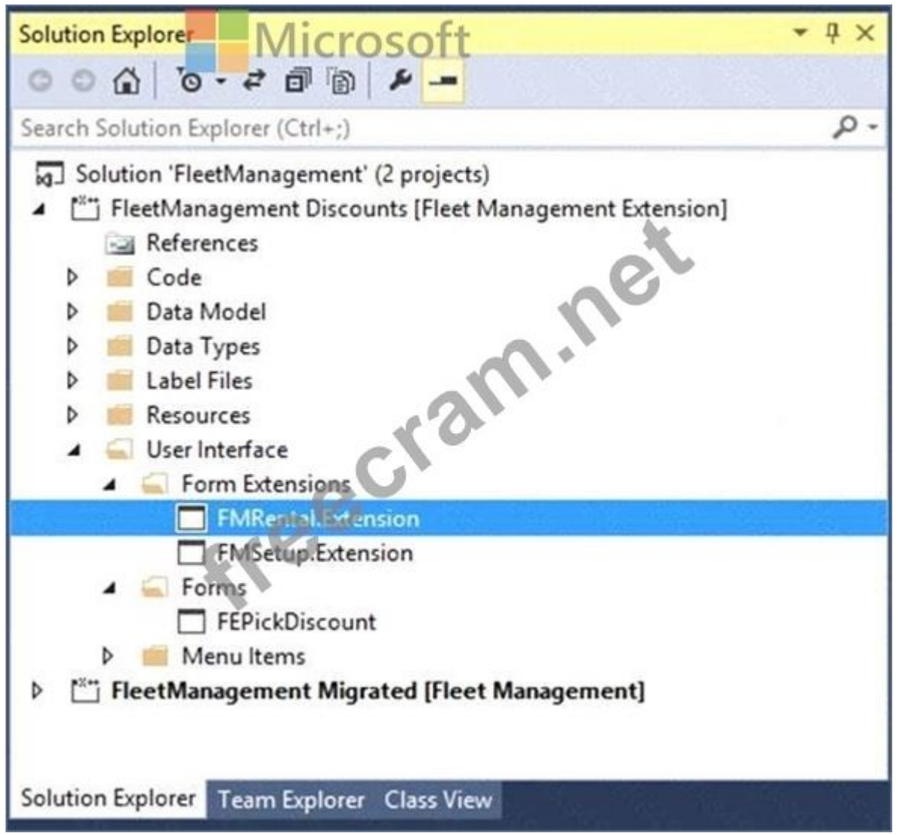

You must add fields to a standard table in Visual Studio.
You need to create an extension of the table.
What should you do?
A. Create a table extension from the base table.
B. Create a new table object in the project.
C. Create an extension class for the base table.
D. Drag the table from the AOT to the project.

NEW QUESTION: 152
A company has an extension that makes changes to a base form.
You need to identify all extension changes made to the base form.
What are two possible ways to achieve the goal? Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.
A. Right-click the base form and select view references
B. In search bar on the form extension element, enter the text e:
C. In the search bar on the base form, enter the text e:.
D. In the search bar on the form extension element, enter the text c:
E. In the search bar on the base form, enter the text c:.
Answer: (SHOW ANSWER)
A: Customization and Extension

View references	Create a diagram that shows the other elements that reference the selected element.

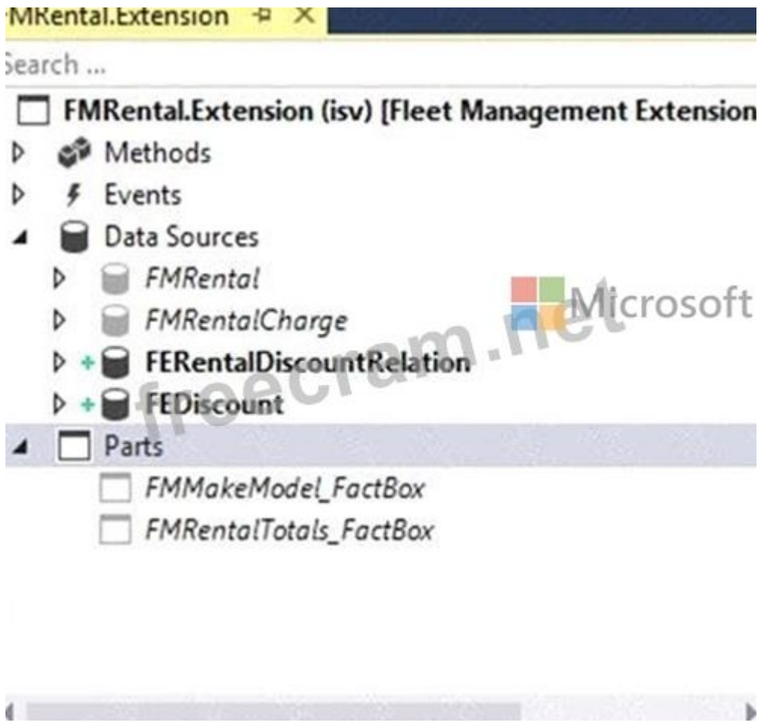

B: Example: Navigate to FMRental.Extension in the Tree Designer
1. In the Visual Studio, in Solution Explorer, in the FleetManagement Discounts project, expand User Interface > Form Extensions.

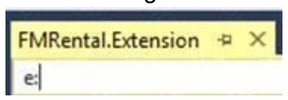

Microsoft
free cram.net

The FMRental.Extension element is an extension element that extends the functionality of the FMRental form by adding two new data sources and a new tab control.

2. In Solution Explorer, double-click FMRental.Extension to open the designer.

3. In the designer's search box, type 'e:' as shown in the image below. This filters the current designer to only show nodes that belong to the current extension.

NEW QUESTION: 153
You have a table in which multiple properties must be changed. Multiple table properties are locked down at the base table and must not be overwritten.
You need to modify the table properties by extending the table.
Which table property can you populate in a table extension by using the property sheet?
A. Configuration key
B. Cache lookup
C. Created by
D. Table group
Answer: C (LEAVE A REPLY)

NEW QUESTION: 154
A company uses Dynamics 365 finance and operation apps.
The company must create test cases by using the SysTest framework. The test cases must meet the following requirements:
* All insert statements must be tracked and deleted during cleanup.
* Transactions must be rolled back using SQL save points.

You need to select the TestTransactionMode options to use.

Answer:

Explanation:

NEW QUESTION: 155

A company has a Dynamics 365 finance and operations app.

A user requests a new field named MarkupGroup in the CustCustomerV3Entity data entity. The new field is based on the MarkupGroup field from the CustTable data source. The user plans to use the new field to publish changes to the finance and operations system by using Microsoft Excel. You add the field to the CustCustomerV3Entity data entity and run a database synchronization.

You need to ensure that the user can publish changes with the new field in the CustCustomerV3Entity data entity by using Excel. What should you do?

A. Use the Data Connection Wizard in Excel to connect to finance and operations using an ODBC connection and open the CustCustomerV3Entity data entity into the workbook for testing.

B. Use the Dynamics Office Add-in in Excel to connect to the development server URL and open the CustCustomerV3Entity data entity.

C. Use the query functionality in Excel to connect to the finance and operations Microsoft Azure SQL Server Database and select the CustCustomerV3Entity data entity.

D. Use the OData Data Feed functionality in Excel to connect to the OData feed and select the CustCustomerV3Entity data entity into the workbook for testing.

Answer: (SHOW ANSWER)

NEW QUESTION: 156

An error message displays when a user tries to save an outgoing electronic reporting document. You need to ensure that the document format supports electronic reporting. Which three formats can you use? Each correct answer presents a complete solution NOTE: Each correct selection is worth one point.

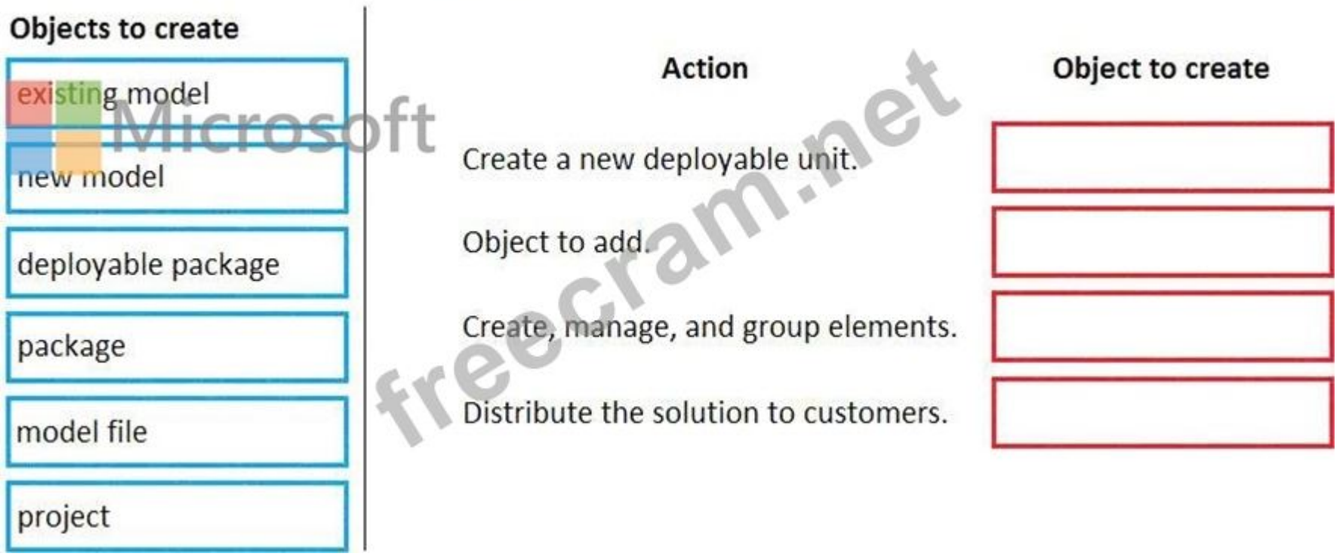

A. Microsoft Word document
B. OPENXML
C. XML
D. Microsoft Excel workbook
E. JSON
Answer: (SHOW ANSWER)

NEW QUESTION: 157
You need to investigate the Vendor exclusion list issue.
What should you do?

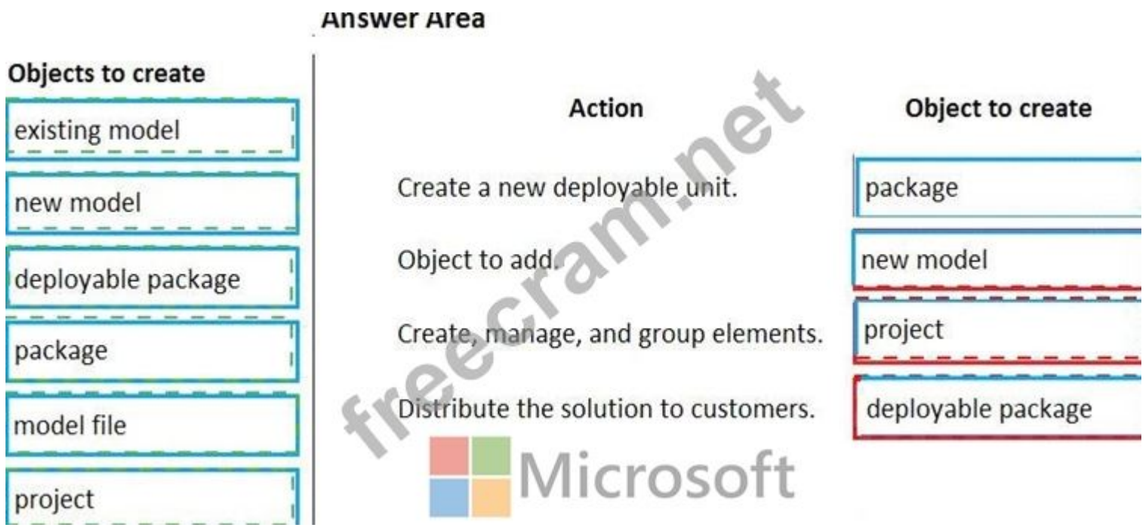

A. Navigate to the Options tab, select Record Info, and then select Show all fields.
B. Navigate to the General tab, select Record Info, and then select Show all fields.
C. Navigate to the Page options tab, select Record Info, and then select Show all fields.
D. Navigate to the Options tab and select Database log.
Answer: (SHOW ANSWER)

NEW QUESTION: 158
You need to develop, test, and deploy the Vendor Exclusion list solution.
What should you create? To answer, drag the appropriate objects to the correct actions. Each element may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

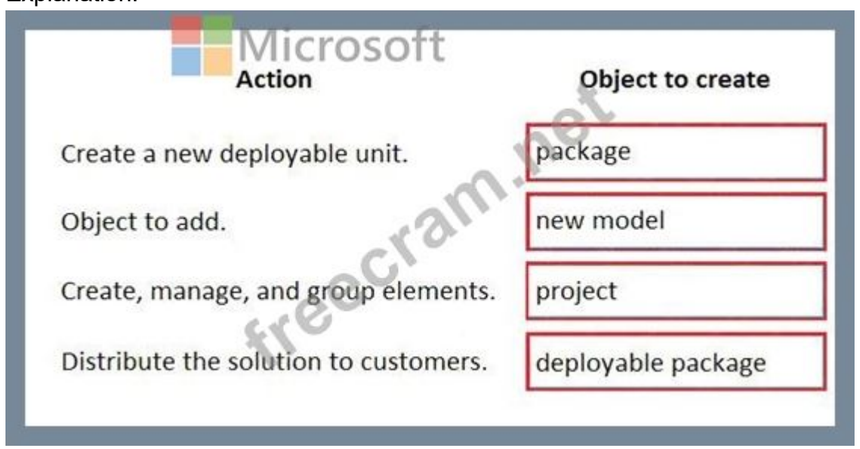

Answer Area

Answer:

Explanation:

Box 1: package

An AOT package is a deployment and compilation unit of one or more models that can be applied to an environment. It includes model metadata, binaries, reports and other associated resources. One or more AOT packages can be packaged into a deployable package, which is the vehicle used for deployment of code (and customizations) on demo, sandbox, and production environments.

Box 2: New model

Model - You configure your model to refer to two other models. This enables your model to reference metadata and code elements that are in other packages.

Box 3: project

Project - You create a project and then associate your project to your new model. You add elements to your project, which are also added to your model. Specifically, you add an extended data type (EDT). You also add a table that you populate with fields and a method.

Box 4: deployable package

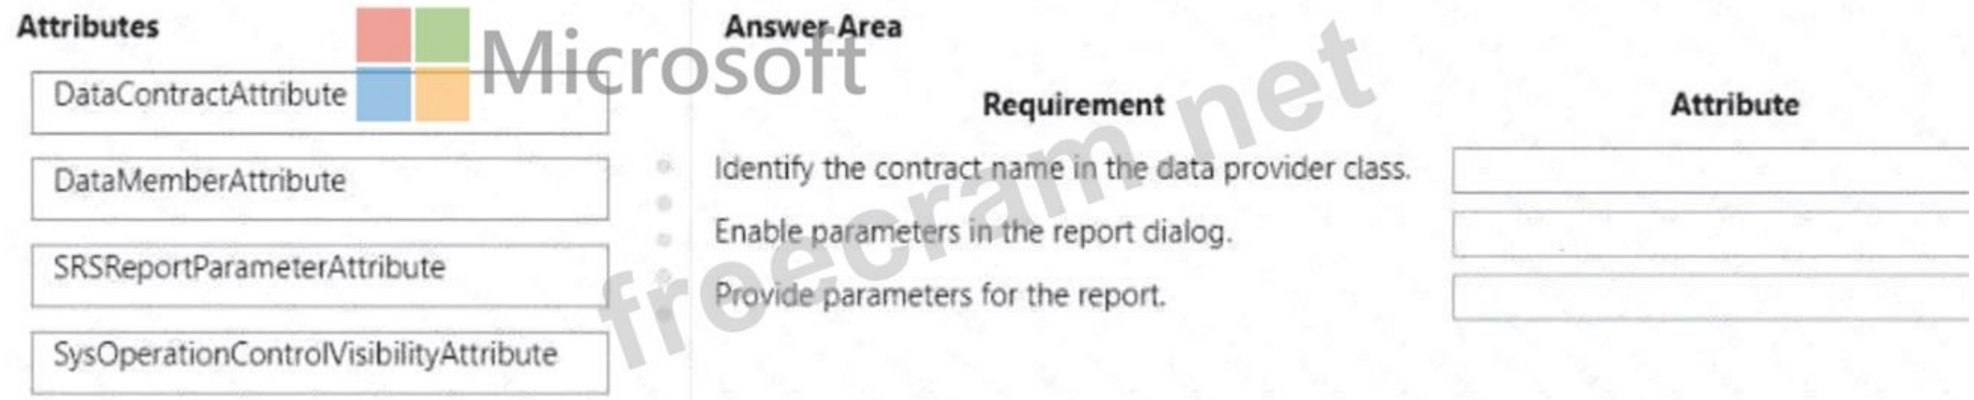

Reference:

https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/dev-tools/create-data-model-elements

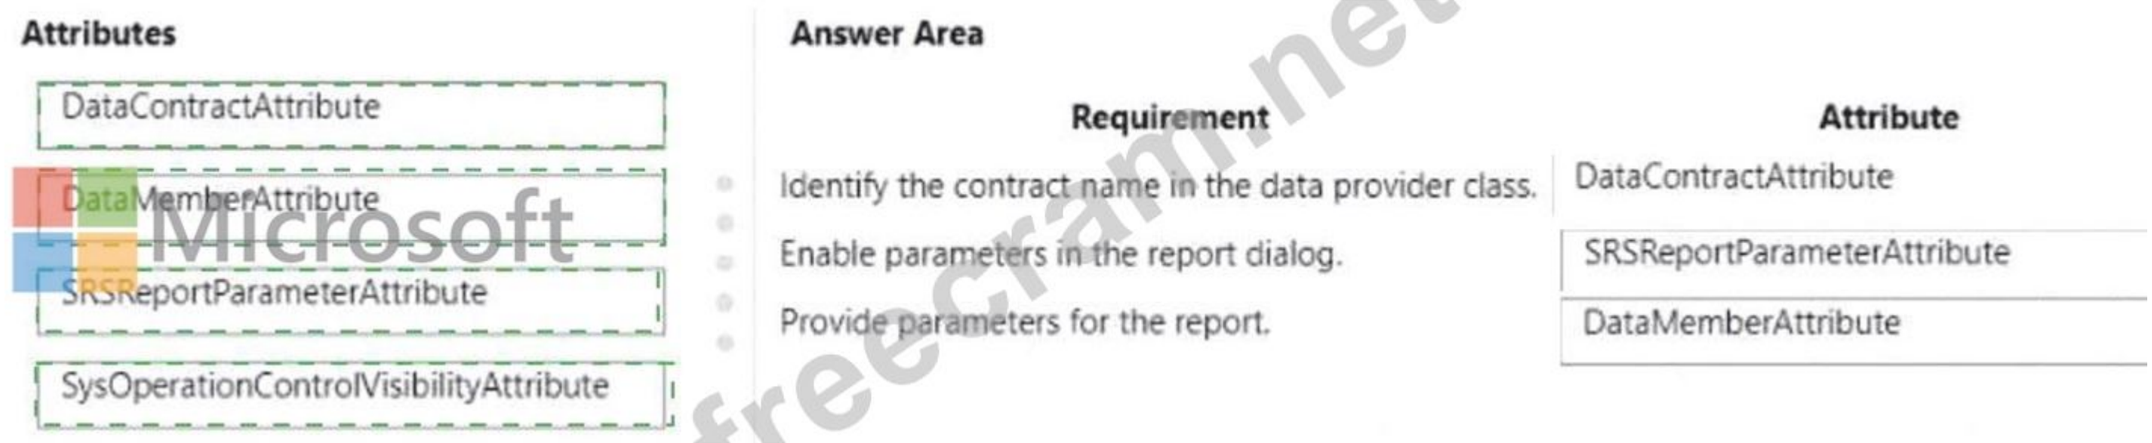

NEW QUESTION: 159

A company implements Dynamics 365 Supply Chain Management.

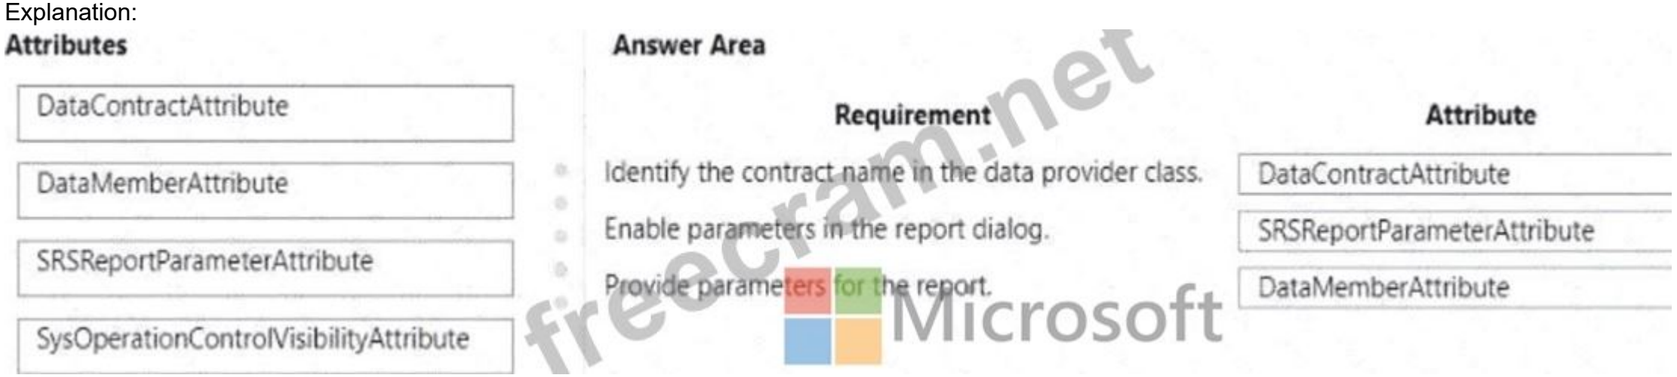

You need to create a report that shows all customer project invoices.
Which attribute should you use? To answer, drag the appropriate attributes to the correct requirements. Each attribute may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content NOTE: Each correct selection is worth one point.

Answer:

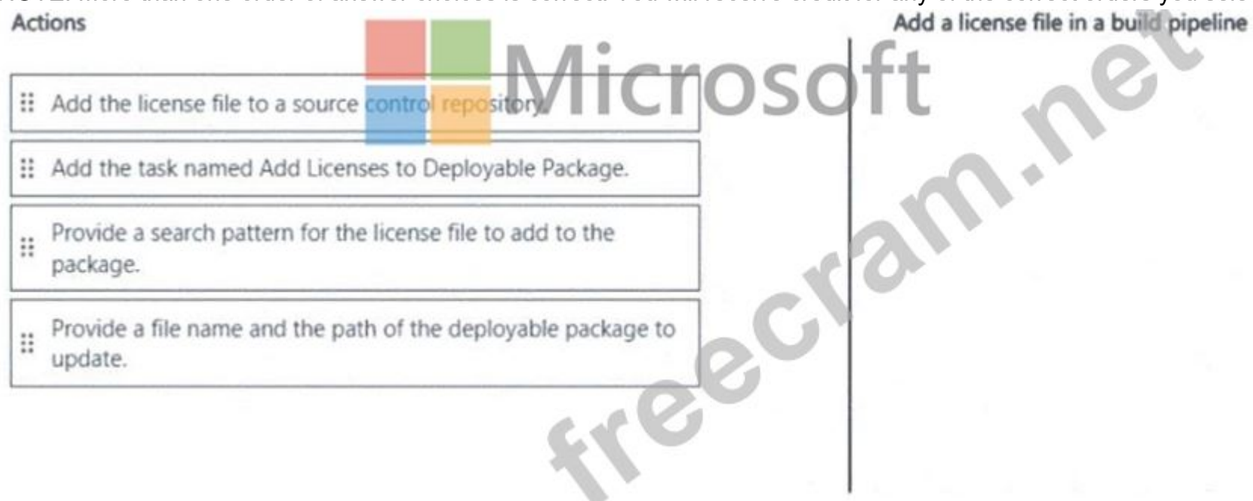

Explanation:

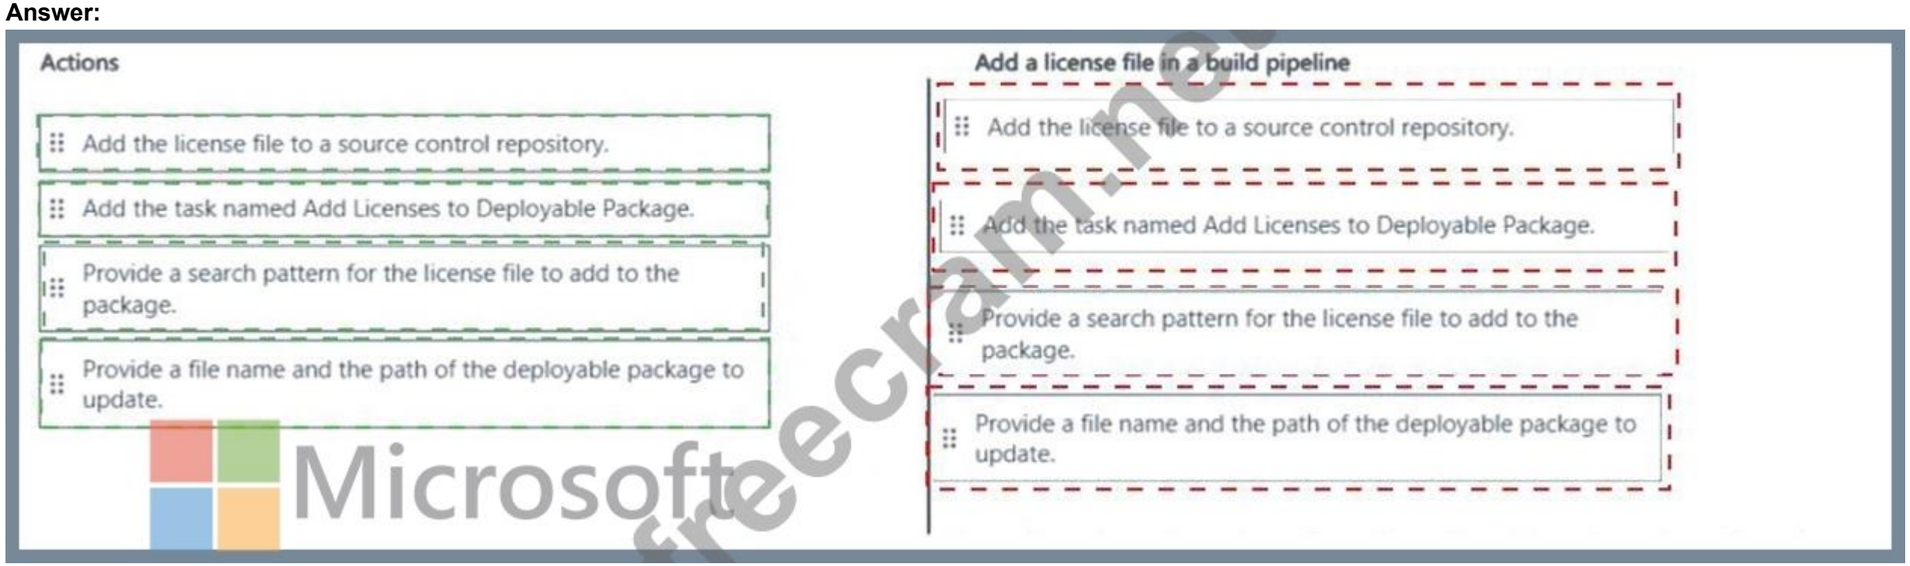

NEW QUESTION: 160
You have a test environment that has an independent software vendor (ISV) solution.

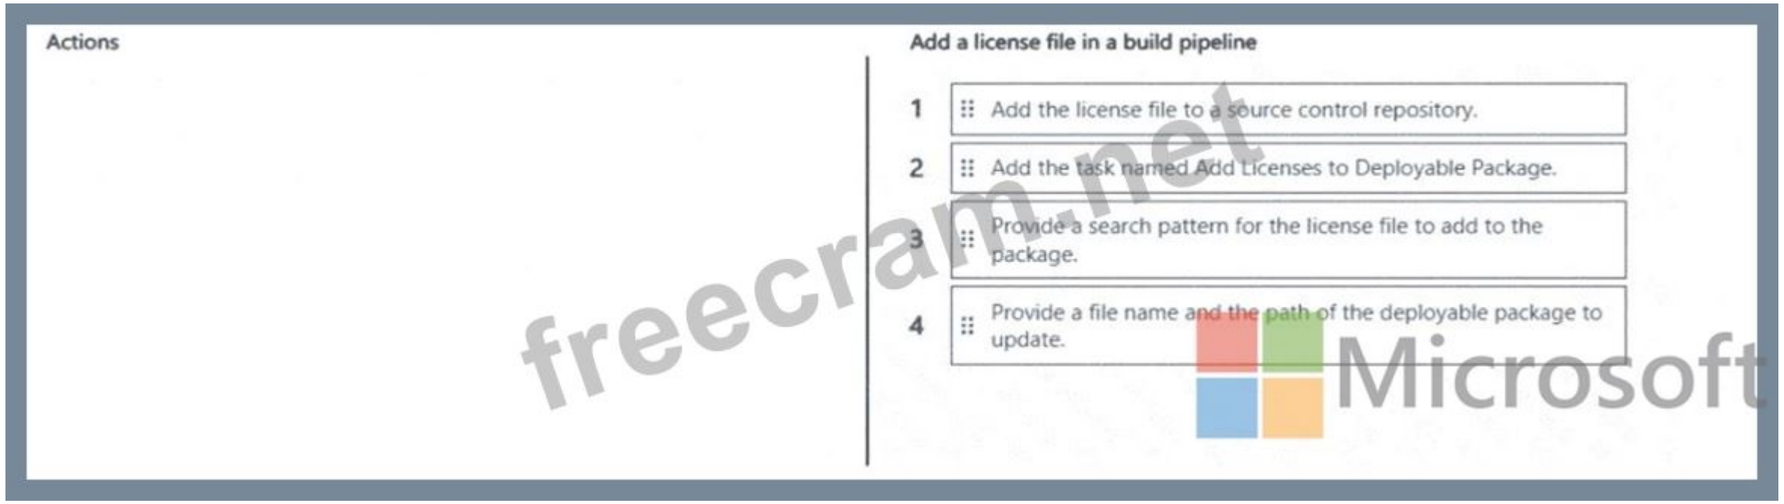

The ISV solution requires a license to enable it.
You need to add a license file to a software deployable package when the build is run.
In which order should you perform the actions? To answer, move all actions from the list of actions to the answer area and arrange them in the correct order.
NOTE: More than one order of answer choices is correct. You will receive credit for any of the correct orders you select.

Answer:

Explanation:

Microsoft

NEW QUESTION: 161

You are a Dynamics 365 Finance and Operations developer.

You need to monitor system performance.

Which tools should you use? To answer, select the appropriate option in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Tool
Review overall health of the system, as well as currently running processes and historical data.	LCS Environment Monitoring tool / Fiddler / Trace Parser / SQL Profiler
Review the load time and latency of different forms.	LCS Environment Monitoring tool / Fiddler / Trace Parser / SQL Profiler
Review a single process and see the code and SQL statements that are being run.	LCS Environment Monitoring tool / Fiddler / Trace Parser / SQL Profiler

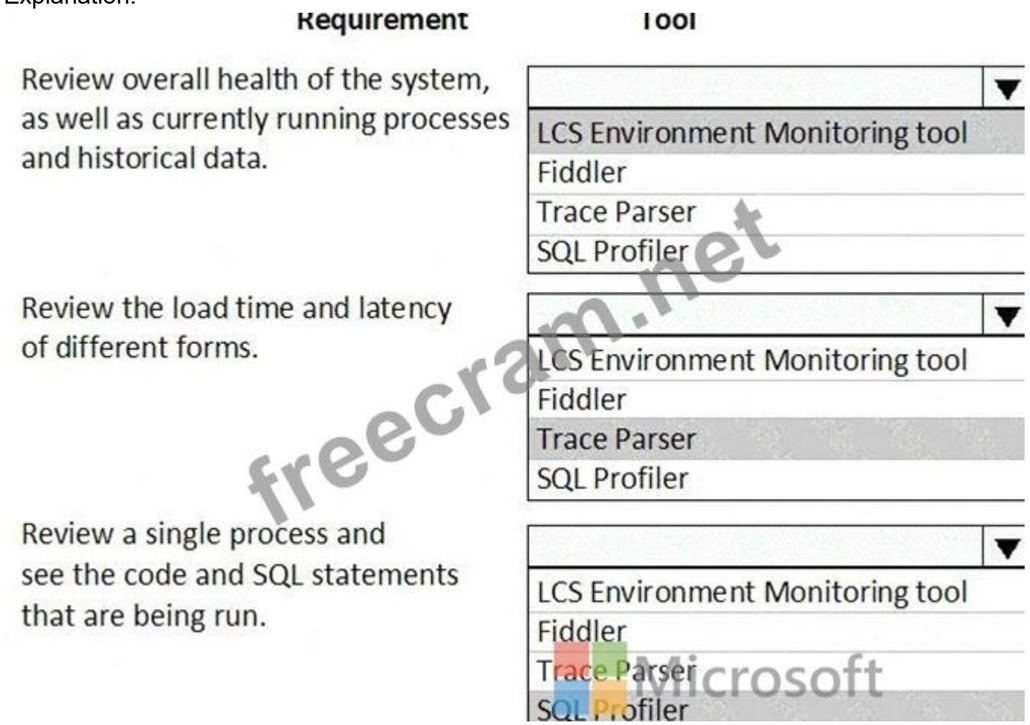

Microsoft
freecram.net

Answer:

Requirement	Tool
Review overall health of the system, as well as currently running processes and historical data.	LCS Environment Monitoring tool
Review the load time and latency of different forms.	Trace Parser
Review a single process and see the code and SQL statements that are being run.	SQL Profiler

freecram.net
Microsoft

Explanation:

freecram.net
Microsoft

Box 1: LCS Environment Monitoring tool

Microsoft Dynamics Lifecycle Services (LCS) provides to help you monitor, diagnose, and analyze the health of the Finance and Operations environments that you manage.

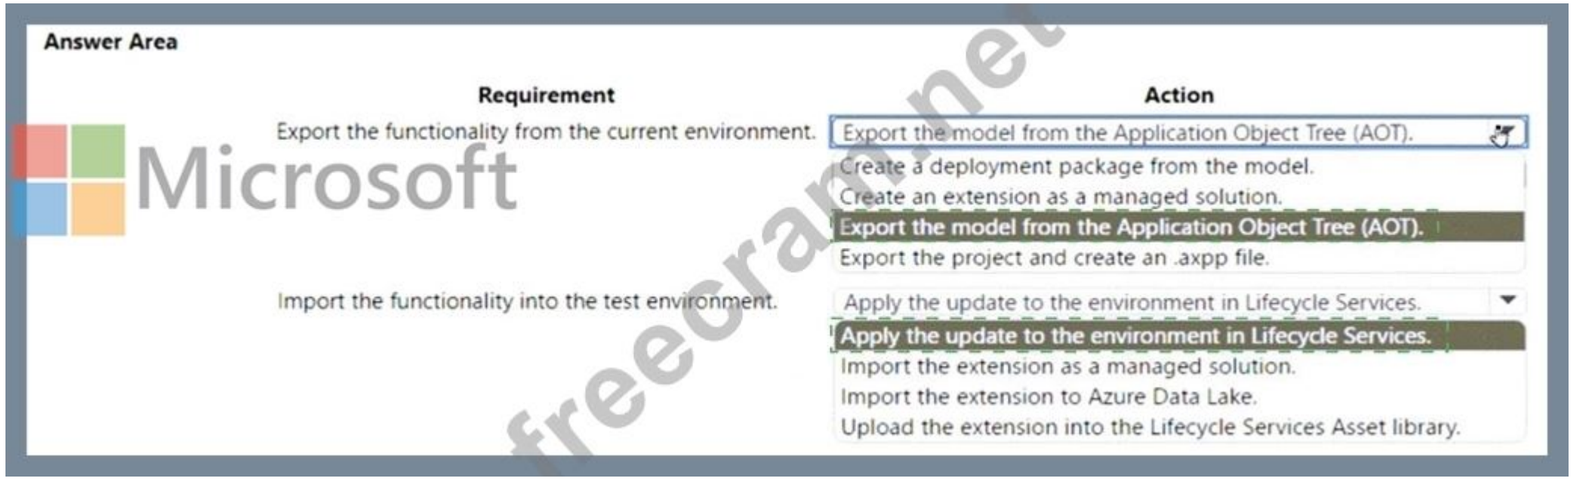

Box 2: Trace Parser
You can use the Trace parser to consume traces and analyze performance in your deployment.
Box 3: SQL Profiler

https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/lifecycle-services/monitoring- diagnostics

NEW QUESTION: 162
You are a Dynamics 365 Supply Chain Management developer.
You are working on a project by using Visual Studio.
Several users check out a custom form version control and modify the form.
You need to find the user that has added a specific line of code to the form.
What should you do?
A. Open the object in Object Designer, select the title of the object, and then right-click View History.
B. In Solution Explorer, navigate to the object and right-click View History.
C. Using Visual Studio, navigate to the object. Add the object to a new solution, and then right-click View History.
D. Using Visual Studio, navigate to the object in Application Explorer and right-click View History.
Answer: (SHOW ANSWER)
In Visual Studio, Go to source control explorer > Select the object > right click > View history Reference:
https://dynamicsuser.net/ax/f/developers/93354/how-to-rollback-a-change-set-completely-automatically-in-tfs

NEW QUESTION: 163
A company uses Dynamics 365 Finance and Dynamics 365 Supply Chain Management. The company wants to use new functionality that relates to purchase requisitions.
You need to promote the new functionality to a test environment.
What should you do? To answer select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.
