### NEW QUESTION: 1

An administrator is tasked with allowing managers to request desktops and changes to desktops for their employees.

What VMware solution can be used to meet this requirement?

- A. Horizon Automated Pools
- B. vRealize Operations
- C. vRealize Automation
- D. Horizon Help Desk

Answer: ([SHOW ANSWER](#))

### NEW QUESTION: 2

Select the correct command to decommission the Horizon Connection Server replica.

- A. lvmutil.cmd
- B. vdmadmin.exe
- C. viewdbchk.cmd
- D. vdmexport.exe

Answer: ([SHOW ANSWER](#))

### NEW QUESTION: 3

Which storage product allows the pooling of resources to create datastores in a Software Defined Datacenter?

- A. VMware VMFS
- B. VMware HCI Mesh
- C. VMware vSAN
- D. VMware Storage I/O Control

Answer: ([SHOW ANSWER](#))

**NEW QUESTION: 4**

An administrator used the Horizon Console to specify the Active Directory account for joining instant-clone VMs to the Active Directory domain.

What two permissions must be granted to the Active Directory account to perform this task? (Choose two.)

- A. Grant the Global Domain Administrator role.
- B. Grant the Horizon Domain Admin role.
- C. Grant Inventory Administrator role.
- D. Write properties in the domain or in the organization units.
- E. Create and delete computer objects.

**Answer: B,E** ([LEAVE A REPLY](#))

**NEW QUESTION: 5**

A new Horizon environment has gone into production. External sessions are being disconnected after a random period of time.

The following information has been documented by the administrator:

Internal and external users are able to connect to their desktops.

External sessions connect via a Unified Access Gateway.

Users are immediately able to reconnect but will be disconnected again in a few minutes.

Internal sessions, connected directly to the desktops, are not impacted.

While the session remains connected, all expected functionality works properly.

What could be a cause of this issue?

- A. A misconfigured network load balancer is in front of the Connection Servers.
- B. Required firewall ports are not open in front of the Unified Access Gateway appliances.
- C. A misconfigured network load balancer is in front of the Unified Access Gateway appliances.
- D. Required firewall ports are not open in front of the Connection Servers.

**Answer: (**[SHOW ANSWER](#)**)**

**NEW QUESTION: 6**

End-users are complaining that they are frequently being asked for credentials when opening additional apps.

Which step should the administrator take to resolve the issue?

- A. Configure Session Timeout by modifying the Client Settings in Horizon Client.
- B. Configure a time limit by modifying the Horizon GPO.
- C. Configure SSO Timeout by modifying the Global Settings in Horizon Administrator.
- D. Configure Desktop Timeout by modifying the Pool Settings in Horizon Administrator.

**Answer: (**[SHOW ANSWER](#)**)**

**NEW QUESTION: 7**

Where can an administrator find the VDI machines in the Horizon LDAP?

- A. OU=Machines

- B. OU=Desktops
- C. OU=VDI
- D. OU=Servers

Answer: ([SHOW ANSWER](#))

#### NEW QUESTION: 8

Which description explains Cloud Pod Architecture?

- A. Cloud Pod Architecture is a feature that provides cross-data center administration, high availability desktops, and disaster recovery capabilities.
- B. Cloud Pod Architecture is a feature only available when using Windows virtual desktops in a Horizon environment.
- C. Cloud Pod Architecture is a feature that requires additional licenses to activate and use.
- D. Cloud Pod Architecture is a feature that allows a vSphere cluster to become highly available for virtual desktops.

Answer: ([SHOW ANSWER](#))

#### NEW QUESTION: 9

Drag and drop the high-level configuration steps for smart card authentication on the left into the correct sequential order on the right.

| <u>Smart Card Authentication Step</u>                       | <u>Correct Sequence</u> |
|-------------------------------------------------------------|-------------------------|
| Obtain the root certificate from the CA                     | Step 1                  |
| Prepare the AD for smart card authentication                | Step 2                  |
| Configure smart card settings in the VMware Horizon console | Step 3                  |
| Add the root certificate to a server's truststore file      | Step 4                  |

Answer:

| Smart Card Authentication Step                              | Correct Sequence                                                   |
|-------------------------------------------------------------|--------------------------------------------------------------------|
| Obtain the root certificate from the CA                     | Step 1 Obtain the root certificate from the CA                     |
| Prepare the AD for smart card authentication                | Step 2 Add the root certificate to a server's truststore file      |
| Configure smart card settings in the VMware Horizon console | Step 3 Configure smart card settings in the VMware Horizon console |
| Add the root certificate to a server's truststore file      | Step 4 Prepare the AD for smart card authentication                |

#### NEW QUESTION: 10

An administrator has been tasked by their organization with determining the type of Horizon deployment to use.

These requirements have been provided to the administrator:

Implement quickly the deployment of Windows and Linux desktops.

Provide hybrid cloud support.

Provide centralized brokering.

Ensure the environment is secure from end-to-end.

Which deployment solution meets the requirements?

- A. Horizon Cloud on Azure
- B. Horizon On-Premises
- C. Workspace ONE Unified Endpoint Management
- D. vSphere Desktop Edition

**Answer:** ([SHOW ANSWER](#))

#### NEW QUESTION: 11

An administrator notices that a cloud pod is not in the correct site.

What can be done to solve this issue?

- A. Under Settings > sites, select the site, and select move pod to this site.
- B. Under Settings > Cloud Pod Architecture, select the pod and change the name of the site.
- C. Under Settings > Cloud Pod Architecture, select the pod, click edit and select the correct site.
- D. Under Settings > sites, select the pod, click edit, and select the correct site from the menu.

**Answer:** ([SHOW ANSWER](#))

#### NEW QUESTION: 12

A user reports that they are unable to connect to their desktop from the internet using PCoIP, but they are able to connect via BLAST.

Which could be the cause of the issue?

- A. The firewall is denying port 80 to the Unified Access Gateway.
- B. The firewall is denying port 443 to the desktop.

- C. The firewall is denying port 4172 to the Unified Access Gateway.
- D. The firewall is denying port 3389 to the Desktop.

**Answer:** ([SHOW ANSWER](#))

#### **NEW QUESTION: 13**

Which are the required permissions an administrator must assign to the user account for instant-clone operations in active directory before creating instant-clone desktop pools? (Choose three.)

- A. List contents
- B. Create and Delete Computer Objects
- C. Read and Write All Properties
- D. Create and Delete Child objects
- E. Write to service principal names
- F. Modify Owner

**Answer:** ([SHOW ANSWER](#))

#### **NEW QUESTION: 14**

An administrator is tasked with giving the security team non-destructive rights to see how the connection servers have been configured.

What privilege is needed to meet the requirement?

- A. Inventory Administrators (Read only)
- B. Administrators (Read only)
- C. Global Configuration and Policy Administrators (Read only)
- D. Settings Administrator (Read only)

**Answer:** ([SHOW ANSWER](#))

#### **NEW QUESTION: 15**

A junior-level Horizon administrator is not able to see all RDS farms.

Where would a high-level administrator need to make changes to correct the issue?

- A. Access Groups
- B. Category Folder
- C. Global Entitlements
- D. Global Policies

**Answer:** ([SHOW ANSWER](#))

#### **NEW QUESTION: 16**

Which two steps must be completed in order to expand a writable volume? (Choose two.)

- A. Select Volumes > Writables > Select Volume > Update Writable.
- B. Select Volumes > Writables > Select Volume > Expand.
- C. Specify a size which is at least 1MB larger than the current size of the volume.
- D. Specify a size which is at least 1GB larger than the current size of the volume.
- E. Modify the snapvol.cfg to reflect the new size.

**NEW QUESTION: 17**

An administrator configured a virtual machine to use an NVIDIA card but the virtual machine is not starting up.

What could be the cause of the issue? (Choose two.)

- A. The Desktop Pool doesn't support 3D cards.
- B. 3D graphics cannot be used with local storage.
- C. Not all memory has been reserved on the VM.
- D. Not all CPU has been reserved on the VM.
- E. No suitable host could be found.

Answer: ([SHOW ANSWER](#))

**NEW QUESTION: 18**

Which of the following statements are true about Application Profiler?

- A. Application Profiler is installed automatically when installing VMware Dynamic Environment Manager FlexEngine.
- B. Application Profiler is installed automatically when installing Dynamic Environment Manager Management Console.
- C. VMware Dynamic Environment Manager Agent and the Application Profiler cannot be installed on the same machine.
- D. Application Profiler is installed using VMware Dynamic Environment Manager Enterprise Setup Wizard and explicitly selecting local drive installation.

Answer: D ([LEAVE A REPLY](#))

**NEW QUESTION: 19**

Which Horizon feature provides high availability desktops across datacenters?

- A. Instant-Clones
- B. Replica Connection Servers
- C. vCenter Linked Mode
- D. Cloud Pod Architecture

Answer: ([SHOW ANSWER](#))

### NEW QUESTION: 20

Which two client types have the lowest cost of ownership and are easier to manage deployments, firmware updates, and monitor. (Choose two.)

- A. Windows 10 Clients
- B. Headless Clients
- C. MacOS Clients
- D. Thin Clients
- E. Zero Clients
