D. From the Identity & Access Management tab in Workspace One Access, assign the group the Service Broker User and Organization member roles.

**Answer:** ([SHOW ANSWER](#))

#### **NEW QUESTION: 7**

An administrator has re-logged on to vRealize Operations Manager and would like to continue reviewing an active troubleshooting for a VM in Workbench.

What must the administrator perform to continue the investigation?

- A. Sessions are persisted after the user logs out from vRealize Operations Manager.
- B. Sessions do not persist after the user logs out from vRealize Operations Manager.
- C. The administrator must contact VMware support to retrieve the latest session information vRealize Operations Manager.
- D. Sessions can be imported based on an export prior to the user logging out of vRealize Operations Manager.

**Answer:** ([SHOW ANSWER](#))

#### **NEW QUESTION: 8**

Which tool in the Cloud Management solution can be used to create dashboards based on the logs generated by vRealize Automation?

- A. vRealize Operations Manager
- B. vRealize Log Insight
- C. vRealize Network Insight
- D. vRealize Orchestrator

**Answer:** A ([LEAVE A REPLY](#))

#### **NEW QUESTION: 9**

Which is the valid use case for vRealize Automation?

- A. Central repository for Perl scripts
- B. Infrastructure and application monitoring
- C. Providing the compute layer for Kubernetes
- D. Multi-cloud deployment with governance

**Answer:** ([SHOW ANSWER](#))

#### **NEW QUESTION: 10**

- A. Day 2 Action
- B. Resource Quota
- C. Lease
- D. Approval

**Answer:** ([SHOW ANSWER](#))

#### **NEW QUESTION: 11**

Which component can be monitored with the dashboards in the VMware SDDC Health Monitoring Solution?

- A. VMware Site Recovery Manager
- B. VMware Tanzu
- C. VMware Horizon

D. vRealize Network Insight

**Answer: ([SHOW ANSWER](#))**

### **NEW QUESTION: 12**

An operator has been tasked with using vRealize Operations to determine whether sufficient capacity exists within a production vSAN Cluster to add another 100 workloads. Which two actions should be taken to complete this task? (Choose two.)

- A. Create a new Add VMs Scenario using the Workload Planning: Hyperconverged and VMC on AWS option.
- B. Create a new Add VMs Scenario using the Workload Planning: Traditional option.
- C. Select Plan from the Quick Start Page.
- D. Select Assess Capacity from the Quick Start Page.
- E. Select Rightsize from the Quick Start Page.

**Answer: ([SHOW ANSWER](#))**

### **NEW QUESTION: 13**

A cloud-only company has a small team of developers working on developing applications using public cloud native services. The company would like to invest in a platform that is capable of automating the delivery and lifecycle of services across multiple clouds using a self-service catalog.

Which solution should the customer choose?

- A. vRealize Operations
- B. vRealize Operations Cloud
- C. vRealize Automation Cloud
- D. vRealize Automation

**Answer: ([SHOW ANSWER](#))**

### **NEW QUESTION: 14**

A company's data center is running out of compute resources (CPU and Memory). As a result, the administration team decided to optimize the CPU and memory value assigned to each virtual machine to save some compute resources.

How can the administrators use vRealize Operations Manager to achieve this goal?

- A. Under Rightsizing, select the oversized virtual machines, and click resize.
- B. Under Recommended Actions, check the alerts, and apply the suggested fix.
- C. Under Workload Optimization, click optimize now, and run the recommended actions.
- D. Under Reclaim, select the snapshots shown, and click delete.

**Answer: ([SHOW ANSWER](#))**

### NEW QUESTION: 15

An administrator wants to create a common catalog through which users can request different catalog items.

Which vRealize Automation service should be used?

- A. Cloud Assembly
- B. Service Broker
- C. SaltStack Config
- D. Code Stream

Answer: ([SHOW ANSWER](#))

### NEW QUESTION: 16

Why would the health status of an environment be missing in vRealize Suite Lifecycle Manager (vRSLCM)?

- A. vRealize Log Insight is not deployed in the environment.
- B. The SDDC Management Health solution pack is not configured in vRealize Operations Manager.
- C. Identity Manager is not deployed in the environment.
- D. The vRSLCM Management solution pack is not configured in vRealize Operations Manager.

Answer: ([SHOW ANSWER](#))
