

VMware.250-589.v2026-02-03.q77

Exam Code:	250-589
Exam Name:	Broadcom Symantec Web Protection - Edge SWG R2 Technical Specialist
Certification Provider:	VMware
Free Question Number:	77
Version:	v2026-02-03
# of views:	102
# of Questions views:	770
https://www.freecram.net/torrent/VMware.250-589.v2026-02-03.q77.html	

NEW QUESTION: 1

Which elements should be considered when creating web access policies in Edge SWG?
(Select two)

- A. Website categorization and threat reputation
- B. File system configuration on user devices
- C. Cloud storage usage per user
- D. User identity and group membership

Answer: (SHOW ANSWER)

NEW QUESTION: 2

How does Edge SWG improve web performance using caching?

- A. By storing previously accessed web content and serving it to users without re-downloading it from the internet
- B. By blocking access to websites that take too long to load
- C. By forcing all users to browse in incognito mode
- D. By reducing encryption levels for faster data transmission

Answer: (SHOW ANSWER)

NEW QUESTION: 3

How does Symantec Edge SWG intercept and inspect web traffic in an explicit proxy deployment?

- A. Traffic is automatically redirected using network address translation (NAT)
- B. Users manually configure a proxy or use a PAC file to direct traffic through Edge SWG
- C. The firewall forces all outgoing traffic through the Edge SWG appliance

D. Users connect via a secure VPN tunnel that routes all traffic through Edge SWG

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 4

Which diagnostic tool in Edge SWG is used to capture and analyze network traffic for troubleshooting?

- A. Policy Rule Optimizer
- B. Threat Intelligence Feed
- C. Event Log Monitor
- D. Packet Capture Utility

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 5

How can administrators enforce acceptable internet use policies in Edge SWG?

- A. By granting unrestricted access to high-bandwidth websites
- B. By allowing users to manually override all security policies
- C. By disabling all authentication requirements
- D. By configuring access policies based on website categorization

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 6

Which feature in Reporter allows administrators to customize reports based on business requirements?

- A. SSL/TLS Decryption Engine
- B. Report Processing and Aggregation Component (RPAC)
- C. Bandwidth Allocation Policy Editor
- D. Device Health Monitor

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 7

Which log should be checked when troubleshooting policy enforcement issues in Edge SWG?

- A. Event Log
- B. Bandwidth Utilization Log
- C. Firewall Traffic Log
- D. SSL Certificate Log

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 8

Which built-in tool in Edge SWG helps administrators analyze how security policies are applied?

- A. Policy Tracing Tool
- B. Bandwidth Optimization Analyzer
- C. Threat Intelligence Dashboard
- D. SSL Decryption Debugger

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 9

Which tasks can be performed using Management Center's device management capabilities? (Select two)

- A. Providing cloud-based remote access to unauthorized users
- B. Monitoring health status and performance metrics of Edge SWG appliances
- C. Automatically disabling SSL/TLS encryption for internal traffic
- D. Deploying and rolling back policy changes across managed devices

Answer: B,D ([LEAVE A REPLY](#))

NEW QUESTION: 10

- A. Check connectivity between the Edge SWG appliance and the BCAAA agent
- B. Reduce password complexity requirements for users
- C. Disable BCAAA authentication and allow anonymous access
- D. Restart the firewall to refresh security rules

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 11

Which monitoring feature in Edge SWG helps administrators set up automatic alerts for critical security events?

- A. Allowing unrestricted access to security logs
- B. Manually reviewing logs every 24 hours
- C. Disabling all logging functions
- D. Configuring Device Alerts in Management Center

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 12

Which Symantec technology powers Edge SWG's ability to analyze and block malicious web traffic in real time?

- A. WebPulse Threat Intelligence
- B. Universal Policy Enforcement (UPE)
- C. Management Center Logging System
- D. SSL Bypass Engine

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 13

Which best practices should be followed when configuring Edge SWG role-based policies?
(Select two)

- A. Remove all authentication requirements for internal users
- B. Regularly update authentication settings to reflect organizational changes
- C. Allow users to define their own security settings
- D. Test policy changes in a controlled environment before deploying

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 14

How does Edge SWG determine whether a website should be isolated using HRI?

- A. By requiring the user to manually report suspicious websites
- B. By analyzing the website's risk level using threat intelligence feeds
- C. By monitoring the user's browsing history
- D. By automatically blocking all HTTPS websites

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 15

Which method is used by Edge SWG to prevent phishing attacks?

- A. Real-time URL filtering and domain reputation analysis
- B. Blocking all HTTP traffic
- C. Requiring multi-factor authentication for every web request
- D. Forcing all users to browse in Incognito mode

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 16

Which troubleshooting steps should be taken if an Edge SWG policy is unexpectedly blocking user access to websites? (Select two)

- A. Review the Web Filtering logs to check for incorrect categorization
- B. Allow users to override policy restrictions at their discretion
- C. Disable all web filtering rules to allow access
- D. Use the Policy Tracing Tool to analyze how the request is processed

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 17

Which feature in Edge SWG allows administrators to check how a request matches filtering rules and policies?

- A. Policy Coverage Tool
- B. SSL Certificate Verifier
- C. Firewall Packet Inspector
- D. Access Control List (ACL) Manager

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 18

What is the primary challenge of managing HTTPS traffic on Symantec Edge SWG?

- A. Edge SWG does not support SSL decryption
- B. Encrypted traffic prevents traditional content inspection
- C. TLS certificates are not required for HTTPS filtering
- D. HTTPS websites cannot be blocked or filtered

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 19

What is the most common cause of high CPU usage on an Edge SWG appliance?

- A. Excessive SSL/TLS decryption and inspection
- B. Incorrectly configured DNS settings
- C. Inadequate cooling of the hardware
- D. Running outdated firmware versions

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 20

- A. Use diagnostic logs to gather information before making changes
- B. Disable all security policies to quickly identify the issue
- C. Allow end-users to modify security settings for self-troubleshooting
- D. Test and validate policy changes in a controlled environment

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 21

What is a best practice when configuring acceptable internet usage policies in Edge SWG?

- A. Disable logging to reduce storage usage
- B. Allow all categories of websites to ensure user freedom
- C. Allow social media access without any restrictions
- D. Regularly update web filtering rules based on evolving security threats

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 22

Which benefits does Universal Policy Enforcement (UPE) provide when integrating Edge SWG with cloud security solutions? (Select two)

- A. Reduces logging for cloud-based traffic
- B. Automatically allows all traffic from cloud services
- C. Ensures consistent security policies across on-premise and cloud environments
- D. Extends web filtering and data protection policies to cloud applications

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 23

How can administrators offload HTTPS traffic to an SSL Visibility Appliance to enhance performance?

- A. By forwarding decrypted traffic from Edge SWG to the SSL Visibility Appliance
- B. By configuring Edge SWG to route all HTTPS traffic directly to the internet
- C. By using DNS filtering instead of SSL decryption
- D. By disabling SSL interception in Edge SWG

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 24

How does Reporter integrate with Edge SWG for monitoring?

- A. By collecting and analyzing access logs for web activity and security incidents
- B. By bypassing web security policies for administrators
- C. By increasing internet bandwidth for high-priority users
- D. By allowing direct modification of user authentication settings

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 25

Which best practices should administrators follow when configuring High-Risk Isolation (HRI) policies? (Select two)

- A. Disable all other security controls to rely solely on HRI
- B. Allow users to bypass isolation for unknown websites
- C. Regularly update threat intelligence feeds to classify new risky domains
- D. Ensure users are informed when accessing an isolated website

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 26

Which factors can cause authentication failures in Edge SWG? (Select two)

- A. Incorrectly configured authentication policies
- B. Network connectivity issues between Edge SWG and the authentication server

- C. Allowing users to log in from multiple devices
- D. Using an SSL certificate with a longer expiration date

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 27

Which action should an administrator take if Edge SWG policies are not being enforced as expected?

- A. Disable SSL decryption to avoid interference with policies
- B. Use the Policy Tracing Tool to verify rule processing order
- C. Allow users to modify security policies manually
- D. Increase bandwidth allocation for all users

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 28

Which best practices should administrators follow when configuring malware analysis policies in Edge SWG? (Select two)

- A. Enable automatic updates for malware detection algorithms
- B. Allow users to bypass malware scanning if needed
- C. Disable malware scanning for performance improvement
- D. Log all detected threats for future analysis and compliance

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 29

Which actions should an administrator take when troubleshooting Edge SWG authentication failures? (Select two)

- A. Check event logs for authentication error messages
- B. Disable authentication and allow unrestricted access
- C. Verify that the authentication server (e.g., Active Directory) is reachable
- D. Manually enter user credentials for all authentication attempts

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 30

- A. Authentication policies do not apply to any traffic
- B. User credentials may not be passed correctly to authentication servers
- C. Users must manually enter their credentials for every request
- D. All authentication attempts are automatically approved

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 31

Which logs should be regularly reviewed to ensure proper security monitoring in Edge SWG? (Select two)

- A. User email logs for spam detection
- B. Printer queue logs for network troubleshooting
- C. Access Logs for monitoring user web activity
- D. Event Logs for tracking security incidents and policy changes

Answer: ([SHOW ANSWER](#))

Valid 250-589 Dumps shared by ExamDiscuss.com for Helping Passing 250-589 Exam! NEW QUESTION: 32

Which elements should be considered when defining role-based access policies in Edge SWG? (Select two)

- A. Printer and hardware configuration settings
- B. Total number of files stored on the user's laptop
- C. User's department and job role
- D. Website categorization and risk level

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 33

Which log should an administrator check when troubleshooting SSL decryption issues in Edge SWG?

- A. SSL Debug Logs
- B. Threat Intelligence Logs
- C. Event Logs
- D. Web Content Filtering Logs

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 34

What is the most common cause of DNS resolution failures in Edge SWG?

- A. Incorrectly configured DNS server settings
- B. Too many active user sessions
- C. Insufficient bandwidth for DNS queries
- D. Expired SSL certificates

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 35

Which actions can be taken to optimize security and enforce acceptable use policies in Edge SWG? (Select two)

- A. Use real-time monitoring to track user browsing behavior
- B. Disable SSL inspection for secure websites to enhance performance
- C. Implement category-based filtering to block high-risk websites
- D. Allow full administrative control for all employees

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 36

What is the first step in troubleshooting policy issues in Edge SWG?

- A. Enable unrestricted access for all users
- B. Check the Policy Tracing Tool to verify how policies are applied
- C. Restart the Edge SWG appliance
- D. Disable all policies and test web access

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 37

Which troubleshooting steps should be taken if SSL interception is causing websites to break? (Select two)

- A. Allow users to bypass SSL decryption manually
- B. Disable web security policies for HTTPS traffic
- C. Verify that the Edge SWG root certificate is installed on client devices
- D. Exclude business-critical applications from SSL decryption

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 38

Which steps can administrators take to troubleshoot high latency in web browsing through Edge SWG? (Select two)

- A. Check for network congestion and optimize bandwidth allocation
- B. Reduce security policy enforcement to improve performance
- C. Analyze logs to identify slow-performing web requests
- D. Allow users to bypass Edge SWG filtering for faster browsing

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 39

What is the primary purpose of monitoring features in Symantec Edge SWG?

- A. To provide users with the ability to modify security policies
- B. To disable web filtering policies for improved browsing speed
- C. To allow unrestricted web browsing without security checks
- D. To track system performance, security events, and user activity in real-time

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 40

- A. Open network access with no authentication
- B. LDAP-based authentication
- C. Unauthenticated guest access
- D. Integrated Windows Authentication (IWA)

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 41

Which best practices should administrators follow to optimize DNS resolution on Edge SWG? (Select two)

- A. Use a mix of internal and external DNS servers for better redundancy
- B. Manually enter static IP addresses for all websites
- C. Enable DNS caching to reduce frequent queries
- D. Disable logging to speed up DNS queries

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 42

Which Edge SWG feature helps optimize bandwidth by compressing HTTP responses before sending them to users?

- A. HTTP Compression
- B. Proxy Auto-Configuration (PAC) Files
- C. SSL Bypass
- D. Access Control Policy

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 43

Which feature in Edge SWG helps identify SSL decryption issues by analyzing certificate validation failures?

- A. SSL Debug Mode
- B. Universal Policy Enforcement (UPE) Dashboard
- C. Threat Intelligence Console
- D. Packet Capture Utility

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 44

What action does Edge SWG take when a user attempts to access a website flagged as malicious by WebPulse?

- A. Forwards the request to the organization's firewall
- B. Allows access but limits download speed

- C. Automatically redirects the user to an alternative website
- D. Blocks access and displays a warning page

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 45

What is a potential security risk of improperly configured SSL decryption settings in Edge SWG?

- A. The Edge SWG appliance may disable content filtering
- B. Users may be able to access encrypted malicious content without detection
- C. Web pages may load faster than expected
- D. Users will experience intermittent network disconnections

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 46

Which component in Edge SWG is used to categorize and enforce acceptable web usage policies?

- A. SSL Inspection Policy
- B. Web Categorization Database
- C. Firewall Content Filtering Module
- D. Threat Intelligence Gateway

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 47

Which policy setting allows administrators to bypass filtering for certain users or groups?

- A. Authentication Timeout Policy
- B. Threat Intelligence Feed Manager
- C. Access Control Policy with User Exceptions
- D. SSL Certificate Bypass Rule

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 48

What is the primary purpose of reporting features in Symantec Edge SWG?

- A. To replace real-time monitoring with offline reports
- B. To provide administrators with insights into web activity, security incidents, and policy enforcement
- C. To automatically block all web traffic based on predefined policies
- D. To allow users to modify their own security policies

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 49

Which security benefits does Symantec Edge SWG provide? (Select two)

- A. SSL/TLS decryption to inspect encrypted web traffic
- B. Automatic assignment of IP addresses to endpoint devices
- C. Prevention of zero-day malware threats using intelligence feeds
- D. Full replacement for all endpoint antivirus solutions

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 50

- A. Internal company websites that require authentication
- B. Email attachments downloaded from corporate mail servers
- C. Government and financial institution portals
- D. Web pages that contain unverified scripts or unknown domains

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 51

Which is a common cause of SSL interception failures in Edge SWG?

- A. Excessive bandwidth utilization
- B. Untrusted root certificates on client devices
- C. Incorrectly configured firewall rules
- D. Expired user authentication sessions

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 52

Which setting should be checked if users experience slow DNS resolution through Edge SWG?

- A. User browser history settings
- B. Authentication timeout policies
- C. Response time of configured DNS servers
- D. Edge SWG firmware version

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 53

Which Edge SWG feature can help identify memory usage issues?

- A. Universal Policy Enforcement (UPE) Dashboard
- B. Threat Intelligence Feeds
- C. Authentication Request Logs
- D. System Health Monitoring in Management Center

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 54

How does Edge SWG use group membership to apply security policies?

- A. Users are required to manually select their access level
- B. Security policies only apply to administrator accounts
- C. All users receive the same security policy
- D. Policies are assigned based on users' Active Directory groups

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 55

What should be done if users experience SSL certificate warnings when accessing HTTPS websites through Edge SWG?

- A. Allow users to manually bypass security warnings
- B. Replace all HTTPS websites with HTTP alternatives
- C. Ensure that the Edge SWG root certificate is installed and trusted on all client devices
- D. Disable SSL decryption entirely

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 56

Which actions should administrators take to optimize reporting configurations in Edge SWG? (Select two)

- A. Configure data retention policies based on business needs
- B. Reduce the frequency of security reports to once per year
- C. Disable logging to increase system performance
- D. Enable scheduled reports for compliance audits

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 57

Which feature allows administrators to differentiate web access policies based on users' departments or job roles?

- A. Bypassing all authentication requirements
- B. Anonymous authentication
- C. Global policy enforcement
- D. Role-based access control (RBAC)

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 58

Which Symantec technology is responsible for analyzing files for malicious behavior in real-time?

- A. Malware Analysis Engine
- B. Universal Policy Enforcement (UPE)
- C. SSL Bypass Module
- D. Firewall Packet Inspection System

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 59

What is the first step in Symantec's troubleshooting methodology for Edge SWG?

- A. Disable all security policies and test again
- B. Identify the problem and gather relevant details
- C. Restart the Edge SWG appliance
- D. Immediately escalate the issue to Symantec Support

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 60

- A. Configure separate databases for financial and HR records
- B. Assign dedicated Edge SWGs for each assigned role in the company
- C. Ensure that HR log sources are not uploaded to financial databases
- D. Restrict access by financial personnel to HR-related fields in the database

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 61

What should an administrator do if a legitimate website is mistakenly blocked by an Edge SWG policy?

- A. Add the site to the allowlist in the web filtering policy
- B. Allow users to bypass security controls manually
- C. Restart the Edge SWG appliance to refresh settings
- D. Disable all security policies

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 62

Which methods does Edge SWG use to intercept and analyze HTTPS traffic? (Select two)

- A. Rewriting HTTPS URLs to HTTP
- B. Blocking all encrypted traffic by default
- C. Forward proxy inspection
- D. SSL/TLS decryption

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 63

Which threat risk level would likely be assigned to an unproven URL without an established history of normal behavior?

- A. Low
- B. Medium
- C. High
- D. Medium-Low

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 64

Which benefits does integrating Edge SWG with malware scanning solutions provide? (Select two)

- A. Allows users to download and scan files manually on their devices
- B. Detects and blocks advanced persistent threats (APTs) in real time
- C. Prevents the download of malicious files before they reach endpoints
- D. Increases user access to high-risk file-sharing websites

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 65

Which of the following is the primary function of Symantec Edge SWG?

- A. Providing web security and content filtering for organizations
- B. Replacing traditional firewall appliances
- C. Encrypting all internal network traffic
- D. Optimizing network bandwidth for cloud applications

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 66

What is the primary function of High-Risk Isolation (HRI) in Edge SWG?

- A. Blocking all internet access for non-administrator users
- B. Redirecting users to a VPN for secure access

- C. Isolating risky and unknown websites to prevent endpoint compromise
- D. Automatically encrypting all network traffic

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 67

Which Edge SWG log should an administrator check when troubleshooting DNS resolution issues?

- A. Authentication Event Logs
- B. Policy Enforcement Logs
- C. DNS Resolver Logs
- D. Threat Intelligence Logs

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 68

Which is the primary advantage of an inline Edge SWG deployment?

- A. Decreases the amount of traffic to Edge SWG
- B. Ease of deployment
- C. Eliminates single point of failure
- D. More easily implemented redundancy

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 69

Which log type is most useful when troubleshooting authentication failures in Edge SWG?

- A. DNS Cache Logs
- B. Event Logs
- C. SSL Cipher Strength Logs
- D. Threat Intelligence Logs

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 70

- A. Manual authentication
- B. Transparent authentication
- C. Biometric authentication
- D. Password-based authentication

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 71

Which authentication method should be used in explicit proxy mode for Edge SWG?

- A. Proxy-based authentication (IWA or LDAP authentication)
- B. Open access without authentication
- C. Direct IP authentication

D. Biometric authentication via endpoint devices

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 72

Which reporting best practices should be followed to ensure accurate web usage monitoring? (Select two)

- A. Regularly review and validate report accuracy
- B. Allow all users to modify reporting settings
- C. Set up automated report generation for policy compliance audits
- D. Disable logging to save disk space

Answer: A,C ([LEAVE A REPLY](#))

NEW QUESTION: 73

Which malware scanning option provides real-time threat detection for files downloaded via Edge SWG?

- A. Allowlisting all known websites
- B. Content Analysis System (CAS) integration
- C. Web traffic bypass
- D. SSL decryption exclusion

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 74

Which step should be taken if a custom policy rule is not working as intended?

- A. Disable all preconfigured rules and only use custom rules
- B. Allow manual rule overrides by end-users
- C. Restart all network devices in the organization
- D. Ensure the rule is placed correctly in the policy order hierarchy

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 75

Which tool should an administrator use to diagnose security policy issues in Edge SWG?

- A. SSL Certificate Expiry Monitor
- B. VPN Connection Analyzer
- C. Policy Tracing Tool
- D. Bandwidth Optimization Tool

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 76

Which type of threat protection policy can be applied in Edge SWG to prevent malware-infected file downloads?

- A. Firewall Access Policy

- B. Bandwidth Optimization Policy
- C. VPN Access Policy
- D. Content & Malware Analysis Policy

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 77

Which best practices should be followed when configuring virus scanning policies in Edge SWG? (Select two)

- A. Enable automatic updates for malware signature databases
- B. Disable scanning for encrypted traffic to improve speed
- C. Log all malware scan results for future analysis
- D. Allow users to override virus scanning for personal files

Answer: ([SHOW ANSWER](#))
