NEW QUESTION: 1
A customer operating an ONTAP 9.7 cluster comprised of six AFF A400 nodes would like to use their Commvault instance to replicate volume snapshots to their existing StorageGRID cluster to free up space. They have the Complete license bundle but have not been provided any additional budget to complete this task. Which two steps can be taken to complete this without having to purchase anything? (Choose two)
A. Upgrade to ONTAR 9.8P10
B. Install the ONTAP One license
C. Upgrade to ONTAR 9.10.1
D. Install a SnapMirror license
Answer: (SHOW ANSWER)

NEW QUESTION: 2
A customer wants to tier infrequently accessed data from an on-premises AFF cluster to a low- cost object storage tier in Azure Blob Storage while keeping active data on high-performance SSD. Which technology should be configured?
A. Cloud Tiering with SnapMirror
B. SnapVault
C. FabricPool
D. FlexCache
Answer: (SHOW ANSWER)

NEW QUESTION: 3
You are asked to implement a monitoring solution for your VM environment that is hosted on NetApp storage; however, you have no budget for this task. You decide to use Cloud Insights to accomplish your task. What are two capabilities of this solution? (Choose two.)
A. Integrate Cloud Insights with your ActiveIQ information.
B. Create customized, real-time dashboards.

C. Set up monitoring and alerting.
D. Enable user data access auditing.
Answer: (SHOW ANSWER)

NEW QUESTION: 4
You have an application that runs once per month to provide analytics and report generation. You are asked to use cloud compute resources to run this application. However, your existing environment consists of a single AFF A300 HA pair. In this scenario, which two actions would satisfy the requirements? (Choose two.)
A. Configure FabricPool on existing aggregates by using Amazon Simple Storage Service (Amazon S3).
B. Use the NetApp Cloud Sync service.
C. Use the NetApp Cloud Backup Service.
D. Use the NetApp Cloud Volumes Service in AWS.
Answer: (SHOW ANSWER)

NEW QUESTION: 5
Which three Trident storage drivers support clone operations? (Choose three.)
A. ontap-nas
B. aws-cvs
C. ontap-san
D. ontap-nas-flexgroup
E. ontap-nas-economy
Answer: (SHOW ANSWER)

NEW QUESTION: 6
You deployed a NetApp Cloud Volumes ONTAP system in your AWS environment and you need to activate the WORM feature to secure them. In this scenario, which two statements are correct?
(Choose two.)
A. You can activate WORM storage on individual volumes; you do not need to activate WORM at the system level.
B. You cannot activate WORM storage on individual volumes; WORM must be activated at the system level.
C. When WORM storage is activated, data tiering to object storage can be enabled.
D. When WORM storage is activated, data tiering to object storage cannot be enabled.
Answer: (SHOW ANSWER)

NEW QUESTION: 7
Your organization is adopting DevOps principles to deliver innovation rapidly. Which three methods support this approach? (Choose three.)
A. Allow more people within the organization to approve changes.
B. Plan to reduce the blast radius of failures.
C. Implement daily stand-up meetings for all team members.
D. Automate processes as much as possible.

E. Implement version control for code changes.
Answer: (SHOW ANSWER)

NEW QUESTION: 8
You have deployed your application to an NKS cluster in your on-premises environment with ONTAP Select. You now want to move your application to an AWS environment. What are two ways to accomplish this task? (Choose two.)
A. Use SnapSync.
B. Use Cloud Sync.
C. Use CloudMirror.
D. Use SnapMirror.
Answer: (SHOW ANSWER)

NEW QUESTION: 9
A customer is experiencing an I/O bottleneck with one VMware hosted workload in their NetApp HCI cluster that is part of their hybrid cloud. The solution must be immediate and non-disruptive.
In this scenario, which corrective action should the customer perform?
A. Add additional memory and CPU to the ESXi host.
B. Dynamically migrate the workload including storage to a nearby AWS region.
C. Dynamically migrate the workload to a different NetApp HCI ESXi host in the cluster.
D. Modify the QoS on this particular workload to allow it to use the resources available.
Answer: (SHOW ANSWER)

NEW QUESTION: 10
You are creating an Ansible playbook for use against an ONTAP cluster that is using HTTPS with the auto-generated certificates. In this scenario, which two elements must be in every task?
(Choose two.)
Freecram.net
A. self_signed: true
B. validate_certs: false
C. security: https
D. https: true
Answer: (SHOW ANSWER)

NEW QUESTION: 11
A customer has a legal requirement to hold data that has a 30-year retention period. The data cannot be modified when it is under hold. If the legal hold for any of the data ends, that data must be removed. In this scenario, what are two solutions that satisfy the customer's requirements?
(Choose two.)
A. Cloud Volumes ONTAP in GovCloud
B. SnapLock Compliance enabled aggregate
C. SnapLock Enterprise enabled aggregate

D. NetApp Cloud Volumes ONTAP with WORM enabled

Answer: (SHOW ANSWER)

NEW QUESTION: 12

What are two stages in the DevOps lifecycle? (Choose two.)

A. plan

B. destroy

C. operate

D. architect

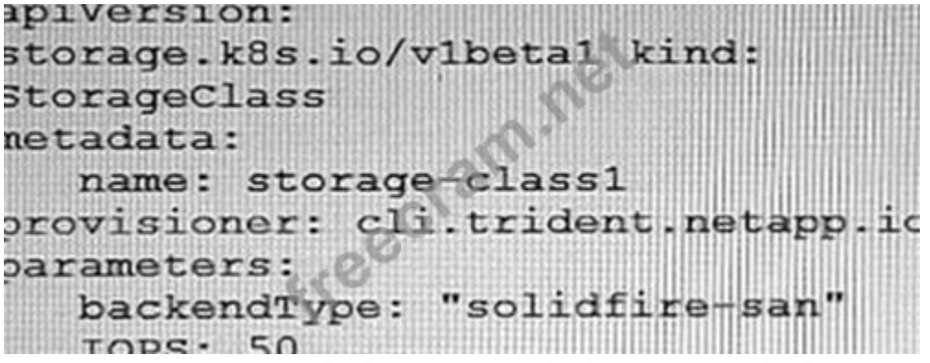

Answer: (SHOW ANSWER)

NEW QUESTION: 13

Click the Exhibit button.

Refer to the exhibit and the Storage Class information shown below.

What are the minimum IOPS, maximum IOPS, and burst IOPS assigned to the persistent volumes that were created by Trident?

A. "minIOPS": 4QG0, "maxIOPS": 6000, "burstIOPS": 8000

B. "minIOPS": 50, "maxIOPS": 50, "burstIOPS": 50

C. "minIOPS": 1000, "maxIOPS": 2000, "burstIOPS": 4000

D. "minIOPS": 600C, "maxIOPS": 8000, "burstIOPS": 10000

Answer: (SHOW ANSWER)

NEW QUESTION: 14
Which statement accurately describes the difference between FlexClone and FlexCache?
A. FlexClone and FlexCache both require SnapMirror licensing.
B. Both technologies require identical ONTAP versions on source and destination.
C. FlexClone caches frequently accessed data; FlexCache creates writable clones.
D. FlexClone creates a writable, space-efficient copy of a volume; FlexCache creates a read-mostly cache of a volume at a remote location.
Answer: (SHOW ANSWER)

NEW QUESTION: 15
You are setting up a DevOps practice for your company. In this scenario, which three tools would you use? (Choose three.)
A. Jenkins
B. ConfigBuilder
C. Docker
D. ConfigAdvisor
E. Github
Answer: (SHOW ANSWER)

NEW QUESTION: 16
You have an on-premises AFF A400 system with SnapMirror replication to a Cloud Volumes ONTAP system. You have a corruption on a source volume and you want to make the destination volume in Cloud Volumes ONTAP writable. In this scenario, which action would you perform on the replication relationship in Cloud Manager?
A. sync
B. delete
C. reverse resync
D. break
Answer: (SHOW ANSWER)

NEW QUESTION: 17
You need to find the documentation for an Ansible module without access to the Internet. In this scenario, which command will show you the documentation for na_ontap_volume?
A. ansible-doc na_ontap_volume

B. ansible-help netapp.ontap.na_ontap_volume

C. ansible-doc -lookup netapp.ontap.na_ontap_volume

D. ansible-doc netapp.ontap.na_ontap_volume

Answer: (SHOW ANSWER)

NEW QUESTION: 18

You have the variable file shown in the exhibit.

```
# variable.yml

volume:
 - vol1
 - vol2
 - vol3
```

Which task would enable you to iterate over this group?

A.

```
- name: Volume create
  na_ontap_volume:
    state: present
    hostname: cluster1
    username: admin
    password: netapp123
    name: "{ item }"
    size: 10
    aggregate: aggr1
    vserver: vserver1
  with_items:
    "{ volume }"
```

freecram.net

```
- name: Volume create
  na_ontap_volume:
    state: present
    hostname: cluster1
    username: admin
    password: netapp123
    name: "$item"
    size: 10
    aggregate: aggr1
    vserver: vserver1
  with_items:
    "{{ volume }}"
```

B.

```
name: Volume create
na_ontap_volume:
  state: present
  hostname: cluster1
  username: admin
  password: netapp123
  name: "{{ item }}"
  size: 10
  aggregate_name: aggr
  vserver: vserver1
with_items:
```

C.

```
name: Volume create
na_ontap_volume:
  state: present
  hostname: cluster1
  username: admin
  password: netapp123
  name: "{{ volume }}"
  size: 10
  aggregate_name: aggr
  vserver: vserver1
with_items:
```

D.

Answer: B (LEAVE A REPLY)

NEW QUESTION: 19
You are writing a script to verify, update and display discrepancies of IT assets in the corporate content management database (CMDB). You must use the RESTful API to interface with the CMDB server. What are two common formats for the RESTful API responses? (Choose two.)
A. SGML
B. XML
C. MarkDown
D. JSON
Answer: (SHOW ANSWER)

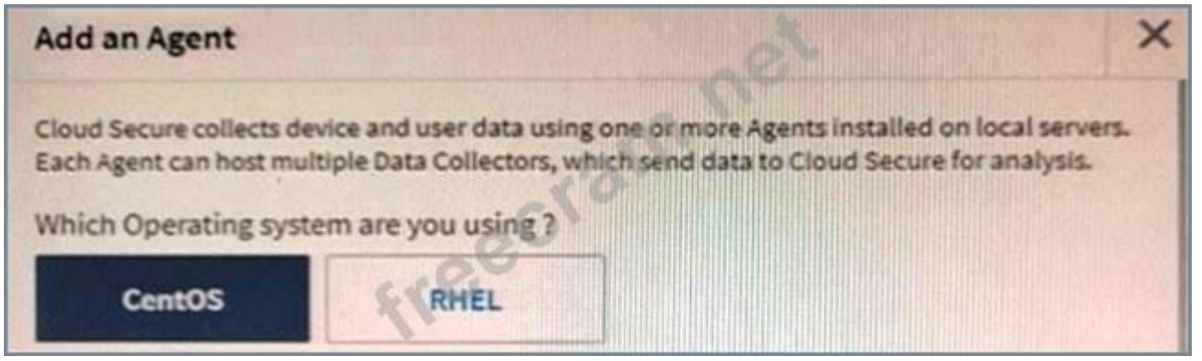

NEW QUESTION: 20
Your manager has informed you that any new solutions that you deploy must support SnapMirror technology for replicating data back to your main data center, where a large ONTAP cluster provides data protection. In this scenario, which two solutions satisfy this requirement? (Choose two)
Freecram.net
A. Use E-Series disk arrays at your remote sites.
B. Deploy NetApp HCI for compute and storage in your branch offices.
C. Use NetApp Cloud Volumes ONTAP in your public cloud provider footprints for storing data.
D. Deploy a StorageGRID cluster across your three regional data centers.
Answer: (SHOW ANSWER)

NEW QUESTION: 21
You are creating a new meme generation application and are using containers for service chaining. The end user uploads the original image to one container, the image resolution modifier to another container, and the text overlay to a third container. In this scenario, knowing that you have NetApp ONTAP storage available to you, which solution will allow each container to access the same data?
A. Use the same container image for all three tasks and the data will exist because data in containers is persistent.
B. Re-encode the binary data into MIME64, and pass it as a string when instantiating new containers.
C. Provision a persistent volume using Trident, and then have Kubernetes claim this volume, as necessary, to provide the same storage to each container.
D. Presenting the same LUN to all of your nodes' underlying OS will make that storage available to the container as well.
Answer: (SHOW ANSWER)

NEW QUESTION: 22
Which three volume workflows are supported by Trident for Kubernetes? (Choose three.)
A. LUN resize
B. volume clone
C. volume import
D. volume snapshots
E. volume replication

Answer: (SHOW ANSWER)

NEW QUESTION: 23
As shown in the exhibit, you are installing NetApp Cloud Secure agents.

In this scenario, which component must be deployed for Cloud Secure to report findings?
A. container in Astra
B. connector from Cloud Manager
C. data broker
D. acquisition unit from Cloud Insight
Answer: (SHOW ANSWER)

NEW QUESTION: 24
You are using REST APIs to deploy and manage storage that is provided by NetApp Cloud Volumes ONTAP in Microsoft Azure. You are a federated user, and you want to communicate with an authenticated endpoint. In this scenario, how should you acquire the JWT access token?
A. Use a JWT access token generator.
B. Use the refresh token generator.
C. Use the API key generator.
D. Use an e-mail address and password
Answer: (SHOW ANSWER)

NEW QUESTION: 25
You are creating an Ansible playbook to create a new NFS export. In which order do you need to execute the module tasks in your playbook?
A. na_ontap_export_policy na_ontap_volume na_ontap_export_policy_rule
B. na_ontap_export_policy_rule na_ontap_volume na_ontap_export_policy
C. na_ontap_volume na_ontap_export_policy_rule na_ontap_export_policy
D. na_ontap_volume na_ontap_export_policy na_ontap_export_policy_rule
Answer: (SHOW ANSWER)

NEW QUESTION: 26

You are asked to configure NetApp Trident to provide dynamic and persistent storage using Azure NetApp Files to your Azure Kubernetes Service (AKS) cluster. In this scenario, which three elements do you need to configure your Trident back end? (Choose three.)
A. an Azure portal credential
B. an ONTAP cluster credential
C. an Azure subscription ID
D. an Azure location/region with a subnet delegated to Microsoft .Netapp/volumes
E. an App Registration or service principal
Answer: (SHOW ANSWER)

NEW QUESTION: 27
Your customer is running their Kafka and Spark applications inside a Kubernetes cluster. They want to create a single backup policy within Astra to automate the backup of both applications and all their related Kubernetes objects at the same time. Which method in Kubernetes should be used to accomplish this task?
A. Create a Kubernetes custom resource definition that includes all of the objects that Astra needs to treat as a single entity.
B. Create a Helm chart that deploys Kafka and Spark and their related objects to multiple namespaces.
C. Put the applications and their objects in a single namespace, or label all the objects with a single label that Astra can recognize.
D. Use a single Trident-based StorageClass to provision all storage for Kafka and Spark.
Answer: (SHOW ANSWER)

NEW QUESTION: 28
Which of the following products is used to generate custom reports of monitored infrastructure components?
A. Cloud Insights
B. BlueXP Governance
C. Astra Control
D. SnapCenter
Answer: (SHOW ANSWER)

NEW QUESTION: 29
You need to deploy BlueXP Observability collectors into a large environment and require multiple data collectors. Which of the following must be used to deploy multiple collectors?
A. VMware clone feature
B. BlueXP clone feature
C. ONTAP FlexCache Technology
D. ONTAP FlexClone Technology
Answer: (SHOW ANSWER)

NEW QUESTION: 30

An engineer is troubleshooting a failed SnapMirror initialization between an on-premises ONTAP cluster and Cloud Volumes ONTAP in Azure. Connectivity tests confirm the intercluster LIFs can ping each other, but the SnapMirror relationship still fails to initialize. What should be checked next?

Freecram.net

A. Whether FlexClone licensing is enabled on the destination.
B. Whether the required SnapMirror/intercluster ports (typically 11104/11105) are permitted by the Network Security Group and any intervening firewalls.
C. The NTP configuration on the Azure VM only.
D. Whether FabricPool tiering is enabled on the source volume.
Answer: (SHOW ANSWER)

NEW QUESTION: 31
Your customer wants a hierarchical view of their Kubernetes clusters, as well as the utilization of pod and namespace objects running inside of the clusters. In addition, they want to be notified when certain health or performance metrics are affecting the objects in the cluster, as well as their storage. In this scenario, which product would satisfy the requirements?
A. NetApp Cloud Manager
B. NetApp Cloud Insights
C. Spot Elastigroup by NetApp
D. NetApp Trident
Answer: (SHOW ANSWER)

Valid NS0-404 Dumps shared by ExamDiscuss.com for Helping Passing NS0-404 Exam! NEW QUESTION: 32
A customer has recently adopted ONTAP for the persistent storage of their OpenShift Cluster.
They anticipate a need to deploy approximately 40,000 Persistent Volumes (PVs). Which Astra Trident driver must be used?
A. ontap-nas-economy
B. ontap-nas
C. ontap-nas-flexgroup
D. ontap-san-economy
Answer: (SHOW ANSWER)

NEW QUESTION: 33

You have virtual desktops that are hosted in both AWS and Azure. The desktops need to connect to your on-premises database by using Azure ExpressRoute and AWS Direct Connect. In this scenario, which routing protocol supports this connectivity?

A. BGP

B. EIGRP

C. OSPF

D. RIP

Answer: (SHOW ANSWER)

NEW QUESTION: 34

What are two differences between a container and a VM? (Choose two.)

A. Containers that are deployed on a host all share the OS kernel, whereas VMs do not.

B. Containers can only communicate with other containers on the same host; VMs can communicate across routable networks.

C. VMs boot up faster than containers exposing the same application.

D. Containers are more portable than VMs because they isolate the applications from the infrastructure.

Answer: (SHOW ANSWER)

NEW QUESTION: 35

Which two statements are true about NetApp SnapMirror Business Continuity (SM-BC)? (Choose two.)

A. It only supports asynchronous replication.

B. It uses a mediator to arbitrate automatic switchover between sites.

C. It provides automated failover with zero data loss (RPO=0) for supported applications.

D. It requires MetroCluster hardware exclusively and cannot use standard AFF systems.

Answer: (SHOW ANSWER)

NEW QUESTION: 36

A customer has deployed a NetApp HCI environment and has configured SnapMirror replication relationships to Cloud Volumes ONTAP in AWS. After migrating Cloud Manager from on- premises to AWS, the customer can no longer create new replication relationships between existing environments. The Cloud Manager can access the Cloud Volumes ONTAP working environment and the current SnapMirror relationships continue to make successful transfers of data. In this scenario, where would you locate the source of the problem?

A. The Security Group for the Cloud Volumes ONTAP EC2 instance.

B. The EC2 type of the Cloud Manager EC2 instance.

C. The IAM role for Cloud Manager EC2 instance.

D. The routing table for the subnet where Cloud Volumes ONTAP resides.

Answer: (SHOW ANSWER)

NEW QUESTION: 37

You have a hybrid storage environment with on-premises ONTAP 9.8 clusters and Cloud Volumes ONTAP for AWS 9-8 clusters. You have a requirement to automatically discover, map, and classify your data. In this scenario, which NetApp service satisfies this requirement?

A. Cloud Volume Service

B. Cloud Secure

C. Cloud Data Sense

D. Cloud Sync

Answer: A (LEAVE A REPLY)

NEW QUESTION: 38

You have received an internal request for persistent storage where the developer would like to be able to specify the filesystem. Which three NetApp Trident backend storage drivers would satisfy the requirement? (Choose three.)

A. eseries-iscsi

B. ontap-nas

C. ontap-.san

D. ontap-nas-economy

E. solidfire-san

Answer: (SHOW ANSWER)

NEW QUESTION: 39

A customer wants to reduce cloud storage costs for Cloud Volumes ONTAP by automatically moving cold data blocks to low-cost object storage while ensuring hot data remains on the ONTAP performance tier. Which two statements about this capability are true? (Choose two.)

A. Tiered data blocks are only readable after being manually rehydrated by an administrator.

B. This is accomplished using FabricPool with a tiering policy (e.g., Auto or Snapshot-Only).

C. FabricPool tiering requires the volume to be part of a SnapMirror relationship.

D. The tiering policy can be set per volume.

Answer: (SHOW ANSWER)

NEW QUESTION: 40

A software development team wants to adopt a new business process that allows a choice of coding language and does not require capital expenditure. In this scenario, which two cloud classifications would satisfy these conditions? (Choose two.)

Freecram.net

A. Software as a Service (SaaS)

B. Infrastructure as a Service (IaaS)

C. Platform as a Service (PaaS)

D. Testing as a Service (TaaS)

Answer: (SHOW ANSWER)

NEW QUESTION: 41

Your company asks you to deploy a new version control management system. In this scenario, which two tools would accomplish this task? (Choose two.)
A. Confluence
B. ALM
C. GitHub
D. SourceForge
Answer: (SHOW ANSWER)

NEW QUESTION: 42
Your company is implementing NetApp Cloud Insights to monitor the company's onpremises NetApp AFF storage and Amazon Elastic Compute Cloud (Amazon EC2) instances. Which information is required to configure the Amazon EC2 data collector to monitor the performance of the EC2 instances?
A. AWS root user
B. AWS IAM access key ID
C. NetApp Cloud Manager password
D. AWS IAM Management Console password
Answer: (SHOW ANSWER)

NEW QUESTION: 43
You recently started at a new company where the persistent storage for Kubernetes was not provided by NetApp. You want to make sure you take full advantage of the additional annotations available from your NetApp storage. In this scenario, which three parameters would you use to accomplish this task? (Choose three.)
A. mountOptions
B. cloneFromPVC
C. snapshotPolicy
D. unixPennis sions
E. accessModes
Answer: (SHOW ANSWER)

NEW QUESTION: 44
Which two definitions are true about data protection under Astra Control? (Choose two.)
A. A snapshot is stored in an object store in the cloud.
B. A backup is a point-in-time copy of an application that is stored on the same provisioned volume as the application.
C. A snapshot is a point-in-time copy of an application that is stored on the same provisioned volume as the application.
D. A backup is stored in an object store in the cloud.
Answer: (SHOW ANSWER)

NEW QUESTION: 45

A customer requires WORM storage in the cloud. In this scenario, which two combined NetApp technologies support this requirement? (Choose two.)
A. SnapLock Enterprise
B. SnapLock Compliance
C. Cloud Volumes Service
D. Cloud Volumes ONTAP
Answer: (SHOW ANSWER)

NEW QUESTION: 46
You are asked to help a customer architect a private cloud solution using a tightly integrated converged infrastructure that can be managed by the vendor. You decide to present FlexPod Managed Private Cloud as a solution. In this scenario, what are three results of this solution?
(Choose three.)
A. allows for a variety of server vendors
B. validated designs that are available for a variety of applications
C. only available with software-defined storage
D. the ability to present storage using FC, iSCSI, or NFS
E. the ability to provide rapid redeployment of resources using software-defined service profiles
Answer: (SHOW ANSWER)

Valid NS0-404 Dumps shared by ExamDiscuss.com for Helping Passing NS0-404 Exam! NEW QUESTION: 47
You want to add your NetApp StorageGRID embedded Prometheus instance as a data source to Grafana. What must be done to accomplish this task?
A. Unblock port 9090 on the StorageGRID primary admin node.
B. Deploy a gateway node in StorageGRID.
C. Reboot the StorageGRID primary admin
D. Create a dashboard for StorageGRID in Grafana.
Answer: (SHOW ANSWER)

NEW QUESTION: 48
Which DevOps principle implies that your documentation and your configuration are the same?
A. continuous deployment
B. infrastructure as code

C. continuous testing
D. continuous monitoring
Answer: (SHOW ANSWER)

NEW QUESTION: 49
You are instructed to move towards an infrastructure as code process. You need to be able to track changes to the files that you are using. In this scenario, how would you satisfy the requirement?
A. Enable WORM configurations for each file.
B. Enable encryption for each file.
C. Keep the files in a block-storage device.
D. Keep the files in a source-content versioning system.
Answer: (SHOW ANSWER)

NEW QUESTION: 50
Which two capabilities does NetApp Astra Control (or its successor BlueXP application-aware data protection for Kubernetes) provide for stateful applications running in Kubernetes? (Choose two.)
Freecram.net
A. Application-consistent snapshot and backup of Kubernetes-native applications.
B. Replacement of the Kubernetes API server.
C. Migration of an entire application, including persistent data, between Kubernetes clusters or clouds.
D. Provisioning of physical compute nodes for the Kubernetes cluster.
Answer: (SHOW ANSWER)

NEW QUESTION: 51
Click the Exhibit button.

```
terraform {
  required_providers {
    netapp-cloudmanager = {
      source = "NetApp/netapp-cloudmanager"
      version = "21.6.0"
    }
  }
}
```

freecram.net
Referring to the exhibit, what would happen if there is a newer version of netapp-cioudmanager available when you install the provider with the terraform init command?
A. The newer version will be downloaded.
B. Only the exact version 21.6.0 is downloaded.
C. Any version below version 21.6.0 is installed.
D. The newer version will be downloaded only when it is a patch release.
Answer: C (LEAVE A REPLY)

NEW QUESTION: 52
You are using NetApp Cloud Manager to set up replication, as shown in the exhibit. Which two replication policies are supported in this scenario? (Choose two.)

freecram.net

A. Tier
B. Backup
C. Clone
D. Mirror
Answer: B,D (LEAVE A REPLY)

NEW QUESTION: 53
You are responsible for setting up a process to handle version control for developers' source code. You need to decide which tools you will use. In this scenario, which two tools would satisfy the requirement? (Choose two.)
A. Docker Hub
B. git
C. Jfrog
D. subversion
Answer: A,D (LEAVE A REPLY)

NEW QUESTION: 54
You are using REST APIs to deploy and manage storage that is provided by NetApp Cloud Volumes ONTAP in Microsoft Azure. You have written a Python script that contains a POST request to the following URL: http://localhost/occm/api/azure/vsa/working-environments.
However, you receive a 401 response failure message that indicates that the user is not authenticated. In this scenario, which two steps must you perform to communicate with an endpoint? (Choose two.)
A. Acquire a JWT access token from the OAuth token endpoint.
B. Call an API endpoint with the refresh token.
C. Call an API endpoint with the JWT access token.
D. Acquire a refresh token from the OAuth token endpoint.
Answer: (SHOW ANSWER)

NEW QUESTION: 55
As a DevOps engineer, you want a single tool that uses one automation language consistently across orchestration, application deployment, and configuration management. In this scenario, which tool would you choose?
A. Octopus
B. Ansible
C. Docker
D. Selenium

Answer: (SHOW ANSWER)

NEW QUESTION: 56
An organization is implementing infrastructure as code to deploy NetApp Cloud Volumes ONTAP instances. In this scenario, what are two ways in which this implementation improves operation efficiencies? (Choose two.)
A. Best practices can be implemented directly into configurations.
B. Deployment failures are automatically resolved by configuration management.
C. Defining the system as code makes it more secure.
D. System configurations can be version controlled.
Answer: (SHOW ANSWER)

NEW QUESTION: 57
Your software development team is working on a new stateful containerized application that requires persistent storage. The team develops software on their local workstations prior to deploying to test and production environments. The team wants to create a consistent experience across the various stages of the software development life-cycle. In this scenario, which NetApp product should the team use?
A. Azure NetApp Files
B. NetApp ONTAP Select
C. NetApp Cloud Volumes ONTAP
D. NetApp Cloud Volumes Service
Answer: (SHOW ANSWER)

NEW QUESTION: 58
A customer has implemented a NetApp-based hybrid cloud solution using NetApp Cloud Volumes ONTAP for AWS and NetApp Cloud Volumes ONTAP for Azure. Users are complaining about slow read and write speeds when they access data from Microsoft Azure while they are using compute resources in AWS. Which three actions would solve the problem? (Choose three.)
A. Modify the underlying storage resources of Cloud Volumes ONTAP for Azure.
B. Increase the instance size and type of Cloud Volumes ONTAP for AWS.
C. Move user compute resources to AWS from Azure.
D. Transition volumes from Cloud Volumes ONTAP for Azure to Cloud Volumes ONTAP for AWS.
E. Monitor network connectivity between AWS and Azure.
Answer: (SHOW ANSWER)

NEW QUESTION: 59
You are deploying persistent storage for Kubernetes with NetApp Trident. In this scenario, what are the two objects that you must create? (Choose two.)
A. Trident backend
B. Trident virtual storage pool
C. Kubemetes StorageClass
D. Trident volume

Answer: (SHOW ANSWER)

NEW QUESTION: 60

Which process refers to the automated release of new applications into production?

A. continuous deployment

B. continuous improvement

C. continuous feedback

D. continuous integration

Answer: (SHOW ANSWER)

NEW QUESTION: 61

Your customer is writing a curl command to test an API call to deploy Cloud Volumes OWTAP for AWS They want to know what the content- Type parameter should be set to in the header of the HTTP request. In this scenario, what would you tell the customer?

A. Set the parameter to application/json

B. Set the parameter to text/plain.

C. Set the parameter to application/ xml

D. Set the parameter to text/html.

Answer: (SHOW ANSWER)

NEW QUESTION: 62

You want to manage your applications using NetApp Astra Control within your Azure account.

Which two actions must be completed before accomplishing this task? (Choose two.)

A. Set up a capacity pool.

B. Delegate a subnet to Azure NetApp Files.

C. Export your Azure AD Administrator key and import it into Astra Control.

D. Manually provision Azure Blob storage

Answer: (SHOW ANSWER)

NEW QUESTION: 63

Which tool provides a unified control plane that allows users to define a strategy and managelocal snapshots, data replication copies, and object storage copies?

A. BlueXP Backup and Recovery

B. NetApp SnapMirror Cloud
C. BlueXP Copy and Sync
D. BlueXP Cloud Tiering
Answer: (SHOW ANSWER)

NEW QUESTION: 64
Your organization is adopting DevOps techniques to accelerate the release times of your product.
The organization wants to have more communication between teams, quick iterations, and a better method for training work in progress. In this scenario, which three methodologies would you recommend? (Choose three.)
A. kanban
B. iterative
C. waterfall
D. agile
E. scrum
Answer: (SHOW ANSWER)

NEW QUESTION: 65
You are creating an Ansible playbook to deploy a NetApp ONTAP cluster. You want to take advantage of a loop to automate the creation of several volumes. What would accomplish this task?
A.

```
- name: Volume Create
na_ontap_volume:
    state: absent
    name: "{{ item }}"
    vserver: "my_svm"
    aggregate_name: "aggr0"
    size: 10
    size_unit: gb
    policy: default
    junction_path: "/{{ item }}"
loop:
    - vol1
    - vol2
    - vol3
```

freecram.net

B.
```
- name: Volume Create
na_ontap_volume:
    state: present
    name: "{{ vol1,vol2,vol3 }}"
    vserver: "my_svm"
    aggregate_name: "aggr0"
    size: 10
    size_unit: gb
    policy: default
    junction_path: "/{{ vol1,vol2,vol3 }}"
```

C.
```
- name: Volume Create
na_ontap_volume:
    state: present
    name: "{{ item }}"
    vserver: "my_svm"
    aggregate_name: "aggr0"
    size: 10
    size_unit: gb
    policy: default
    junction_path: "/{{ item }}"
loop:
    - vol1
    - vol2
    - vol3
```

D.
```
- name: Volume Create
na_ontap_aggregate:
    state: present
    name: "{{ item }}"
    vserver: "my_svm"
    aggregate_name: "aggr0"
    size: 10
    size_unit: gb
    policy: default
    junction_path: "/{{ item }}"
loop:
    - vol1
    - vol2
    - vol3
```

Answer: A (LEAVE A REPLY)

NEW QUESTION: 66

As an implementation engineer, you are testing your automation script that you wrote for deploying Cloud Volumes ONTAP for Azure. You want to verify that the ID that you use for the tenant ID field in the JSON body is correct. In this scenario, where would you find this ID in the user interface (UI)?

A. Tenant ID in the Azure portal

B. Subscription ID in the Azure Portal

C. Tenant ID in the Cloud Manager UI

D. Workspace ID in the Cloud Manager UI
Answer: (SHOW ANSWER)

NEW QUESTION: 67
Which two factors determine the maximum throughput achievable by a Cloud Volumes ONTAP instance in AWS? (Choose two.)
A. The number of aggregates configured, regardless of disk type.
B. The AWS Region's default network MTU.
C. The EC2 instance type selected.
D. The EBS volume type and provisioned IOPS/throughput.
Answer: (SHOW ANSWER)

NEW QUESTION: 68
Your company uses all four of NetApp's storage offerings: ONTAP, StorageGRID, Element, and E- Series. You are asked to provide persistent storage to the OpenShift group by using NFS. In this scenario, which of the available storage deployments would provide access?
A. Element
B. StorageGRID
C. ONTAP Select
D. E-Series
Answer: (SHOW ANSWER)

NEW QUESTION: 69
A customer wants to automate the deployment of a repeatable, multi-step hybrid cloud workflow (e.g., provisioning a Cloud Volumes ONTAP instance, creating volumes, and configuring SnapMirror) without writing custom scripts. Which BlueXP capability best fits this need?
A. Active IQ Unified Manager Alerts
B. SnapCenter Plug-in Framework
C. FlexClone Automation Engine
D. BlueXP Workflow Automation / Ansible integration with NetApp modules
Answer: (SHOW ANSWER)

NEW QUESTION: 70
You are asked to design a Trident solution on NetApp ONTAP for a highly scaled Kubernetes environment that contains thousands of stateful microservice applications. Which ONTAP Trident driver should be used in such a highly scaled environment?
Freecram.net
A. ontap-nas-economy
B. ontap-nas-flexgroup
C. ontap-san
D. ontap-nas
Answer: (SHOW ANSWER)

NEW QUESTION: 71
You must have a firewall adjusted to allow Ansible to work with ONTAP and Element software. In this scenario, which port must be allowed for both systems?
A. SSH(22)
B. Telnet(23)
C. HTTPS(443)
D. HTTP(80)
Answer: (SHOW ANSWER)

NEW QUESTION: 72
You are deploying a new container application with persistent storage that is set up with StatefulSets storage. You are concerned about the number of persistent volumes during scale-up and scale-down activities. In this scenario, which statement is correct?
A. The number of persistent volumes will not increase and decrease automatically.
B. The number of persistent volumes will increase and not decrease.
C. The number of persistent volumes will increase and decrease automatically.
D. The number of persistent volumes will increase and then will decrease automatically if the data is not used after a defined period of time.
Answer: (SHOW ANSWER)

NEW QUESTION: 73
You are currently working as an infrastructure administrator. Your business is undergoing an agile transformation exercise to accelerate time to market for the software development team. The business will be adopting DevOps practices and tools as a part of this transformation. In this scenario, what are three skill areas that you should learn to support the business during this transition? (Choose three.)
A. continuous integration
B. patching control
C. containerization
D. project management
E. infrastructure as code
Answer: (SHOW ANSWER)

NEW QUESTION: 74
You are performing a default deployment using Kubernetes. In this scenario, where is persistent data stored?
A. on the master node
B. on every worker node
C. on a random worker node
D. on the worker node with the pod
Answer: (SHOW ANSWER)

NEW QUESTION: 75
Which two NetApp technologies can be combined to provide near-instantaneous recovery of a volume to a point in time prior to a ransomware infection while preserving the original volume for forensic analysis? (Choose two.)
A. SnapRestore
B. SnapMirror Business Continuity
C. FlexClone
D. FabricPool
Answer: (SHOW ANSWER)
