NEW QUESTION: 1

An administrator notices that a cloud pod is not in the correct site.

What can be done to solve this issue?

- A. Under Settings > sites, select the pod, click edit, and select the correct site from the menu.
- B. Under Settings > Cloud Pod Architecture, select the pod and change the name of the site.
- C. Under Settings > sites, select the site, and select move pod to this site.
- D. Under Settings > Cloud Pod Architecture, select the pod, click edit and select the correct site.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 2

A new Horizon environment has gone into production. External sessions are being disconnected after a random period of time.

The following information has been documented by the administrator:

Internal and external users are able to connect to their desktops.

External sessions connect via a Unified Access Gateway.

Users are immediately able to reconnect but will be disconnected again in a few minutes.

Internal sessions, connected directly to the desktops, are not impacted.

While the session remains connected, all expected functionality works properly.

What could be a cause of this issue?

- A. A misconfigured network load balancer is in front of the Unified Access Gateway appliances.
- B. Required firewall ports are not open in front of the Unified Access Gateway appliances.
- C. A misconfigured network load balancer is in front of the Connection Servers.
- D. Required firewall ports are not open in front of the Connection Servers.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 3

Which are the required permissions an administrator must assign to the user account for instant-clone operations in active directory before creating instant-clone desktop pools? (Choose three.)

- A. List contents
- B. Create and Delete Child objects
- C. Write to service principal names
- D. Create and Delete Computer Objects
- E. Read and Write All Properties
- F. Modify Owner

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 4

After creating a new desktop pool that contains customization specifications, a Horizon administrator sees the following message in the VMware Horizon event database:

Provisioning error occurred for Machine Machine_Name: Customization failed for Machine Which two could be the cause of the issue? (Choose two.)

- A. The administrator does not have sufficient permissions to access the customization specification.
- B. Desktops can only be customized after the end user logs into the virtual machine.
- C. The compute account of the template has been removed from the Active Directory.
- D. The customization specification has been renamed or deleted.
- E. Desktop pool provisioning is disabled.

Answer: A,D ([LEAVE A REPLY](#))

NEW QUESTION: 5

Which two built-in apps are supported and automatically added to the profile of a multi-app kiosk profile? (Choose two.)

- A. Sticky Notes
- B. Calculator
- C. Camera
- D. Microsoft Word
- E. Microsoft Edge

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 6

Which description explains Cloud Pod Architecture?

- A. Cloud Pod Architecture is a feature only available when using Windows virtual desktops in a Horizon environment.
- B. Cloud Pod Architecture is a feature that allows a vSphere cluster to become highly available for virtual desktops.
- C. Cloud Pod Architecture is a feature that requires additional licenses to activate and use.
- D. Cloud Pod Architecture is a feature that provides cross-data center administration, high availability desktops, and disaster recovery capabilities.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 7

To reduce the risk of users downloading malware to the corporate network, an administrator wants to allow end users to open only intranet websites inside their virtual desktop. Additionally, the administrator wants to configure all other URLs to automatically open in a browser on the end-user's client machine. Which steps should the administrator take to meet the requirements? (Choose two.)

- A. Disable the Allow External Website feature in Horizon Agent.
- B. Enable the URL Content Redirection feature in Horizon Agent.
- C. Configure group policy settings to indicate how Horizon Agent redirects the URL.
- D. Enable the URL Content Redirection feature on the desktop pool settings.
- E. Enable secure website settings in the Global Settings Security menu.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 8

The virtualization of physical resources after installation of a hypervisor follows a specific procedure. Drag and drop the procedural steps on the left into the correct sequential order on the right.

<u>Virtualization Procedural Step</u>	<u>Correct Sequence</u>
Create a VM and specify the required hardware to run a specific OS	Step 1
The hypervisor abstracts the physical resources into virtual hardware	Step 2
The hypervisor takes control of the physical resources of the host	Step 3
Install a guest operating system inside the VM, as done on a physical computer	Step 4

Answer:

<u>Virtualization Procedural Step</u>	<u>Correct Sequence</u>
Create a VM and specify the required hardware to run a specific OS	Step 1 The hypervisor abstracts the physical resources into virtual hardware
The hypervisor abstracts the physical resources into virtual hardware	Step 2 The hypervisor takes control of the physical resources of the host
The hypervisor takes control of the physical resources of the host	Step 3 Create a VM and specify the required hardware to run a specific OS
