

## Microsoft.MB-700.v2026-07-01.q151

Exam Code:	MB-700
Exam Name:	Microsoft Dynamics 365: Finance and Operations Apps Solution Architect
Certification Provider:	Microsoft
Free Question Number:	151
Version:	v2026-07-01
# of views:	103
# of Questions views:	1510
<a href="https://www.freecram.net/torrent/Microsoft.MB-700.v2026-07-01.q151.html">https://www.freecram.net/torrent/Microsoft.MB-700.v2026-07-01.q151.html</a>	

### NEW QUESTION: 1

A company plans to implement Dynamics 365 Supply Chain Management.

The company has announced that it will be implementing a change management program. Many employees have volunteered to be a part of this program.

You need to determine the change management responsibilities for each role.

In which role does each responsibility belong? To answer, drag the appropriate roles to the correct responsibilities. Each role may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

The screenshot shows a drag-and-drop interface. On the left, under 'Roles', there are four items: Champions, Success owner, Early adopters, and Executive sponsors. On the right, under 'Answer Area', there are two responsibilities: 'Translate business goals into Dynamics 365 scenarios.' and 'Motivate and train teams.' Each responsibility has a corresponding 'Role' input field. The interface is watermarked with 'freecram.net' and the Microsoft logo.

Answer:

The screenshot shows the same interface as above, but with the correct answers. The 'Roles' list on the left has green boxes around each item. The 'Role' input fields on the right have red boxes around them, with 'Success owner' assigned to the first responsibility and 'Champions' assigned to the second. The interface is watermarked with 'freecram.net' and the Microsoft logo.

NEW QUESTION: 2

The company uses Lifecycle Services (LCS) environment monitoring tools to assess the health of their production environment.

The environment administrator must be able to do the following:

\* View tasks performed during a browser session.

\* Verify that interactive users are not connecting to servers allocated for batch jobs.

You need to determine which environment monitoring tools meet the requirements.

Which tool should you recommend for each requirement? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Tool
View tasks performed during a browser session.	<input type="checkbox"/> Activity load <input type="checkbox"/> User activity <input type="checkbox"/> User load
Verify that interactive users are not connecting to servers allocated for batch jobs.	<input type="checkbox"/> SQL insights <input type="checkbox"/> User activity <input type="checkbox"/> User load

Answer:

Requirement	Tool
View tasks performed during a browser session.	<input type="checkbox"/> Activity load <input checked="" type="checkbox"/> User activity <input type="checkbox"/> User load
Verify that interactive users are not connecting to servers allocated for batch jobs.	<input type="checkbox"/> SQL insights <input type="checkbox"/> User activity <input checked="" type="checkbox"/> User load

**NEW QUESTION: 3**

You need to recommend an appropriate implementation methodology.

Which methodology should you recommend?

- A. Waterfall
- B. Lean
- C. Agile
- D. Spiral

Answer: ([SHOW ANSWER](#))

**NEW QUESTION: 4**

A company uses Dynamics 365 finance and operations apps.

The company is creating a detailed One Version strategy for applying updates to different environments through Lifecycle Services (LCS).

You need to identify which environment can receive automatic updates from Microsoft.

Which environment should you select?

- A. Customer-managed environment deployed through LCS
- B. Microsoft Azure-hosted VHD development environment downloaded from LCS
- C. Local VHD development environment downloaded from OneDrive
- D. Multiple box testing environment hosted in Microsoft Azure

Answer: ([SHOW ANSWER](#))

**NEW QUESTION: 5**

A company is planning a Dynamics 365 Finance implementation. The company completes a build versus buy analysis and determines that customizations need to be built.

Multiple developers will work on the customizations. The company needs to ensure that each developer's source code is not in conflict with the other developer's code.

In addition, the technical quality team requires the ability to perform robust searches on the source code and metadata through XML searches.

You need to define the code management strategy.

Which components meet the requirements? To answer, drag the appropriate components to the correct requirements. Each component may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content NOTE: Each connect selection is worth one point.

The screenshot shows a Microsoft Dynamics 365 interface with two main panes. On the left, the 'Components' pane contains three boxes: 'Application Checker', 'Application Explorer', and 'Source Control'. On the right, the 'Answer Area' contains a 'Requirement' section with two items: 'Prevent code conflicts.' and 'Perform searches on application source code and metadata through XML searches.' To the right of the requirements is a 'Component' column with two empty input boxes. A large 'eCram' watermark is visible across the center of the interface.

Answer:

This screenshot shows the same interface as above, but with the correct assignments. In the 'Components' pane, 'Application Checker', 'Application Explorer', and 'Source Control' are highlighted with green boxes. In the 'Component' column, 'Source Control' is assigned to the first requirement ('Prevent code conflicts.') and 'Application Checker' is assigned to the second requirement ('Perform searches on application source code and metadata through XML searches.'). Both assignments are highlighted with red boxes. A large 'eCram' watermark is visible across the center of the interface.

**NEW QUESTION: 6**

You need to recommend a site and warehouse configuration.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Configuration**  **Solution**

Warehouse type  ▼

One advanced site, configure items for scanning
One basic warehouse, one advanced warehouse
Two basic warehouses, configure items for scanning
Two basic warehouses, no item configuration for scanning

Financial tracking  ▼

Item
License plate
Location
Warehouse

Answer:

**Configuration**  **Solution**

Warehouse type  ▼

One advanced site, configure items for scanning
One basic warehouse, one advanced warehouse
Two basic warehouses, configure items for scanning
Two basic warehouses, no item configuration for scanning

Financial tracking  ▼

Item
License plate
Location
Warehouse

Reference:

<https://docs.microsoft.com/en-us/dynamics365/supply-chain/warehousing/warehouse-management-overview>

**NEW QUESTION: 7**

A company is evaluating licensing for Dynamics 365 Finance.

The company requires expense management functionality that enables expense reports to be submitted by various users. Expense approvals will be a back-office function. You need to determine the license type for each role.

Which license types are required? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Role	License type
Expense creator	<div style="border: 1px solid gray; padding: 2px;"><div style="border-bottom: 1px solid gray; height: 20px; margin-bottom: 2px;"></div>Device</div> <div style="border-bottom: 1px solid gray; padding: 2px;">Dynamics 365 Finance</div> <div style="padding: 2px;">Team Member</div>
Expense approver	<div style="border: 1px solid gray; padding: 2px;"><div style="border-bottom: 1px solid gray; height: 20px; margin-bottom: 2px;"></div>Dynamics 365 Finance</div> <div style="border-bottom: 1px solid gray; padding: 2px;">Dynamics 365 Project Operations</div> <div style="padding: 2px;">Dynamics 365 Supply Chain Management</div>

Answer:

Role	License type
Expense creator	<div style="border: 1px solid gray; padding: 2px;"><div style="border-bottom: 1px solid gray; height: 20px; margin-bottom: 2px;"></div>Device</div> <div style="border-bottom: 1px solid gray; padding: 2px;">Dynamics 365 Finance</div> <div style="border: 2px solid red; padding: 2px;">Team Member</div>
Expense approver	<div style="border: 1px solid gray; padding: 2px;"><div style="border-bottom: 1px solid gray; height: 20px; margin-bottom: 2px;"></div><div style="border: 2px solid red; padding: 2px;">Dynamics 365 Finance</div><div style="border-bottom: 1px solid gray; padding: 2px;">Dynamics 365 Project Operations</div><div style="padding: 2px;">Dynamics 365 Supply Chain Management</div></div>

**NEW QUESTION: 8**

You are planning to implement Dynamics 365 Finance. Accountants in your organization need to be able to enter multiple lines into payment journals. You need to recommend a tool for expediting data entry. What should you recommend?

- A. Use the desktop version of Microsoft Excel to use the Excel Data Connector app.
- B. Use the Data migration tool.
- C. Use an aggregate data entity to expose data to the Microsoft Excel Data Connector app.
- D. Use Microsoft Excel online to use The Excel Data Connector app.

**Answer: A (LEAVE A REPLY)**

Reference:

<https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/office-integration/use-excel-add-in>

**NEW QUESTION: 9**

A company audits the security of its Dynamics 365 Supply Chain Management environment. The security administrator must identify the following details:

- \* The security roles that have access to the budget plan form.
- \* The duties that grant access to the form.

You need to recommend auditing tools to meet the requirements.

Which tools should you recommend? To answer, drag the appropriate tools to the correct requirements. Each tool may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

**Answer:**

**NEW QUESTION: 10**

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company is implementing Dynamics 365 Finance and Operations applications.

The company has the following security requirements:

\* Employees working from home must use company-managed devices only to access the applications.

\* Users with administrative roles must use multi-factor authentication (MFA).

You need to implement a security solution.

Solution: Configure Microsoft Dataverse security.

Does the solution meet the goal?

A. No

B. Yes

Answer: [\(SHOW ANSWER\)](#)

### NEW QUESTION: 11

A company implements Dynamics 365 Finance. The company does not have a developer on staff.

The company designs vendor checks that will be accepted by banks. The company wants to format new vendor checks for multiple banks.

You need to recommend a solution to validate that a generated vendor check format matches the original check format.

What should you recommend? To answer, drag the appropriate tools to the correct requirements. Each tool may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

#### Tools

- Document management
- Business documents
- SQL Server Reporting Services (SSRS)
- Electronic reporting

#### Answer Area

##### Requirement

Format new vendor checks.

Validate vendor check formats.

##### Tool

- Tool
- Tool

Answer:

**Tools**

- Document management
- Business documents
- SQL Server Reporting Services (SSRS)
- Electronic reporting

**Answer Area**

**Requirement**

Format new vendor checks.  
 Validate vendor check formats.

**Tool**

- Electronic reporting Tool
- Document management

Reference:

<https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/analytics/er-business-document-management>

**NEW QUESTION: 12**

You need to ensure that file sharing during Teams chats meets the technical requirements of the marketing department. What should you do?

- A. Create a retention policy for the SharePoint sites location.
- B. Create a data loss prevention (DLP) policy for Teams chat and channel messages.
- C. Create a retention policy for the OneDrive account location.
- D. Create a retention policy for Teams chats.
- E. Enable Customer Lockbox.

**Answer:** (SHOW ANSWER)

**NEW QUESTION: 13**

A company is implementing Dynamics 365 Finance.

The company is concerned that the encryption of data between the application server and the browser might be used to access the application. You need to recommend what the company should do to increase the security of the data during transmission.

Which security components should you recommend the company use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

**Answer Area**

**Action**

Configure the connection.

Add to the configuration in Dynamics 365 Finance.

**Security component**

- Microsoft SQL Server Transparent Data Encryption
- Azure Key Vault
- Azure Storage encryption
- Microsoft Defender XDR
- Microsoft SQL Server Transparent Data Encryption

- configuration key
- security policy
- encryption API
- certificate secret
- configuration key

**Answer:**

Answer Area

Action

Configure the connection.

Add to the configuration in Dynamics 365 Finance.

**NEW QUESTION: 14**

A company is implementing Dynamics 365 Finance.

The company needs information on the capabilities of Lifecycle Services (LCS).

You need to identify the scenarios for using LCS.

Which three scenarios should you identify? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. View the implementation methodology examples provided by Microsoft.
- B. Identify issues in module configuration and business data.
- C. Estimate the number of licenses required.
- D. Configure database logging on tables.
- E. Submit a support ticket.

Answer: ([SHOW ANSWER](#))

**NEW QUESTION: 15**

You need to recommend Microsoft solutions for City Power and Light's business requirements.

What should you recommend? To answer, drag the appropriate solutions to the correct requirements. Each solution may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Solutions	Requirement	Solution
Microsoft Forms Pro		
Microsoft Power Automate	Customer surveys	
Microsoft Teams	Centralized tool for all employee communication and file sharing	
Dynamics 365 Field Service	Manage part inventory and tools on trucks for customer support appointments	
Microsoft SharePoint		
PowerApps		
Dynamics 365 Customer Service		

Answer:

Solutions	Requirement	Solution
Microsoft Forms Pro		
Microsoft Power Automate	Customer surveys	Microsoft Forms Pro
Microsoft Teams	Centralized tool for all employee communication and file sharing	Microsoft Teams
Dynamics 365 Field Service	Manage part inventory and tools on trucks for customer support appointments	Dynamics 365 Field Service
Microsoft SharePoint		
PowerApps		
Dynamics 365 Customer Service		

Reference:

<https://docs.microsoft.com/en-us/dynamics365/field-service/overview>

**NEW QUESTION: 16**

Your company has a Microsoft 365 subscription.

You need to prevent temporary employees from using the chat feature in Microsoft Teams.

Solution: You create a meeting policy and assign the policy to the users.

Does this meet the goal?

A. Yes

B. No

**Answer:** ([SHOW ANSWER](#))

Creating a meeting policy in Microsoft Teams controls the features available during meetings, such as who can bypass the lobby or whether recording is allowed, but it does not control the ability to use chat outside of meetings. To prevent temporary employees from using the chat feature, a messaging policy would need to be configured instead.

**NEW QUESTION: 17**

A company is implementing Dynamics 365 and Microsoft Power Platform.

You need to export only the modified forms that are part of a solution update.

Which option should you use?

A. Include no components or metadata

B. Select components

C. Include all components

D. Include entity metadata

**Answer:** ([SHOW ANSWER](#))

**NEW QUESTION: 18**

A company is planning a multicountry implementation of Dynamics 365 Supply Chain Management.

You are planning the solution blueprint workshop and must create the artifacts.

You need to identify which artifacts to create for the requirements.

Which artifact should you prepare for each requirement? To answer, move the appropriate artifact to the correct requirement. You may use each artifact once, more than once, or not at all. You may need to move the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

**Artifacts**

- Process catalogs
- Gap requirements
- Environment strategy

**Solution blueprint artifacts**

**Requirement**

- Document code and configuration flows from test to gold.
- Document unsupported areas in the solution.

**Artifact**

- 
- 

**Answer:**

**Artifacts**

- Process catalogs
- Gap requirements
- Environment strategy

**Solution blueprint artifacts**

**Requirement**

- Document code and configuration flows from test to gold.
- Document unsupported areas in the solution.

**Artifact**

- Environment strategy
- Gap requirements

**NEW QUESTION: 19**

A mining company is upgrading their system to Dynamics 365 Finance and Dynamics 365 Supply Chain Management.

You need to determine which functionality of the Dynamics 365 suite meets each requirement.

Which functionality should you implement for each requirement? To answer, select the appropriate options from the answer area.

NOTE: Each correct selection is worth one point.

## Requirement

## Functionality

Track maintenance on mining machines and equipment.

	▼
Asset Management	
Fixed Assets	
Field Service	

Capture costs for each of the mine locations or capitalization opportunities.

	▼
Project Management and Accounting	
Fixed Assets	
Inventory dimension site	

Answer:

## Requirement

## Functionality

Track maintenance on mining machines and equipment.

	▼
Asset Management	
Fixed Assets	
Field Service	

Capture costs for each of the mine locations or capitalization opportunities.

	▼
Project Management and Accounting	
Fixed Assets	
Inventory dimension site

### NEW QUESTION: 20

You are a consultant for Proseware, Inc.

You need to audit the system based on government financial compliance standards in Objective 2.

What should you use?

- A. Security diagnostic for task recording
- B. Compare permissions
- C. User role assignments report
- D. Segregation of duties
- E. Role to user assignments report

Answer: [\(SHOW ANSWER\)](#)

### NEW QUESTION: 21

A company creates a canvas app in a development environment.

The technical team wants to move the app from the development environment to a test environment. You need to provide a recommendation. What should you propose?

- A. Use a configuration migration tool.

- B. Use a package deployer.
- C. Export and import a patch.
- D. Export and import a managed solution.

Answer: [\(SHOW ANSWER\)](#)

**NEW QUESTION: 22**

A company plans to implement Dynamics 365 Supply Chain Management. The company has third-party applications that require integration. The company uses the Success by Design framework for the implementation. The solution architect is generating a findings document as the output of the integration design workshop. You need to categorize the types of findings from the integration design workshop. Which three categorizations should you use? Each correct answer presents a complete solution. NOTE; Each correct selection is worth one point.

- A. Build
- B. Risk
- C. Gap
- D. Assertions
- E. Issue

Answer: [\(SHOW ANSWER\)](#)

**NEW QUESTION: 23**

A company is planning to implement Dynamics 365 Finance and Dynamics 365 Supply Cham Management. The company is set up with the following:

- \* The parent company reports sales in US dollars (USD).
- \* The two partially owned subsidiaries perform transactions in euros (EUR).
- \* The two fully owned subsidiaries perform transactions in USD.
- \* Each subsidiary has three business units for product development strategic planning, and sales operations.
- \* There are two distribution centers in the US. Each center has a primary warehouse and a quarantine warehouse.

You need to configure the organizational structures for the company.

How should you configure the organizational structures? To answer, move the appropriate configurations to the correct organizational structures. You may use each configuration once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

The screenshot shows the Microsoft Dynamics 365 Organizational Structures configuration interface. It is divided into two main panes. The left pane, titled "Configurations", contains three items: "Consolidation company", "Financial dimension", and "Legal entity". The right pane, titled "Organizational Components", contains three categories: "Organizational structures", "Business units", and "Partially owned subsidiary". Each category has an empty box for configuration. A watermark "freeexam.net" is visible across the interface.

Answer:

**NEW QUESTION: 24**

You need to recommend solutions to meet the CIO's requirements (or the customers and the roadmap. What should you recommend? To answer, select the appropriate options in the answer area.  
NOTE: Each correct selection is worth one point.

**Answer:**

**NEW QUESTION: 25**

You need to identify the strategy for each application lifecycle management (ALM) component.  
Which strategy should you use for each ALM component? To answer, select the appropriate options in the answer area.  
NOTE: Each correct selection is worth one point.

Code management strategy for ALM process.

ALM component

Code management strategy Dynamics 365  
custom development

Microsoft  
Strategy

A Visual Studio project per workstream  
A model per pod  
A single model for the implementation  
A Visual Studio project per workstream  
A single Visual Studio project per workstream

Deploy as its own package.  
Deploy as its own package.  
Deploy as part of an existing package.

**Answer:**

Code management strategy for ALM process.

ALM component

Code management strategy Dynamics 365  
custom development

Microsoft  
Strategy

A Visual Studio project per workstream  
A model per pod  
A single model for the implementation  
A Visual Studio project per workstream  
A single Visual Studio project per workstream

Deploy as its own package.  
Deploy as its own package.  
Deploy as part of an existing package.

#### NEW QUESTION: 26

A manufacturing company has multiple factories and distribution centers in remote areas where they have poor internet connectivity. The company is planning to implement Dynamics 365 Supply Chain Management.

The company's main priorities are uninterrupted factory and distribution center operations, master data management financial global reporting, and integration with analytics tools.

You need to design the infrastructure.

Solution: Implement the manufacturing factories' operations and distribution center operations on-premises and the center data repository in the cloud.

Does the solution meet the goal?

A. Yes

B. No

**Answer:** ([SHOW ANSWER](#))

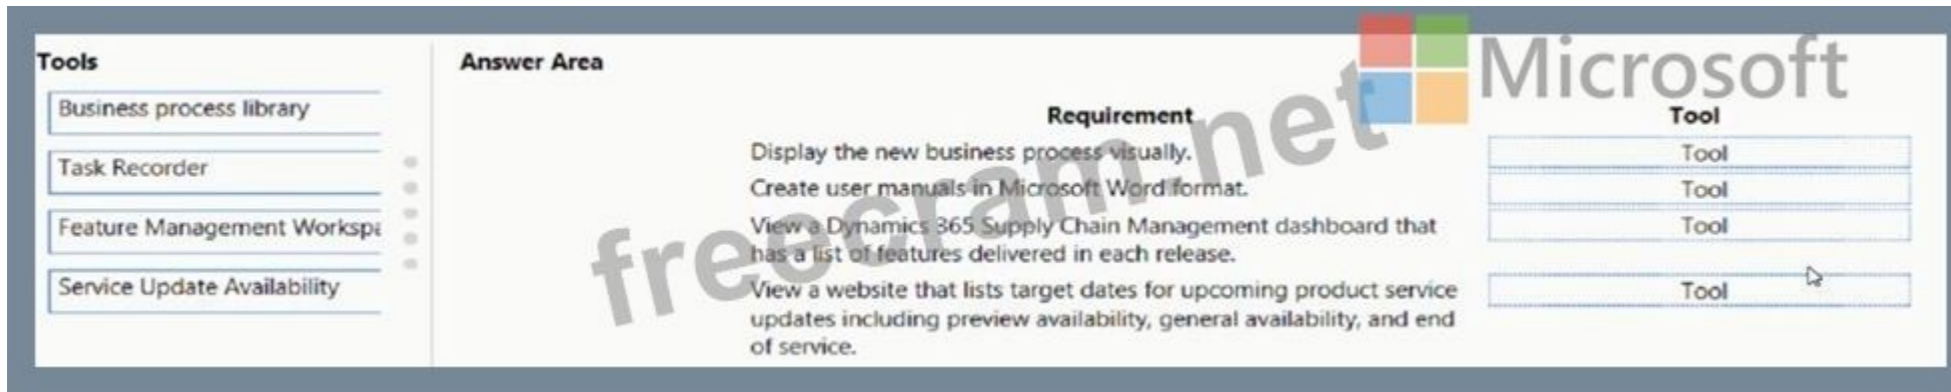

#### NEW QUESTION: 27

A company uses Dynamics 365 Supply Chain Management. You are evaluating the company's new business processes.

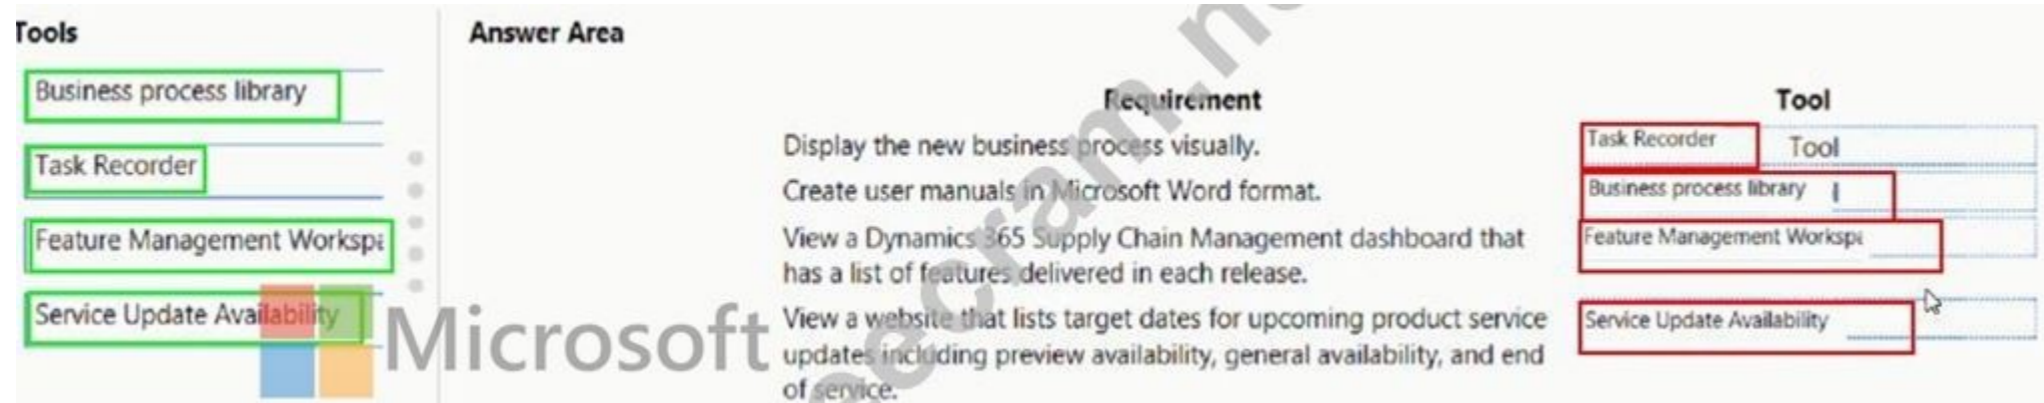

You need to determine which tools functional consultants should use to identify any possible gaps and new features available from Microsoft.

What should you recommend? To answer, drag the appropriate tools to the correct requirements. Each tool may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

Reference:

<https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/fin-ops/get-started/feature-management/feature-management-overview>

**NEW QUESTION: 28**

A company is planning a Dynamics 365 Supply Chain Management implementation. The company expects that a high number of customizations will be required due to the nature of its business.

The company has the following requirements for the customizations:

- \* Code that is written must not create issues with any future service updates.
- \* Models that contain code must simplify the application lifecycle management (ALM) strategy.

You need to define the code management strategy.

Which actions should you use in the strategy? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Answer Area

**Requirement**  
Code does not create issues with service updates.

**Action**

- Use extensions.
- Overlay source code.
- Create data packages.

Models that contain code must simplify the ALM strategy.

- Deploy in its own package.
- Use extensions.
- Deploy in its own package.
- Deploy in an existing package.

**NEW QUESTION: 29**

A company deploys Dynamics 365 finance and operations apps. The implementation includes Dynamics 365 and Microsoft Power Platform solutions. The company creates and manages service calls for technicians by using Dynamics 365 Field Service.

When a work order is created, Dynamics 365 Field Service must create a sales order for that work order in real time.

A user creates a change-based alert that will trigger when a newly created sales order from a workflow is greater than \$5,000. The alert must trigger a workflow the user can modify to automate other steps.

You need to recommend components for the company to use.

NOTE: Each correct selection is worth one point.

Action	Integration component
Create the sales order from the work order.	<ul style="list-style-type: none"> <li>Dual-write</li> <li>Custom service</li> <li>Batch OData API</li> </ul>
Trigger the change-based alert workflow.	<ul style="list-style-type: none"> <li>Activities</li> <li>Dual-write</li> <li>Business events</li> <li>Data Integrator</li> </ul>

**Answer:**

Action	Integration component
Create the sales order from the work order.	<ul style="list-style-type: none"> <li>Dual-write</li> <li>Custom service</li> <li>Batch OData API</li> </ul>
Trigger the change-based alert workflow.	<ul style="list-style-type: none"> <li>Activities</li> <li>Dual-write</li> <li>Business events</li> <li>Data Integrator</li> </ul>

**NEW QUESTION: 30**

A company produces automotive components. The company uses Microsoft Excel to track the quantity of parts on hand. The company wants to automate processes to track inventory using Dynamics 365 Supply Chain Management. You need to ensure that the company can track supplies and determine when to purchase new inventory. Which two features should you use? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. Demand forecasting
- B. Master planning
- C. Purchase requisitions
- D. Purchase agreements
- E. Purchase policies

**Answer: (SHOW ANSWER)**

Reference:

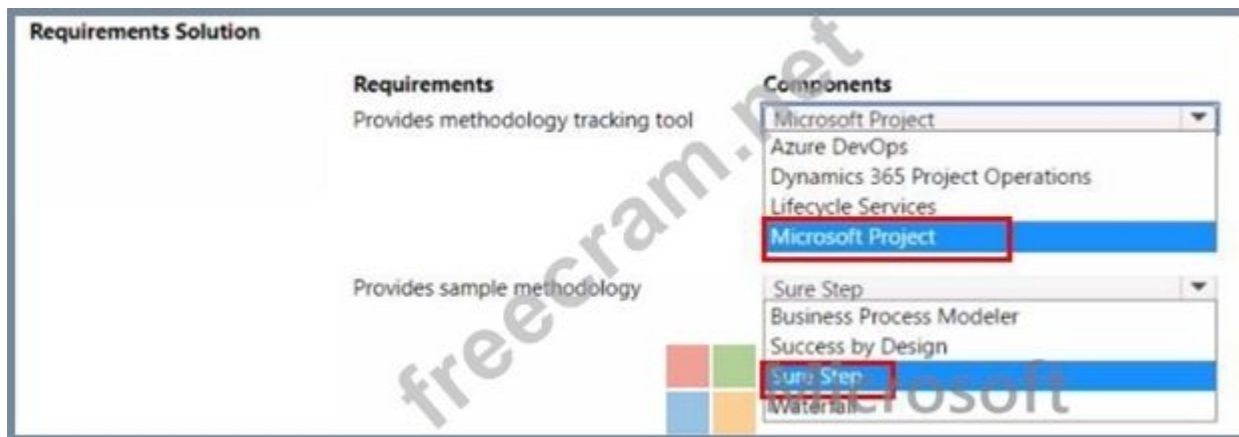

<https://docs.microsoft.com/en-us/dynamics365/supply-chain/master-planning/planning-optimization/demand-forecast>

**NEW QUESTION: 31**

You need to implement a solution for entering the methodology information for the project. Which components should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer:

Valid MB-700 Dumps shared by EduDump.com for Helping Passing MB-700 Exam! **NEW QUESTION: 32**

You are preparing to complete a solution blueprint review and are reviewing business process documentation.

You need to identify the deliverable related to each process.

Which deliverable type should you identify for each deliverable definition? To answer, select the appropriate options in the answer area NOTE: Each correct selection is worth one point.

**Process definition deliverable**

**Deliverable definition**  
Provides a sequenced list of business processes.

Links requirements throughout validation.

Displays inputs and outputs for each business process.

**Deliverable type**

- Process flow
- Process flow
- Process map
- Process catalog
- Requirements traceability matrix
- Process map
- Requirements traceability matrix
- Process catalog
- Process map
- Process flow
- Process catalog

**Answer:**  
Process definition deliverable

**Deliverable definition**  
Provides a sequenced list of business processes.

Links requirements throughout validation.

Displays inputs and outputs for each business process.

**Deliverable type**

- Process flow
- Process flow
- Process map
- Process catalog
- Requirements traceability matrix

**NEW QUESTION: 33**

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company is planning to implement Dynamics 365 Supply Chain Management with three locations. Two locations must use United States currency (USD) as the default currency. The third location must use Canadian currency (CAD).

One US facility and the Canadian facility must use advanced warehouse functionality. The other US facility must use basic warehousing.

You need to configure the legal entity, site, and warehouse architecture to meet the requirements.

Solution: Create three legal entities, one for each facility.

Does the solution meet the goal?

- A. Yes
- B. No

Answer: ([SHOW ANSWER](#))

Default currency is configured per legal entity. Advanced warehouse is configured per warehouse.

**NEW QUESTION: 34**

A company plans to implement Dynamics 365 Finance + Operations (on-premises).

The company has system compliance requirements that must be addressed. You need to design the solution for the company.

What should you address in the design?

- A. equal employment opportunity
- B. fair labor standards
- C. data privacy
- D. employee retirement

Answer: C ([LEAVE A REPLY](#))

**NEW QUESTION: 35**

A company uses an on-premises product management application that manages 200 products. Product information does not change frequently.

You need to synchronize data between the application and Dynamics 365 Supply Chain Management. Data in Dynamics 365 Supply Chain Management must update in near real time when changes are made in the application.

What should you recommend?

- A. OData
- B. Batch data API
- C. Application Integration Framework
- D. Lifecycle Services

Answer: ([SHOW ANSWER](#))

Reference:

<https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/data-entities/integration-overview>

**NEW QUESTION: 36**

A company is implementing Dynamics 365 Supply Chain Management. The company is enrolled in the FastTrack program.

You need to determine when specific tasks occur within the Success by Design framework.

In which stage does each task take place? To answer, drag the appropriate stages to the correct tasks. Each stage may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

**Stages**

- Initiate
- Implement
- Prepare
- Operate

**Task**

- Assess implementation partner readiness.
- Assess system and operational readiness for go-live.

**Stage**

**Answer:**

**Stages**

- Initiate
- Implement
- Prepare
- Operate

**Task**

- Assess implementation partner readiness.
- Assess system and operational readiness for go-live.

**Stage**

- Initiate
- Prepare

**NEW QUESTION: 37**

You need to identify the regression testing strategy that should be used by the sales order entry app for the sales order lifecycle.

Which testing strategies should you use? To answer, move the appropriate testing strategies to the correct processes. You may use each testing strategy once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

**Testing Strategies**

- Automated
- Manual

**Processes**

- Sales order entry
- Sales order end-of-day process

**Testing strategies**

**Answer:**

**Testing Strategies**

- Automated
- Manual

**Processes**

- Sales order entry
- Sales order end-of-day process

**Testing strategies**

- Manual
- Automated

**NEW QUESTION: 38**

A German company is implementing a cloud-based Dynamics 365 system.

The company needs to determine the best data storage solution for the following requirements:

- \* Data must be stored in the European Union.
- \* Data cannot be viewed by the United States government under the Patriot Act.
- \* Data transfer exceptions can be made but must be authorized by the corporate legal team.
- \* You need to determine which cloud services may have to transfer data to the United States.

Which three services should you review? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Usage data
- B. Technical support
- C. Power BI dashboard
- D. Data center failover
- E. Lifecycle Services

Answer: ([SHOW ANSWER](#))

**NEW QUESTION: 39**

A company uses Dynamics 365 finance and operations apps.

The company's environment plan does not meet the requirements to support performance tests for the solution implementation.

The environment needs to meet the Microsoft-recommended process to support performance testing.

You need to recommend a process to implement the environment.

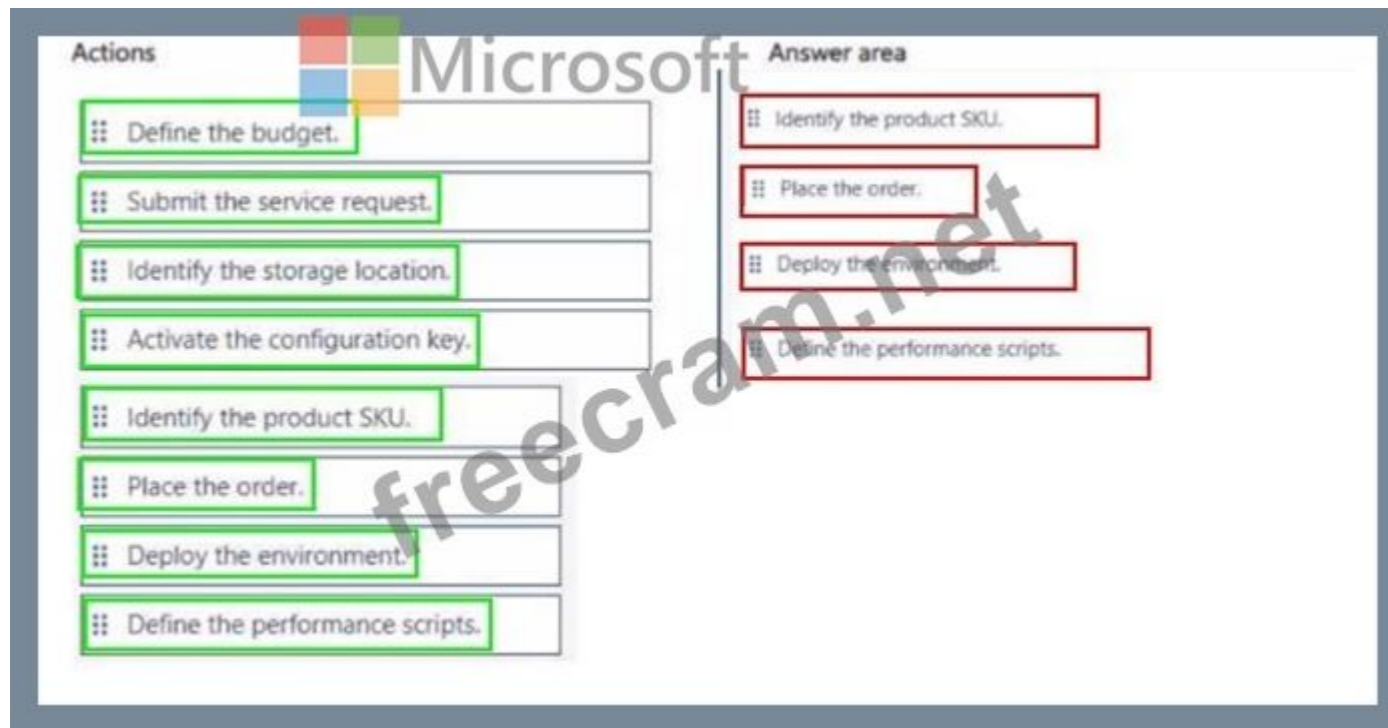

Which four actions should you recommend be performed in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

The screenshot displays a question interface with two main sections: 'Actions' and 'Answer area'. The 'Actions' section contains a list of eight actions, each with a three-dot icon on the left for selection:

- Define the budget.
- Submit the service request.
- Identify the storage location.
- Activate the configuration key.
- Identify the product SKU.
- Place the order.
- Deploy the environment.
- Define the performance scripts.

The 'Answer area' is currently empty. A vertical line separates the two sections. The Microsoft logo is located at the bottom right of the interface. A watermark 'freecram.net' is visible across the center of the screenshot.

Answer:

#### NEW QUESTION: 40

A company is implementing Dynamics 365 Finance.

The company wants to automate expense reports processing. The new process must provide visibility into all steps of the approval process.

You need to recommend a solution.

Which two solutions should you recommend? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Use the Business process modeler (BPM) to create a business process flow.
- B. Create a workflow that runs on Application Object Server (AOS).
- C. Use Microsoft Power Automate to create a workflow.
- D. Use the PowerApps platform to create a business process flow.

Answer: ([SHOW ANSWER](#))

#### NEW QUESTION: 41

A company uses Dynamics 365 Finance.

The company wants to understand how version updates are handled.

You need to explain the version update and pause policy.

What should you conclude? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

What is the minimum number of required updates each year?

- One
- Two
- Three
- Four

How many consecutive updates can you pause before an update is required?

- One
- Two
- Three
- Four

Answer:

The screenshot shows the quiz interface with the following correct answers highlighted in red boxes:

- For the first question, "Two" is selected.
- For the second question, "Three" is selected.

**NEW QUESTION: 42**

You are designing a solution for a company. The solution will integrate with various data sources.

You need to recommend the correct timing for each integration pattern.

What should you recommend? To answer, drag the appropriate timings to the correct patterns. Each timing may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content NOTE: Each correct selection is worth one point.

The interface is divided into two main sections: "Timings" and "Answer Area".

**Timings:**

- Synchronous only
- Asynchronous only
- Both

**Answer Area:**

Pattern	Timing
OData	Timing
Custom service	Timing
SOAP	Timing
Batch data API	Timing

Answer:

Timings

Synchronous only

Asynchronous only

Both

Microsoft

Answer Area

Pattern

OData

Custom service

SOAP

Batch data API

Timing

Synchronous only

Synchronous only

Both

Asynchronous only

#### NEW QUESTION: 43

A company plans to upgrade from Microsoft Dynamics AX 2012 to Dynamics 365 Finance and Dynamics 365 Supply Chain Management. The company has a large call center that uses a third-party system to enter sales orders.

The company decides to keep the third-party system and integrate it with Dynamics 365 Finance and Dynamics 365 Supply Chain Management. The company also wants to reuse the Microsoft Dynamics AX 2012 integration and endpoints with Dynamics 365 Finance and Dynamics 365 Supply Chain Management.

For performance reasons, non-real-time integrations must be avoided.

All solutions that are proposed should be supported by Microsoft in case there are performance issues.

You need to plan the integration strategy.

What should you do?

- A. Plan for testing in a production environment.
- B. Use only synchronous integrations.
- C. Reuse the Application Integration Framework (AIF) and endpoint integration.
- D. Use a standard Microsoft Data Management Framework (DMF) package REST API.

Answer: (SHOW ANSWER)

#### NEW QUESTION: 44

A company uses Dynamics 365 Supply Chain Management.

You are performing regression testing using the Regression suite automation tool (RSAT). You observe that invoice totals for some sales orders are lower than expected.

You need to ensure that the invoice totals are correct.

What should you do? To answer, drag the appropriate actions to the correct scenarios. Each action may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer Area

Requirement

Track maintenance on mining machines and equipment.

Functionality

Asset Management

Asset Management

Fixed Assets

Field Service

Fixed Assets

Project Management and Accounting

Fixed Assets

Inventory dimension site

Microsoft

Answer:  
Answer Area

The screenshot shows a Dynamics 365 interface with two requirements listed under the heading "Requirement":

- Track maintenance on mining machines and equipment.
- Capture costs for each of the mine locations for capitalization opportunities.

Two dropdown menus are open under the heading "Functionality":

- The first dropdown menu has "Asset Management" selected.
- The second dropdown menu has "Fixed Assets" selected.

**NEW QUESTION: 45**

You need to recommend solutions for City Power and Light's new system. What should you recommend? To answer, drag the appropriate tools to the correct requirements. Each tool may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content. NOTE: Each correct selection is worth one point.

The screenshot shows a Dynamics 365 interface for question 45. It features three tool options on the left and three requirements in the center, each with a corresponding empty box on the right for a tool selection.

Tools	Requirement	Tool
ISV	Solar panel quoting	
Custom	Wire payments	
Standard	Audit requirements	

Answer:

The screenshot shows the Dynamics 365 interface with the correct tool assignments for question 45. The tool boxes are highlighted with green borders, and the requirement boxes are highlighted with red borders.

Tools	Requirement	Tool
ISV	Solar panel quoting	Custom
Custom	Wire payments	ISV
Standard	Audit requirements	Standard

**NEW QUESTION: 46**

A company is implementing Dynamics 365 Finance. The company enrolled in the FastTrack program. You need to explain the benefits of FastTrack.

What are three benefits? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. solution design and development for the customer
- B. formalization of roles
- C. early discovery of risks and issues
- D. predictable success based on past experience
- E. proactive guidance

Answer: ([SHOW ANSWER](#))

**NEW QUESTION: 47**

A company is implementing Dynamics 365 Finance.

The company uses Microsoft 365 apps.

The company wants to integrate Microsoft Word and Excel into Dynamics 365 Finance. You need to identify the underlying technology that is required.

Solution: Lifecycle Services (ICS)

Does the solution meet the goal?

- A. No
- B. Yes

Answer: ([SHOW ANSWER](#))

**NEW QUESTION: 48**

A customer implements Dynamics 365 Finance and Dynamics 365 Supply Chain Management The customer wants to use system functions to help prevent fraud.

You need to determine which functions meet the customer's security requirements.

Which function should be used for each requirement? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Function
Evaluate 10 percent of purchase orders for compliance.	Audit policy sampling
Disallow the same employee to both post and pay invoices.	Segregation of duties

Answer:

**NEW QUESTION: 49**

A company uses Dynamics 365 Finance. The company has several integrations with Dynamics 365 Finance that use REST web services.

You must perform unit testing on the web services before you promote the web services to the main build environment. You need to recommend solutions to manually unit test the web services.

Which two tools should you recommend? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Postman
- B. Dynamics 365 task recordings
- C. Regression suite automation testing (RSAT)
- D. Azure DevOps
- E. Soap UI

Answer: ([SHOW ANSWER](#))

**NEW QUESTION: 50**

A company wants to upgrade their current AX 2009 system to Dynamics 365.

You need to recommend a supported upgrade strategy for code and transactional data for the previous five years.

Which two options should you recommend? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Use the Data migration tool (DMT) to move the data from AX 2009 to Dynamics 365.
- B. Use Lifecycle Services Code upgrade tool to directory upgrade the code base from AX 2009 to Dynamics 365.
- C. Upgrade code from AX 2009 to AX 2012, and then AX 2012 to Dynamics 365.
- D. Use the Data Import/Export Framework to migrate the data from AX 2009 to Dynamics 365.

Answer: ([SHOW ANSWER](#))

Reference:

<https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/migration-upgrade/data-migration-tool>

**NEW QUESTION: 51**

You are a solution architect that implements Dynamics 365 finance and operations apps.

An advanced scenario in master planning includes a product bug.

You need to create a modification to avoid the scenario with the product bug, but Microsoft has not created the required extension capabilities. You need to recommend a solution to log the product bug and request the extension capabilities. Which tools should you recommend? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Action	Tool
Open support ticket.	<input type="text"/> Lifecycle Services (LCS) FastTrack Azure DevOps Dynamics 365 Application Ideas
Request extension capabilities.	<input type="text"/> Lifecycle Services (LCS) FastTrack Azure DevOps Dynamics 365 Application Ideas

Answer:

Action	Tool
Open support ticket.	<input type="text"/> <b>Lifecycle Services (LCS)</b> FastTrack Azure DevOps Dynamics 365 Application Ideas
Request extension capabilities.	<input type="text"/> <b>Lifecycle Services (LCS)</b> FastTrack Azure DevOps Dynamics 365 Application Ideas

Reference:

<https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/extensibility/extensibility-requests>

**NEW QUESTION: 52**

Note: This question is part of a series of questions that present the same scenario. Each Question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company with multiple legal entities implements Dynamics 365 Finance.

You need to recommend options to ensure that you can provide customized financial reporting across the legal entities.

Solution: Create separate cost centers to manage operations. Does the solution meet the goal?

A. No

B. Yes

Answer: ([SHOW ANSWER](#))

**NEW QUESTION: 53**

A company is implementing the vendor collaboration functionality in Dynamics 365 Chain Management.

A vendor's external user must be able to access the vendor portal and create new users. The external user must be able to create new users only for the vendor's organization.

You need to set up the solution to meet the requirements.

How should you set up the solution? To answer, select the appropriate options in the answer area.

Allow portal access for vendor users.

- Grant full Azure Active Directory access
- Create employee records
- Create new worker records
- Provision the vendor users

Grant access to create new users.

- Initiate a workflow
- Grant full Azure Active Directory access
- Configure rules to enforce separation of duties
- Assign the contacts to the vendor

Answer:

Requirement	Action
Allow portal access for vendor users.	<ul style="list-style-type: none"> <li>Grant full Azure Active Directory access</li> <li>Create employee records</li> <li>Create new worker records</li> <li><b>Provision the vendor users</b></li> </ul>
Grant access to create new users.	<ul style="list-style-type: none"> <li><b>Initiate a workflow</b></li> <li>Grant full Azure Active Directory access</li> <li>Configure rules to enforce separation of duties</li> <li>Assign the contacts to the vendor</li> </ul>

**NEW QUESTION: 54**

A manufacturing company is implementing Dynamics 365 Supply Chain Management.

The company wants to ensure that they are prepared for the testing phase of the implementation.

You need to validate the solution.

Which type of test should you perform? To answer, drag the appropriate test types to the correct scenarios. Each test type may be used once, more Than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Test types	Answer Area									
<ul style="list-style-type: none"> <li>Unit test</li> <li>Regression test</li> <li>Acceptance test</li> </ul>	<table border="1"> <thead> <tr> <th>User type</th> <th>Scenario</th> <th>Test type</th> </tr> </thead> <tbody> <tr> <td>Developer</td> <td>Test code for new features and functionality.</td> <td></td> </tr> <tr> <td>User</td> <td>Test application updates against existing functionality.</td> <td></td> </tr> </tbody> </table>	User type	Scenario	Test type	Developer	Test code for new features and functionality.		User	Test application updates against existing functionality.	
User type	Scenario	Test type								
Developer	Test code for new features and functionality.									
User	Test application updates against existing functionality.									

**Answer:**

Test types	Answer Area									
<ul style="list-style-type: none"> <li><b>Unit test</b></li> <li><b>Regression test</b></li> <li>Acceptance test</li> </ul>	<table border="1"> <thead> <tr> <th>User type</th> <th>Scenario</th> <th>Test type</th> </tr> </thead> <tbody> <tr> <td>Developer</td> <td>Test code for new features and functionality.</td> <td><b>Unit test</b></td> </tr> <tr> <td>User</td> <td>Test application updates against existing functionality.</td> <td><b>Regression test</b></td> </tr> </tbody> </table>	User type	Scenario	Test type	Developer	Test code for new features and functionality.	<b>Unit test</b>	User	Test application updates against existing functionality.	<b>Regression test</b>
User type	Scenario	Test type								
Developer	Test code for new features and functionality.	<b>Unit test</b>								
User	Test application updates against existing functionality.	<b>Regression test</b>								

**NEW QUESTION: 55**

A company uses Dynamics 365 Finance. An ISV provides a fix for an issue with a solution that the company uses.

You must deploy the fix to the production environment.

You need to schedule the deployment.

What should you do?

- A. Open an extensibility support request.
- B. Open a hotfix request.
- C. Create a service request in Lifecycle Services (LCS).
- D. Create a support request in Lifecycle Services (LCS).

**Answer:** ([SHOW ANSWER](#))

Extensibility requests

Finance and Operations applications exclusively use extensions to customize the product.

We've been working toward an extension-based customization model for some time. Over the past several releases we have been gradually sealing models. As of Dynamics 365 for Finance and Operations release 8.0, this completes the sealing. From this release forward, only extension-based customizations are allowed.

In future releases, we will be adding even more extensibility capabilities to enable independent software vendors (ISVs) and value-added resellers (VARs) to deliver complete business solutions. We will prioritize these on a customer-by-customer basis with frequent releases.

**NEW QUESTION: 56**

A company uses the vendor collaboration functionality within Dynamics 365 Supply Chain Management.

You must grant an external vendor permission to collaborate with the company. The system must send the vendor an invitation email. Emails must be sent to work email addresses only.

You need to configure user access

Which two actions should you perform? Each correct answer presents part of the solution NOTE Each correct selection is worth one point.

- A. Provision a vendor user.
- B. Create a new Azure Active Directory tenant
- C. Assign user roles.
- D. Set up separation of duties

**Answer:** ([SHOW ANSWER](#))

**NEW QUESTION: 57**

A company that has multiple manufacturing facilities plans to implement Dynamics 365 Supply Chain Management. The company's current processes are manual and primarily managed on paper.

The company is concerned about a big bang approach to implementation and instead wants a staggered approach to rollout. The company wants to ensure that the first manufacturing facility to go live will be successful and serve as a model to its other manufacturing facilities.

You need to identify Microsoft guidance on a phased rollout approach and any available Success by Design templates to support the effort.

Which tool should you use for the guidance?

- A. Azure DevOps
- B. Business Process Modeler
- C. Lifecycle Services
- D. GitHub Repository

**Answer:** ([SHOW ANSWER](#))

**NEW QUESTION: 58**

You need to recommend a solution to manage the wine bottle label requirements for the private brand. What should you recommend?

- A. Recommend Dynamics 365 Retail.
- B. Create notes on the item and print for the customers.
- C. Implement Advanced Warehouse label printing.
- D. Use an add-on solution for barcode and label report printing.

Answer: ([SHOW ANSWER](#))

**NEW QUESTION: 59**

You need to resolve the IT team's concerns at the appropriate phase for implementation with Microsoft engineers.

Which phases should you use? To answer, move the appropriate phases to the correct issues. You may use each phase once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

**NEW QUESTION: 60**

A company is deploying a Microsoft Power Platform solution.

You need to grant access to the solution based on the following requirements:

- \* Users must be able to customize the environment.
- \* Users must be able to view rows only for the tables they create.

Which role should you assign?

- A. System Customizer
- B. Common Data Service User
- C. Environment Maker
- D. System Administrator

Answer: ([SHOW ANSWER](#))

The System Customizer:

Has full permission to customize the system.

Can only view rows for system tables that they create.

<https://docs.microsoft.com/en-us/power-platform/admin/environments-overview>

**NEW QUESTION: 61**

A company implements Dynamics 365 Finance.

A sales order confirmation report does not meet the company's branding standards. The report must include header notes and a colorful logo.

You must enable modern design for additional reports created by users in the future.

You need to meet the branding standards and enable additional forms and reports to be created by users.

What should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Requirement**

**Solution**

Add colorful logo and header notes.

Modern reports branding details
Print management configuration
Business document management

Enable forms by users.

Modern reports branding details
SQL Server Reporting Services (SSRS) report design
Print management configuration
Business document management

**Answer:**

Requirement	Solution				
Add colorful logo and header notes.	<table border="1"><tr><td>Modern reports branding details</td></tr><tr><td>Print management configuration</td></tr><tr><td>Business document management</td></tr></table>	Modern reports branding details	Print management configuration	Business document management	
Modern reports branding details					
Print management configuration					
Business document management					
Enable forms by users.	<table border="1"><tr><td>Modern reports branding details</td></tr><tr><td>SQL Server Reporting Services (SSRS) report design</td></tr><tr><td>Print management configuration</td></tr><tr><td>Business document management</td></tr></table>	Modern reports branding details	SQL Server Reporting Services (SSRS) report design	Print management configuration	Business document management

**NEW QUESTION: 62**

You need to recommend a solution to meet the requirements for the globalization features. Which feature should you recommend?

- A. First release program
- B. FastTrack program
- C. Product Roadmap
- D. Release validation program
- E. Preview early access program

**Answer: (SHOW ANSWER)**

Note:

\* The CTO has learned that there are updates to globalization features in Dynamics 365 Finance. The IT staff has been tasked with ensuring that they are the first group to receive these updates.

\* The IT department has decided not to code for globalization issues because they are in an upcoming service update. They are closing in on go-live and need to make sure that the updates are applied in time.

Service updates are continuous, touchless updates that provide new features and functionality. You are in control and manage how your organization receives these updates. For example, you can sign up for the First Release program so that your organization receives updates first. You can apply the updates to any of your environments manually (self-update) or remain on the default release schedule and receive the auto-updates when you schedule them using LCS.

**NEW QUESTION: 63**

A company plans to use Dynamics 365 Finance. Each business unit maintains a separate bank account under a single legal entity. The accounting team requires that bank statements are automatically reconciled for multiple bank accounts per business unit. You need to document this requirement.

Which two components should you identify for this requirement? Each correct answer presents part of the solution. Choose two.

NOTE: Each correct selection is worth one point.

- A. project timeline
- B. approval
- C. severity of the gap
- D. cutover plan
- E. gap fit analysis

**Answer: (SHOW ANSWER)**

**NEW QUESTION: 64**

A company plans to use Dynamics 365 finance and operations apps.

Code builds for new development must follow Microsoft's recommendations by using supported tools.

Virtual machine (VM) environments are required for the following usage:

Develop code.

Centrally merge all code in a structured way.

You need to implement a code management solution.

Which tools should you use? To answer, drag the appropriate tools to the correct requirements. Each tool may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Tools	Requirement	Tool
Lifecycle Services (LCS)	Deploy developer VMs.	Tool
Azure DevOps		Tool
Git		Tool
Azure portal	Keep developer VMs updated with the latest code.	Tool
	Deploy new code to the build environment.	Tool

Answer:

Tools	Requirement	Tool
Lifecycle Services (LCS)	Deploy developer VMs.	Lifecycle Services (LCS)
Azure DevOps		Azure DevOps
Git	Keep developer VMs updated with the latest code.	Git
Azure portal	Deploy new code to the build environment.

**NEW QUESTION: 65**

A company implements Dynamics 365 Finance.

The company needs to create balance statements for customers by using a SQL Server Reporting Services (SSRS) report. The report must contain custom branding that users can choose through print management capabilities. The branding must be created by a user that does not have the ability to access a Microsoft Visual Studio environment. You need to recommend a solution. What should you recommend?

- A. Electronic reporting
- B. SSRS Report Designer
- C. Financial report designer
- D. Document templates
- E. Modern report design templates

**Answer:** ([SHOW ANSWER](#))

**NEW QUESTION: 66**

A client wants to create a custom view-only security role that allows users to view the customer list in the accounts receivable module. You create a security role named ReadOnlyUserAR and add the role to users. You create a custom duty named CustomerViewList.

You need to recommend how to implement the privileges.

Which three actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Add the Customers privilege to the CustCustomer.
- B. Add the Customers privilege to CustomerViewList.
- C. Add the CustCustomerMasterInquire duty to ReadOnlyUserAR.
- D. Add the Customers privilege to CustCustomerMasterInquire.
- E. Add CustomerViewList to ReadOnlyUserAR.
- F. Add ReadOnlyUserAR to users.

**Answer:** C,E,F ([LEAVE A REPLY](#))

**NEW QUESTION: 67**

A company implements Dynamics 365 Finance.

The company must view data from Dynamics 365 Finance in an Excel document. The data must refresh every time a user opens the Excel file.

You need to identify the feature the user should use to open the Excel document.

Which feature should you recommend?

- A. Workspace
- B. Mobile workspace
- C. List Page
- D. SQL Server Reporting Services (SSRS) report

**Answer:** ([SHOW ANSWER](#))

**NEW QUESTION: 68**

A toy manufacturer keeps finished products in a physical warehouse.

The manufacturer and distributor use different inventory control software.

Sales orders are used to move inventory to the distributor.

The distributor must be notified immediately when the toy manufacturer ships an order.

You need to determine a solution for providing notifications to the distributor's inventory system.

What are three possible ways to achieve this goal? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Business events
- B. Custom web service
- C. OData
- D. Lifecycle Services
- E. Recurring integrations

**Answer:** ([SHOW ANSWER](#))

**NEW QUESTION: 69**

You need to recommend a performance and load testing strategy for the requirement. What should you recommend? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Requirement	Option
Recommend objects for load testing.	Customer imports and user count
	Order imports and warehouse picking
	Order imports, user count, and order entry
	Warehouse picking and user count
Recommend a testing sequence.	Data migration and then order import
	Order import and then data migration
	Vendor import and then order import

**Answer:**

Requirement	Option
Recommend objects for load testing.	Customer imports and user count
	Order imports and warehouse picking
	Order imports, user count, and order entry
	Warehouse picking and user count
Recommend a testing sequence.	Data migration and then order import
	Order import and then data migration
	Vendor import and then order import

**NEW QUESTION: 70**

A company has identified a bug in Dynamics 365 Supply Chain Management. The bug has been found in the Lifecycle Services (LCS) Issue search tool with an open status and no hotfix attached.

You need to determine how the company should respond to this situation.

What should you recommend?

- A. Pause updates
- B. Enter a support ticket
- C. Update to the latest platform version.

**Answer:** ([SHOW ANSWER](#))

**NEW QUESTION: 71**

You need to recommend which type of Dynamics 365 licenses are needed.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**NEW QUESTION: 72**

A client plans to implement Dynamics 365 Finance.

The client is unsure whether to use a cloud-based or on-premises implementation.

For which scenario should the client install the on-premises version of the app?

- A. The client wants direct access to production environments.
- B. The client has integrations that depend on direct Microsoft SQL access.
- C. The client already has a significant infrastructure investment.
- D. The client needs to comply with data sovereignty rules in a region where Microsoft Azure Data Centers are limited.

Answer: [\(SHOW ANSWER\)](#)

**NEW QUESTION: 73**

A company plans to implement Dynamics 365 Supply Chain Management. The company has the following requirements:

Use mobile devices for warehouse activities including cycle counting.

Set up automatic cycle counting work IDs and assign the IDs to workers.

Ensure that workers can group work IDs that are specific to a particular location, zone, or work pool.

Ensure that workers can specify a cycle counting work ID that has a status of Open.

Ensure that workers can count items in a warehouse location at any time.

You need to recommend cycle counting options that meet the company's requirements.

What should you recommend? To answer, drag the appropriate counting options to the correct requirements. Each counting option may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Cycle count options	Requirement	Cycle count option
User directed	Specify a cycle counting work ID that has a status of <b>Open</b> .	Cycle count option
System directed	Automatically assign a cycle counting work ID to a worker.	Cycle count option
Cycle count grouping	Group work IDs that are specific to a particular location, zone, or work pool.	Cycle count option
Spot cycle count	Count items in a warehouse location at any time.	Cycle count option

Answer:

Cycle count options	Requirement	Cycle count option
User directed	Specify a cycle counting work ID that has a status of <b>Open</b> .	User directed un option
System directed	Automatically assign a cycle counting work ID to a worker.	System directed nt option
Cycle count grouping	Group work IDs that are specific to a particular location, zone, or work pool.	Cycle count grouping tion
Spot cycle count	Count items in a warehouse location at any time.	Spot cycle count .t option

**NEW QUESTION: 74**

You need to recommend how to resolve audit compliance findings. What should you recommend?

- A. Run the segregation of duties process.
- B. Run the verify compliance of user-role assignments process.
- C. Run the user license estimator report.
- D. Run the usage profiler.

**Answer: B** ([LEAVE A REPLY](#))

**NEW QUESTION: 75**

You are preparing a proof of concept environment using Dynamics 365 Finance.

You need to analyze the results generated from the Regression suite automation tool (RSAT). Which Lifecycle Services tool should you use to store the RSAT testing files?

- A. Business process modeler
- B. Asset library
- C. Usage profiler
- D. Methodologies

**Answer: A** ([LEAVE A REPLY](#))

**NEW QUESTION: 76**

A company is determining which reporting tools to use as part of a Dynamics 365 Finance implementation.

Scenario A: Power users must use a free form tool to allow other power users to leverage transactional data to be consumed externally.

Scenario B: Developers must use a modeling tool to allow all users to leverage aggregated data to be consumed internally.

Scenario C: Developers must use a free form tool to allow all users to leverage transactional and aggregated data to be consumed internally and externally.

Scenario D: Power users must use a free form tool to allow all users to leverage aggregated data to be consumed internally and externally.

Scenario E: Power users must use a modeling tool to allow other power users to leverage transactional data to be consumed externally.

You need to recommend which tool should be used for each scenario.

Which tool should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer Area**

Scenario	Reporting Tool
A	<input type="text"/> Microsoft Excel Embedded BI SSRS report Power BI Management reporter
B	<input type="text"/> Microsoft Excel Embedded BI SSRS report Power BI Management reporter
C	<input type="text"/> Microsoft Excel Embedded BI SSRS report Power BI Management reporter
D	<input type="text"/> Microsoft Excel Embedded BI SSRS report Power BI Management reporter
E	<input type="text"/> Microsoft Excel Embedded BI SSRS report Power BI Management reporter

Answer:

Answer Area	
Scenario	Reporting Tool
A	<input type="text" value="Microsoft Excel"/> ▼ Microsoft Excel Embedded BI SSRS report Power BI Management reporter
B	<input type="text" value="Embedded BI"/> ▼ Microsoft Excel Embedded BI SSRS report Power BI Management reporter
C	<input type="text" value="SSRS report"/> ▼ Microsoft Excel Embedded BI SSRS report Power BI Management reporter
D	<input type="text" value="Power BI"/> ▼ Microsoft Excel Embedded BI SSRS report Power BI Management reporter
E	<input type="text" value="Management reporter"/> ▼ Microsoft Excel Embedded BI SSRS report Power BI Management reporter

**NEW QUESTION: 77**

A company uses Dynamics 365 Finance.

Service updates have become costly over time, taking resources away from their daily jobs to test against updates which include both functional testing and performance tuning. The company has a medium risk tolerance.

You need to define a testing strategy.

Solution: Only test areas where the change may impact other areas.

Does the solution meet the goal?

A. No

B. Yes

Answer: [\(SHOW ANSWER\)](#)

### NEW QUESTION: 78

A company is implementing Dynamics 365 Supply Chain Management. The company has 11 legal entities. Each entity uses a separate enterprise resource planning (ERP) system. A customer may have a unique customer number in each system because the systems are disconnected. One of the customer numbers will be used as the master number in Dynamics 365.

The company plans to add entities to Supply Chain Management over time. Customer records will continue to be added to the ERP systems throughout the implementation lifecycle and must be kept up to date. The ERP systems will be decommissioned after go-live.

You need to create a strategy to migrate the customer data and ensure that new records are automatically mapped.

Which solution should you implement for each requirement? To answer, drag the appropriate solutions to the correct requirements. Each solution may be used once, more than once, or not at all.

You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Solutions	Requirement	Solution
Existing ERP system	Consolidate on the single master customer number.	
Azure Data Lake	Store historical data.	
Data Migration Framework	Import customer data.	
F&O Data Feeds		

Answer:

Solutions	Requirement	Solution
Existing ERP system	Consolidate on the single master customer number.	Data Migration Framework
Azure Data Lake	Store historical data.	Azure Data Lake
Data Migration Framework	Import customer data.	Data Migration Framework
F&O Data Feeds		

Reference:

https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/data-entities/azure-data-lake-overview

**NEW QUESTION: 79**

A company plans to implement Dynamics 365 Finance Operations (on-premises).

The company has system compliance requirements that must be addressed. You need to design the solution for the company. What should you address in the design?

- A. employee retirement
- B. job-protected family and medical leave
- C. data privacy
- D. workers' compensation

Answer: (SHOW ANSWER)

**NEW QUESTION: 80**

A company uses AX 2012 R3 and plans to migrate to Dynamics 365 Finance and Supply Chain Management. The company's AX 2012 R3 implementation is heavily customized.

The company wants to understand if AX 2012 R3 can be upgraded or if it must be reimplemented. AX 2012 R3 uses some features that have been deprecated in Dynamics 365 Finance and Supply Chain Management.

The company has the following requirements:

- \* Determine if AX2012 R3 can be upgraded or if it must be reimplemented.
- \* Identify code conflicts in the new code format.

You need to identify which tool to use for each requirement.

Which tool should you use? To answer, move the appropriate tool to the correct requirement. You may use each tool once, more than once, or not at all. You may need to move the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Tools to upgrade from AX 2012 R3

Requirement	Tool
Determine the feasibility of upgrading to or reimplementing Dynamics 365.	<input type="text"/>
Plan for the migration of customized code.	<input type="text"/>

Answer:

Tools to upgrade from AX 2012 R3

Requirement	Tool
Determine the feasibility of upgrading to or reimplementing Dynamics 365.	Pre-upgrade checklist
Plan for the migration of customized code.	Code upgrade estimation

**NEW QUESTION: 81**

A client wants to create a custom view-only security role that allows users to view the customer list in the accounts receivable module. It must be accurately reported during a security audit. You need to recommend how to implement the privileges.

Which five actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions	Answer area
Add the <b>CustCustomerMasterInquire</b> duty to the <b>ReadOnlyUserAR</b> role.	
Create a new security role named <b>ReadOnlyUserAR</b> .	
Add the <b>Customers</b> privilege to the <b>CustCustomerMasterInquire</b> duty.	
Add the custom role <b>ReadOnlyUserAR</b> to users.	
Create a custom duty named <b>CustomerViewList</b> .	
Add the <b>Customers</b> privilege to the <b>CustomerViewList</b> duty.	
Add the <b>CustomerViewList</b> duty to the <b>ReadOnlyUserAR</b> role.	

Answer:

Actions	Answer area
Add the <b>CustCustomerMasterInquire</b> duty to the <b>ReadOnlyUserAR</b> role.	Create a new security role named <b>ReadOnlyUserAR</b> .
Create a new security role named <b>ReadOnlyUserAR</b> .	Create a custom duty named <b>CustomerViewList</b> .
Add the <b>Customers</b> privilege to the <b>CustCustomerMasterInquire</b> duty.	Add the <b>Customers</b> privilege to the <b>CustomerViewList</b> duty.
Add the custom role <b>ReadOnlyUserAR</b> to users.	Add the <b>CustomerViewList</b> duty to the <b>ReadOnlyUserAR</b> role.
Create a custom duty named <b>CustomerViewList</b> .	Add the custom role <b>ReadOnlyUserAR</b> to users.
Add the <b>Customers</b> privilege to the <b>CustomerViewList</b> duty.	
Add the <b>CustomerViewList</b> duty to the <b>ReadOnlyUserAR</b> role.

### NEW QUESTION: 82

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company implements Dynamics 365 Finance.

Forms and reports take longer than usual to open and run in the production environment.

You need to investigate the performance issue by using SQL Insights in Lifecycle Services (LCS).

Solution: Check for blocked queries and high DTU.

Does the solution meet the goal?

A. Yes

B. No

Answer: ([SHOW ANSWER](#))

Reference:

<https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/lifecycle-services/performance-troubleshooting>

**NEW QUESTION: 83**

A client is implementing Dynamics 365 Finance.

You need to determine a testing solution to validate performance of critical business processes in the organization.

Which two tools should you use? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Task Recorder
- B. SysTest
- C. PerfSDK
- D. Regression suite automation tool

Answer: ([SHOW ANSWER](#))

**NEW QUESTION: 84**

A research institute is implementing Dynamics 365 Finance and plans to use Lifecycle Services (LCS) to standardize the implementation process.

You need to define a strategy for implementing LCS tools to meet the requirements.

What should you recommend? To answer, drag the appropriate tools to the correct tasks. Each tool may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Tools	Task	Tool
Usage profiler	View a detailed summary of consumed characteristics modeled for an organization.	Tool
Performance metrics	View the most expensive queries for selected period.	Tool
Business process modeler	Create, view, and modify repeatable implementations.	Tool
Upgrade analysis	Plan full-version, minor-version, and in-place upgrades.	Tool

Answer:

## Tools

Usage profiler

Performance metrics

Business process modeler

Upgrade analysis

## Answer Area

### Task

View a detailed summary of consumed characteristics modeled for an organization.

View the most expensive queries for selected period.

Create, view, and modify repeatable implementations.

Plan full-version, minor-version, and in-place upgrades.

### Tool

Usage profiler

Performance metrics

Business process modeler

Upgrade analysis

<https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/lifecycle-services/bpm-overview>

## NEW QUESTION: 85

You need to configure a policy for the IR department to meet the technical requirement for training video.

How should you complete the powerShell cmdlet? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Set-CsTeamsMeetingPolicy -Identity IT

Set-CsTeamsMeetingBroadcastConfiguration  
Set-CsTeamsMeetingBroadcastPolicy  
Set-CsTeamsMeetingConfiguration  
Set-CsTeamsMeetingPolicy

-NewMeetingRecordingExpirationDays  
-AllowCloudRecording  
-ChannelRecordingDownload  
-NewMeetingRecordingExpirationDays  
-RecordingStorageMode

Answer:

Answer Area

Set-CsTeamsMeetingPolicy -Identity IT

Set-CsTeamsMeetingBroadcastConfiguration  
Set-CsTeamsMeetingBroadcastPolicy  
Set-CsTeamsMeetingConfiguration  
Set-CsTeamsMeetingPolicy

-NewMeetingRecordingExpirationDays  
-AllowCloudRecording  
-ChannelRecordingDownload  
-NewMeetingRecordingExpirationDays  
-RecordingStorageMode

## NEW QUESTION: 86

A company implements Dynamics 365 Supply Chain Management The company does not implement Dynamics 365 Commerce.

The company implements a third-party web store for wholesalers to place online orders.

The third-party web store only displays real-time inventory to the wholesalers. The company imports sales orders from the web store to Dynamics 365 Supply Chain Management Some sales orders are imported extremely slow due to the high volume of transactions that exceed 300,000 lines throughout the day.

You must recommend integration solutions to improve performance.

Which integration tools should you recommend? To answer, drag the appropriate integration tools to the correct requirements. Each integration tool may be used once, more than once, or not at all.

You may need to drag the split bar between panes or scroll to view content.

NOTE Each correct selection is worth one point.

The screenshot shows a Microsoft Dynamics 365 interface with three panes. On the left, the 'Integration tools' pane contains three items: 'Batch data API', 'OData', and 'Custom service'. The middle pane, labeled 'Answer Area', contains two requirements: 'Show real-time inventory.' and 'Import sales orders.'. The right pane, labeled 'Integration tool', contains two empty input boxes.

Answer:

The screenshot shows the same Microsoft Dynamics 365 interface as above, but with the correct solution applied. In the 'Integration tools' pane, 'Batch data API', 'OData', and 'Custom service' are highlighted with green boxes. In the 'Integration tool' pane, 'Custom service' and 'Batch data API' are selected with red boxes and checkboxes.

**NEW QUESTION: 87**

A company plans to implement Dynamics 365 Finance and purchase licenses through an Enterprise Agreement (EA).

Development environments must be licensed for the duration of the implementation.

You need to recommend solutions for activating development environments that allows the company to manage costs based on usage.

What should you recommend? To answer, drag the appropriate solutions to the correct requirements.

Each requirement may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

The screenshot shows a Microsoft Dynamics 365 interface for solution recommendation. On the left, the 'Solutions' pane contains three items: 'Azure Subscription Environment', 'Enterprise Agreement (EA)', and 'Server and Cloud Enrollment (SCE)'. The middle pane, labeled 'Answer Area', contains two requirements: 'Determine environment licensing.' and 'Manage development environment costs.'. The right pane, labeled 'Solution', contains two empty dashed boxes for placing solutions.

Answer:

**NEW QUESTION: 88**

An organization uses Dynamics 365 Finance. You are hired to architect a solution for the organization. You need to analyze usage characteristics.

- A. Data Management Workspace
- B. Business Process Modeler
- C. Microsoft Excel
- D. Trace Parser

Answer: [\(SHOW ANSWER\)](#)

**NEW QUESTION: 89**

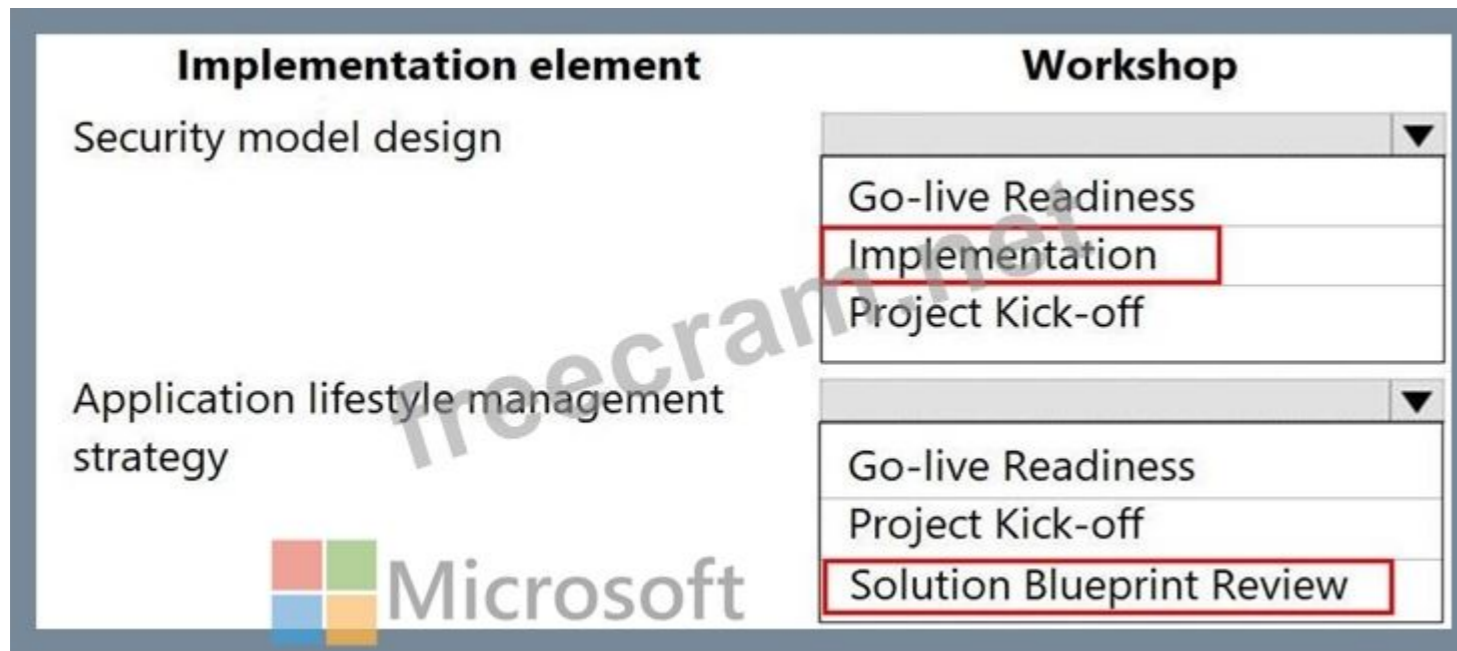

A company is implementing Dynamics 365 Finance. The company has an adjusted annual revenue to one million U.S. dollars. The company engages with the FastTrack program. You need to advise on workshop content to aid their implementation.

Which workshop covers each implementation element? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Implementation element	Workshop
Security model design	<ul style="list-style-type: none"> <li>Go-live Readiness</li> <li>Implementation</li> <li>Project Kick-off</li> </ul>
Application lifestyle management strategy	<ul style="list-style-type: none"> <li>Go-live Readiness</li> <li>Project Kick-off</li> <li>Solution Blueprint Review</li> </ul>

Answer:

Reference:

<https://docs.microsoft.com/en-us/dynamics365/fasttrack/solution-workshops>

#### NEW QUESTION: 90

A company implements Dynamics 365 Commerce.

The company creates an integration to query customer loyalty points from Dynamics 365 Commerce by a third-party application.

The third-party application must manually retrieve loyalty points. The loyalty point totals must reflect the real-time amount.

You need to identify the correct integration technology.

Which technology should you use?

- A. Postman
- B. FTP
- C. Data packages
- D. Entity store
- E. OData

Answer: [\(SHOW ANSWER\)](#)

OData

Odata is also a very simple and easy way to get access to Dynamics 365 F&O data.

Loyalty overview, Loyalty capabilities: In the 10.0 release, we introduced a data entity named Retail loyalty other activity type lines. This data entity enables the retailers to use either Data Import/Export Framework (DIXF) or OData API to record the activities that should award customers with loyalty points. The data entity stores the activities in a journal named Loyalty lines for other activities, which can be used for review and modification purposes. After the data has been reviewed, the IT user can either manually post the activity lines or run a job named Process other activity type for loyalty lines, which will post all the unposted activity lines and award the points to the customers based on the earning rules. In the above scenario, the event registration application would call OData API to send the customer information to Commerce. However, the IT user can post the activity lines for only those customers who attended the workshop and delete the activity lines for the other customers.

**NEW QUESTION: 92**

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company implements Dynamics 365 Finance.

Forms and reports take longer than usual to open and run in the production environment.

You need to investigate the performance issue by using SQL Insights in Lifecycle Services (LCS).

Solution: Create a non-unique index on a table.

Does the solution meet the goal?

- A. Yes
- B. No

Answer: ([SHOW ANSWER](#))

Reference:

<https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/lifecycle-services/performance-troubleshooting>

**NEW QUESTION: 93**

A utility company has the financial users. Two of the users need access to supply chain functionality.

You need to provide a licensing strategy for the utility company.

Which two licensing options should you recommend? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Purchase 20 Dynamics 365 Finance base licenses.
- B. Purchase two Dynamics 365 Supply Chain Management attach licenses.
- C. Purchase 18 Dynamics 365 Finance attach licenses.
- D. Purchase 18 Dynamics 365 Finance base licenses.
- E. Purchase two Dynamics 365 Supply Chain Management base licenses.

**Answer: B,D ([LEAVE A REPLY](#))**

**NEW QUESTION: 94**

A company plans to use Dynamics 365 Finance.

The company has a requirement session with the accounts receivable department.

You need to identify which requirement contains all necessary information.

Which requirement should you identify?

**A.** Cash should be posted to a ledger.

**B.** Accounts receivable managers need reporting from the system.

**C.** The Post in batch button should be the first button on the form when posting a payment journal for ease of use by the accounts receivable processing department.

**D.** Accounts receivable clerks need to review and submit payments over \$100,000 to managers to meet industry compliance requirements.

**Answer: ([SHOW ANSWER](#))**

**NEW QUESTION: 95**

You need to ensure that the customer records remain synchronized in both systems.

What should you recommend?

**A.** Write a Power BI report.

**B.** Integrate the third-party application into Dynamics 365 Finance

**C.** Replace the sales system with Dynamics 365 Sales.

**D.** Use Microsoft Power Automate

**Answer: ([SHOW ANSWER](#))**

Topic 2, City Power and Light

Overview

This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.

To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study.

At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.

To start the case study

To display the first question in this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. If the case study has an All Information tab, note that the information displayed is identical to the information displayed on the subsequent tabs. When you are ready to answer a question, click the Question button to return to the question.

Background

City Power and Light is a publicly traded electric utility company. The company has a corporate office, four regional field offices, two subsidiary companies that produce solar energy, and one wind power subsidiary. City Power and Light has 50 percent ownership in the solar energy company. The company fully owns the wind power company but operates it separately from other businesses.

City Power and Light currently operates with varying integrated legacy systems and has difficulty assembling company financials. Migrating these systems and workloads to a common platform would improve visibility into the business and inform decision making. The company plans to implement Dynamics 365.

Legacy systems

- \* The legacy system does not have audit capability of configurable workflow based on business logic
- \* The legacy paper-based purchasing system does not allow parent-child relationships for vendors. Two signatures are required for purchase requisitions.
- \* Purchase orders are entered into the system manually based on signed purchase requisitions printed to PDF and then emailed to the vendor.
- \* The legacy procurement system does not have a parent-child relationship for master data management.

#### Financials

- \* All financial consolidate up to City Power and Light Holding, LLC.
- \* The finance department employees are currently able to create as well as pay invoices.

#### Customers

Sales orders from the website are uploaded into the system manually once a day .

International and domestic customers currently post to the same receivable account. At the end of the month, these have to be separated into domestic and international receivable accounts.

#### Other information

- \* There are multiple active acquisitions expected during the implementation timeline.
- \* The item master data for solar panel configurations has multiple variables and variants. As a complex.

#### General

- \* Flexible implementation approach to support frequently changing business needs and requirements.
- \* A phased roll-out is needed due to the complexity of the business.
- \* Any offsite Travel meals submitted on an expense report without corresponding flight and hotel expenses need to be reviewed.
- \* Ten percent of vendor invoices should be reviewed to ensure they meet company policy.
- \* Testing of business processes needs to be automated.
- \* Customer surveys must be sent out after email customer service interactions. Surveys must contain a rating system and a way for customers to add comments.
- \* Employees require one central tool for internal communication, phone calls, and file sharing.
- \* Sales representatives need an enterprise quoting tool for solar panel customers.

#### Technical

- \* A cloud-based financial and operational system, accessible on mobile devices.
- \* The ability to keep a legacy meter reading application with the ability to use the data in aggregated operating reports.
- \* Business processes should be tested with different variables for the same process as part of the testing plan.

#### Functional

- \* Establish and document business processes to assist with on-boarding new employees more efficiently.
- \* Parent-child relationships need to be established for vendors with regional offices. Purchasing locations vary from invoicing locations.
- \* The ability to create automated wire payments.

#### Requisitions

- \* All purchase requisitions over \$50 need to be approved by a manager.
- \* All purchase requisitions over \$1,000 require senior manager approval.
- \* Multiple purchase requisitions to the same vendor should be combined.

#### Sales

The item master data for solar panel configurations have multiple variables and variants. This leads to complex quoting and sales orders.

Sales representatives must be able to create automated wire payments.

#### Issues

- \* A limited number of users are available for testing.
- \* User1 reports that the date fields are not saving during formula entry with saved variables functionality in the RSAT tool.
- \* The purchasing department is seeing duplicate vendor records during data conversion.

- \* Audit notes from the prior year indicate improvement is needed in roles and responsibilities related to financial management and security roles.
- \* User2 reports that parts ordered on P0123 were never received and the vendor has said they never received the PO.
- \* User3 provides feedback that important steps during journal entry are being forgotten and new users need hands-on guidance.
- \* Service technicians report that they do not always have the appropriate tools or parts with them requiring multiple service calls.

**NEW QUESTION: 96**

A company is implementing Dynamics 365 Supply Chain Management. The company is in the FastTrack program and has been assigned a FastTrack solution architect.

The company has a partner who provides a solution architect to consult with the company throughout the implementation lifecycle.

You need to determine which solution architect role is responsible for specific aspects of the implementation.

Which role is responsible for each implementation task? To answer, drag the appropriate roles to the correct implementation tasks. Each role may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Roles

- FastTrack solution architect
- Partner solution architect

Answer Area

Implementation task

- Assess whether best practices are being followed.
- Design the solution.
- Develop the solution.

Role

- FastTrack solution architect
- Partner solution architect

Answer:

Roles

- FastTrack solution architect
- Partner solution architect

Answer Area

Implementation task

- Assess whether best practices are being followed.
- Design the solution.
- Develop the solution.

Role

- FastTrack solution architect
- FastTrack solution architect
- Partner solution architect

**NEW QUESTION: 97**

A distribution company uses Dynamics 365 Supply Chain Management.

The company has one buyer group for paper products and another buyer group for chemicals. Each buyer group purchases from separate vendors.

The buyers print individual purchase order confirmations to PDF files and then send the PDF files to their desktop printer.

The company purchases two network printers. Each buyer group receives one printer.  
Each buyer group must send PDF files to their own printer.  
You need to configure Dynamics 365 Supply Chain Management to support the requirement.  
Which two features should you configure? Each correct answer presents part of the solution.  
NOTE: Each correct selection is worth one point.

- A. Document Routing Agent
- B. Power Automate
- C. Print management
- D. Electronic reporting tool
- E. Power BI

**Answer: A,C (LEAVE A REPLY)**

A: Install the Document Routing Agent to enable network printing.

The Document Routing Agent is a downloadable application that you can use to enable network printing scenarios. You can enable network printers for specific companies by using in-client administrative pages.

C: Print management is the framework in Dynamics 365 Finance and Operations that allows users to configure print settings for various business documents, including sending emails and archiving. Print management setups are typically separated by module and include nodes for all business documents that are available to be printed.

#### **NEW QUESTION: 98**

Note: This question is part of a series of questions that present the same scenario. Each Question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company with multiple legal entities implements Dynamics 365 Finance.

You need to recommend options to ensure that you can provide customized financial reporting across the legal entities.

Solution: Create separate business units. Does the solution meet the goal?

- A. Yes
- B. No

**Answer: (SHOW ANSWER)**

Reference:

<https://docs.microsoft.com/en-us/dynamics365/finance/general-ledger/generating-consolidated-financial-statements>

#### **NEW QUESTION: 99**

A company uses Dynamics 365 Supply Chain Management.

The system has a slow response time when sales orders are entered.

You need to identify any blocking SQL statements.

Which Lifecycle Services (LCS) tool should you use?

- A. SQL Insights - Live View
- B. SQL Insights - Index Analysis
- C. Telemetry data monitoring

**D. Performance SDK**

**Answer:** [\(SHOW ANSWER\)](#)

All SQL performance tools in LCS are available under the SQL Insights tab on the Environment Monitoring page for a specific environment. The following tabs are available:

Live View - Shows executing statements and blocking statements. The current SQL Now page that shows performance issues will be replaced with Live View.

Index Analysis - Shows aggregated index and table information, based on user scans, user seeks, user updates, and row count. Like performance metrics, this tool shows the trend for the selected index along with additional table metrics. This feature is not available in self-service environments.

Queries - Shows a list of predefined queries that can be used to retrieve metrics on demand. Examples of queries include a current blocking tree, a list of active plan guides, and a list of most expensive queries.

Etc.

**NEW QUESTION: 100**

plans to deploy code changes to the production environment and operations apps implementation. Four sales associates enter and manage customer sales orders.

Sales associates must have access only to the forms that they require for maintaining their customers and sales orders. Sales associates must also have access only to the sales orders that they enter for the specific customers they manage.

The company must provide an annual audit report to an industry compliance governing agency with proof that the sales associates cannot perform certain tasks against their customers such as invoicing. Those tasks must be performed by a different employee of the company.

You need to implement the security controls for the requirements.

Which security controls should you use? To answer, drag the appropriate security controls to the correct requirements. Each security control may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content NOTE; Each correct selection is worth one point.

**Answer:**

**NEW QUESTION: 101**

You need to recommend a solution for the business process testing plan. What should you recommend?

- A. LCS Business process library
- B. SysTest framework
- C. Chain test cases
- D. Derived test cases

**Answer:** [\(SHOW ANSWER\)](#)

Reference:

https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/perf-test/rsat/rsat-derived-test-cases

**NEW QUESTION: 102**

A company with multiple legal entities implements Dynamics 365 Finance. The company's financial controller needs a single global report that displays vendor aging across all companies.

The report must meet the following requirements:

- \* Leverage standard functionality as much as possible.
- \* Minimize development time.
- \* Minimize configuration time.

You must identify a tool to create the report. Which tool should you use?

- A. Electronic reporting tool
- B. Business document management
- C. Financial Reporter
- D. SQL Server Reporting Services (SSRS)

Answer: [\(SHOW ANSWER\)](#)

**NEW QUESTION: 103**

A customer is implementing Dynamics 365 Supply Chain Management. Purchase orders are being confirmed without any manager oversight. Purchase orders must be reviewed by the manager of an employee who enters a purchase order.

You need to configure the system to meet the requirement.

What should you configure?

- A. Hierarchy workflow
- B. User workflow
- C. Security roles
- D. Participant workflow

Answer: [\(SHOW ANSWER\)](#)

**NEW QUESTION: 104**

A professional services company is implementing Dynamics 365 Finance. The company has the following business entities:

Company	Comments
CompanyA	This is a company that reports on behalf of all organizational units.
OperationsB	This is a transactional company that operates with their own tax ID.
OperationsC	This is a regional business unit within OperationsB.
OperationsD	This is a transactional company that operates with their own tax ID.

You need to configure the system to support this organizational structure.

How should you configure the organization? To answer, drag the appropriate configurations to the correct entities. Each configuration may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

**Configurations**

- Legal entity
- Financial dimension
- Legal entity for elimination
- Legal entity for consolidation

**Answer Area**

Entity	Configuration
CompanyA	Configuration
OperationsC	Configuration

**Answer:**

**Configurations**

- Legal entity
- Financial dimension
- Legal entity for elimination
- Legal entity for consolidation

**Answer Area**

Entity	Configuration
CompanyA	Legal entity configuration
OperationsC	Legal entity for elimination

**NEW QUESTION: 105**

You need to solve User1's issue.

What should you create?

- A. Business Process Modeling Notation (BPMN)with Power Automate
- B. GitHub Solution Blueprint template
- C. GitHub Cutover template
- D. Data Migration framework data packages

**Answer:** [\(SHOW ANSWER\)](#)

Data migration is a key success factor in almost every implementation. A primary concern of some customers is the speed that data can be migrated at, especially if there are vast amounts of data and a small cutover window. The Data migration framework is also used to move data as part of business requirements and operations.

A data package for a Dynamics 365 Finance and Operations app can consist of one or many data entities. A typical data package consists of a group of entities for a specific task, process, or function.

Note: A mock cutover was conducted. It was unsuccessful due to lack of coordination across the countries. The lack of success created timing issues with data uploads from centralized IT and validation at the country level. User1 must use a standard template to prevent the mock cutover issue happening at go-live.

**NEW QUESTION: 106**

A company implements Dynamics 365 Finance to replace a legacy enterprise resource planning (ERP) system.

A proprietary customer relationship management (CRM) system must be integrated with Dynamics 365 Commerce. The integration must be asynchronous.

You need to use a tool to integrate the CRM system.

Which tool should you recommend?

- A. Dual-write
- B. OData
- C. Data Integrator
- D. Batch data API

Answer: ([SHOW ANSWER](#))

#### NEW QUESTION: 107

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A manufacturing company has multiple factories and distribution centers in remote areas where they have poor internet connectivity. The company is planning to implement Dynamics 365 Supply Chain Management.

The company's main priorities are uninterrupted factory and distribution center operations, master data management, financial global reporting, and integration with analytics tools.

You need to design the infrastructure.

Solution: Implement the distribution centers and center data repository in the cloud.

Does the solution meet the goal?

- A. No
- B. Yes

Answer: ([SHOW ANSWER](#))

#### NEW QUESTION: 108

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company is implementing Dynamics 365 Finance. The company uses Microsoft 365 apps. The company wants to integrate Microsoft Word and Excel into Dynamics 365 Finance. You need to identify the underlying technology that is required.

Solution: Microsoft Entra ID.

Does the solution meet the goal?

- A. No
- B. Yes

Answer: ([SHOW ANSWER](#))

#### NEW QUESTION: 109

A company implements Dynamics 365 Finance. The company is preparing to deploy a cumulative update.

The company wants to use the Regression suite automation tool (RSAT) to reduce the required manual testing effort before deploying the update. You need to recommend Lifecycle Services (LCS) tools that can be used to facilitate automated testing. Which two tools should you recommend? Each correct answer presents a complete solution.

NOTE Each correct selection is worth one point.

- A. LCS methodologies
- B. Azure DevOps
- C. Asset library
- D. Upgrade analysis
- E. Business process modeler

Answer: ([SHOW ANSWER](#))

**NEW QUESTION: 110**

A company uses Dynamics 365 Supply Chain Management.

You are performing regression testing using the Regression suite automation tool (RSAT). You observe that invoice totals for some sales orders are lower than expected.

You need to ensure that the invoice totals are correct.

What should you do? To answer, drag the appropriate actions to the correct scenarios. Each action may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

**NEW QUESTION: 111**

You need to recommend a solution for the chief technical officer (CTO) What should you recommend?

- A. Premier Support
- B. Azure Rapid Response
- C. Proactive Services
- D. Lifecycle services (LCS)
- E. Azure DevOps

Answer: ([SHOW ANSWER](#))

Microsoft Dynamics customers who enroll in Microsoft Services Premier Support have access to complete, end-to-end vendor services for the entire Microsoft environment-from databases and desktops to servers and business applications.

Microsoft Premier Online is a secured online resource, exclusively available to Premier Support and Essential Support customers. It provides a comprehensive repository of support and other resources to help you and your IT teams stay up-to-date and knowledgeable about the Microsoft technologies you use every day. Continue to use CustomerSource to access unlimited online training, the support Knowledge Base, and upgrades, updates, service packs, hot fixes and tax and regulatory updates for Microsoft Dynamics.

Note: The CTO has directed the infrastructure team to guarantee they are on the most current version available at the time of go-live.

The CTO has learned that there are updates to globalization features in Dynamics 365 Finance. The IT staff has been tasked with ensuring that they are the first group to receive these updates.

The IT department has limited knowledge of Microsoft 365, Microsoft Teams, and Dynamics 365 Finance. The IT department will be unable to support the applications. The CTO must determine the strategy for managing the support-related risk.

#### **NEW QUESTION: 112**

A Dynamics 365 user is enrolled in the FastTrack program. The user begins the Success by Design framework and is in the first phase of workshops.

You need to plan the subsequent phases.

What are the three remaining phases? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Prepare
- B. Operate
- C. Initiate
- D. Implement
- E. Solution Blueprint Review

**Answer:** ([SHOW ANSWER](#))

#### **NEW QUESTION: 113**

A customer is preparing to upgrade to a new version of Dynamics 365 Finance.

Unit testing is required prior to the upgrade.

You need to recommend a testing tool for unit testing.

Which tool should you recommend?

- A. Regression suite automation tool
- B. Business process modeler
- C. SysTest
- D. Data task automation

**Answer:** ([SHOW ANSWER](#))

Use SysTest Framework to author unit/component test code.

SysTest framework is Unit Test framework in Dynamics 365 for Finance and Operations, Enterprise edition. SysTest framework was available in the earlier version as well, and it provides developers the ability to write unit test code for the business logic.

Reference:

<https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/perf-test/testing-validation>

#### **NEW QUESTION: 114**

A company is implementing Dynamics 365 Supply Chain Management.

The company has invested in new production equipment.

You need to plan for the production equipment to be regularly serviced.

What should you do? To answer, drag the appropriate functions to the correct requirements. Each function may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

**NEW QUESTION: 115**

You need to determine an infrastructure for the solution.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

**Answer Area**

**Infrastructure**

Hardware

Microsoft Recommendation

Laptops and credit card readers only  
 Warehouse mobile devices and laptops only  
 Warehouse mobile devices, laptops, and a store database  
 Warehouse mobile devices, laptops, and other peripheral devices

These are the selections for the infrastructure: Hardware.

Apps and Services

Common Data Model and Common Data Service  
 FTP Server

These are the selections for the infrastructure: Apps and Services.

**NEW QUESTION: 116**

A company uses Dynamics 365 Finance and Supply Chain Management. Accounting is completing month end close tasks and reports two issues:

- \* A user cannot recall the name of a form used to close inventory.
- \* A new error message appears when trying to enter data in a field for all users. The users can click past the error and continue working.

You need to identify the correct tool to support the issues.

Which tool should you use for each issue? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

**Support tools**

Microsoft Issue

Issue	Tool
User cannot recall name of form.	Help button <b>Usage data</b> Help button Issue search Submit an incident
New error message for all users.	Submit an incident Usage data Issue search <b>Submit an incident</b>

**Answer:**

Support tools

User cannot recall name of form.

New error message for all users.

New error message for all users.

Tool

### NEW QUESTION: 118

Your company has a Microsoft 365 subscription.

You need to prevent temporary employees from using the chat feature in Microsoft Teams.

Solution: From the Microsoft Teams admin center, you modify the External access settings.

Does this meet the goal?

A. Yes

B. No

Answer: [\(SHOW ANSWER\)](#)

External access settings in the Microsoft Teams admin center control the ability of users to communicate with users from other domains. This does not prevent temporary employees from using the chat feature internally within the organization. To achieve the goal, a messaging policy that restricts chat usage for specific users needs to be implemented.

### NEW QUESTION: 119

A customer who has operations in France is implementing Dynamics 365 Finance.

The customer must provide European Union (EU) intra-region value added tax (VAT) reporting in XML format from the system. You need to determine which functionality within Dynamics 365 Finance meets the requirement. Which functionality should the customer use?

- A. Electronic reporting
- B. Localization reports
- C. Management reporter
- D. Power BI reports

Answer: [\(SHOW ANSWER\)](#)

**NEW QUESTION: 120**

A company plans to migrate from AX 2012 to Dynamics 365 Finance.

The internal financial auditors have identified a risk of AX 2012 no longer being a supported platform. The chief financial officer wants to minimize this risk as quickly as possible by moving to Dynamics 365 Finance and does not understand the difference between upgrading and reimplementing.

You need to identify the implementation type for each value driver.

Which implementation type should you identify for each value driver? To answer, move the appropriate implementation type to the correct value driver. You may use each implementation type once, more than once, or not at all. You may need to move the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point

**Implementation types**

☰ Upgrade only

☰ Reimplement only

☰ Both upgrade and reimplement

**Tools to upgrade from AX 2012**

Value driver	Implementation type
Keeps transactional history	<input type="text"/>
Implements Microsoft 365 Copilot features	<input type="text"/>

Answer:

**Implementation types**

☰ Upgrade only

☰ Reimplement only

☰ Both upgrade and reimplement

**Tools to upgrade from AX 2012**

Value driver	Implementation type
Keeps transactional history	☰ Upgrade only <input type="checkbox"/>
Implements Microsoft 365 Copilot features	☰ Both upgrade and reimplement <input type="checkbox"/>

**NEW QUESTION: 121**

A company plans to use Dynamics 365 Supply Chain Management. The company is starting the analysis phase and wants to ensure all requirements are obtained.

The company has asked to use alternative methods along with the requirement gathering sessions to collect requirements. You need to identify which method to use for each requirement. Which method should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Method

Requirement	Method
All company objectives must be documented.	<ul style="list-style-type: none"><li>Pain point discussion</li><li>Integration diagram review</li><li>Connect with all levels of organization</li></ul>
Sufficient process detail must be included.	<ul style="list-style-type: none"><li>Job shadowing</li><li>Integration diagrams</li><li>Process automation review</li></ul>

Answer:

Method

Requirement	Method
All company objectives must be documented.	<ul style="list-style-type: none"><li>Pain point discussion</li><li>Integration diagram review</li><li>Connect with all levels of organization</li></ul>

Microsoft

### NEW QUESTION: 123

A client has a third-party warehouse management system.

Data from the system must be integrated with Dynamics 365 Finance in near real-time. You need to determine an integration solution.

Which two solutions should you recommend? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. OData
- B. Batch data API processed daily
- C. Business events
- D. Data management

Answer: [\(SHOW ANSWER\)](#)

### NEW QUESTION: 124

A company plans to implement Dynamics 365 Finance and Supply Chain Management. The company uses passwords to manage access.

The company wants to replace passwords with Microsoft Azure security features.

You need to recommend a security solution for the company.

What should you recommend?

- A. Windows security
- B. Microsoft Entra ID Privileged Identity Management

C. Microsoft Entra ID Conditional Access

D. Windows Hello

Answer: ([SHOW ANSWER](#))

**NEW QUESTION: 125**

A company uses Dynamics 365 Finance. The company experiences performance issues with several forms in production.

You need to use Live View SQL performance metrics to identify potential issues that occur in real time.

You need to recommend a solution to troubleshoot performance issues.

Which two performance metrics should the company use? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

A. Blocking statements

B. Batch requests

C. Database File I/O

D. Executing statements

E. Executing indexes

Answer: ([SHOW ANSWER](#))

AD: Live View - Shows executing statements and blocking statements.

A: Sample flow

Scenario: Users report slow performance when using the system. One issue could be a blocking statement. Blocking by itself is typical in a healthy system and is only a problem when it becomes excessive or starts degrading business activities.

Go to the Live View tab and check if there are any blocking statements. If there is a blocking statement, copy the blocking query ID.

Open the Queries tab and select the Current Blocking Tree query. This will return the root blocker that is blocking the SQL operation.

Etc.

**NEW QUESTION: 126**

You need to correctly structure the master data.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Issue**  **Option**

Vendors with multiple ship to addresses.  ▼

- Business address
- Invoice-to account
- Vendor group
- Vendor posting profile

International and domestic customer receivables.  ▼

- Customer group
- Customer segment
- Default dimensions
- Financial dimensions

Answer:

**Issue**  **Option**

Vendors with multiple ship to addresses.  ▼

- Business address
- Invoice-to account
- Vendor group
- Vendor posting profile

International and domestic customer receivables.  ▼

- Customer group
- Customer segment
- Default dimensions
- Financial dimensions

**NEW QUESTION: 127**

You need to determine a solution for the customers in Jamaica.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Application
Customer additions	<input type="text"/> <ul style="list-style-type: none"> <li>Power Apps app</li> <li>Data Migration</li> <li>Data migration framework</li> </ul>
Customer data validation	<input type="text"/> <ul style="list-style-type: none"> <li>Power Automate</li> <li>Data migration framework</li> <li>Common Data Model</li> <li>Dynamics 365 Finance workflows</li> </ul>

Answer:

Customer data validation	<input type="text"/> <ul style="list-style-type: none"> <li>Power Automate</li> <li>Data migration framework</li> <li>Common Data Model</li> <li>Dynamics 365 Finance workflows</li> </ul>

**NEW QUESTION: 128**

A customer is implementing Dynamics 365 Finance and Dynamics 365 Supply Chain Management.

The customer wants to use this implementation to standardize business processes.

You need to perform a gap analysis and recommend how to address the gaps.

Which functionality should you recommend for each requirement? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Requirement**

**Functionality**

Multiple requisitions must be consolidated into a single purchase order.

- Purchase requisition workflow
- Consolidation legal entity
- Demand consolidation
- Purchase order versions

Headcount must be tracked in the general ledger for reporting purposes.

- Statistical accounts
- Posting layers
- Cost entry
- Cost control unit

The system must be configured to maintain appropriate stock levels.

- Item coverage
- Master planning
- Stock counting
- Storage dimensions

Answer:

**Requirement**  **Functionality**

Multiple requisitions must be consolidated into a single purchase order.

- Purchase requisition workflow

### NEW QUESTION: 129

A graphic design school is implementing ERP by using Dynamics 365 Finance.

The school needs to provide operational training and online training for employees.

You need to identify the right type of instance for the situation.

Which instance type should you recommend? To answer, drag the appropriate instance types to the correct requirements. Each instance type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

The screenshot shows a Microsoft Dynamics 365 interface for question 129. On the left, under 'Instance types', there are two buttons: 'Sandbox' and 'Production'. On the right, under 'Requirement', there are three items: 'Employee training', 'Online courses', and 'User acceptance testing'. To the right of these requirements is a column labeled 'Instance Type' with three empty boxes, each containing the text 'Instance type'. A vertical split bar is visible between the 'Instance types' and 'Requirement' panes.

Answer:

The screenshot shows the same Microsoft Dynamics 365 interface as above, but with the 'Sandbox' button highlighted in green and the three 'Instance type' boxes highlighted in red, indicating the correct answer.

### NEW QUESTION: 130

A company is implementing these Microsoft solutions;

- \* Dynamics 365 Finance
- \* Dynamics 365 Supply Chain Management
- \* Dynamics 365 Commerce
- \* Power Apps

All users will require finance capabilities, but the other solutions will vary per user.

You need to identify the license types required to build a quote.

What should you select? To answer, drag the appropriate license types to the correct solutions. Each license type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

License types

- Base only
- Attach only
- Base or Attach
- Add-ons

Answer Area

Solution	License type
Power Apps	
Dynamics 365 Commerce	

Answer:

License types

- Base only
- Attach only
- Base or Attach
- Add-ons

Answer Area

Solution	License type
Power Apps	Base or Attach
Dynamics 365 Commerce	Base only

**NEW QUESTION: 131**

A company uses Dynamics 365 Supply Chain Management.

The company needs to import daily sales from a third-party financial system into Dynamics 365 Supply Chain Management.

The third-party financial system sends daily sales transactions to an FTP location in a comma separated values (CSV) file.

The third-party financial system CSV data is in a format that cannot be imported directly into Dynamics 365 Supply Chain Management. Sales transactions include multiple fields that must be consolidated into a single field in Dynamics 365 Supply Chain Management.

Data management is enabled

You need to identify the integration process phases in which to import the data.

Which phases should you use? To answer, drag the appropriate phases to the correct actions. Each phase may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Phases

- Source
- Staging
- Target

Answer Area

Action	Phase
Convert the data into a format that can be imported into Dynamics 365 Supply Chain Management.	
Consolidate multiple fields into a single field.	
Validate the data against Dynamics 365 Supply Chain Management business logic.	

**Answer:**

Phases

☰ Source	
☰ Staging	
☰ Target	

Answer Area

Action

- Convert the data into a format that can be imported into Dynamics 365 Supply Chain Management.
- Consolidate multiple fields into a single field.
- Validate the data against Dynamics 365 Supply Chain Management business logic.

**NEW QUESTION: 132**

A travel agency is implementing Dynamics 365 Finance and Dynamics 365 Supply Chain Management. The agency must validate and perform these tasks during each regression cycle.

- \* Purchase and sales processes
- \* Payment gateway functionality to third-party integration
- \* Vendor payment
- \* Notifications
- \* Chart control
- \* Page refresh data consistency

You need to determine which tasks can be performed using the Regression suite automation tool (RSAT). Which three tasks can be performed? Each Correct answer presents a complete solution.

NOTE: Each correct selection is worth one point

- A. purchase and sales processes
- B. notifications
- C. chart control
- D. page refresh data consistency
- E. configure vendor payment settings

**Answer:** ([SHOW ANSWER](#))

**NEW QUESTION: 133**

A company is implementing Dynamics 365 Finance and discussing solutions for data analytics. The company has the following business requirements:

- \* Use data from external sources in addition to Dynamics 365 finance data.
- \* Collect data from devices for reporting.
- \* Continuously export data from Dynamics 36S without user intervention.

You need to recommend a solution.

What should you recommend?

- A. Entity store
- B. Bring your own database (BVOO)
- C. Azure Data lake
- D. Power BI

**Answer:** ([SHOW ANSWER](#))

**NEW QUESTION: 134**

A company is upgrading its existing operational software to an enterprise resource planning (ERP) system and is evaluating Dynamics 365 Finance. The company is setup with the following:

- \* One parent company based in the US and three fully owned subsidiaries that use US dollars (USD) for the accounting currency.
- \* Two partially owned subsidiaries that use Canadian dollars (CAD) for the accounting currency.
- \* Distribution facilities in both Canada and the US.
- \* Project managers travel to customer locations.
- \* Intercompany sales are transacted between the US subsidiaries.
- \* E-commerce business-to-business (B2B) sales.
- \* A call center that receives customer orders.

The company has the following requirements:

- \* Must provide an asset maintenance capability.
- \* Must provide a purchase requisition approval process.
- \* Must provide an invoice approval process.

You need to identify which functional component of Dynamics 365 Finance to implement.

Which functional component should you use?

- A.** Call center sales
- B.** Purchase requisition workflow
- C.** Invoice approval workflow
- D.** Site and warehouse setup

**Answer:** ([SHOW ANSWER](#))

**NEW QUESTION: 135**

A company plans to implement Dynamics 365 Finance.

The company's current system contains sales tax-related data.

You need to design a solution that sequences the transfer of sales tax codes and sales tax groups. What should you do?

- A.** Write customization requirements.
- B.** Design user acceptance testing processes.
- C.** Analyze data integration points.
- D.** Design a data migration scenario.

**Answer:** ([SHOW ANSWER](#))

**NEW QUESTION: 136**

A company plans to apply updates to a Dynamics 365 Finance environment. The environment has custom code.

You need to determine the impact of updates to the custom code.

What is the impact?

- A.** Updates are runtime backward compatible only.
- B.** Updates are backward compatible from both a design time and runtime perspective.
- C.** Updates are design-time backward compatible only.
- D.** Updates are not backward compatible from either a design-time or runtime perspective.

**Answer:** ([SHOW ANSWER](#))

**NEW QUESTION: 137**

You are planning a Dynamics 365 implementation.

You need to recommend a solution for the different types of environment instances.

What should you recommend? To answer, drag the appropriate instance types to the correct scenarios. Each instance type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

**Instance types**

- Tier 1
- Tier 2
- Production

**Answer Area**

Single-box instance that the customer can use as an automated build environment.

Multi-box instance that customers can use for user acceptable testing.

Environment that uses Microsoft SQL server.

**Instance type**

- Instance type
- Instance type
- Instance type

Answer:

**Instance types**

- Tier 1
- Tier 2
- Production

**Answer Area**

**Scenario**

Single-box instance that the customer can use as an automated build environment.

Multi-box instance that customers can use for user acceptable testing.

Environment that uses Microsoft SQL server.

**Instance type**

- Tier 1 Instance type
- Tier 2 Instance type
- Production Instance type

**NEW QUESTION: 138**

A company implements Dynamics 365 Finance in a self-service environment. The company plans to deploy code changes to the production environment.

You need to recommend methods to deploy the changes.

What should you recommend? To answer, drag the appropriate deployment methods to the correct code types of changes. Each deployment method may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE Each correct selection is worth one point.

Answer:

**NEW QUESTION: 139**

You need to identify the security configuration required for new users and for the manufacturing managers.

Which security configurations should you use? To answer, move the appropriate security configurations to the correct requirements. You may use each security configuration once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content NOTE: Each correct selection is worth one point.

Answer:

**NEW QUESTION: 140**

A utility company has the financial users. Two of the users need access to supply chain functionality.

You need to provide a licensing strategy for the utility company.

Which two licensing options should you recommend? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Purchase 18 Dynamics 365 Finance attach licenses.
- B. Purchase two Dynamics 365 Supply Chain Management base licenses.
- C. Purchase 20 Dynamics 365 Finance base licenses.
- D. Purchase 18 Dynamics 365 Finance base licenses.

E. Purchase two Dynamics 365 Supply Chain Management attach licenses.

Answer: D,E ([LEAVE A REPLY](#))

**NEW QUESTION: 141**

A data architect creates a document that specifies the data format to transfer data from an existing environment to a new environment.

You need to create a requirement for the general ledger data.

a. Which sequence number format is correct?

A. [Data Type Reference].[Module #].[Sequence Number]

B. [Sequence Number].[Data Type Reference].[Module #]

C. [Data Type Reference].[Sequence Number].[Module #]

D. [Module #].[Data Type Reference].[Sequence Number]

Answer: ([SHOW ANSWER](#))

**NEW QUESTION: 142**

A company plans to implement Dynamics 365 Supply Chain Management and Dynamics 365 Customer Service.

The company has two call centers. The company owns one call center, and the other is a third-party call center. All call center orders flow through to one distribution center for shipping.

The third-party call center will not be moving to Dynamics 365 Customer Service.

The distribution center ships incorrect item quantities to customers as a result of the following scenarios:

\* The company-owned call center places orders in which the unit of measure conversion logic does not convert properly from case to each.

\* The third-party call center uses an on-premises solution that frequently has network outages and cannot handle bidirectional asynchronous operations.

Call center data must flow through Microsoft Dataverse.

You must recommend an integration pattern for the Microsoft Dynamics 365 implementation for each call center solution.

Which integration patterns should you recommend? To answer, drag the appropriate integration patterns to the correct requirements. Each integration pattern may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

The screenshot shows a drag-and-drop interface for selecting integration patterns. On the left, under 'Integration patterns', there are four options: Dual-write, Batch data API, Power Automate, and Bring your own database (BYOD). On the right, under 'Answer Area', there are two requirements: 'Unit of measure conversion logic' and 'Asynchronous offline capabilities'. Below these requirements are two empty boxes labeled 'Integration pattern' for dropping the selected options. A Microsoft logo is visible at the bottom left of the interface.

Answer:

**NEW QUESTION: 143**

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company is planning to implement Dynamics 365 Supply Chain Management with three locations. Two locations must use United States currency (USD) as the default currency. The third location must use Canadian currency (CAD).

One US facility and the Canadian facility must use advanced warehouse functionality. The other US facility must use basic warehousing.

You need to configure the legal entity, site, and warehouse architecture to meet the requirements.

Solution: Create one legal entity and differentiate capabilities by warehouse.

Does the solution meet the goal?

A. Yes

B. No

**Answer:** [\(SHOW ANSWER\)](#)

Instead create three legal entities, one for each facility.

Default currency is configured per legal entity. Advanced warehouse is configured per warehouse.

**NEW QUESTION: 144**

A company is implementing Dynamics 365 Finance. The company plans to use Business process modeler (BPM) tool to align their business processes with industry-standard processes.

You need to help the company get started using BPM.

Which prerequisite should the company install?

A. A. Business events catalog

B. Asset library

C. American Productivity and Quality Center (APQC) membership

D. Azure DevOps project

**Answer:** [\(SHOW ANSWER\)](#)

Business process modeler (BPM) in Lifecycle Services (LCS), prerequisites To effectively use BPM, you must have Microsoft Office 2010 and a Microsoft Azure DevOps project.

**NEW QUESTION: 145**

A food production company is implementing Dynamics 365 Supply Chain Management.

The company must run production for salad kits that do not contain nut allergens first, and salad kits that do contain nut allergens second to avoid cross contamination. The salad kits create by-products.

You need to identify business process steps to ensure that production orders for salad kits that are free of nut allergens are produced first.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Requirement

Set up raw materials for finished goods.

Configure the batch sequence.

Enable the sequence planned orders parameter.

Configuration

Formula  
BOM Version  
BOM  
Product configurator

Sequence group  
Route group  
Operation  
Reservation Sequence

Master planning  
Production  
Operation  
Route

Microsoft

#### NEW QUESTION: 146

A company plans to use Dynamics 365 Supply Chain Management to migrate from multiple enterprise resource planning (ERP) systems.

You are leading data requirements sessions for the migration of master data from the ERP systems into Supply Chain Management.

You need to document the data migration strategy based on the gathered requirements.

Which three considerations should be included in the data migration strategy? Each correct answer presents part of the solution. Choose three NOTE: Each correct selection is worth one point.

- A. record counts
- B. project budget
- C. source systems
- D. data monetization
- E. data cleansing

Answer: ([SHOW ANSWER](#))

**NEW QUESTION: 147**

A company uses Dynamics 365 Finance. The company plans to integrate proprietary solutions by using OData web services.

Some web service integrations have a higher importance than others.

When a lower importance web service integration has larger than expected utilization, higher importance web services must operate as expected.

You need to recommend a solution to meet the integration performance requirements.

What should you recommend?

- A. Assign throttling priorities to the integrations.
- B. Assign batch priorities to the integrations.
- C. Create the critical web services by using Power Automate integrations.
- D. Create the critical web services by using Azure Logic Apps.
- E. Run the critical integration batch jobs first.

Answer: ([SHOW ANSWER](#))

**NEW QUESTION: 148**

A company is planning a One Version strategy for its Dynamics 365 Finance implementation.

Developers use local, downloaded VHD development environments to develop new functionality. Previous developers had to redo some modifications because customizations were created on outdated versions of the software. The One Version strategy must therefore include steps to ensure that developers are developing against the latest updates. You need to include an update strategy for the development environments.

Solution: Update the VHD development environments each time there is a Dynamics 365 Finance major service release.

Does the solution meet the goal?

- A. No
- B. Yes

Answer: A ([LEAVE A REPLY](#))

**NEW QUESTION: 149**

An organization is planning a new Dynamics 365 Finance + Operations (on-premises) implementation.

The business process demands a huge volume of transactions to be imported during peak hours. Users can always access the system.

You need to do proper hardware sizing to ensure expected performance.

Which two factors should be considered for sizing? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. crash dump analysis
- B. business process optimization
- C. deadlock log evaluation
- D. user profile management

E. transaction characterization

Answer: ([SHOW ANSWER](#))

**NEW QUESTION: 150**

A company uses Dynamics 365 Supply Chain Management and has two legal entities that distribute the same items. One of the legal entities uses advanced warehouse management.

New items that are created must meet the business needs of both companies and allow for consolidated analytics.

You need to recommend a master data management strategy to standardize the item master and meet the business requirements.

What should you recommend?

- A. Use an advanced warehouse setup for the product and release to both companies.
- B. Create an item in each company with different item numbers.
- C. Create the product record and release to each company where setup variations are completed.
- D. Create an item in each company with the same item number.
- E. Use Common Data Management to create the item templates for both legal entities.

Answer: ([SHOW ANSWER](#))

**NEW QUESTION: 151**

A company plans to upgrade from AX 2012 to Dynamics 365 Finance.

You are planning the end-to-end upgrade.

The upgrade must follow Microsoft recommendations.

You need to identify the phase for each activity.

Which phase should you use for each activity? To answer, move the appropriate phase to the correct activity. You may use each phase once, more than once, or not at all. You may need to move the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

The screenshot shows a drag-and-drop interface for assigning phases to upgrade activities. On the left, under the heading "Phases", there are three items: "Analyze", "Execute", and "Validate", each with a three-dot menu icon. On the right, under the heading "Upgrade phases", there are two activities: "Perform AX 2012 preparation tasks." and "Create cutover plan.", each with a corresponding empty text box labeled "Phase". A vertical line separates the two panes, and a vertical stack of four blue dots is positioned between them, indicating a split bar that can be moved. A large "Microsoft" watermark is visible across the center of the interface.
