NEW QUESTION: 1

An administrator wants to provision a new Golden Image but doesn't see the VM in the list with golden images.

Which could be the cause of the issue? (Choose two.)

- A. There is more than 1 active snapshot on the golden image.
- B. The golden image was not optimized.
- C. The wrong Guest OS Version was selected when creating the golden image.
- D. The golden image VM is not configured with a CD-ROM player.
- E. No snapshot was made after optimizing the golden image.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 2

An administrator needs to deploy an application to specific users in their instant-clone desktop environment with the following characteristics:

The application needs to be updated very frequently.

The application needs to be installed as soon as possible.

The application is not multi-user aware.

Which solution would meet the requirements?

- A. VMware Dynamic Environment Manager
- B. VMware Horizon Published Application
- C. VMware Thinapp
- D. VMware App Volumes

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 3

An administrator needs to monitor Connection Server health by using a http request.

Which command is the correct command to use?

- A. GET Error! Hyperlink reference not valid.
- B. GET Error! Hyperlink reference not valid.
- C. GET Error! Hyperlink reference not valid.
- D. GET Error! Hyperlink reference not valid.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 4

A user is complaining that each time they logon the need to change the settings for the e-mail client.

Which three options can an administrator deploy to make sure the user's settings are being saved?

- A. Roaming Profiles
- B. VMware Dynamic Environment Manager
- C. Mandatory profiles
- D. Flexible profiles
- E. VMware App Volume Writeable Volume

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 5

An administrator wants to leverage Horizon Cloud Service to manage their Horizon on-premises deployment. What does the administrator need to install to achieve this?

- A. Deploy a Unified Access Gateway using DHCP.
- B. Deploy the Horizon Cloud Connector with a static IP.
- C. Deploy a Unified Access Gateway with a static IP
- D. Deploy the Horizon Cloud Connector using DHCP

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 6

Which of the following statements are true about Application Profiler?

- A. VMware Dynamic Environment Manager Agent and the Application Profiler cannot be installed on the same machine.
- B. Application Profiler is installed using VMware Dynamic Environment Manager Enterprise Setup Wizard and explicitly selecting local drive installation.
- C. Application Profiler is installed automatically when installing VMware Dynamic Environment Manager FlexEngine.
- D. Application Profiler is installed automatically when installing Dynamic Environment Manager Management Console.

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 7

Which of the following will happen when an administrator upgrades the Connection Server and a valid certificate is stored on the Windows Server?

- A. The existing keys and certificates will be extracted and imported into the Windows Certificate Store only if Horizon is integrated with Workspace ONE Access.
- B. Installing the Connection Server instance generates a self-signed certificate for the server.
- C. The Connection Server installation will automatically extract and import the existing keys and certificates into the Windows Certificate Store.
- D. If the import existing certificates checkbox is selected during the Connection Server installation, the existing keys and certificates will be extracted and imported into the Windows Certificate Store.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 8

When trying to connect to the Connection Server using HTML access on Internet Explorer 11, a user sees a message stating that the server expects to receive login credentials from another application or server. The Connection Server instance is paired with a SAML 2.0 authentication server with a signed CA certificate.

- A. Internet Explorer 11 does not support HTML Access.
- B. Workspace ONE mode is enabled on the Connection Server instance.
- C. HTML access is not allowed if the Connection Server is paired with an SAML 2.0 authentication server.
- D. HTML access is disabled by the CA certificate.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 9

Which pre-requisite should be met before installing the Connection Server?

- A. Use a domain user account with administrator privileges on the Connection Server.
- B. Install AD DS and AD LDS Tools on the Connection Server.
- C. The host system must be a vSphere VM with a static IP address.
- D. An SSL server certificate must be installed on the Connection Server.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 10

Which two types of pools can be created in Horizon on Azure VMware Solutions(AVS)? (Choose two.)

- A. full clone
- B. Raw clones
- C. linked clones
- D. Instant-done
- E. Pool clones

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 12

An administrator recently deployed a Horizon pod with external access using Unified Access Gateway (UAG). While trying to launch VDI from an External network, VDI launched with a black screen and then disconnects. The administrator has validated the port requirement and all other required ports are open. Users are able to connect internally using the connection server URL. While reviewing the UAG logs, the administrator found that the Blast connection is hitting the Connection Server instead of VDI IP.

What should the administrator do to resolve the issue?

- A. Upload the Blast Proxy Certificate in Horizon Edge Settings.
- B. Enable Tunnel in UAG.
- C. Update the Blast External URL in UAG with port number.
- D. Disable the Tunnel and Gateways in Connection Server.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 13

Which can be used to make sure only certain Connection Servers are used for a Global Entitlement?

- A. Home sites
- B. Tags
- C. Access Groups
- D. Category Folders

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 14

A Horizon administrator has been running Application Profiler to preserve application-specific user defined settings. These files have grown to 2.3GB in size for a particular user and have negatively impacted the user experience.

What can be done to the configuration to improve the user experience?

- A. Use Deepest Registry Path.
- B. Change the default save path.
- C. Configure exclusions to filter out unnecessary folders.
- D. Configure exclusions to filter out unnecessary registry entries.

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 15

Which two Windows Server Operating Systems are supported by VMware Horizon 8? (Choose two.)

- A. Windows Server 2019
- B. Windows Server 2003 R2
- C. Windows Server 2016
- D. Windows Server 2008 R2
- E. Windows Server 2012

Answer: ([SHOW ANSWER](#)**)**

NEW QUESTION: 16

An administrator is tasked with allowing managers to request desktops and changes to desktops for their employees.

What VMware solution can be used to meet this requirement?

- A. vRealize Operations
- B. vRealize Automation
- C. Horizon Automated Pools
- D. Horizon Help Desk

Answer: ([SHOW ANSWER](#)**)**

NEW QUESTION: 19

Which two databases are supported in horizon 8 for Event Database configuration? (Choose two.)

- A. DynamoDB
- B. MariaDB
- C. MySQL
- D. Microsoft SQL
- E. Oracle DB

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 20

An administrator notices that a cloud pod is not in the correct site.
What can be done to solve this issue?

- A. Under Settings > Cloud Pod Architecture, select the pod and change the name of the site.
- B. Under Settings > Cloud Pod Architecture, select the pod, click edit and select the correct site.
- C. Under Settings > sites, select the pod, click edit, and select the correct site from the menu.
- D. Under Settings > sites, select the site, and select move pod to this site.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 21

Refer to the exhibit.

An administrator configures a CA certificate for the Connection Server. However, they are still encountering certificate warnings when trying to connect to the Connection Server. The exhibit displays the properties of the CA-Signed certificate.

Referring to the exhibit and using the alpha-character indicator, which image shows the root cause of the issue?

- A. D
- B. C
- C. A

D. B

Answer: ([SHOW ANSWER](#))

Assign the friendly name "vdm" to only one certificate on each VMware Horizon server host.

NEW QUESTION: 22

An administrator needs to upgrade a Unified Access Gateway (UAG) appliance. The UAG is connected to a load balancer with other UAGs and has existing sessions.

Which option provided allows zero downtime for maintenance?

- A.** Power off the UAG appliance
- B.** Enable Quiesce Mode in the UAG Admin UI.
- C.** Remove the Horizon Connection Server thumbprint in the UAG Admin UI.
- D.** Suspend the UAG appliance.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 23

Drag and drop the Anywhere Workspace components on the left to their respective function on the right.

Answer:

NEW QUESTION: 24

A company that is currently using VMware Horizon with instant-clones is researching the possibility of using VMware Horizon Cloud on Azure.

What deployment option is available for Horizon on Azure?

- A.** Horizon Cloud on Azure with instant-clones
- B.** Horizon Cloud on Azure with full-clones
- C.** Horizon Cloud on Azure with Azure clones
- D.** Horizon Cloud on Azure with WVD

Answer: ([SHOW ANSWER](#))

There is no such thing as instant clones in Azure. All clones are full clones. The speed with which clones are created depends on the type of disk you select.

NEW QUESTION: 25

A junior-level Horizon administrator is not able to see all RDS farms.

Where would a high-level administrator need to make changes to correct the issue?

- A.** Access Groups
- B.** Global Policies
- C.** Category Folder
- D.** Global Entitlements

Answer: **B** ([LEAVE A REPLY](#))

NEW QUESTION: 26

Drag and drop the high-level configuration steps for smart card authentication on the left into the correct sequential order on the right.

Answer:

NEW QUESTION: 27

After creating a new desktop pool that contains customization specifications, a Horizon administrator sees the following message in the VMware Horizon event database:
Provisioning error occurred for Machine Machine_Name: Customization failed for Machine Which two could be the cause of the issue? (Choose two.)

- A. The customization specification has been renamed or deleted.
- B. Desktop pool provisioning is disabled.
- C. The compute account of the template has been removed from the Active Directory.
- D. The administrator does not have sufficient permissions to access the customization specification.
- E. Desktops can only be customized after the end user logs into the virtual machine.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 28

Where are exclusions specified for Writable Volumes to prevent App Volumes from persisting specific data between sessions?

- A. svservice.log
- B. snapvol.cfg
- C. config.ini
- D. json.cfg

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 29

Drag and drop the TLS Configuration steps on the left into the correct sequential order on the right.

Answer:

NEW QUESTION: 30

An administrator is leveraging PCoIP protocol in their Horizon environment and wants to distribute clients to end users that have the smallest footprint possible with no local operating system. Which client type satisfies these requirements?

- A. Android based thin client
- B. MacOS Client
- C. Teradici based zero clients
- D. Windows embedded thin client

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 31

Which three can be used by a Horizon administrator who wants to provision an application to users' desktops? (Choose three.)

- A. VMware Thinapp
- B. VMware App Volumes Writable Volume
- C. VMware Dynamic Environment Manager
- D. VMware App Volumes Application Package
- E. VMware Horizon Published Application

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 32

An administrator configures VMware Dynamic Environment Manager's Logon and logoff tasks to loads to load two PowerShell scripts on boot and logoff, but has noticed the scripts are not loading.

- A. PCoIP needs to be used instead of Blast.
- B. Clipboard rejection policy needs to be configured.
- C. URL Content Redirection policy needs to be configured.
- D. Permissions were not configured property.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 33

Which Horizon feature provides high availability desktops across datacenters?

- A. Instant-Clones
- B. vCenter Linked Mode
- C. Cloud Pod Architecture
- D. Replica Connection Servers

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 34

Which two can an administrator whose organization is running VMware Horizon Standard use to determine the transport protocol being used by a user? (Choose two.)

- A. Horizon Performance Tracker

- B. Horizon Console
- C. Horizon Logon Monitor
- D. Horizon Help Desk Tool
- E. Horizon Agent Logs

Answer: B,E ([LEAVE A REPLY](#))

NEW QUESTION: 35

A company will be deploying hundreds of desktops for temporary workers. The workers be heavy Microsoft 365 users and require access to local USB, camera, and printers. The company is challenged with no spare capacity to support the deployment in their datacenter.

Which VMware solution can the company use to easily deploy the desktops, while keeping the base cost lower than other possible solutions?

- A. Horizon on Google Cloud VMware Engine
- B. VMware Horizon On-premises
- C. VMware Horizon on AWS
- D. VMware Horizon on Azure

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 36

An administrator is preparing to upgrade Horizon Connection Servers in parallel.

What action must first be performed to ensure that there are no issues with Horizon LDAP replication within the Pod?

- A. Execute vdmadmin.exe -s.
- B. Execute repadmin.exe /showrepl localhost:389.
- C. Execute ViewDBChk.cmd --scanMachines.
- D. Execute vdmexport.exe -f Myexport.LDF.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 37

An administrator is tasked with giving the security team non-destructive rights to see how the connection servers have been configured.

What privilege is needed to meet the requirement?

- A. Administrators (Read only)
- B. Settings Administrator (Read only)
- C. Inventory Administrators (Read only)
- D. Global Configuration and Policy Administrators (Read only)

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 38

How does an administrator enable debug logging for a single user in VMware Dynamic Environment Manager?

- A. Configure the FlexEngine GPO to DEBUG.
- B. Create an empty FleDebug.log file in the log folder.
- C. Create an empty FlexDebug.txt file in the log folder.
- D. Update the FlexEngine registry to DEBUG.

Answer: C (LEAVE A REPLY)
