Answer: ([SHOW ANSWER](#))

NEW QUESTION: 9

A VMware Workspace ONE environment has been setup with Roles Based Access Control (RBAC), and the directory-based administrators who managed in Workspace ONE UEM have limited permissions to access the console.

The administrator has enabled VMware Workspace ONE Intelligence in the environment and must now enable the correct configuration setting that will allow administrators to access VMware Workspace ONE Intelligence from VMware Workspace ONE UEM.

Which configuration setting must be enabled?

A. Create a new user role, and then give the role Read and Edit permissions to Intelligence in Categories > Monitor

B. Create a new user role in the Intelligence Console, and then give the role Read and Edit permissions to Intelligence

C. Create a new admin role in the Intelligence Console, and then give the role Read and Edit permissions to Intelligence

D. Create a new admin role, and then give the role Read and Edit permissions to Intelligence in Categories > Monitor

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 10

Which statement about VMware Workspace ONE Access with other VMware Workspace ONE product integrations is accurate?

FreeExam.net

- A.** VMware Workspace ONE Access can be integrated with VMware Workspace ONE Intelligence to provide insights on user logins and application launches
- B.** AirWatch Cloud connector can be integrated with VMware Workspace ONE Access to act as a proxy for users to access internal resources
- C.** VMware Workspace ONE Trust Network includes several security solutions that can be integrated with VMware Workspace ONE Access, which can provide a consolidated view of all threats reported by the various security solutions
- D.** VMware Workspace ONE Assist can be integrated with VMware Workspace ONE Access to provide administrators the ability to seamlessly launch remote management sessions for eligible devices from the VMware Workspace ONE Access console

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 11

A leadership team would like to enable VMware Workspace ONE Notifications with Hub Services so push notifications can occur to the end-user devices.

Which types of notifications are sent?

- A.** Actionable and Informational
- B.** Immediate and Instructive
- C.** Informational and Immediate
- D.** Instructive and Actionable

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 12

Which category setting of Citrix-published resources is supported in VMware Workspace ONE Access?

- A.** Syncing
- B.** StoreFront Filtering
- C.** Tagging
- D.** Nested categories

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 13

A user is able to login to VMware Workspace ONE Access Catalog and launch a Citrix Desktop application without any prompt for credentials.

Which Authentication Method must have been previously executed to have gained access to the VMware Workspace ONE Access Catalog?

- A.** True SSO
- B.** Kerberos Auth Adapter
- C.** Password (Cloud Deployment)
- D.** OAuth SSO

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 14

An administrator of iOS supervised devices has noticed that devices are checking in regularly but are failing the Last Compromised Scan compliance policy. The administrator is fine with having slight disruptions to users but does not want any interaction from the user to be required.

The administrator decides to use an action in the Last Compromised Scan compliance policy that would force the device to report back the compromised status without requiring user input.

Which action in the Last Compromised Scan compliance policy should be used?

- A. Assign a sensor to the device to request the compromised status
- B. Assign a compliance profile containing a single app payload for the Hub application
- C. Assign a push notification to the device to request the compromised status
- D. Assign the command to Request Device Check-In

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 15

What is a prerequisite to have Aptelligent integrated with VMware Workspace ONE Intelligence?

- A. VMware Workspace ONE UEM must manage VMware Workspace ONE Intelligence SDK apps as internal apps
- B. VMware Workspace ONE UEM must have MEMCached deployed
- C. VMware Workspace ONE Digital Employee Experience Management must be configured
- D. VMware Workspace ONE Assist must be deployed on all iOS and Android devices

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 16

A resource server in the workflow of an OAuth request refers to a server that hosts the protected resources a client is attempting to access.

Which Workspace ONE service acts as the resource server in the OAuth workflow?

- A. Workspace ONE Access
- B. Workspace ONE UEM
- C. VMware Unified Access Gateway
- D. Workspace ONE Content Delivery Network

Answer: ([SHOW ANSWER](#))
