NEW QUESTION: 1

Which are the mandatory preconditions for an attribute that can be used for saving the segmentation results?

Note: There are 2 correct Answers to this question.

- A. The length of the attribute needs to be 18 digits.
- B. It should be a non-key attribute of the master data type.
- C. It belongs to a simple or compound master data type.
- D. Its data type is INTEGER and its length has been specified.

Answer: B,C ([LEAVE A REPLY](#))

NEW QUESTION: 2

Which of the following checks for master data and key figures does the Check Mode algorithm trigger?

Note: There are 3 correct Answers to this question.

- A. It checks whether the location products specified in the master data are connected by customer sourcing rules within the supply chain network.
- B. It checks whether the location resource specified in the master data forms a cycle in the supply chain network.
- C. It checks whether the sourcing in the Production Source Item Master Data type exists.
- D. It checks whether the heuristic detects cycles formed by nodes (such as location products) in the supply chain network.
- E. It checks whether the required planning level master data exists for a subset of input key figures.

Answer: ([SHOW ANSWER](#)**)**

NEW QUESTION: 3

Which of the following key functions are supported by SAP IBP for sales and operations? Note: There are 2 correct Answers to this question.

- A. A basic demand planning process
- B. Finite resource planning
- C. An advanced demand planning process
- D. Manual creation of feasible constrained plans

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 4

You are modeling the introduction of a new product using Lifecycle Planning functionality in SAP IBP. What is mandatory to create in your planning area for the setup of reference product(s) to work?

Note: There are 2 correct Answers to this question.

- A. Planning objects for the new product
- B. Definition of an attribute representing the product description
- C. Definition of an attribute representing the product ID
- D. Definition of Actual Sales business meaning for one key figure

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 5

Which of the following modes can you use when creating a constrained plan? Note: There are 2 correct Answers to this question.

- A. Resource maximization
- B. Profit maximization
- C. Production maximization
- D. Delivery maximization

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 6

Which property of an attribute will allow it to be used as an attribute as a key figure?

- A. Type NAVCHAR
- B. Type TIMESTAMP
- C. Type INTEGER
- D. Type DECIMAL

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 7

Which one of the following values can you use in disaggregation expressions?

- A. If (Attribute) = 0
- B. KF1 (Stored) + KF2 (Stored) + Attribute

C. KF1 (Calculated) + Attribute

D. KF1 (Stored) + Helper KF

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 8

Which of the following functional areas are included in the out-of-the-box SAP Integrated Business Planning application for sales and operations? Note: There are 3 correct Answers to this question.

A. Finite resource capacities planning

B. Demand-driven materials requirement planning

C. Rough-cut supply planning

D. Executive review

E. Consensus demand planning

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 9

You are modeling a substitution scenario associated with a promotion. What are some of the Master Data parameters that you need to maintain to ensure desired results generated by the optimizer?

Note: There are 2 correct Answers to this question.

A. Promotion duration

B. Flag 'Disable Substitution of Location Products

C. Location Product Sub Cost Rate

D. Loc-Prod Subst Valid-From Date

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 10

You have set up infinite S&OP heuristics for unconstrained planning. What must you do to model inputs as constraints?

Note: There are 2 correct Answers to this question.

A. Enter transportation lead times.

B. Model adjusted transport receipts.

C. Create product substitutions.

D. Set minimum and maximum lot sizes.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 11

Which of the following are the key features of SAP Supply Chain Control Tower? Note: There are 2 correct Answers to this question.

A. Ability to balance demand and supply and attain financial targets

B. Ability to use task and case management

- C. Ability to create smart alerts
- D. Ability to create a feasible plan

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 12

Which of the following are features of the S&OP process templates? Note: There are 2 correct Answers to this question.

- A. Each step depicted in the template can have tasks associated with it.
- B. All process templates are assigned to dashboards.
- C. The number of steps in a process template is the same for all implementations.
- D. New instances of templates allow for re-use of the same processes again.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 13

Which supply chain challenge is addressed by SAP IBP for demand?

- A. Inability to arrive at consensus demand
- B. Inability to synchronize supply and demand
- C. Inability to respond to short-term changes in supply and demand
- D. Inability to understand and shape actual demand

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 14

When can filter blocks appear in calculations? Note: There are 2 correct Answers to this question.

- A. When modeling attribute as a key figure
- B. When modeling attribute transformations
- C. When modeling cross-period calculations
- D. When using IFISNULL statements in the formula

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 15

When you promote calculated and approved inventory parameters from SAP IBP for inventory, what other IBP modules can be receiving them?

Note: There are 2 correct Answers to this question.

- A. SAP IBP for sales and operations
- B. SAP IBP for response and supply
- C. DDMRP
- D. SAP IBP for demand

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 16

You want to display and edit data in different units of measure (UOM). Which of the following must you consider before you use UOM?

Note: There are 3 correct Answers to this question.

- A. Units of measure are usually not time-independent.
- B. Analytics provide the user with the option to select the target unit of measure.
- C. Unit of measure is an attribute of a master data type, such as Product.
- D. Units of measure are usually not time-dependent.
- E. Conversion to the target unit of measure is handled by functionality of SAP IBP Excel UI

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 17

You are creating advanced copy operators as part of an SAP IBP solution that is being implemented.

What do you need to be aware of when defining data transfer? Note: There are 2 correct Answers to this question.

- A. Selecting by attribute with option 'contain' is possible.
- B. Specifying target key figure that is time independent is possible.
- C. Specifying target key figure is mandatory.
- D. Specifying source key figure is mandatory.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 18

You are adding a value-based filter to a planning view. Which of the following conditions apply?

Note: There are 3 correct Answers to this question.

- A. These filters are always applied based on the values stored in the database.
- B. These filters can be used together with attribute totals in the same planning view.
- C. The alerts dashboard is not available if a value-based filter is set for the open planning view.
- D. You can add (or delete) planning objects to a planning view after these filters are applied.
- E. You can only apply one value-based filter per planning view.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 19

Which of the following approaches could you take to reduce run times of an optimizer? Note:

There are

2 correct Answers to this question.

- A. Avoid using telescopic time buckets.
- B. Use a subnetwork ID to reduce the size of the problem.
- C. Split into multiple planning areas to support weekly vs. daily planning needs.
- D. Increase the use of incremental lot size beyond the frozen horizon.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 20

You are evaluating criteria for choosing the solver to support planning for a complex supply chain. What are some of the points that should be reviewed? Note: There are 2 correct Answers to this question.

- A. Planning results can be generated faster by the optimizer.
- B. Push and Pull production models are used by the optimizer.
- C. Finite heuristics can achieve demand prioritization and pegging.
- D. Prioritization of demand elements one by one is achieved by heuristics.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 21

Which of these conditions must be met to create a Local Member key figure?

- A. A key figure is created in the Planning Area app.
- B. A key figure is selected in the Key Figures tab in the Microsoft Excel add-in.
- C. Use Excel Cell References in Report Editor is selected.
- D. Activate Local Member Recognition is selected.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 22

Analytics charts are created by the user in the Advanced Analytics application. What actions are possible in the Advanced Analytics app?

Note: There are 2 correct Answers to this question.

- A. Apply filters on your data.
- B. Group data.
- C. Merge charts together.
- D. Open graphics in Excel.

Answer: A,B ([LEAVE A REPLY](#))

NEW QUESTION: 23

You created a key figure and want to add calculations. Which of the following rules do you consider?

Note: There are 2 correct Answers to this question.

- A. The calculation chain for a key figure must always result in a calculated key figure.

- B.** All key figure calculations have calculation inputs, which can be marked as stored or calculated.
- C.** Key figures can be calculated across different planning levels.
- D.** Aggregation calculations using SUM or MAX functions must be based on a higher aggregation U level.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 24

You want to restrict value entries outside of a specified range into a key figure. What setting will you use to achieve that goal?

- A.** IBP -> Data Validation in IBP Formatting Sheet tab
- B.** By restricting data input in the Key Figure Configuration app
- C.** Select Protect Active Worksheet in the About section of SAP IBP tab
- D.** IBP -> Lock Selected cells in IBP Formatting Sheet tab

Answer: **B** ([LEAVE A REPLY](#))

NEW QUESTION: 25

NO.21 For which of the following application jobs can you enter planning filters as parameters?

Note: There are 2 correct Answers to this question.

- A.** Create Time Periods for Time Profiles
- B.** Purge Non-Conforming Data
- C.** Purge Key Figure Data
- D.** Purge Master Data

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 26

Why would you set up a cascading filter in the planning view? Note: There are 2 correct Answers to this question.

- A.** To filter attributes based on specific values
- B.** To filter data in an Application Job template
- C.** To filter attributes based on other attribute filters
- D.** To filter using attributes that have a large number of values

Answer: **C,D** ([LEAVE A REPLY](#))

NEW QUESTION: 27

You run a what-if analysis and use the scenario planning function. Which actions can you perform? Note:

There are 3 correct Answers to this question.

- A.** Run a scenario-specific demand sensing job.
- B.** Share data with other users.
- C.** Display data in analytics.

- D. Change scenario-specific master data.
- E. Run a scenario-specific inventory optimization job.

Answer: ([SHOW ANSWER](#))
