## NEW QUESTION: 1

Which traffic will be blocked when application-default service is set on a Security policy?

- A. HTTP traffic on TCP/81
- B. HTTPS traffic on TCP/443
- C. SSH traffic on TCP/22
- D. DNS traffic on UDP/53

Answer: ([SHOW ANSWER](#))

## NEW QUESTION: 2

Which architecture is unique to Palo Alto Networks and results in no additional performance overhead when enabling additional features?

- A. single-pass
- B. multi-pass
- C. multiple-core threaded
- D. no-pass

Answer: ([SHOW ANSWER](#))

## NEW QUESTION: 3

How does Cloud Identity Engine (CIE) simplify deployment of cloudbased services to provide user authentication?

- A. It authenticates users via a cloud-based service and refers to the hub for mappings for group identification.
- B. It allows configuration of an authentication source once instead of for each authentication method.
- C. It expands the capability to filter and forward decrypted and non-decrypted Transport Layer Security (TLS) traffic.

D. It ensures that a compromised master key does not compromise the configuration encryption for an entire deployment.

Answer: ([SHOW ANSWER](#))

#### NEW QUESTION: 4

What are three unique benefits of the Palo Alto Networks Content-ID? (Choose three.) Select 3 Correct Responses

- A. increasing latency as new threat prevention features are enabled
- B. enforcing policy control over unapproved web surfing
- C. micro-segmenting network traffic based on the unique identification number of the content
- D. proactively identifying and defending against unknown, new, or custom malware and exploits
- E. detecting and preventing known and unknown threats in a single pass

Answer: ([SHOW ANSWER](#))

#### NEW QUESTION: 5

A firewall enabled as a decryption broker will take which of the following actions?

- A. correlate a series of related threat events that indicate a likely compromised host on the network
- B. monitor the state of active connections to determine which network packets to allow through
- C. forward clear text traffic to security chains for additional enforcement
- D. identify potential denial-of-service (DoS) attacks and take protective action

Answer: ([SHOW ANSWER](#))

#### NEW QUESTION: 6

Using a comprehensive range of natively-integrated subscriptions and inline machine learning (ML), what does a Next-Generation Firewall (NGFW) use to prevent known and unknown threats in real time?

- A. Cloud Identity Access Management (CIAM)
- B. Cloud Native Security Platform (CNSP)
- C. Cloud Delivered Security Services (CDSS)
- D. Cloud Security Posture Management (CSPM)

Answer: ([SHOW ANSWER](#))

#### NEW QUESTION: 7

The Security Operations Center (SOC) has noticed that a user has large amounts of data going to and coming from an external encrypted website. The SOC would like to identify the data being sent to and received from this website.

Which Secure Sockets Layer (SSL) decryption method supported by Palo Alto Networks would allow the SOC to see this data?

- A. Inbound Proxy
- B. Forward Proxy

- C. Web Proxy
- D. Certificate Proxy

**Answer: B ([LEAVE A REPLY](#))**

**NEW QUESTION: 8**

Which two of the following are benefits of the Palo Alto Networks Zero Trust architecture?  
(Choose two.) Select 2 Correct Responses

- A. more network segments
- B. increased detection of threats and infiltration
- C. cloud-based virtual private network (VPN)
- D. tighter access control

**Answer: ([SHOW ANSWER](#))**

**NEW QUESTION: 9**

To use App-ID effectively in Security policies, which three best practices should be followed?  
(Choose three.) Select 3 Correct Responses

- A. Use Expedition to migrate a port-based policy to PAN-OS.
- B. Whenever possible, enable App-ID override.
- C. Use phased transition to safely enable applications.
- D. Use Policy Optimizer to migrate to an application-based policy.
- E. After the application is specified in policy, set the 7 service to "any".

**Answer: ([SHOW ANSWER](#))**

**NEW QUESTION: 10**

Which three of the following are features of the Palo Alto Networks Next-Generation Firewall (NGFW) that differentiate it from a stateful inspection firewall? (Choose three.) Select 3 Correct Responses

- A. User-ID
- B. Login-ID
- C. Network-ID
- D. App-ID
- E. SSL/SSH Decrypt

**Answer: ([SHOW ANSWER](#))**

**NEW QUESTION: 11**

Implementation of which PAN-OS feature improves visibility and prevention of malware?

- A. Antivirus profiles
- B. Anti-Spyware profiles
- C. Data Filtering profiles

D. Decryption profiles

Answer: ([SHOW ANSWER](#))

**NEW QUESTION: 12**

What is a technical benefit of User-ID in relation to policy control?

- A. It improves safe enablement of applications traversing the network.
- B. It matches traffic against policy to check whether it is allowed on the network.
- C. It allows all users to designate view-only access to itinerant personnel.
- D. It encrypts all private keys and passwords in the configuration.

Answer: ([SHOW ANSWER](#))

**NEW QUESTION: 13**

Which feature allows a customer to gain visibility and respond to changes in user behavior or potential threats without manual policy changes?

- A. User-ID agent
- B. dynamic user groups (DUGs)
- C. dynamic address objects
- D. Lightweight Directory Access Protocol (LDAP) sync

Answer: ([SHOW ANSWER](#))
